### PAPUA.—Port Moresby.

The Bank at its branches in Australia and New Zealand issues drafts on London on demand or at its currency on the usual terms. It also issues drafts on its branches in Australia and New Zealand, and its agents in America, Africa, and throughout the East. The Bank allows interest on Fixed Deposits, negotiates and sends for collection Bills on London or elsewhere, makes advances against Wool and other Produce shipped, discounts Trade Paper, purchases and advances on Gold, issues Credits available in London, Africa, India, China, America, &c., and collects Dividends on Shares and Interest on Debentures. The Bank makes remittances by Telegraphic Transfer, and undertakes all other descriptions of Banking and Exchange business. At its London Office, the Bank negotiates and sends for collection Bills on Australia and New Zealand, issues Drafts, Bills and Letters of Credit on its Branches and receives Fixed Deposits at interest. Bills of Exchange may also be obtained from its Agents in all the principal towns throughout the British Isles. The Bank undertakes the Agency of other Banks.

CIRCULAR NOTES are issued by its Branches in sums of £10, £20, and £50, negotiable by its Correspondents in the chief Cities on the Continent of Europe, in North, South and Central America, Ceylon, Mauritius, India, Japan, Africa, and Polynesia.

SHARE REGISTERS are kept at Melbourne, Sydney, Brisbane, Adelaide, Hobart and Lancaster, and at Wellington, New Zealand. Dividends are paid upon receipt of telegraphic advice.

## New Palace Emporium

. . . On the Historic Slope of Brickfield Hill. . .

With frontages in GEORGE, GOULBURN and PITT STREETS of over a thousand feet and containing nearly twenty acres of floor space for the display of goods and the convenience of customers.

The NEW STORE is, in MANY WAYS, THE MOST REMARKABLE of its kind ever erected. It is certainly . . .

### THE BIGGEST STORE

in Australia; and in the GREAT CITIES of AMERICA, and among the PALATIAL PALACES of TRADE in EUROPE, while there ARE FEW RETAIL EMPORIUMS that can boast of LARGER SPACE and greater conveniences, there are also many CELEBRATED STORES, that, on comparison, would have to GIVE IT BEST.

TERMS: SPOT CASH.

Anthony Hordern & Sons, Ltd. . .

# General Catalogue

THIS BOOK is designed, like all our Catalogues, to serve the country, just as, from behind the counter, we serve the town.

## IN RESPONSE TO ORDERS BY POST

Selections are made from the same stocks, and the same prices are charged, as to town buyers. This practice, taken in conjunction with our liberal rule of free carriage, cannot fail to commend itself to all.

## PATTERNS AND PRICE LISTS.

We send Patterns and Price Lists everywhere post free, on application by letter.

With regard to patterns it is always advisable to make a second choice, a precaution that often prevents disappointment.

When returning Patterns, please enclose them in the wrapper they were received in, and draw the pen through your name and address, then affix a penny stamp for every two ounces.

## GOODS IN TRANSIT.

WE TAKE NO RISKS IN CONNECTION WITH GOODS IN TRANSIT. Everything sent to the country is carefully packed by experienced men, and our liability ceases when we deliver goods to the Railway authorities, Steamship owners, or the Post Office. In the event of goods arriving at their destination in damaged condition, or short, no time should be lost in reporting the matter to the proper authorities.

## PAYMENT FOR GOODS.

Our terms being Spot Cash, sufficient to cover the cost of the goods required, and freight or postage, should be sent with every order. Observance of this rule is indispensable to ensure prompt despatch. Remittances may be sent by . . .

Postage Stamps, Postal Notes, Post Office Order, Bank Notes, Cheque, or Bank Draft.

No exchange is charged on cheques of 20/- or over drawn on banks in New South Wales when received through the post.

## NEEDFUL PRECAUTIONS.

Letters containing Postage Stamps, Bank Notes or Coin should be registered, so that if lost they may be more easily traced.

When remitting Postal Notes to us, the words **Anthony Hordern and Sons, Ltd.** should be written in the space left vacant for the name of the Payee, and **Haymarket** in the space for the paying Post Office. This simple plan will ensure almost absolute safety, as Postal Notes so marked can only be paid to us.

Money remitted by Post Office Order or Telegram should also be made payable at **Haymarket Post Office.**

## INSUFFICIENT REMITTANCES.

When from alteration of prices or other causes, such as payment of freight, trainage, postage, &c., the invoice exceeds remittance sent, we expect payment of such balance per return of post, as otherwise a considerable amount of inconvenience and extra trouble is caused. We shall feel obliged by a strict observance of this rule, or future orders may be limited to the amount of the remittance received.

# ANTHONY HORDERN & SONS, LTD. ONLY UNIVERSAL PROVIDERS

## RULE RELATIVE TO

### Free Carriage of Goods of the value of £2 10s. and upwards.

So that there may be no misunderstanding as to our practice in the matter, we publish our rule relative to free carriage of Goods for the information of country residents.

#### WITH SOME EXCEPTIONS

We pay trainage or shipping freight to any Railway Station or Port in New South Wales; also to any Sea Port in Queensland, Northern Territory, Victoria, South Australia and Tasmania, only on parcels of Drapery, Clothing, Boots and Shoes, Cutlery, Electro-plate and Jewellery of the value of £2 10s. and upwards.

#### WE DO NOT PAY CARRIAGE

On Furniture, Ironmongery, Tools of Trade, Crockery and Glass, Groceries, Tobacco and Cigars, Toys, Sports Material, Harness, Carpets and Floorcloths, Bedsteads and Bedding, and other heavy and bulky goods.

#### ARTICLES NOT INCLUDED IN OUR FREE LIST

may sometimes be enclosed in parcels for which we pay the carriage without any charge to customers, provided the inclusion does not materially affect the weight so as to increase the cost of transit. When, however, the enclosure of such articles does increase the weight so as to add to the cost of carriage, a proportionate charge will be made.

#### PARCELS BY POST.

We allow a reasonable proportion of cost of postage on such parcels of not less than £2 10s. in value, and, of course, not containing heavy or bulky articles. The amount allowed is the estimated trainage by rail or freight by steamer, if sent in that way instead of by post. Thus, if the postage cost 4s., and the estimated trainage or freight 3s., the difference, 1s. only, would be charged to Customer.

We herewith append a brief summary of the conditions under which Goods are sent by Parcels Post, which should be carefully noted:—

- 1st.—Parcels of General Merchandise not exceeding 11 lbs. in weight may be sent to any Post Office in the Commonwealth to which Mails are conveyed by Rail, Steamer, or Coach; but to places where the Mails are conveyed on horseback parcels of only 3 lbs. will be taken.
- 2nd.—No parcel must exceed the limit of 3 feet 6 inches in length, and 2 feet 6 inches in circumference.
- 3rd.—Postage must be prepaid by Stamps affixed to each parcel according to weight.
- 4th.—A parcel must not contain any communication of the nature of a letter, otherwise such letter will be treated as unpaid, and charged for accordingly.
- 5th.—The Postmaster-General will see that every possible care is taken of parcels in transit, but will not hold himself responsible for any delay, damage or loss.
- 6th.—No parcel will be received or delivered containing anything of an explosive, combustible, dangerous or offensive character, or articles likely to injure other parcels.
- 7th.—Parcels may be sent also to other States under the same conditions, with regard to size and weight, as those applying to New South Wales. The rate of postage is shewn in the following table:—

#### NEW SOUTH WALES.

	s.	d.		s.	d.
1 lb. and under ...	0	8	7 lbs. and under	2	0
2 lbs. " " " "	0	9	8 " " " "	2	3

50	0 3	0 3	0 5	0 9	1 1	1 5	1 11	2 5	0 7
75	0 3	0 5	0 7	1 0	1 5	1 10	2 7	3 3	0 9
100	0 4	0 7	0 9	1 3	1 9	2 3	3 3	4 0	1 0
125	0 5	0 9	0 11	1 6	2 1	2 8	3 10	4 9	1 2
150	0 6	0 10	1 1	1 9	2 5	3 1	4 5	5 6	1 4
175	0 7	0 11	1 3	2 0	2 9	3 6	5 0	6 3	1 6
200	0 8	1 0	1 5	2 3	3 1	3 11	5 6	7 0	1 9
250	0 10	1 3	1 9	2 9	3 9	4 9	6 6	8 3	2 0
300	1 0	1 4	2 0	3 3	4 3	5 3	7 3	9 3	2 3
350	1 2	1 6	2 3	3 6	4 9	5 9	7 9	9 9	2 3
400	1 4	1 8	2 3	3 9	5 3	6 3	8 3	10 3	2 6
500	1 6	2 0	2 6	4 3	6 0	7 3	9 3	11 3	2 9
600	1 8	2 0	2 6	4 9	6 6	8 3	10 3	12 3	3 0
700	1 10	2 3	2 9	5 0	7 0	9 0	11 3	13 3	3 3
850	2 0	2 6	3 6	5 6	8 0	10 0	12 9	15 6	3 6
Over 850	2 3	3 0	4 6	6 3	9 6	11 6	14 6	16 6	4 0

There is no advantage in prepayment of carriage by Goods Train, the rate being the same if paid at either end. Goods addressed to platforms must be prepaid in every instance.

When freight on parcels sent by Passenger Train is not prepaid, 25 per cent. extra, with a maximum of 1/-, will be charged on delivery. Remittances should therefore include sufficient to cover cost of freight as well as cost of goods ordered.

ALL PRICES IN THIS CATALOGUE  
ARE SUBJECT TO  
MARKET FLUCTUATIONS,  
FROM WHATEVER CAUSE ARISING.

Our Selling Prices are effected in various ways, and they rise and fall accordingly. They are influenced by the current rate of wages in various parts of the world where manufacturing enterprise is carried on; by alterations in the cost of raw materials; by the operations of Trusts and Combines, and by various other things beyond our control.

Our system of paying Spot Cash for everything enables us to buy in the best markets at the lowest rates and these advantages are passed on to all who honor us with their custom.

# WEDGWOOD WARE.

## :: A Great Ceramic House ::

"Water." A remarkably handsome Vase, in Black Basalt, from the original Flaxman mould. About 14in. high—  
Price, £3/15/-

In all these classes and others we offer a numerous choice of picked examples, which by themselves are well worth a visit to the  
**FINE ART GALLERY**  
at the New Palace Emporium,  
Brickfield Hill, Sydney.

Wedgwood Covered Vase, 7in high ... Price, 17/6

THE great house of JOSIAH WEDGWOOD & SONS, LTD., now represented by the fifth generation of descendants from the founder, was established in 1759. Josiah Wedgwood raised English Ceramic Art from mediocrity to unequalled distinction. His high ideals have been faithfully preserved by his descendants, who maintain his original designs, and have added others to meet modern requirements. On this page is shown the famous Portland or Barberini Vase, the original of which (now in the British Museum) was discovered buried near Rome in the seventeenth century, and has ever since been ranked by artists as one of the most beautiful of ancient design and workmanship extant. The original was purchased by the Duke of Portland at the sale of the Barberini collection in 1786 for £1099—a price that would be far exceeded nowadays. Of the copies made by Wedgwood himself, one called the *Proper* copy, was sold in 1902 for £390. Other first-class copies from the original moulds, and maintaining fully the delicacy of workmanship, are now made at the Wedgwood works, Etruria, Staffordshire, England.

The chief classes of Wedgwood Pottery are

**WEDGWOOD CHINA**  
beautiful in color and unsurpassed in form and symmetry; the splendid hand-painted

**QUEEN'S WARE**  
so termed by Wedgwood in 1768 when Her Majesty Queen Charlotte commanded him to make complete table services for royal use; the luxurious

**BLACK BASALT WARE**  
with a rich black smooth surface; and the world renowned

**JASPER WARE**  
in which Josiah Wedgwood reached the highest pinnacle in his art.

The celebrated historical **Portland Vase** in Black and White, from the Flaxman mould. Reproduced from the original now in the British Museum. Height, including Mirror Stand, 18in. —  
Price, £15/15/-

# Genuine Wedgwood Jasper Plaques

POPE translated Homer into English verse, and Wedgwood translated classic designs into English pottery.

In introducing Jasper ware in 1787, Josiah Wedgwood said:—"Verbal descriptions could give but an imperfect idea of the delicacy of the material, the execution of the artist, or the general effect, and I must beg leave to refer those who wish for information in these respects to a view of the articles themselves." The words apply fittingly to the beautiful and splendid selection of WEDGWOOD JASPER PLAQUES in

- - - ANTHONY HORDERNS' FINE ART GALLERY - - -

We can illustrate only several examples out of many equally delightful.

**DANCING HOURS.** In polished Mahogany Frame, with Gilt Slip. Outside measurement 19in. x 7½in. 27/6

## ROYAL DOULTON WARE.

AMONG the Exhibits which attracted the attention of Their Majesties King George and Queen Mary during their recent visit to the Royal Doulton Potteries, was the beautiful Globular Vase and Cover here depicted. The body of the Vase is painted with Roses by Edward Raby, who is a past master in the delineation of this particular flower, and in this case has given of his best. It is a good example of enamel painting, fired at a specially high temperature, giving a bright and sparkling surface. The gilding, too, is exceptionally fine in execution

Mr. J. F. BLACKER, speaking of this artist, says—

"I saw Mr. Raby at work in his Studio painting roses with a full brush on a large Vase. As a painter of roses he certainly has no superior. What struck me was the wonderful grace in grouping the flowers all round the Vase, the masterly quality of broad expression, free from niggling and stippling, the general softness and richness of the coloring. But I understood these when his book of studies lay before me. In them were the records of the roses, blooms growing in the open air, studies of groups and single flowers from the greenhouse. These lovely flowers became glorious on porcelain, immortalised by the artist, who, seeing their soul, took them into his own."

### ONE OF DOULTON'S CERAMIC TRIUMPHS.

The body of the Vase is painted with Roses by Edward Raby: an exquisite composition. Roses, floating in a deep, ruddy glow that shrouds and varies with an effect of misty, dream-like loveliness.

Height, 4ft. ... .. Price, £650

THIS DOULTON VASE  
with its Flower-pieces Beauty  
and its Harmonies of Color  
SHOWS THE ART OF THE POTTER

## Royal Doulton Sang de Boeuf and Rouge Flambe.

AMONG the many secret processes of porcelain manufacturing and decorating, which were guarded so zealously by the Chinese for centuries, and which in time even they ceased to excel in, none was so sought after by the European manufacturers as their beautiful ruby red glazes, known as "Sang de Boeuf," "Rouge Flambe," "Peach Blow" and "Haricot"; the first of these being, as its name denotes, a wonderfully rich ruby or blood red; while the others were varieties of the same color, blended with yellow, or streaked or mottled with blue, purple, grey or green.

The museums of Europe are rich in choice specimens of these exquisite chemical curios of ancient Chinese manufacture, as are many well-known private collections, notably the Rothschild collection of London, and the famous Walters collection of Baltimore; but the Chinese have long ceased to produce anything to compare with these gems of the Kang-Si dynasty, and it is a matter for regret that modern Chinese porcelains are rapidly losing their former prestige in artist merit and becoming purely commercial.

In the meantime, while these rare specimens are gradually becoming extinct, the appreciation of them by collectors and connoisseurs is increasing, and European manufacturers have lately redoubled their efforts to master this marvellous ancient art.

Messrs. Doulton & Co., of Burslem, England, after careful study and watchfulness and the building and rebuilding of special ovens for the purpose, are now turning out specimens of these mysterious glazes with all the various combinations of color effects which have hitherto baffled other European manufacturers for generations.

Many of these specimens it has been our good fortune to obtain, and we can only say that for perfection of glaze, as well as for exquisite coloring and purity of form, many of them rival the finest of the Chinese.

As collectors have almost given up in despair searching for choice specimens of the early Chinese red glazes, in the varieties above named, they have at least the satisfaction of knowing that they can acquire superb examples in modern porcelains, made in the same manner colored, streaked, or mottled, as they desire, which are their equal chemically and artistically; in fact, have everything that the most enthusiastic collector could desire—but antiquity.

## ROYAL WORCESTER PORCELAIN.

**E**STABLISHED in 1791 at Worcester, without natural advantages or skilled artisans, DR. WALL succeeded in producing the finest and most beautiful of soft Porcelain. The industry started by this talented physician and accomplished artist has continued till this day, and still maintains its high traditions.

The following brief description of recent additions to our range of Worcester Porcelain show that the standard set up by the past is being fully maintained, and in many instances surpassed.

**Vase**, of an exceptionally pleasing and graceful form, the ornate and the classical style of design being artistically treated in subdued metallic tints. The Vase is painted by John Stinton, who is so well-known for his successful rendering of Highland cattle and scenery. Height, 14in. ... Price, £20/- each

**"Music."** One of the many delightful figures produced at Worcester, and one of the best. The features, attitude and the drapery all deserve commendation, the silken tints of the costume being exceptionally effective. Height, 12in. Price, 87/6 each

**"Dancing,"** a companion piece to the above, but can be sold separately. The pose of this figure being worthy of special notice, the drapery and corresponding details being equally as effectively carried out. Height, 12in.—Price, 87/6 each

**Bulb-shaped Vase**, on foot with fluted neck. This piece is happily finished with a pleasant landscape by H. Davis, whose faithful work meets with an ever increasing demand. Height, 9 1/2 in. ... Price, 76/- each

**Tall-shaped Vase**, with embossed embellishments finished in Bronze. The tone of the glazing serving to enhance the lovely sky-blue effect of the decoration on the body of the Vase. The subject, "Cranes in a sylvan landscape," well and skilfully treated by H. Davis. Height over all, 12in. ... Price, 63/-

**Afternoon Tea Service**, comprising six dainty Teacups and Saucers in satin lined case. The decoration of this set is a charming example of how adaptable the rose may be as a floral decoration. The set is hand-painted, and would make a lovely present. The case lending to the contents a charm of exclusiveness. Set complete in case ... Price, 68/-

**Shakespeare Plaque**, a pleasing treatment of that well-known Shakespearean shrine, Stratford-on-Avon Church, painted with true feeling by Rushton. Diameter, 10in. ... Price, 59/6 each

**Shakespeare House**, by the same artist, forms a suitable companion piece to the above. Diameter, 10in. Price, 59/6

**Vase**, Ewer shape on square base, painted by Davis, whose clever rendering of Highland sheep in the nature of enchanting landscapes gives us another proof of his almost unlimited versatility. Height, 9in. Price, 45/-

**Vase**, of simple form, chastely finished in Green Bronze tints, forming a suitable groundwork for the charming treatment, by Cole, of a floral group—Wild Rose, Field Violets, etc., mingled in sweet profusion. Height, 10 1/2 in. ... Price, 42/-

**Urn-shaped Vase**, of uncommon design with side handles and square base, a piece of decidedly Hadley style. The bowl portion of the Vase painted with roses, by Austin. Would make a lovely color tone in any collection. Height, 8 1/2 in. Price, 39/6

**Cylindrical-shaped Vase**, finely embossed and perforated. A dainty specimen, showing a miniature group of Highland Cattle, by Stinton. An ideal cabinet specimen. Height, 6in. Price, 20/6

**Plates**, 9in. diameter, the border being treated in the world-renowned deep rich Blue and Gold, for which the Worcester Works have for so long been famous. The centres and small panels being painted with English wild flowers, by Richetta. The Wild Rose, Poppies, Field Daisies, and Sweet Brier, calling up memories of sweet arcanid scenes ... Price, 22/6 each

## BERNARD MOORE WARE.

A superb Collection of BERNARD MOORE WARE is now being shown, the selection having been made personally by the Artist, exemplifying some of the choicest Exhibits of Sang-de-Bœuf, Peach Blow, Haricot, and Rouge flambe. Every Piece is signed by Mr. MOORE. Visitors are invited to inspect these magnificent Articles of modern talent—there is no obligation to purchase. Here are some elegant Illustrations of BERNARD MOORE'S Art in Pottery.

**Small Bowl-shaped Vase**, 8in. high, neck 2in. diameter, and 3½in. wide at the base; the inside showing rare Haricot tints, and the outside decorated with Green Dragon clouds on a lapis lazuli ground. Price, 12/3

**Pot-Pourri**, bulb shaped, on three stumpy feet, with handle knobs; a quaint, rugged specimen, showing in its mottling interesting flambe effects and endless tints, forming a delicate harmony of color. Height, 4in.; width, 6in. Price, 19/6

**A Vase** of pleasing form and charming outline; color and glazing perfect. Height, 6½in. Price, 19/6

**A Delightfully Modelled Sang-de-Bœuf Double-Bulb Vase**. This piece, although small, is a graceful specimen, and a perfect example of the deep blood-red color. Height, 6½in. Price, 15/9

**Ginger Jar**, a fine specimen of rouge flambe, true in shape and color; the smoothness of the jar covered in a Green tinge mottled mantle, the jade coloring of which, the green at the glorious red of the base of the Jar. The cover, with a rich flambe lake in a Green jade setting, forms a fitting coping to a charming piece. Height, 7in.; width, 5in. Price, 89/6

**Elegant Decorative Model of a Bird**, resting on a bamboo stump, beautifully modelled. A choice specimen of the deep blood-red Sang-de-Bœuf glaze, so highly prized by collectors. Height, 10½in. Price, 45/6

**Magnificent Sang-de-Bœuf Ginger Jar**, of noble proportions, the shape is perfect and the color glorious. Would make a striking color note in any collection. Height, 10½in. Price, 84/6

**Miniature Vases**, 1½in. high, in opalescent tints of greens and blues and purples, making nice cabinet specimens of transmutation glaze effects. Price 4/8 each

**Miniature Bottle-Shaped Vase**, in rouge flambe and deep haricot mottling, decorated with yellow and silver opalescent dragon, and cloud effects outlined in gold. Height, 2½in. Price, 10/6 each

**Bottle-Shaped Vase**, 6½in. high, with medium width neck, the shape lending itself to the skilful combination of rouge flambe and yellow jade glaze effect. The mottling, together with the general finish, will commend this piece—Price, 18/6 each

**Vase**, in the shape of a double gourd, in Sang-de-Bœuf glaze, with Haricot mottling, the outlines of the accidental effect being quaintly traced in gold turquoise enamels. A piece that will make glad the heart of some connoisseur—Height, 8½in. Price, 22/6 each

**Shallow Bowl**, 8in. wide, 3½in. high. An interesting specimen of lustre glazing, with sunflower design and scroll work—Price, 5/6 each

**Vase**, 14in. high and 5in. wide, of a cylindrical form, with bulb base, the neck being slightly flanged. This vase was considered by Mr. Bernard Moore to be the best specimen of Sang-de-Bœuf glaze in the collection, and quite an exhibition piece. Price, 77/6 each

**Vase**, 8½in. high, with wide base, the neck and shoulders the rare peach-blow mottling, the lower portion of the Vase showing the only Blue and White splashes of the old Chinese flambe vases. These pieces are of such rarity that in the large collection just received there is only one with this beautiful effect. Price, 27/6 each

**Bowl**, 9½in. diameter, 1½in. high, decorated with green dragon on a deep blue ground, the red and peach, with tinges of rouge flambe showing slightly through the lustre effect. The outside treatment in various shades of red, in an Oriental design, complete an interesting and distinctive piece. Price, 77/6 each

**Elephant**, 8in. high, beautifully modelled, richly glazed in deep, blood-red Sang-de-Bœuf glaze, so highly prized by collectors. Price, 84/6 each

# ROYAL CROWN DERBY CHINA.

Lovers of high-class Porcelain will find that the display contains an unique collection of the choicest productions of this eminent firm. The artistic models, richly decorated, present many new schemes of decoration which form a welcome addition to the brilliant color combinations for which these works have for so long been famous.

**Rose Bowl**, with perforated China Cover, decorated in alternate panels of Salmon Pink and dark Blue, and dark Blue and Gilt scrolls. Standing on four feet, richly decorated to correspond. A beautiful and typical example of Crown Derby China. Diameter, 8in.; height, 6 1/2in. — Price, 56/6 each

**Oval Jardiniere**, with raised handles at end, on four feet, typically decorated; the rich and varied colors forming a brilliant harmony. Length, 11in.; height, 4 1/2in.; width, 4 1/2in. ... Price, 97/6 each

**Oriental Sexagon-Shaped Jar**, dome cover, surrounded by a Dog of Fo. A handsome floral design in panels, in effective colors and finished with Gold. Height, 10in.; diameter, 8in. ... Price, 80/-

**Tall, Gracefully-Shaped Vase**, with side handles, and highly ornamental cover, decorated in dark Blue and Gold, floral design, on White panels, relieved with Red and Gold ... Price, 5/6 each

**Oval Urn-Shaped Bowl**, of classical design, supported on four dwarf columns, resting on a solid base. This piece has raised end handles, with laurel wreath ornamentation, relieved in gold. # FINEST COALPORT CHINA.

**I**N the "Chats" Series of Handbooks on Art (on sale in our Fine Art Gallery) Mr. Arthur Heydon furnishes many interesting particulars regarding this Porcelain manufactured in Shropshire. The Factory was established in the middle of the 18th Century, and there is evidence that the clay used is taken from the same beds which, 1500 years ago, supplied the Romans with material for their White Ware, specimens of which are constantly being unearthed in various spots in the valley of the Severn. In 1780 was produced the celebrated "Willow Pattern," first manufactured from a Chinese model. This has been in demand to the present day, and (it is worthy of note) is produced without the use of lead for glazing. In 1820 the Society of Arts awarded a Gold Medal for the Felspar Porcelain, and this date appears to be the turning point in the history of Coalport. At the present time the productions of this Factory must be classed in the very front rank. The old traditions are maintained, and the selected ware we are privileged to offer to Australian connoisseurs is of the highest artistic excellence. We are able to furnish only a few illustrations of characteristic pieces, and recommend an inspection of the fine assortment indicated by the following list.—

**Coalport Vase.** Height, 9in. Decorated in Green and Gold, and Landscape painted panel; richly traced Gold handles—  
70/-

# ROYAL COPENHAGEN PORCELAIN.

High-grade Modern ::  
Ceramic Productions.

This Mark on every genuine  
piece of Copenhagen  
Porcelain

**F**OREMOST, not only in Danish Ceramics, but also in those of the whole of Europe, stands The Royal Porcelain Manufactory of Copenhagen. Its mastery lies partly in its limitation. It brings forward no extremely large pieces; it does not force the material to produce things which are more easily and better produced in metal or otherwise; nor do we see jugs, points, leaves, flowers and vines of porcelain which can hardly bear being looked at. There is no arrogance, either technically or artistically.

Justice is done to the noble and beautiful White Porcelain. Modelling, as well as colouring, is limited to what is necessary. Every single piece bears evidence of harmonious co-operation between the craftsman, the painter, and the modeller. Each of these is represented to his due measure and degree in the beautifully balanced whole. Every piece is a piece of art.

These facts give a reason why every piece turned out from the Copenhagen Manufactory appeals to the onlooker with so charming an amiability. What a heartfelt absorption in the world of nature! What care and feeling have been bestowed upon the reproduction of the vision! And yet, how simple is its perfection, entirely without the aid of gold or colour. Here truly is beauty in industry; one of the finest flowers that has blossomed upon the tree of Ceramic Art.

The Copenhagen Manufactory preserves its old methods. Yet its original fund of novelty is not yet exhausted. It brings continually fresh treasures to the surface of its unique artistic world. Its old technic appears in a new raiment. It has produced pearl glazes on differently coloured backgrounds with the finest execution and with most beautiful effect.

Among the purchasers of collections of Royal Copenhagen Porcelain are the following:—The late King Edward VII of England; Emperor Nicholas of Russia; The King of Denmark; Queen Elizabeth of Roumania.

Personal inspection is necessary to appreciate the marvellous variety of designs, models and colouring of the remarkable collection now shown in the FINE ART GALLERY. No one is importuned to purchase.

—The prices will be found extremely moderate, ranging from a few shillings to several pounds.—

Handsome Centre Piece, for fruit or flowers. Richly cut bowl, stem and foot. Height, 12in.; diameter of top dish, 8 1/2 in. ... Price, 39/6

Rose Bowl, very handsome and deeply cut, fine diamonds with cut and polished edge and cut star at bottom. Height, 7in.; diameter at top, 8in.—  
 Price, 27/6

# FINEST CRYSTAL CUT GLASSWARE.

**Cut-Glass Crystal Vases**, in an endless variety of shapes and elegant designs. Height from 5 to 15 in. Prices, 17/6, 21/6, 25/6, 27/6, 30/6 each. A thoroughly representative collection of the best that England and America produce. Exceptional in style and beauty, unequalled for sparkle, brilliant color and weight.

**Tall Compote Glass**, richly and massively cut, with cut stem and foot, an unusually elegant and graceful piece. Height, 12 in. Price, 37/6 each.

**Square-shaped Scallop-edge Dish**, the cutting being so extremely fine, that the whole piece presents one glittering mass. Diameter, 9 in.—

Price 75/- each

**A Delightful Jewel or Puff Box**, cut in elaborate starred Hobnail design. This piece would make a handsome addition to a lady's toilet table. Height, 8 in.; diameter, 8 in.—

Price, 47/6 each

**Tall Sweet Dish**, 8 in. high, 6 in. diameter, a charming addition to any table. Price 19/6 each

**Spirit Decanter**, in an eminently useful shape, the design being very effective, and a beautiful example of clever cutting on pure crystal. Height to top stopper, 11 in.

Price, 60/- each

**Large Cut-Glass Bowl** of graceful outline and noble proportions, standing on a glass pedestal. This piece makes a splendid punch or claret cup bowl, and (when fitted with double wire), a magnificent **Rose Bowl**. Height, 11 in.; diameter, 11 in. Price, 25/6/- each

**Bowl-shaped Dish**, for fruit salad or flower bowl, deeply cut in Stars and Hobnail design. An extremely uncommon shape, artistically designed, and carefully executed. Length, 11 in.; width, 8 in. Price, 37/6 each

**Heavily-cut Crystal Rose Bowl**, tall shape, fitting on to an Ormolu foot. A fine specimen of the glasscutter's art. Height, 11 1/4 in.; diameter, 9 in. Price, 70/- each

**Tall Vase**, firm standing, with bulb shape centre, in finest crystal deep solid cutting. A typical reproduction of Georgian Glassware. Height, 10 in. Price, 65/- each

**Three-handed Loving Cup**, 8 in. high. A charming specimen of Intaglio cutting, reviving memories of old customs, yet adaptable to many uses. Price, 15/- each

**Rose Bowls**, sparkling and brilliant, unequalled for fineness of detail and clever cutting, each fitted with Double Gift Wire and Ormolu Stand, in various new and beautiful shapes, deeply-cut designs. 21, 23/6, 26/6, 30/-, 32/6, 36/-, 38/6, 40/-, 42/-, 44/-, 46/-, 48/-, 50/-, 52/-, 54/-, 56/-, 58/-, 60/-, 62/-, 64/-, 66/-, 68/-, 70/-, 72/-, 74/-, 76/-, 78/-, 80/-, 82/-, 84/-, 86/-, 88/-, UNIQUE DISPLAY OF WORKS OF ART IN

## TERRA COTTA WARE

COMPRISING \_\_\_\_\_

Statuary, Groups, Vases, Figures, &c

The artistic excellence of this collection shown in the FINE ART GALLERY is of the highest order. The range on view contains many classical and other popular subjects, all finely modelled, each piece being a signed replica.

"Corinth." Signed replica; height about 3ft. 6in. ... Price, £9/9, -

The following are very attractive Specimens and remarkable value at the prices quoted:—

"La Force." A group piece of exceptional merit, finished as bronze. The modelling of the lion, held in check by the gladiator, armed only with a trident, is a wonderfully strong piece of work. The rough and rugged base adds strength to the piece, and forms a fitting finish to an artistic triumph. Height, 31 inches; length, 23 inches ... Price, £10/10/-

"The Gladiator." A fine subject treated in an artistic and masterful style; the pose of the figure being exceptionally realistic and the delineation of the muscles marvellously executed. This piece is finished as bronze, the metallic glazing alone being itself a triumph of Ceramic Art. Height, 28 inches ... Price, £7/7/- each

"Diana." Vase of same design, with figure in relief of Diana, attired for the chase and accompanied by hounds. Height, 30in. ... Price, £6/16/- each

"The Bather." This well known and ever popular subject has been happily reproduced in Terra Cotta work. The Artist, in paying personal attention to the outline of the figure and the retouching of the limbs and features, has given the subject that truly lifelike finish which justly deserves the appellation it receives. This piece is artistically finished in Bronze Green. Height, 32 inches ... Price, £6/6/- each

"The Teamster." A natural treatment of a popular subject, showing the teamster in the attitude of lighting his pipe. Height, 24 inches ... Price, 7/5/- each

"Music and Dancing." Two Vases of pleasing outline, with female figure in relief. One represents Dancing and the other Music. Height, 35in. ... Price, £5/17/6

# FRENCH BRONZES.

The collection of French Bronze, and Bronze and Ivory Figures displayed in the New GALLERY, comprises the choicest ever exhibited in Australia. Every piece is distinctive, and the work of individual artists, each being signed. The rarity of subjects and excellence of finish place them absolutely in the front rank, and we invite inspection with every confidence.

## "CHASSEUR DE LA GARDE,"

By R. NANNINI

A masterly piece. The eager alertness of the expression, the pose, the restrained action of the horse, together with the faithful and minute exactness of every little detail, give to this piece a distinctive tone in a collection where every piece is pleasing. Height, 16in.; length, 18in.; Price, £30

"CHASSEUR DE LA GARDE."

"DANSEUSE AU VOILE."

"Carmen." A delightful figure, proud and vigorous; the head and arms being in Ivory, heighten the natural effect of a beautiful piece. The drapery is marvellously executed. Signed by E. Touchay—  
Height, 12in. ... .. Price, £25

"Meditation." No description can adequately convey a correct impression of this piece. The artist, Van der Straeten, has here depicted a lady deeply immersed in her book, strolling, with hat over her arm, utterly oblivious to the outside world. The head and shoulders and the arms are in Ivory, the costume in bronze; the whole piece making a charming picture. Height, 12in. ... .. Price, £17/17/-

"Boy and Lizard." This piece is all in bronze, by Leon Morice, and represents a boy running. The pose of the figure as he swings his leg back to avoid contact with the lizard, is a wonderful piece of work, full of life and animation. Height, 18in. ... .. Price, £10/10/-

## "DANSEUSE AU VOILE,"

By PHILIPPE.

An artist whose work is always pleasing. The gracefulness of the figure, the anatomical accuracy of outline, the ease with which the dancer, with a certain blithe abandon falls easily into classic poses, shows the technical force of a master. Height, 12in. ... .. Price, £8/8/-

— ANTHONY HORDERNS' FINE ART GALLERY. —

# MARBLE STATUARY

BY LEADING FRENCH AND ITALIAN ARTISTS.

including Original Signed Works by BOERO, SCHORCK, JARDELLA, HIPPOLYTE MOREAU, LATOUR, &c., &c. The following subjects are also on view:—

**JUDITH, BY LATOUR.**—The stern commanding character of this study has been forcibly expressed. The pose is perfect, the classic drapery, clasped by a jewelled girdle, serving but to enhance the charming fulness of the figure—

Height, 22in. Price, £11/10/-

**THE MINUET.**—One of the happy old world style of figures. A dainty lady dancing the minuet with all the grace associated with this period. The artist, Van der Straeten, is to be congratulated on the success with which he has completed this piece; the expression of the face in ivory being a fine piece of work—

Height, 18in. Price, £22/10/-

**THE BATHER SURPRISED, BY BOERO.**—This figure has justly deserved the approbation it receives. The anatomical accuracy and gracefully outlined form are truly lifelike. The artist has here presented us with a figure vibrating with the very joy of life

Height, 28in. Price, £45

**THE SOWER.** The whiteness of the marble, and the skill of the artist give to this figure a wonderfully lifelike appearance; the freedom of movement being expressed with vigour and determination—

Height, 23in. Price, £11/11/-

# OLD CHINESE PORCELAIN AND HARD STONES.

By EDGAR GORRER and J. F. BLACKER.

**D**URING the last quarter-of-a-century the attention of an ever-growing number of Collectors has been attracted to the singular charm and merit of Old Chinese Porcelain. Whilst many writers have dealt fully with the historical side and the characteristics of the various periods, no attempt has been made to furnish the collector and the student with a work containing an extensive reproduction in colour of the finest specimens. Those who desire to study and to acquire the typical examples of the great periods are precluded from doing so owing to their extreme rarity.

The authors confidently hope that "CHINESE PORCELAIN AND HARD STONES" will supply a long-felt want, as it places before all those interested in the art reproductions in actual colours of all the most sought-for types, with descriptions of both English and French, which set forth all that is interesting concerning the respective articles. These descriptions can also be regarded as educational, for the significance of the flowers, emblems, utensils, etc., which form the subject of the decorations is fully explained.

Further, such a work as this is essential in order to place before the amateur that which is rarest and finest in this most delightful art, as the average buyer or student is familiar with the ordinary types of Blue and White, Famille Verte, Powder-Blue, and Famille Rose, these being merely the reflex of the glory of the great pieces in the true Chinese taste, which are illustrated in these columns.

The volumes contain 254 pages of illustrations, arranged in groups as follows:-

- |                                 |   |   |
|---------------------------------|---|---|
| 1. Black grounds, decorated.    | 6. Blue and White   | 10. Three and Five-colour decoration on various backgrounds |
| 2. Green grounds, decorated.    | 7. Powder Blue.   | 11. Famille Rose  |
| 3. Yellow grounds, decorated.   | 8. Single or Soft colour Glasses.                         | 12. Jade and other hard stones.                             |
| 4. Figures, Birds, and Animals. | 9. Amberine and Dark Blue grounds, with colour decoration |   |
| 5. Famille Verte.               |   |   |

Two volumes, royal quarto, only 1,000 copies printed, each numbered, the text in English and French, with 254 full and double-page illustrations in colours, depicting about 4,000 objects.

Price - £12.12 - nett.

## UNWIN'S "CHATS" SERIES.

PRACTICAL GUIDES TO COLLECTING.

It is to the beginner and collector that UNWIN'S "CHATS" SERIES of Practical Hand-books specially appeal. They are the recognised standard guides to collecting, each volume being the work of an expert on the subject dealt with.

They are not only the best but the cheapest works on their subjects. They are profusely illustrated with carefully-chosen specimens of the various styles and periods, and each has a coloured frontispiece.

Full Indices, Bibliographies and List of Sale Prices at Public Auctions are included in the volumes

# HABERDASHERY AND TRIMMINGS.

This Department, or rather departments, deals with the small wares of the **DRAPERY TRADE**, and its importance in connection with the **everyday business** of social and domestic life can hardly be over-estimated.

In commencing our Catalogue in this way, with **Price Lists of Haberdashery** and similar small wares, the fitness of things is indicated, for it was in connection with goods of this description that our first venture in the arena of trade was made. We began our career as

## ... DRAPERS AND HABERDASHERS ...

and it is largely due to painstaking attention to such comparatively small matters that we have our present proud position as

## ... The Premier Retailers of the Commonwealth ...

- Lisle Thread Mending, Black or  
 Tan ...  $\frac{1}{12}$  card; 1/8 doz.

No. 55.

## SILK FOR SEWING.

It has passed into a proverb that if the pennies are carefully kept, the pounds will look after themselves. It is likewise important that savings should be made in small purchases, as such is no more important ones. Orders, both great and small, are best filled at Anthony Horderns' Famous Low Prices.

### Crown and Cushion Silk Buttonhole Twist

Black, Nos. 5, 6, 7, 8, 10 & 11 3/8 reel; 24/6 lb.

## BUTTONS.

The number of Buttons produced in various parts of the world is truly marvellous. As for price, Buttons range from next to nothing to a pound a piece. There is little or no sale in Australia for Buttons at the high price named.

### DIAGRAM SHEWING SIZES OF ALL BUTTONS GAUGED BY LINES.

Larger size Buttons than shown increase in like proportion.

## LINEN BUTTONS.

The Ariel Two-hole Button, on one gross cards, Brass eyelets, English made, strong and durable —

No. 78

# ANTHONY HORDERN & SONS, LTD., PALACE EMPORIUM, SYDNEY.

## MORE BUTTONS.

Buttons have been used for other purposes than keeping garments tidy in place. The Heads of **Military Heroes** can be engraved or placed on Buttons, and the Buttons on the clothes worn by the boys belonging to a certain celebrated school in England exhibit the bust of the founder, King Edward VI.

### LINEN BUTTONS ON AVERAGE CARD.

	10	12	14	16	18	20	22 lines
Number of Buttons on each card	2	2	2	1½	1½	1½	1½ doz

Sizes	40	50	60 lines
	-/9	1/-	1/3 doz.

### PLAIN AND FANCY DRESS BUTTONS.

In this department we should find some favor with the ladies, because we are match makers. Not in the sense usually understood; but, inasmuch as we are able to match with fashionable and appropriate buttons, almost any dress material, silk, wool or otherwise.

**Small Size Buttons**, 14 to 24 lines. See diagram, page 24

ANTHONY HORDERN & SONS, LTD., ONLY UNIVERSAL PROVIDERS

# WOOLS FOR WORKING.

Whereby industrious fingers can always find useful employment.

WOOLS ARE SOLD BY WEIGHT.

and it makes all the difference to users whether they get fair weight or not. It is easy enough to reduce the price if short weight be given, and the indiscreet trader, relying on the indifference of the majority of mankind plays this trick all over the world.

Facsimile of 1-lb. Packet of Berlin Wool.

Andalusian and Shetland Wools sold by us are parcelled after the same manner.

## BERLIN, ANDALUSIAN, and SHETLAND WOOLS,

as sold by Anthony Horderns' are done up in 4 oz. packets, and four of these packets go to a pound of 16 oz. On each packet is printed "4 Fold Berlin", containing Full Four Ounces of Wool, exclusive of paper and string" and through this Anthony Horderns' announce that the Wools they sell are full weight sixteen ounces to the pound, warranted pure dye and finest quality.

The remarks also practically apply to Wools for Working that we stock other than those specially referred to—

	In parcels of			
	1 oz.	$\frac{1}{2}$ lb.	1 lb.	$\frac{1}{2}$ lb. Bundles
<b>4 and 8 FOLD BERLIN WOOL.</b>				
Black, White ...	—/4	1/3 $\frac{1}{2}$	4/9	4/8 per lb.
Scarlet, Cardinal, Maroon, Rose Pink, Salmon, Pink, Cream, Biscuit, Apricot, Tan, Blue, Yellow, Orange, Electric, Grey, Slate, Lake Violet, Prune, Fawn, Brown, Terra Cotta, Sage Green, Moss Green, Bronze Green ...	—/4 $\frac{1}{2}$	1/3	4/11	4/10 "
Navy Blue, Partridge, Peacock, Gas Green ...	—/4 $\frac{1}{2}$	1/4	5/2	5/1 "
Cerise, Morning Red, Shaded ...	—/4 $\frac{1}{2}$	1/5	5/8	5/6 "
Rainbow Shaded, Fine Shaded Green ...	—/4 $\frac{1}{2}$	1/5 $\frac{1}{2}$	5/9	5/8 "
<b>4-FOLD ANDALUSIAN and 2 FOLD SHETLAND WOOL.</b>				
Black, White ...	—/4	1/3	4/11	4/10 "
Scarlet, Cardinal, Maroon, Rose Pink, Salmon Pink, Cream, Biscuit, Apricot, Tan, Blue, Yellow, Grey, Slate, Fawn, Brown, Bronze Green ...	—/4 $\frac{1}{2}$	1/4	5/3	5/2 "
Navy Blue, Partridge ...	—/4 $\frac{1}{2}$	1/4 $\frac{1}{2}$	5/5	5/4 "
Cerise, Morning Red ...	—/4 $\frac{1}{2}$	1/5	5/7	5/6 "

Wool Workers, &c., will notice that Berlin, Andalusian and Shetland Wools are sold in 1 oz. folds. The Wool is thus less likely to be stretched or soiled by handling.

The colors quoted in above list may be obtained in various shades, from light to dark, suitable for Fancy Work.

## EMBROIDERY AND NEEDLEWORK.

"Here the Needle plies its busy task."

Skill in Embroidery and "Faintment of Needlework" are as old as the hills. To copy the ancients may be had from, but for all that, "broidered work from Egypt," and sailed Needlework of centuries ago, might well teach a lesson of industry and taste.

## THE "WHITE" DRESSMAKING MACHINE.

No. 21R Special "White" Dressmaking Machine, Oak woodwork, Bentwood cover, Centre and Side Drawers, Extra Leaf at Back, and Drop Leaf at Side, making a much larger table than usual, a decided convenience to Dressmakers. Complete, with the "King" Steel Set of Attachments ... .. £6/10/-

FOR OTHER "WHITE" SEWING MACHINES, SEE OPPOSITE PAGE.

ANTHONY HORDERN and SONS, Ltd., are Sole Agents for  
 "WHITE" SEWING MACHINES for New South Wales and Queensland.

# THE "WHITE" SEWING MACHINES.

Says the Oracle "If it's a 'White' it's all right."

The "King" Steel set of attachments, consisting of Ruffler, Tucker, Shirring Plate, Under Braider and Foot Binder, and Five Hemmers (assorted sizes), combine the most desirable features in this line, both as to ease of application and satisfaction in execution, as included Free with every "WHITE" Sewing Machine.

Not the least important parts of a Sewing Machine are its Bearings. These should be constructed to run with the least possible friction under severe conditions with the smallest amount of care. Hence the application of Ball Bearings to the "White" Sewing Machine marks an era of advanced adaptation to the requirements of this modern age; and emphasizes the progressive spirit so characteristic of its manufacturers.

All "White" Machines are fitted with Ball Bearings, and in addition all "White" Machines are supplied with Tension Indicator, Pinch Tension, Automatic Tension Releaser, and Patent Dust Caps on Needle and Presser Bars. Ball bearings are applied at both ends of treadle and on balance wheel, thus giving the machine a smooth acting, light running movement that delights the most indifferent operator.

## THE "WHITE" FAMILY SEWING MACHINES, with Vibrating Shuttle.

No. 2H Hand Machine, with same head as No. 2 Treadle Machine, in Walnut base, without stand, Bentwood Cover ... .. £3/17/6

No. 2V Treadle Sewing Machine, finely finished, Nickel plated Fly Wheel, Bentwood Cover and Centre Drawer, finished in Oak or Walnut woodwork £4/12/6

No. 7V Treadle Sewing Machine, finely ornamented with Nickel plated Fly Wheel, beautiful Bentwood Cover, Drop Leaf, long Centre Drawer and one Drawer at each end of table, finished in beautifully figured Oak or Walnut ... .. £5 5

No. 3V Treadle Sewing Machine, elaborately ornamented with Nickel plated Fly Wheel, Bentwood Cover, Drop Leaf, long Centre Drawer and two Drawers at each end of table, finished in beautiful figured woodwork, Oak or Walnut ... .. £5/12/6

## THE "WHITE" DROP HEAD SEWING MACHINES.

No. 34V Drop Head Treadle Machine, same as No. 25V, but with one drawer at each end of table £5/12/6

No. 25V Drop Head Treadle Machine, the latest and most date for public favor. A handsome, finely finished machine, with Nickel-plated Fly Wheel, Panel Front, and two Drawers at each end of table. Strikingly novel in its make-up, from the fact of the head dropping into a wooden receiver when closed, the machine is covered by the leaf, which forms a convenient and useful table. Made in Oak or Walnut, beautifully figured ... .. £6/-

No. 27V Drop Head, same as above, with Panel Front and three Drawers at each end of table ... .. £6/15

No. 22V Drop Cabinet, a handsome, finely finished full Drop Cabinet Machine. When not in use the head is dropped into the Cabinet, and being covered by the leaf is fully protected from dust and injury. When opened for use the leaf turns back on its hinges, enlarges the table and gives ample room for the handling of goods. The case swings up under the leaf forms a strong support for it ... .. £7/7/6

## THE "WHITE" FAMILY ROTARY SHUTTLE TREADLE MACHINES.

No. 2R Oak or Walnut woodwork, Bentwood Cover and Centre Drawer. Nickel-plated Fly wheel. A finely finished Machine ... .. £4/15/-

No. 7R Oak or Walnut woodwork, Bentwood Cover, Drop Leaf, and one Drawer at each end of Table, Nickel plated Fly-wheel ... .. £5/10/-

No. 3R—Oak or Walnut woodwork, Bentwood Cover, Drop Leaf, Nickel plated Fly Wheel ... .. £5/17/6

## THE "WHITE" FAMILY ROTARY DROP HEAD MACHINES.

No. 24R Drop Head Treadle Machine, same as No. 25R, but with one drawer at each end of table ... .. £5/10/-

No. 25R Handsome, elegantly constructed machine, with Nickel Hand Wheel, Panel Front and two Drawers at each end of table. Novel in its make-up, from the fact of the head dropping into a wooden receiver when closed, and being covered by the leaf forms a convenient and useful table. Made in Oak or Walnut wood, beautifully figured ... .. £6/17/6

No. 27R With three Drawers at each end of table. Unique construction. Elegant finish. A radical departure from the usual lines of sewing machine construction, both in stand and woodwork, and yet a thoroughly practical and artistic piece of furniture as well. Made in Oak or Walnut wood ... .. £7/10/-

Duplicate parts can always be had for ...

The "White" Sewing Machine, as sold by us. For Machine Needles, see page 9.

Packing for the Country. Treadle Sewing Machines, 2/6 extra, Hand Machines, packing free.

We are Sole Agents for The "White" Sewing Machines in New South Wales and Queensland.

Fully illustrated Catalogue of Sewing Machines sent post free to any address on application.

## DRESS MATERIALS.

If Calico and Linen be the A B C of the Drapery Trade, then Dress Materials in their numerous guises are all the rest. The lists which follow, enumerating various materials made of Wool, Cotton and Silk, give but a faint idea of the magnitude of our stocks, which, described in detail, would occupy many pages. We must, however, be content to submit the following lists to our country friends, with the promise that

Patterns of all the Newest Goods will be sent Post Free to any Address on request, and the assurance that nothing like such good value is obtainable elsewhere at the same prices.

## PLAIN AND FANCY SILKS.

It is not our purpose to trace the history of the Silk Manufacturing Industry; we only wish to say that our buyers periodically visit its various centres and buy on the spot, dividing the orders so that each line is given to its most noted manufacturer. This is why the department that deals with these and kindred goods affords such marvellous examples of Anthony Horderns' Famous Low Prices.

# ANTHONY HORDERN & SONS, LTD., ONLY UNIVERSAL PROVIDERS

## PLAIN AND FANCY TABLE LINEN.

This branch of the department affords a wide field for investigation and variety. Improvements in machinery, and the application of the arts and sciences to the manufacture of textile fabrics, have done much in bringing the most beautiful fabrics within the reach of all, and that is one reason why we are able to offer them at such low prices. Another reason is that we pay cash for all we buy, and this plan, in conjunction with the largeness of our orders, enables us to sell at lower rates than our neighbors.

### Unbleached Table Damask—

1½ yds. wide	... 11/1, 1/3, 1/4, 1/6, 1/8, 1/11 yds.
12	... 1/4, 1/6, 1/10, 2/3
2	... 1/5, 2/5, 2/6, 2/8, 2/11, 3/8, 3/9, 4/6
24	... 2/9, 3/7, 3/4, 3/7, 4/8, 5/3

### White Table Damask—

1½ yds. wide	... 1/5, 1/7, 2/7, 3/3, 2/8 yds.
12	... 1/7, 2/7, 2/9, 2/4

## TOWELS.

This section is all important. It embraces Towels and Towellings, as well as many other materials and articles in everyday household use. All these goods are **bought for cash down**, direct from the makers, and exhibit **value for price** not obtainable elsewhere. Such eminent manufacturers of Towels as **Christy's** are largely represented in the lines we offer. The sizes given, in many instances, are approximate. New Samples are constantly arriving of varying sizes and prices.

# FLANNEL AND FLANNELETTE.

## FLANNEL.

For various reasons Flannel is worth its weight in gold, but despite this great truth, the best of Flannel is sold at Anthony Horderns' Famous Low Prices, which, without interfering with quality, very greatly reduce the cost.

**Electoral, Pink Edge**, a very soft Flannel for ladies' and children's wear

24	26	28	30	32	34	36	in.
1/4	1/4	1/6	1/6	1/9	1/10	2/1	2/4 yd.

**Saxony Welsh, Blue Edge**—

28	30	32	34	in.		
1/4	1/6	1/6	1/4	1/9, 1/11	2/1	2/9 yd.

**Medium Angola Welsh**—

28	30	32	34	in.	
1/4	1/6	1/6	1/4	1/9	1/8, 1/11, 2/3 yd.

**Heavy Imitation Welsh**—

38	40	42	in.
1/4	1/9, 2/-	1/7	yd.

**Scarlet Saxony**—

28	30	32	34	in.
1/4	1/6	1/8, 1/10	2/-, 2/2	2/6 yd.

**Scarlet, Anti-Rheumatic**

31in., 1/9; 32in., 2/2 yd.

**New Zealand Flannel**

Fawn	—	—	2/3, 2/9, 3/-	3/7 yd.
Grey	—	—	2/3, 2/9, 3/-	3/7 "
White	—	—	2/2, 2/3, 2/5, 3/-	3/7 "
Pink	—	—	2/3, 2/9	"

**Geelong Flannel, White**—

28	30	32	36	in.
1/4	1/8	1/2, 1/4	1/6 yd.	

**Grey or Fawn, Medium Weight**—

28	30	32	in.
1/-	1/1, 1/3, 1/6, 1/9	1/10 yd.	

**Grey or Fawn, Special, 36in.**

... 1/5, 1/7, 1/9 "

**Heavy**—

30	32	34	in.
1/-, 1/3, 1/4	1/-, 1/2, 1/3, 1/5, 1/7	1/2, 1/3, 1/6 yd.	

**Fine Natural Wool, for Ladies' wear**—

28	30	32	36	in.
1/7	1/11	2/2	2/-, 2/3, 2/6	yd.

**Gauze, Flannel**, very fine, for summer wear—

1/2, 1/4, 1/7, 1/10, 2/-, 2/4, 2/6 yd.
Silk Warp, 30in. ... 3/4, 3/11 yd.

**Silk Warp**, 30in.

27	28	29	32	in.
1/3	1/6	1/9	1/11	yd.

**Army Grey**—

**Navy**, for Firemen's and Engineers' wear—

29in., 1/6, 1/6; 31in., 1/8, 1/11, 2/3, 2/6 yd.

**Cream Yorkshire**, 30in. wide ... 1/7

**Colored Twill**—Rose Pink, Salmon, Sky Blue, Royal

Blue, Navy, Maroon, Crimson, Magenta, &c.

27	28	29	31	in.
1/2, 1/4	1/7, 1/9	2/-	yd.	

**Cricketing Flannel** ... 30in., 2/9; 31in., 3/3 yd.

**French Electoral**—

27in., 1/4, 1/6, 1/7, 1/8; 31in., 1/5, 1/6, 1/7, 2/-, 2/10 yd.

**French Twill Flannel**, Cream, 31 in.—

1/5, 1/7, 1/9, 2/-, 2/2, 2/4, 2/8 yd.

**Creme Wool and Linen Flannels**, specially adapted for Ladies' and Children's wear, being soft, warm and durable, 30in. plain ... 1/6, 1/9, 2/2, 2/4 yd.

**French Flannel Zephyr**, Cream, fine Cashmere Twill—

31in., 2/1; 32in., 2/3 yd.

# MOSQUITO AND OTHER CURTAINS.

To allow the enterprising Mosquito the privileges of **Free Trade** to go where it likes and do what it likes — would be to give a foolish preference to a malignant foe. In this instance, at any rate, **Protection is needed**, not only for comfort's sake, but to prevent bloodshed.

## READY-MADE MOSQUITO CURTAINS.

In ordering Mosquito Curtains, size may be obtained by placing the tester bow of bedstead on a piece of paper, and drawing a line round the outside. With Four-Post Bedsteads, give length and width at top measuring from ends of posts. The measurements required for Italian Bedsteads are width of bedstead and length of side arms. These instructions will apply also to Curtains of Swiss Embroidered Mosquito Net.

### For Half-Tester or Italian Bedsteads—

2ft. 6in.	3ft.	3ft. 6in.	4ft.	4ft. 6in.	5ft. wide
7/11	8/11	9/11	12/-	13/9	15/6
9	10	10/9	13/6	15/-	15/-
11/-	11/-	12/6	16/9	19/-	21/-
12/-	13/6	15/6	—	20/-	24/-
—	15/6	17/6	—	22/-	—
—	—	—	—	25/-	—

### For Four-Post Bedsteads—

3ft. wide	..	..	..	11/9, 13/-, 14/6
4ft. 6in. wide	..	..	..	15/6, 17/-, 20/-, 24/-

OTHER SIZES TO ORDER.

### For Cots and Bassinets—

2ft. wide	..	..	..	6/9, 7/6, 8/6, 10/6
2ft. 6in. wide	..	..	..	6/9, 7/6, 8/6, 10/6
3ft. wide	..	..	..	7/6, 8/6, 9/9, 11/9

### For Stretchers ...

..	..	..	..	9/-, 10/-, 11/6
..	..	..	..	.. 6/6, 7/6, 8/6

### For Verandah Sleepers or Campers, made on Hoops, for suspending, with cord, hook, &c. ...

..	..	..	..	9/9, 11/9
Or may be used with our "Open Air" Folding Mosquito Stand	..	..	..	4/11

Mosquito Curtains as above are made of wide Net, full enough to allow the entire bed to be surrounded.

The above prices are for Plain Mosquito Curtains, consisting of Net, Calico or Sheetting top, and binding. The Curtains, however, may be trimmed with Ribbon, Lace, Sateen, or in any way deemed desirable. This plan is frequently adopted, especially with Cots and Bassinets, and, so that customers' instructions may be exactly followed, full particulars of the kind of trimming required, as well as the measurements indicated above, should be sent. If required, estimates will be forwarded by return of post.

## FANCY TRIMMED MOSQUITO CURTAINS.

Ready-made for Double, Half-Tester or Italian Bedsteads, open in front, trimmed Lace Fronts and Rouché ... 24/-, 27/6, 33/6

Same as above, but with Tucked Valance of Net, edged with Lace ... 27/6, 31/-

Or, with Scalloped Valance, edged with Valenciennes Lace ... 40/-

Estimates for other sizes upon application.

Striped Mosquito Net, 108in. wide... 9/3 ..

## MOSQUITO NET By the Yard.

Any Trousseaux may be varied, or any article left out, if desired.

## "MILLIONS OF MISCHIEFS"

And any amount of worry, may be avoided by attention to the following simple directions:—

**Write** your Orders legibly, and your name and address in full. Give the Post Town where our answer will reach you. State if goods and invoice are to be addressed Mr., Mrs., or Miss.

**Give** the correct route by which the goods are to be sent, and say to whom they are to be consigned if you live far from a Railway Station or Port.

Be careful to give sizes, colors, lengths and quantities of goods wanted, and state whether we may substitute if we have not the exact material or article in stock.

In the event of goods going astray in transit, or not arriving at their destination in reasonable time, it would be well for customers, in writing to us, to give date of invoice, to assist in tracing cause of delay.

# ANTHONY HORDERN & SONS, LTD., PALACE EMPORIUM, SYDNEY

ANTHONY HORDERN & SONS, LTD. ONLY UNIVERSAL PROVIDERS

## FANCY DRAPERY.

Departments that abound in novelty and charm. A never-ceasing supply of new things is the order of the day, and an ever changing panorama of Fashion's Choicest Treasures adds to the attraction. Of Lace alone, in its various guises, our ordinary stock gives enough, supposing the lengths were put end to end, to

### PUT A GIRDLE ROUND THE EARTH,

and encircle the hemispheres with a lovely belt. Of everything else, pretty Collarettes, dainty Made up Goods, and thousands of elegant Fashion Fancies, we offer

### THE FINEST SHOW IN AUSTRALIA.

#### REAL LACE

is always appreciated. Beautiful as are the machine-made productions of the Lace Maker's art, the hand-made article can never be lost sight of, and though the lesser cost of Imitation Lace may tempt a vast number of buyers, the real thing will always find hosts of friends among people of taste and refinement.

# ANTHONY HORDERN & SONS, LTD., ONLY UNIVERSAL PROVIDERS

## EMBROIDERY.

In unassuming garments in general use, as well as in the more pretentious, in fashionable attire of many kinds. Embroidery plays a leading part, so much so, that it would ill become a house like ours to give it other than a place of importance in our Drapery sections. Our stock comes to us direct from the manufacturers, straight from Switzerland, where the majority of the better class of Embroidery is made. Our selling prices are low in consequence, indeed each value as we give will be sought for in vain at any other store.

**Cambric or Longcloth Edging,**  $\frac{1}{2}$ in. to  $\frac{1}{4}$ in. wide—  
Open work ...  $-\frac{1}{12}$ ,  $\frac{1}{2}$ ,  $-\frac{1}{24}$ ,  $-\frac{1}{3}$ ,  $-\frac{1}{32}$ ,  $\frac{1}{4}$  yd.  
Closer and better work,  $-\frac{1}{3}$ ,  $-\frac{1}{4}$ ,  $-\frac{1}{48}$ ,  $-\frac{1}{52}$ ,  $\frac{1}{6}$  ..  
Finest work—  
 $-\frac{1}{7}$ ,  $-\frac{1}{8}$ ,  $\frac{1}{9}$ ,  $-\frac{1}{10}$ ,  $\frac{1}{11}$ ,  $\frac{1}{12}$ ,  $\frac{1}{16}$ ,  $\frac{1}{10}$  ..

The following prices are for slightly wider widths.  
The quality of all is excellent.

$\frac{1}{4}$ in. to  $\frac{1}{2}$ in. wide—  
Open work ...  $-\frac{1}{24}$ ,  $\frac{1}{3}$ ,  $-\frac{1}{4}$ ,  $\frac{1}{48}$ ,  $-\frac{1}{5}$ ,  $-\frac{1}{64}$  yd.  
Closer and better work,  $-\frac{1}{8}$ ,  $-\frac{1}{54}$ ,  $-\frac{1}{6}$ ,  $-\frac{1}{7}$ ,  $-\frac{1}{8}$  ..  
Finest work—  
 $\frac{1}{9}$ ,  $-\frac{1}{94}$ ,  $\frac{1}{11}$ ,  $\frac{1}{11}$ ,  $\frac{1}{12}$ ,  $\frac{1}{13}$ ,  $\frac{1}{16}$ ,  $\frac{2}{11}$  ..

These Embroideries will be found wonderful value, the lowest prices raising the point how anything at all can be produced for so little money.

$\frac{1}{2}$ in. to 5in. wide—  
Open work—  
 $\frac{1}{3}$ ,  $-\frac{1}{4}$ ,  $-\frac{1}{44}$ ,  $-\frac{1}{5}$ ,  $\frac{1}{6}$ ,  $-\frac{1}{74}$ ,  $-\frac{1}{8}$ ,  $\frac{1}{84}$  yd.  
Closer and better work,  $-\frac{1}{8}$ ,  $\frac{1}{9}$ ,  $-\frac{1}{94}$ ,  $\frac{1}{10}$ ,  $\frac{1}{11}$  ..  
Finest work,  $\frac{1}{11}$ ,  $\frac{1}{13}$ ,  $\frac{1}{14}$ ,  $\frac{1}{16}$ ,  $\frac{1}{19}$ ,  $\frac{2}{13}$ ,  $\frac{2}{16}$ ,  $\frac{2}{11}$  ..

These widths enable some very rich work to be shewn. It becomes a question, when choosing, whether the best will not be the most desirable in the long run.

5in. to 12in. wide—  
Open work ...  $-\frac{1}{54}$ ,  $-\frac{1}{64}$ ,  $\frac{1}{84}$ ,  $-\frac{1}{104}$ ,  $\frac{1}{11}$ ,  $\frac{1}{12}$  yd.  
Better and richer—  
 $\frac{1}{11}$ ,  $\frac{1}{13}$ ,  $\frac{1}{14}$ ,  $\frac{1}{16}$ ,  $\frac{1}{19}$ ,  $\frac{2}{11}$  to  $\frac{4}{16}$  ..

These represent the beau ideal of Embroidery in the widths given. They are all superb.

**Cambric or Longcloth Insertion, to match Edging,**  $\frac{1}{2}$ in. to  $\frac{1}{4}$ in. wide—  
Open work ...  $-\frac{1}{2}$ ,  $-\frac{1}{3}$ ,  $-\frac{1}{34}$ ,  $-\frac{1}{4}$ ,  $-\frac{1}{5}$  yd.  
Better quality,  $\frac{1}{4}$ ,  $-\frac{1}{54}$ ,  $-\frac{1}{6}$ ,  $-\frac{1}{64}$ ,  $-\frac{1}{7}$ ,  $-\frac{1}{8}$  to  $\frac{1}{13}$  ..  
 $\frac{1}{2}$ in. to 3in. wide ...  $\frac{1}{8}$  to  $\frac{1}{11}$  ..  
 $\frac{1}{4}$ in. to 5in. ...  $\frac{1}{8}$  to  $\frac{1}{11}$  ..

**Open Insertion, for Ribbon, Muslin or Cambric—**  
 $\frac{1}{2}$ in. to  $\frac{3}{4}$ in. wide ...  $-\frac{1}{12}$  to  $\frac{1}{3}$  to  $\frac{3}{8}$  yd.

**Embroidered Muslin Edging,**  $\frac{1}{2}$ in. to  $\frac{1}{4}$ in. wide—  
Open work ...  $-\frac{1}{2}$ ,  $-\frac{1}{3}$ ,  $-\frac{1}{34}$ ,  $-\frac{1}{4}$ ,  $-\frac{1}{5}$  yd.  
Fine work,  $-\frac{1}{34}$ ,  $-\frac{1}{4}$ ,  $-\frac{1}{44}$ ,  $-\frac{1}{54}$ ,  $-\frac{1}{6}$ ,  $\frac{1}{8}$ ,  $\frac{1}{11}$  ..  
The above are very low in price, but the quality will be found really excellent.

$\frac{1}{4}$ in. to  $\frac{1}{2}$ in. wide—  
Open work ...  $-\frac{1}{34}$ ,  $-\frac{1}{4}$ ,  $-\frac{1}{44}$ ,  $-\frac{1}{5}$  yd.  
Better work—  
 $\frac{1}{8}$ ,  $-\frac{1}{6}$ ,  $\frac{1}{64}$ ,  $-\frac{1}{7}$ ,  $-\frac{1}{8}$ ,  $\frac{1}{9}$ ,  $\frac{1}{11}$ ,  $\frac{1}{13}$ ,  $\frac{1}{16}$  ..

$\frac{1}{2}$ in. to 5in. wide—  
Open work ...  $-\frac{1}{5}$ ,  $-\frac{1}{64}$ ,  $-\frac{1}{7}$ ,  $-\frac{1}{8}$ ,  $-\frac{1}{84}$  ..  
Fine quality ...  $\frac{1}{94}$ ,  $-\frac{1}{104}$ ,  $\frac{1}{11}$ ,  $\frac{1}{12}$ ,  $\frac{1}{19}$ ,  $\frac{2}{11}$  to  $\frac{6}{16}$  ..

Lovely specimens of Embroidery. In very useful widths  
5in. to 12in. wide—  
Open work ...  $-\frac{1}{8}$ ,  $-\frac{1}{84}$ ,  $-\frac{1}{94}$ ,  $\frac{1}{104}$ ,  $\frac{1}{11}$  yd.  
Fine rich work ...  $\frac{1}{11}$ ,  $\frac{1}{13}$ ,  $\frac{1}{14}$ ,  $\frac{1}{16}$  to  $\frac{4}{16}$  ..

The patterns of these wider Edgings are in excellent taste.

Patterns of Embroidery sent Post Free to any address.

**Embroidered Muslin Insertion, to match Edging—**

$\frac{1}{2}$ in. to  $\frac{1}{4}$ in. wide—  
Open work ...  $-\frac{1}{24}$ ,  $-\frac{1}{3}$ ,  $-\frac{1}{34}$ ,  $-\frac{1}{32}$  yd.  
Better quality ...  $-\frac{1}{4}$ ,  $-\frac{1}{5}$ ,  $\frac{1}{54}$ ,  $\frac{1}{6}$ ,  $-\frac{1}{9}$ ,  $\frac{1}{11}$  ..

$\frac{1}{4}$ in. to  $\frac{1}{2}$ in. wide—

# LADIES' KID GLOVES.

Gloves Post Free to any Address in Australia.

The following list is representative of the best Kid Gloves the various manufacturers of France and other places afford. Each kind quoted is of special make, while the extent of our orders secures the lowest prices. The final selection of the Gloves is made by experts, who previous to shipment examine every pair, and reject anything found to be not absolutely first rate. This plan, rigidly carried out, enables us to guarantee the quality, workmanship and fit of every pair we sell.

## IN RESPONSE TO ORDERS BY POST.

Selections are made from the same stocks, and the same prices are charged as to town buyers. This practice, taken in conjunction with our liberal rule of free carriage, cannot fail to commend itself to all.

## PATTERNS AND PRICE LISTS.

We send Patterns and Price Lists everywhere post free, on application by letter.

With regard to patterns, it is always advisable to make a second choice, a precaution that often prevents disappointment.

When returning patterns, please enclose them in the wrapper they were received in, and draw the pen through your name and address, then affix a penny stamp for every two ounces.

**LADIES' AND CHILDREN'S HANDKERCHIEFS.**

Ranging from the cheap Cotton variety to Handkerchiefs of the Fine Lawn class, elegantly ornamented with Lace, and of the most delicate and beautiful Silk. In these goods we are in a position to offer **better value** than any other house, simply because our sales are larger, and our purchasing power consequently greater. Of the cheaper kinds of Handkerchiefs, a single order to the manufacturers amounts to **many thousands** of dozens, and in the more expensive kinds our trade is altogether phenomenal. Chance orders may find their way elsewhere, but no one with any knowledge of the matter would think of **passing us by** when goods of this character are wanted.

**Ladies' Fancy Handkerchiefs.** Embroidered, Scalloped, Drawn Thread, etc., in great variety of designs and qualities ... 8/6, 8/11, 4/6, 4/11, 5/6, 5/11, 6/6, 6/11, 7/6, 7/11, 8/6, 8/11, 9/6, 9/11, 10/6 to 20/- half doz.

**Pure Irish Linen. Washed Ready for Use**

No. 4272 ... 6/11 half doz.

No. 3170 ... 12/6 half doz.

No. 565 ... 8/11 half doz.

Our Selling Prices are affected in various ways, and they rise and fall accordingly. They are influenced by the current rates of wages in various parts of the world where manufacturing enterprise is carried on; by alterations in the cost of raw materials; by the operations of Trusts and Combines, and by various other things beyond our control.

Our system of paying Spot Cash for everything enables us to buy in the best markets at the lowest rates, and these advantages are passed on to all who honor us with their custom.

# Children's Costumes, Skirts, Paletots, Coats, &c.

Costumes and Tunics, also Jackets, Mantles and Dresses of every description, for children from one year old to girls of fifteen. No better guide to prevailing styles for children's wear can be found than our **Fashion Portfolio**, published early every Spring and Autumn. Study this and you will find the way to combine Fashion with Economy. The Portfolio is sent **post free** on application.

The following measurements should be sent with orders for Juvenile Garments—Round neck, round shoulders over arms, round bust under arms, round waist, length from neck to bottom of skirt (front), length of sleeve (inside seam).

ANTHONY HORDERN & SONS, LTD., PALACE EMPORIUM, SYDNEY.

## ANTHONY HORDERNS' CLOTHING.

Though the **Tailor** is credited with being only the "ninth part of a man" he exercises a mighty influence for good or evil. Good, when his work results in good looks, comfort, and economy. Evil, when his Bill almost breaks his Customer's back. It is a noteworthy fact that we manufacture almost everything in the clothing line in our own Model Factory, and herein lies the secret of the success of that part of our business devoted to

**ANTHONY HORDERNS' RENOWNED READY-TO-WEAR CLOTHES.**

### Our Rules for Self-Measurement

will enable anyone to obtain a perfect fit at something like half the cost ordinarily charged. The advantage is manifest, and the success of our system proved by the fact that tens of thousands of Customers, all over the country, send to us for their clothes over and over again.

The materials used come to us direct from the Manufacturers, our immense trade, and our practice of paying Spot Cash, enabling us to secure prices which other traders look for in vain. Hence the secret of

**ANTHONY HORDERNS' FAMOUS LOW PRICES.**

#### RULES FOR SELF-MEASUREMENT

Applying to Men's, Boys' and Youths' Clothes on following pages.

Coat Measurement.

- Neck seam under collar to waist (1 to 2)
- From neck seam under collar to bottom of skirt for full length of coat (1 to 3).
- Round chest under coat (4)
- Round waist under coat (5).
- Centre of back to shoulder (6 to 7).
- Shoulder to elbow (7 to 8).
- Elbow to end of sleeve (8 to 9).

A faithful adherence to which will ensure a Perfect Fit.

Vest Measurement.

- From back to neck (1) to top button (2).
- From top button to bottom of vest in front (3).
- Round chest under arms (4 to 5).
- Round waist (6 to 7).

Trousers Measurement.

- Round waist (1 to 2).
- Round hips (3 to 4).
- Round thigh (5).
- Round knee (6)
- Round bottom (7)
- Top to bottom, outside seam (8 to 9).
- Inside seam (10 to 9).

ANTHONY HORDERN & SONS, LTD. ONLY UNIVERSAL PROVIDERS

**MEN'S FASHIONABLE SAC SUITS.**

First-Class Trimings. Our Own Make throughout. All Materials thoroughly shrunk.

"Example," they say, "is better than precept," and though it is also said that "words are wise men's counters," it may be more to the point to offer examples than merely to talk of excellence and virtue. We therefore in support of our claim for your custom, have the honor to ask perusal of this and the following pages.

No. 1.—Twined Sac Syst.

No. 2.—Eng. Sup.

No. 3. Sag. Syst.

Measurements for Overcoats should be taken over ordinary coat, and desired length of Overcoat stated.

See Rules for Self-measurement on page 99.

Anthony Horderns' Famous Low Prices, are for both town and country. To country customers ordering through the post the same prices are charged as to people buying over the counter, and the same goods are sent, for if it be true that the country helps the town, it is also true that Anthony Horderns' Famous Low Prices help the country.

ANTHONY HORDERN & SONS, LTD. ONLY UNIVERSAL PROVIDERS

## DOUBLE-BREASTED MOTOR COATS

AND DETACHABLE LEATHER SHELL.

No. 19—Double-Breasted Motor Coat.

No. 18—Shewing Leather Shell

**Double-Breasted Motor Coats.** buttoning close up to throat, full and roomy cut, assuring protection where most required. The skirts are full, thereby affording plenty of covering for the knees when seated. They are also fitted with wind cuffs inside the sleeves, and racing straps outside. The new wind proof throat tab and storm collar, which can be worn up or down, complete an Ideal Motor Coat (No. 19).

The **Leather Shell**, as shown, does not interfere with the Coat in any way, being fitted with tabs and buttons, it can be taken out and used independently of Coat if required. The inside of the Coat itself is so neatly finished that it is quite as presentable when worn without the detachable lining as with it (No. 18).

**Fancy Overcoatings**, the latest colorings, loose detachable leather shell £75/-, £85/-, £100/-, £110/-, £120/-  
lined Buff leather, not detachable ... 75/-, 84/-, £100/-

### "MILLIONS OF MISCHIEFS"

And any amount of worry, may be avoided by attention to the following simple directions:—

**Write your Orders legibly**, and your name and address in full. Give the **Post Town** where an answer will reach you.

**State** if parcel and invoice are to be addressed **Mr., Mrs., or Miss.**

**Give the correct route** by which the goods are to be sent, and say to whom they are to be consigned if you live far from a Railway Station or Port.

**Be careful to give sizes, colors, lengths and quantities of goods wanted**, and state whether we may substitute if we have not the exact material or article in stock.

**In the event of goods going astray in transit**, or not arriving at their destination in reasonable time, it would be well for customers, in writing to us, to give date of invoice, to assist in tracing cause of delay.

ANTHONY HORDERN & SONS, LTD., PALACE EMPORIUM, SYDNEY.

## Men's Waterproof Coats.

Made with special regard to the climate of Australia, so that the satisfaction of absolute protection from the heaviest downpour may always attend the wearer. When ordering give chest measurement over Ordinary Coat and length desired. See Rules for Self-measurement on page 99.

No. 22—Single-breasted Chesterfield—Epsom.

No. 23—Double-breasted Chesterfield

Fawn and Navy English Box Cloth

Fancy Tweeds

60/-, 65/-, heavy weight 68/-

Straight Pocket, turned-back Collar. These Coats are cut full, with sewn and taped seams.

The prices quoted are for Coats 36 to 44 inches chest measurement. Outlets at a slight advance

**TERMS: SPOT CASH.**—In doing business with our numerous customers, we claim a ready recognition of the necessity for Cash Payments. To pay cash and give credit in return would require the wealth of Croesus ten times told, and ample as are our means, and willing as we are to employ them in the service of the public, it would be impossible, except by the sacrifice of those famous low prices which have made our name so renowned, to do business except for prompt cash.

## MEN'S WATERPROOF OVERCOATS.

Prices and particulars on application.

**TERMS: SPOT CASH.** In doing business with our numerous customers, we claim a ready recognition of the necessity for Cash Payments. To pay cash and give credit in return would require the wealth of Croesus ten times told, and ample as are our means, and willing as we are to employ them in the service of the public, it would be impossible, except by the sacrifice of those famous low prices which have made our name so renowned, to do business except for prompt cash.

## MEN'S MERCERY.

By which is understood everything that a man wears other than that what the Tailor, the Bootmaker, and the Hatter supply. All that these useful people make will be found in other parts of the book, and whatever you require, any or all, you will find advantage in placing the order with us. We are not given to boasting, but we say this, and we say it, being in full possession of our senses at the time of saying it, that we can give better value for your money than you can get elsewhere.

## MEN'S SHIRTS.

## ALL PRICES IN THIS CATALOGUE

ARE SUBJECT TO

## MARKET FLUCTUATIONS,

## FROM WHATEVER CAUSE ARISING.

Our Selling Prices are affected in many ways, and they rise and fall accordingly. They are influenced by the current rate of wages in various parts of the world where manufacturing enterprise is carried on; by alterations in the cost of raw materials; by the operations of Trusts and Combines; and by various other things beyond our control.

Our system of paying Spot Cash for everything we buy enables us to buy in the best markets at the lowest rates, and these advantages are passed on to all who honor us with their custom.

## MORE SHIRTS.

Fashion in shirts is strangely fickle, indeed, almost as fickle as fashion in the innumerable things which go to make a lady's wardrobe. White shirts, however, good old friends, survive, for the boiled shirt of our forefathers, somewhat altered in style, still holds the fort as the shirt "par excellence." These pages convey, as briefly as possible, the various kinds of shirts now worn, but any description possible would utterly fail to account for the variety and ornamental quality of some of the twentieth century shirts. Nevertheless, our friends in the country may rest assured that their orders will be executed from the newest and best.

The following Shirts of various materials are commonly styled

### CRICKET AND TENNIS SHIRTS.

**TERMS: SPOT CASH.**—In doing business with our numerous customers, we claim a ready recognition of the necessity for Cash Payments. To pay cash and give credit in return would require the wealth of Croesus ten times told, and ample as are our means, and willing as we are to employ them in the service of the public, it would be impossible, except by the sacrifice of those low prices which have made our name so famous to do business except for prompt cash.

## "Millions of Mischiefs"

And any amount of worry may be avoided by attention to the following simple directions:—

Write your Orders legibly, and your name and address in full. Give the Post Town where our answer will reach you.

State if goods and invoice are to be addressed Mr., Mrs., or Miss.

Give the correct route by which the goods are to be sent, and say to whom they are to be consigned if you live far from a Railway Station or Port.

Be careful to give sizes, colors, lengths and quantities of goods wanted, and state whether we may substitute if we have not the exact material or article in stock.

In the event of goods going astray in transit, or not arriving at the destination in reasonable time, it would be well for customers, in writing to us, to give date of invoice, to assist in tracing cause of delay.

# CHILDREN'S SHOES AND SLIPPERS.

**TERMS: SPOT CASH.** In doing business with our numerous customers, we claim a ready recognition of the necessity for Cash Payments. To pay cash and give credit in return would require the wealth of Croesus ten times told, and ample as are our means, and willing as we are to employ them in the service of the public, it would be impossible, except by the sacrifice of those famous low prices which have made our name so renowned, to do business except for prompt cash.

ALL PRICES IN THIS CATALOGUE ARE SUBJECT TO MARKET FLUCTUATIONS.

## DIRECTIONS REGARDING LUGGAGE.

### TO INTENDING TRAVELLERS.

THE following information compiled from the latest Handbooks of the various Shipping Companies will, we trust, be of service to the large and ever-increasing number of travellers who, before setting out on a trip to the Motherland or the Continent, have the wisdom to provide themselves with every necessary travelling requisite at...

### ANTHONY HORDERNS' FAMOUS LOW PRICES.

Handbooks containing detailed information in regard to Fares, Routes, and Embarkation can be obtained from the Sydney Offices of the several Companies hereunder mentioned:-

#### THE ORIENT LINE.

Via Colombo, Suez Canal, Naples, Marseilles, Gibraltar, and Plymouth.

Cabin Trunk: maximum size, 36 x 21 x 14 in.

First Saloon Passengers will be allowed 40 cubic feet each adult; Second Saloon, 20 feet. Children paying half fare, half these measurements. Freight will be charged for excess at the rate of 1/6 per cubic foot. Every package must have Passenger's name or initials painted or otherwise marked on it, and whether "Wanted on the Voyage," or "Not Wanted on the Voyage" Labels bearing these directions, also Labels showing the Port at which the Luggage is to be landed, will be supplied on application to Shipping Office. It is important that all old labels be removed. Access to Luggage marked "Wanted" can be obtained at least once a week, on application to the office in charge. Boxes for the Cabin should be marked "Cabin," and must not exceed 3ft. long, 1ft. 9in. broad, and 1ft. 9in. high. One package of this size can be taken in the Cabin by each adult Passenger, but will be reckoned in the allowance. Only the personal effects of the Passenger will be carried as Baggage, not merchandise or other property. Heavy Baggage must be delivered at the Wharf on the morning of the Day before Sailing.

The Steamers leave the Orient Wharf at noon sharp. Passengers are requested to be on board not later than 11.30 a.m.

#### THE P. and O. LINE.

Cabin Trunk: maximum size, 36 x 21 x 15 in.

First Saloon Passengers are allowed on board 336 lbs. of personal Baggage free of Freight. Children of First Saloon Passengers over three and under twelve years, 168 lbs.; Second Saloon Passengers and Servants, 168 lbs.; Children of Second Saloon Passengers (over three and under twelve years), 84 lbs. each.

A First Saloon Passenger paying extra for a Reserved Cabin is entitled to take in the Steamers, free of Freight, 4½ cwt.; and a married couple, paying for reserved accommodation, are entitled to take 9 cwt.

Small articles, such as hat boxes, bags, bundle of rugs, etc., which Passengers generally bring on board in their hands, are not weighed or charged for.

The Portmanteau for Cabin use should not exceed 3ft. in length, 1ft. 9in. in width, and 1ft. 9in. in depth. No packages exceeding this limit are allowed in the Saloon or Cabins.

Colored Labels showing the Port at which Baggage is to be landed will be supplied on application at the Company's Offices, and Passengers are advised to place two of these Labels on each package before sending same for shipment, or taking it on board. Cabin Labels are supplied on application, and Passengers are requested to enter thereon the number of their berths, for any Baggage that they may wish to take with them in their Cabins. It is most important that all old Baggage Labels should be either removed or obliterated.

Only Hand Luggage should accompany the Passenger on board.

Passengers from Sydney are requested to send all their heavy Baggage, properly labelled, to the P. and O. Wharf, not later than 5 p.m. on the day prior to the Steamer's departure.

Steamers leave punctually at noon. Passengers to embark not later than 11.30 a.m.

# ANTHONY HORDERN & SONS, LTD., PALACE EMPORIUM, SYDNEY.

## DIRECTIONS REGARDING LUGGAGE—Continued.

### THE WHITE STAR LINE.

Via Durban and Capetown.

Cabin Trunk: maximum size, 36 x 21 x 14 in.

Each adult Passenger is allowed 15 cubic feet free of Freight. Children paying half-fare, half this measurement. Excess will be charged at the rate of 1/6 per cubic foot. One Cabin Trunk can be taken in the Cabin by each adult Passenger, and will be reckoned in the allowance.

All Baggage will be received at the Wharf until 9 a.m. on the day of sailing.

### THE HUDDART-PARKER LINE.

Holiday Trips to Tasmania and New Zealand.

Cabin Trunk: maximum size, 32 x 18 x 14 in.

Trunks or Packages for the Cabin should not exceed 14 in. in height, 18 in. in width, and 22 in. in length. The smaller the amount of Baggage taken in the Cabin the better.

### THE UNION STEAMSHIP COMPANY.

Each adult Cabin Passenger will be allowed 20 cubic feet of Baggage free. Each adult Steerage Passenger will be allowed 10 cubic feet free. All excess to be paid for at the current rate of freight. Passengers should have their Baggage fully and properly addressed.

Gummed Slips with port of destination printed thereon are supplied on application to any of the Company's Branches or Agencies.

### THE ADELAIDE STEAMSHIP COMPANY, Limited.

Each First Class adult Passenger is allowed 20 cubic feet of personal Baggage free. Second Class and Steerage, 10 cubic feet. Children paying half-fare, half this space. All excess charged for at current rates. All Baggage must be fully addressed.

Gummed Slips with port of destination thereon are supplied gratis at any of the Company's Branches or Agencies.

### THE ABERDEEN LINE.

Via Durban and Capetown.

Cabin Trunk: maximum size, 36 x 21 x 15 in.

BAGGAGE.—Each adult Passenger (and Children in proportion) will be allowed, free of charge:—

Saloon ... 40 cubic feet.

Third Class ... 15 cubic feet.

Any excess charged at the rate of 1/6 per cubic foot.

No Baggage will be received at Steamer's side until 9 a.m. on the day of sailing.

### THE N.D.L. (NORD-DEUTSCHER LLOYD).

Cabin Trunk: maximum size, 30 x 19 x 15 in.

Each adult Passenger is entitled to free transportation of 4 cwt. (not exceeding 35 cubic feet measurement) of personal Baggage. Children paying half-fare and servants are entitled to half the above amount. Excess charged at the rate of £2 10/- per 4 cwt. or 35 cubic feet.

The Steamers for Europe leave usually at 1.30 p.m. on Saturdays.

PORTS OF CALL.—The Ports at which the Steamers call after leaving Australia are Colombo, Aden, Suez, Ismailia, Port Said, Naples, Genoa, Southampton, Antwerp, and Bremen.

ANTHONY HORDERN & SONS, LTD. ONLY UNIVERSAL PROVIDERS

### TRAVELLING REQUISITES.

These favorite Trunks come to us direct from the best makers; our large orders enabling us to command concessions in prices and reductions in freight. We are thus in a position to supply our customers at prices which render competition futile. As can be seen from the illustrations, these Trunks are specially adapted for long journeys and rough usage.

DEEP IMPERIAL CANE TRUNKS.

THE CELEBRATED STORK BRAND.

These Trunks are made of Genuine Spanish Cane, which submitted to a special process and the use of patented machinery produces Solid Cane Sherts, forming a light but extremely strong trunk foundation.

A New Patent Steel Frame is fitted to all Compressed Cane Trunks, Cases and Hat Boxes.

All these goods are lined with linen throughout, furnished with high-grade locks, welted leather, and finished in a first-class manner.

In regard to Compressed Cane Goods we keep only the best quality, and in this class of travelling requisite the best is the cheapest.

No. F3

## COMPRESSED FIBRE CABIN TRUNKS.

Maximum Cabin size—36 x 21 x 14.

The material variously known as **Compressed Fibre** "Flaxite" and "Fordite" is coming rapidly into popular favor. As the name implies, it is largely composed of fibre, a principal ingredient being the Flax Plant. By the aid of powerful machinery and patent processes, the several component parts are welded into sheets of varying thickness. When made into Trunks and Cases, they are found to be not only light in weight, but very durable in wear. The better qualities are covered with Green or Enamelled Brown Flax Canvas and closely resemble Compressed Cane goods.

No. F5.

**Compressed Fibre Imperial Trunks**—These trunks have Steel frames, eight (8) real hide corners, superior locks, lined cloth, and fitted with tray—

Anthony Horderns' Famous Low Prices, are for both town and country. To country customers ordering through the post the same prices are charged as to people buying over the counter, and the same goods are sent, for if it be true that the country helps the town, it is also true that Anthony Horderns' Famous Low Prices help the country.

# ANTHONY HORDERN & SONS, LTD., PALACE EMPORIUM, SYDNEY.

## LADIES' HAT BOXES.

Of late years, the vagaries of Fashionable Milliners have caused quite a revolution in the way of Hat Boxes. The hat boxes of the past years when we sat at the heels of the ladies of the past generation have disappeared. In their place, we have huge boxes made of iron, steel, "The Merry Widow" and other more artistic creations, by which the "Eterna Feminine" seeks to augment the many charms bestowed by Dame Nature.

Quality CN—Tan Enamelled Canvas, iron frame, round Tan hide, lined linen, fall front, fitted with 6 gauze cones to which hats may be pinned, and the possibility of damage reduced to a minimum—  
Size, 21 x 17 x 16in., 85/-

Quality AX—Tan Enamelled Canvas, wood frame, bound leather, firm front, fitted with removable tray and 2 cones ... Size, 20 x 16 x 18in., 18/6

Quality BX—Tan Canvas, iron frame, welted leather, firm front, fitted with 4 gauze cones—  
Size, 20 x 16 x 14in., 27/6

Quality DX—Special large size, Enamelled Canvas, steel frame, lined linen, firm front, fitted with 6 cones—  
Size, 23 x 20 x 20in., 45/-

Quality EX—As above, larger size, 24 x 22 x 22in., 50/-  
The Chelmsford Hat Box, special shallow shape, made to fit under berths on board ship, &c., Enamelled Canvas, steel frame, firm front, side handle, fitted with 2 cones ...  
Size 22 x 22 x 18in., 35/-  
" 22 x 24 x 18in., 44/-

Green Willesden Hat Boxes to match Trunks in all lines at a slight advance in price.

## COMPRESSED CANE HAT BOXES. STORK BRAND.

Best quality, patent steel frame, best locks and lining, fitted with removable cones, matching in color, quality and description Cabin and Imperial Cane Trunks—

Willesden Canvas ...		80/-	85/-	90/-

## CABIN AND SCARBORO' TRUNKS.

Our stock of Cabin and Scarboro' Trunks is the finest in the Southern Hemisphere. The Trunks are made at our Redfern Factory, from specially selected steel plates. Our customers, by purchasing from us, deal direct with the makers, and thereby save all intermediate profits.

## CABIN STEEL TRUNKS.

Made to fit under the bunks of steamers, but also very convenient and serviceable for train and general travelling.

No F11.

The Panama, standard size 36 x 21 x 14

The Panama Cabin Trunk, grained Oak, rounded corners, steel bands in lid and along bottom (No. F11) -

Sizes	27	30	33	36in.
	14/6	16/6	22/6	25/-

Two locks on the 39in. and 36in. sizes.

# ANTHONY HORDERN & SONS, LTD., ONLY UNIVFRSAL PROVIDERS

## CABIN TRUNKS.

No. F12.

The OCEANA, maximum size, 36 x 21 x 14.

The Oceana Cabin Trunk, made of steel plates, with square corners, is a handsome and very strong trunk. Steel bands extend right along bottom and inside lid. In addition to this it has two tubular bands and re-inforced corners (No. F14)—

Sizes	27	30	33	36in.
	18/6	21/-	27/6	34/-

Two locks, as illustration, on 33in. and 36in. only.

The Defiance Cabin Trunk, with rounded corners, solid steel bands encircle Trunk, and extend along the bottom. This Trunk is fitted with rollers, and can be strongly recommended.

Sizes	27	30	33	36in.
	22/6	27/6	33/6	37/6

The Sonoma Cabin Trunk, with square corners, handsomely grained, specially strengthened with wooden battens on top, bottom and sides—

Sizes	30	33	36in.
	40/-	44/-	48/-

The Sonoma has two locks on all sizes.

The Batavia Cabin Trunk, specially corrugated; steel bands along bottom, and inner lid band, brass lock and side supports (No. F13) -

Sizes	27	30	33.	36in.
	11/6	15/6	21/-	25/-

No. F14.

The BEAUMONT Trunk, maximum size, 33 x 22 x 11, weight, 36lbs.

Scarboro' Trunks, for home use or travelling. Made of steel, with strapped corners. Two stout bands extend along the bottom, extra bands being riveted inside the lid. Scarboro' Trunks are too deep to fit under cabin berths, but they are excellent trunks for home and school use, as well as Intercolonial travelling.

The Beaumont Trunk, neatly japanned, raised tubular bands on lid, steel bands along the bottom (No. F14)—

Sizes	26	28	30	33in.
	15/-	16/6	18/6	25/-

The Beaumont has two locks on 33in. only.

The Bombay Trunk, very similar in design to the Beaumont, but a higher-grade trunk of greater strength and finer finish.

Sizes	26	28	30	33in.
	22/6	25/-	27/6	33/-

Two locks on 33in. only.

No. F13

Anthony Horderns' Famous Low Prices, are for both town and country. To country customers ordering through the post the same prices are charged as to people buying over the counter, and the same goods are sent, for if it be true that the country helps the town, it is also true that Anthony Horderns' Famous Low Prices help the country.

# ANTHONY HORDERN & SONS, LTD., PALACE EMPORIUM, SYDNEY.

## STEEL AND AMERICAN TRUNKS, &c.

### THE AMERICAN TRUNK.

In the newest and strongest makes.

No. F17

Ladies' Hat or Bonnet Boxes, neatly japanned, and grained in Oak, fitted with small chains to keep lid in position, strong hasp and staple. Padlocks to fit same, -/6 each extra (No. F17) -

Sizes 14 16 18in. dia.

Quality AX—Round shape 3/11 4/6 5/6

Quality BX—Round shape.

superior quality and finish 4/9 5/6 6/6

Special large sizes to take fashionable Millinery, fitted with two wire cones to which Hats may be pinned and kept rigid -

Sizes 30 32 34in. dia.  
10/6 11/6 13/6

No. F18

The American Cabin Trunk, in regulation sizes.

This strong and excellent wearing Trunk is fitted with a handy tray, and being lined throughout will be found admirable for books and documents as well as for general travelling purposes (No. F18)—

Quality AX—Covered Canvas 30/- 32/6 35/-

Quality BX—better quality ... 33/- 36/- 40/-

Quality CX—Covered Leather 40/- 45/- 50/-

No. F19

The latest from New York patterns, but top American in style for Trunks. This design is now almost completely superseded the oval-shaped top. It is very commodious, it is quickly packed, easy to handle, in transit and possesses great strength. As can be seen from the illustration, the Trunk is well fitted with birdcage straps at corners as well as inside, the lock is of good quality and supported on each side by strong clips. Each Trunk is lined throughout and fitted with a convenient tray.

Sizes 30 32 34 36in.  
Quality BX—Covered superior Canvas ... 40/- 44/- 48/- 52/-

Quality CX—Covered Tan Leather ... 46/- 50/- 55/- 60/-

We shall be pleased to quote for lower and higher quantities, as new goods are constantly being stocked.

## THE GLADSTONE BAG.

WILLIAM EWART GLADSTONE, Statesman, Orator, and Author. Born 1809—Died 1898.

The Gladstone Bag, named after the great Liberal Statesman, continues to be one of the most convenient and serviceable bags yet invented, made with collapsible tops or gussets, superior spring lock, centre division, straps all round.

			Sizes	20	22	24	26in.

## POPULAR KIT BAGS.

For Business and Pleasure.

"To-day is short, yesterday has passed, to-morrow may not come, hence you have no time to waste, If you contemplate doing something, better be at it."—*Pittsburg Journal*.

Strength and capacity are the distinguishing features of this design of Bag. It has, as a result, many admirers who regard it as a most desirable travelling Bag (No. F21)—

Quality FX—Made of stout cowhide, steel frame, double handles, strong lock, hide riveted corners, straps all round, superior lining—

Sizes	20	22	24	26in.
	50/-	55/-	60/-	65/-

Quality EX—Cowhide Kit Bags, double handles, four capped corners, good lock, well-lined, excellent value—

Sizes	20	22	24	26in.
	42/-	45	50/-	55/-

## STRAPPED KIT BAGS.

No. F21

# POPULAR KIT BAGS.

"If all the year were playing holidays,  
To sport would be as tedious as to work."—  
*Shakespeare.*

## THE SENATOR BAG.

The Senator Bag is capacious in point of room, convenient in use, comfortable to carry, combining lightness with strength.

No. F22

The Week-end Strapped Kit Bags, with single handles, plain corners and side locks, straps all round, turn over clips (No. F22)—

Quality AX, as above—

	22/6	25/-	27/6	30/-

Quality BX—Superior quality and finish ... 27/6 30/- 33/- 37/6

The Kit Bag illustrated beneath is the most popular bag on the market. For purposes of business or pleasure, for daily use or week-end visits, no bag compares with it.

No. F24

Quality BX—All Cowhide, cloth lined, nickelled furniture—

(No. F24) ... 12/6 15/- 16/6 19/6

Quality CX—As above, in better quality ... 15/- 17/6 20/- 23/6

## THE ACME BAG.

The Acme Bag possesses real and tangible advantages over all other hand bags at present on the market; in the first place, it can be packed or emptied easily and quickly; secondly, it can be filled to the top, and thirdly, it retains its shape. These three points should make it a formidable rival to all other square bags.

No. F21

Quality BX—Cowhide, side pinch lock, lined cloth, turn over clips (No. F21)

Sizes	12	14	16	18in.
	12/6	15/-	17/6	20/-

## VARIOUS HAND BAGS.

### THE HERCULES BAG.

This design is made to carry heavy weights without fear of the handles coming off. The best quality is further strengthened by the straps of handles extending right round the bag; it thus becomes suitable for a bullion or cash bag.

No. P26

	Size	12	14	16	18in.
Quality AX—Cowhide Hercules Bag (No. P26)	—	12/6	15/-	17/6	20/-
Quality BX—Cowhide, top lock, superior lining...	—	15/	17/6	21/-	25/-
Quality EX—Cowhide, top lock, straps of handle all round bag, strongly sewn and riveted	—	19/6	22/6	25/-	30/-

### BULGE BRIEF BAGS.

These Bags differ in many respects from both the Brief and Square shape, being almost as roomy as the Square, yet sloping to the handle as does the Brief, thus combining great capacity with a nice appearance.

	Size	12	14	16	18 in.
Quality AX—All Cowhide, Cloth lined, nickelled furniture, good locks	—	10/6	12/6	15/6	18/6
Quality BX—All Cowhide, broad bottom, lined Leather, high-grade finish	—	14/-	16/6	19/6	22/6

### BRIEF BAGS.

At one time this shape of bag, as the name implies, was largely, if not exclusively, used by lawyer folk, but has since been adopted for the usages of everyday life for carrying lunch, books, papers, etc.

No. P28

Brief Bags, in case of Tint, assorted grainings (No. P28) —

	Size	10	12	14	16	18in.

Quality CX—Best finish nickelled lock, an excellent bag	—	6/6	8/6	9/6	11/6	13/6

No. P30

### TENNIS BAGS.

Made of genuine Cowhide, lined Cloth throughout, with Pockets to hold Racquets, &c. (No. P30)

35/-

**CUSTOMERS ORDERING BY POST** are treated in the same way as customers buying at the counter. The same prices are charged, and selections are made from the same stocks. Everything sent to the country is carefully packed by experienced men.

## PORTMANTEAUX AND SUIT CASES.

### LEATHER SUIT CASES.

The demand for Suit Cases has assumed very large proportions in recent years, and shews every sign of increasing.

The illustration represents a handsome and very durable case. The foundation is of durable material, covered with selected Cowhide. Every corner is capped and strongly riveted. Two superior slide nozzle locks give strength and security. The frame is of steel, and the case is lined with linen throughout.

No. F29. Quality DX

#### Leather Suit Cases--

HX and IX .. 16in. .. x 7 1/2in. ..

### PORTMANTEAUX.

Once upon a time the Portmanteau was an indispensable adjunct to travelling, but, like the Carpet Bag, it is giving place to newer and more convenient designs.

We, however, quote the following lines which, though not kept regularly in stock, can be made up on short notice.

No. F31—Quality BX.

Sizes 24 26 28 30in.

Quality AX—Solid leather Port- manteau, strong frame, brass lock, well sewn	83/- 86/- 89/- 93/-
---	---------------------

Quality BX—All Cowhide, deeper make ...		25/-	27/6	30/-	35/-

### "FLAXITE" OR "FORDITE" SUIT CASES.

The large and growing demand for "Flaxite" or "Fordite" Cases prove that their virtues are being generally recognised. When lightness and strength are united with attractiveness and convenience, the popularity of the article is assured, and our customers can rely upon getting the best make and finish in this up-to-date class of goods, as many of the leading lines are made specially to our designs.

For many years these cases were denominated Gentlemen's Suit Cases, but this restrictive style of nomenclature must be abandoned, because the fair sex, finding the shape well adapted for carrying their own apparel, are frequent buyers.

No. F36

	Size	30	32	34	26in.

## GENTLEMEN'S FITTED BAGS AND CASES.

Presentation Committees cannot do better than place their orders with us. Not only are our goods the newest on the market, but our prices for Fitted Bags are known to be extremely moderate.

No. F45

Gent's Fitted Suit Cases (No. F45) ... £8/8/-  
In other designs . . . £5/5/-, £7/7/-, £8/8/-, £10/10/-

This shape is much favored, being easy to pack and carry, and providing quick access to any article required. These Cases vary in length and depth, and in the number and method of arranging the fittings

No. F47

The Clarendon Gentlemen's Dressing Case, superior fittings and finish (No. F47) . . . 50/-, 55/-  
Numerous other designs, containing all the necessary to let requisites—

22/6, 27/6, 33/-, 40/-, 45/-, 50/- to £5/5/-

Particulars of any size or quality will be supplied on request

No. F46

Gent's Fitted Gladstone Bag, made of Cowhide, well lined and finished, containing the various requisites for Gentlemen (No. F46) 90/-, 95/-, £5/5/-, £6 up

No. F48

The Cambridge Gentlemen's Dressing Case, only one of many styles, admirably adapted for presentation (No. F48) . . . 33/-

Similar contents placed in other shaped cases

21/-, 25/-, 31/-, 37/6, 41/- to 63/-

# LADIES' DRESSING CASES.

The designs in Dressing Cases are not only so numerous, but are subject to such frequent change in regard to shape and arrangement of fittings as to render anything like complete illustration or description impossible. Our customers may rest assured that their wishes, in matters of shape of case, quantity and quality of contents, shall always receive our best attention.

No. F49

The Duchess Dressing Case, neatly fitted with toilet requisites for ladies (No. F49) ... 85/-, 40/-  
Numerous other pretty designs containing the necessary requisites for home use or travelling  
... 30/-, 35/-, 40/- to 25/6/-

No. F21

The Victoria Fitted Bag is but one of many shapes available. Most bags of a given value contain the same articles, the difference lying in the method of arrangement. The constant change of design and detail makes it difficult to illustrate the goods satisfactorily. The prices will vary in sympathy with the class of bag and the quality and number of its contents.

Approximately may be quoted in various designs (No. F 51) -

70/-, 80/-, 85/-, 90/-, 25, 26/6/-, 27/7/- upwards

No. F50

Ladies' Dressing Cases (No. F50) ... 21/-, 25/-, 40/-  
The illustration shows a Folding Dressing Case. It takes but little room in a box or bag, and is therefore much used in travelling.

We have a large assortment in this class of Case, the prices varying in accordance with the size and quality of Case, and the number of fittings therein -  
10/6, 12/6, 15/-, 17/6, 21/-, and up to 60/-

No. F52

The Belgrave, an attractive design in suitable fancy leather (No. F52) ... 18/6, 25/-, 27/6

Many different designs equally as good or better -  
at 12/6, 15/-, 17/6, 21/-, 22/6, 30/-, 40/-, 50/- up

ANTHONY HORDERN & SONS, LTD. ONLY UNIVERSAL PROVIDERS

## LADIES' AND GENT'S FITTED CASES.

No. 151

The Folding Dressing Case differs from the stiff or box shape, in so far that while it contains the same number of articles, the bulk of the case is much smaller; it is therefore better adapted for travelling as it takes up but little space in one's box or bag.

No. F54

The Brisbane (No. F54) ... .. 36/-

The design exhibits a superior Cowhide Folding Case fitted for a Gentleman's use, and is very completely furnished.

We have numerous other designs in various kinds of leather

12/6, 15/-, 18/6, 21/-, 25/-, 30/-, and up to 70/-

### Ladies' Fitted Travelling Cases (No. F53)—

£5/5/-, £6/8/-, £7/1/-, £7/10/-, £8/1/-, £8/10/-, £10/1/-

These handsome cases are made in convenient sizes and medium weights. Completely fitted with cloth and hair brushes, cut glass bottles for soap, perfume powder, tooth and nail brushes, comb, mirror, manicure implements, and other toilet requisites. These are neatly arranged in lid and around sides, leaving the centre of case free for articles of wearing apparel. Quality and contents vary according to price.

### FOLIO CASES.

Superior Folio Cases, fitted with numerous pockets for writing paper, envelopes, cards, etc. Loops for pens and pencils, blotting and writing pad. Indispensable to Commercial Travellers and business men generally.

## TRAVELLING RUGS.

"It is the coming Home that we go away for."

The truth of the above adage is often verified in the phrase "I'm glad to be back," heard from the lips of many travellers. Nor is it to be wondered at when the home returned to is in sunny Australia.

### WOOL SHAWL RUGS.

By a Shawl Rug is meant a Wool Rug with the ends fringed, thus adding attractiveness without diminishing usefulness. We offer a large choice of these Rugs, and lay many lands under contribution for our supplies. First, we turn to Australia, and from New South Wales and her sister States we procure Pure Wool Rugs, as beautiful in finish as they are choice in design and durable in wear, then we trip a-r-r-o-s-s to the little Island, discovered by Tasman, and run by "Tattersall;" thence to our cousins in Maoriland, and further away across the sea to England

and Scotland. From all these places we get the most delightful Rugs. Nor do our travels end with the countries named, for we are truly cosmopolitan. We seek the best value, the daintiest designs, the choicest colorings, and all these qualities, appearing in the Rugs we sell, are blended into splendid examples of . . .

### ANTHONY HORDERNS' FAMOUS LOW PRICES.

**Wool Shawl Rug.**—A fine assortment in serviceable colors, suitable for home, rail, or steamer use . . . 8/9, 8/6, 10/6, 12/6, 14/6

**Fine Warm Wool Rugs,** in better qualities, English and Scotch manufacture . . . 16/6, 17/6, 19/6, 21/-, 22/6, 25/-, 30/-, 42/-

**Australian Wool Rugs,** in specially selected qualities and designs—  
Beautiful Rugs made in Australia . . . 16/6, 25/-, 30/-, 40/-

### NEW ZEALAND RUGS.

We have a fine range of Rugs manufactured to our order in New Zealand. Rugs from the celebrated Mills of Mosgiel and Kaiapoi are stocked in large numbers, and the greatest care is exercised in the selection of quality and design.

**New Zealand Rugs** . . . 22/6, 25/-, 33/-, 42/-, 45/-, 50/-, 60/-

The average size of a Shawl Travelling Rug is 60 x 72in. The cheaper qualities are slightly smaller, while the better qualities measure 60 x 80in. Some even a little larger.

**Seal Rugs,** Plush finished. These favorite Rugs are too well-known to require eulogy or description. The smaller sizes are used for traveling, and the larger for bed covers and camping purposes. They combine a handsome appearance with remarkable durability—

Size—48 x 60in.	13/6, 15/-, 19/6
48 x 72in.	16/6, 17/6, 21/-
60 x 80in.	22/6, 25/-, 27/6
70 x 90in.	30/-, 35/-, 40/-

### WATERPROOF RUGS.

**Waterproof Rugs.**—To persons who drive a Waterproof Rug is an absolute necessity. If you wish to avoid catching cold, suffering from influenza, and becoming a martyr to rheumatism, make speedy provision against getting wet—buy a Rug—

# ANTHONY HORDERN & SONS, LTD. ONLY UNIVERSAL PROVIDER

## BUSH RUGS.

Warm Woollen Rugs made principally in Brown and Dark Grey shades, with stripes of brighter colors interwoven. The edges are neatly bound and the rugs much used in place of Blankets in the home, when camping out and wherever a good wearing article is needed. Stocked in the following four useful sizes:—

Size, 60 x 72 in. ... ..	5/6, 6/6, 7/6	Size, 70 x 90 in. ... ..	11/6, 12/6, 15/-
" 60 x 80 in. ... ..	7/6, 8/6, 10/8	" 80 x 100 in. ... ..	13/6, 16/6

## SUMMER DUST RUGS.

To all persons who drive, a Dust Rug is a necessary comfort, not only can the unpleasantness of dust-covered garments be obviated, but a rug spread across the knees tends to materially reduce the effects of the Sun's rays and thus adds coolness to cleanliness.

We have an exceptionally fine stock of Linen Dust Rugs in neat and serviceable designs, in Fancy Checks and Stripes, with fringed edges ... .. 2/6, 3/6, 4/6, 5/6, 6/6, 7/6 upwards

## HAMMOCKS.

Thousands testify to the comfort of a Hammock. Swung between shady trees or under the verandah, it affords, on hot summer days and sultry nights, a delicious coolness that acts like a charm, giving rest to weary limbs and peace to troubled minds. A most acceptable gift in the summer season.

### ENGLISH HAMMOCKS.

Made of superior flax twine, fitted with bead and foot spreaders, and tying ropes—

Serviceable Flax Twine ... ..	3/11, 5/6, 7/6
Superior White Whipcord ... ..	10/6, 11/6
Strong Brown Canvas (no spreaders)...	13/6, 15/6

### AMERICAN HAMMOCKS.

These favorite Hammocks are attractive in appearance, comfortable in use, and durable in wear. They are closely woven in well-blended colors: and the better qualities are fitted with pillow, and handsome valance ... 4/6, 5/6, 7/6, 9/6, 10/6, 12/6, 15/- to 25/-

## BETTING BAGS, BULLION BAGS, &c.

**Betting Bags.**—Some day, perhaps, due to the introduction of the totalisator or other cause, the Book-maker and his bag will cease to be; until such time we continue to stock Bags suitable for those who follow this ancient calling—

	Size 14	16	18 in.
Quality AX—Real Cowhide, lined tan Leather, with necessary pockets and slides, extra removable handle and broad plain Leather shoulder strap ... ..	30/-	33/-	36/-

## SCHOOL SATCHELS.

"The schoolboy with his Satchel in his hand,  
Whistling aloud to bear his courage up."  
—Robt. Blair

Our trade in School Satchels has assumed giant proportions, enabling us to stock a unique assortment of sizes and qualities. We can please the little fellow making, in fear and trembling, his first start, as well as the big boys and girls who, in advanced classes, carry little short of a small library.

### BOYS' AND GIRLS' LEATHER SATCHELS.

Boys' with Shoulder Straps.  
Girls' with N P. Handles.

No. P67.

**Water Glasses ... 1/4 each; 3/9 doz.**

## HARLING'S DRAWING INSTRUMENTS.

**Two Squares.**—The new Transparent Edge Tee Square. This Tee Square is made of well-seasoned Spanish Mahogany, and has a strap of thin celluloid let into a saw cut made in the edge of the blade, to which it is attached by means of rivets passing through elongated holes in the celluloid, which allows for shrinkage or expansion without the blade of the square becoming twisted—

Size, 32	36	42	54 in.
8/6	9/-	10/6	12/6 each

**Pear Tree, taper blade, best London make—**

Size, 24	32	36	42 in.
2/-	2/6	3/-	3/6 each

No. 7 " 62 " "	8/-
No. 5 " 40 " "	3/6
No. 6 " 50 " "	5/-
No. 4 " 26 " "	2/6

**Reeves' Greyhound Pastels.** These Pastels are specially manufactured by Reeves & Sons at their London Color Works to meet requirements of education authorities and drawing experts. The colors are strong, and have been most carefully chosen and graded. The composition of the Pastels approaches that of Artists' Pastels, being quite free from grit yet not too soft for school work.

1/2 per box of 9 colors; 1/10 doz. boxes

# ART AND EDUCATION.

Including many things without which either is impossible.

## DRAWING PAPERS.

### DIARIES.

Letts's, Colling's, and the Australian Diaries.  
Special Price List posted free on application.

## THE BENNETT TYPEWRITER.

The Bennett is the newest among Typewriters, and is constructed for hard usage. It embodies everything that is necessary for a high-grade machine, and includes Manifolding; Visible Writing; Universal Keyboard, with 84 characters; Perfect Alignment; Interchangeable Type; Easy Touch; Simple Ribbon Movement, and simplicity in every detail.

The Bennett is packed in neat Leatherette Case, and may be carried in any position; its portability makes The Bennett invaluable to Travellers and Tourists.

Every part of The Bennett Typewriter is made of the best chilled steel and gun metal, and the most skilled labor furnishes the workmanship. The TYPE FACE is identical with the larger machines. The adjustment is accurate, and the type alignment is safeguarded by a special device.

The Bennett contains only one-tenth as many parts as the larger machines, and there is consequently very little to get out of order.

The Bennett does nearly everything the most expensive machines do, and does it as easily and neatly. Ease of operation is one of its greatest recommendations, whilst for economy, convenience and portability it is unequalled.

The Bennett Typewriter will do beautiful clean-looking work which cannot be distinguished from that of the larger machines. It will write plainly and legibly the work of authors, the sermons of preachers, the briefs of lawyers, and the regular correspondence of a business man, and produces interesting work, teaching business methods, business forms and business exactness to the ambitious boy or girl.

Weight, 5 lbs. Size, 10 in. x 5 in. x 2 in.

Price, £4 12/6, Post Free N.S.W. Other States, £4 13/6.

ANTHONY HORDERN & SONS, LTD. ONLY UNIVERSAL PROVIDERS

## ALL KINDS OF LITERATURE.

The attention of our Patrons is particularly directed to the extra postage charges on books despatched outside the State of New South Wales. The Postage quoted is for New South Wales only.

When selecting Books for School Prizes or for presentation, in either large or small quantities, we advise customers residing in the country to leave the choice to us, as such a course will give the advantage of a variety from all the new Books, as well as from those already catalogued.

When ordering in this way, and leaving the selection to us, please state if the books are required for Boys or Girls, how many for each, and the ages of the intended recipients. Also say if there is a preference for any particular class of books.

Dozens of Books as quoted in this Catalogue may be made up from different series at the same price. It is not necessary to choose the whole of a dozen from one series.

## AUSTRALIAN TALES BY AUSTRALIAN AUTHORS.

Works by Ethel Turner (Mrs. H. R. CULLEWIS)

"Mrs Ethel Turner is Miss Alcott's true successor. The same healthy, spirited tone is visible which boys and girls recognised and were grateful for in 'Little Women' and 'Little Men,' the same absence of prudishness, and the same love of adventure."—*The Bookman*.

HANDSOME PRESENTATION VOLUMES AT POPULAR PRICES.

A Beautiful Edition of a Famous Book.

RUBAIYAT OF OMAR KHAYYAM

Translated into English verse by Edward Fitzgerald with an introduction by A. C. Benson. Reproduced from a manuscript written and illuminated by F. Sangorski and G. Sutcliffe. This is the most unique edition of Edward Fitzgerald's translation yet published. The illustrations in color and the decorative pages have been specially designed and illuminated in color and gold by F. Sangorski and G. Sutcliffe. Every page of the text has been engraved by hand in the legible style of the early manuscript writers and illuminated, and the whole reproduced in color from specially prepared plates. Size, 13in. x 9½in., bound in Cloth, with gorgeous design in gold on side and back. 17/6; by post, 18/2.

EDWARD VII. His Life and Times.

Edited by Sir Richard Holmes, K.C.V.O.

Profusely Illustrated with Special Plates, Original Drawings, Photographs and Engravings. Royal Edition. Two Volumes, large 4-to, size 18in. x 10in. Handsomely and specially bound in Half Morocco, Gilt edges, etc. 30/- set.

**Poems of Pleasure.** By Ella Wheeler Wilcox. A unique edition, designed, decorated and illuminated in color and gold by F. Sangorski and G. Sutcliffe. The text has been engrossed by hand in the legible style of the early manuscript writers, and each page has an original design in color. The opening pages are sumptuously decorated in color and gold, and the whole get up of the volume is exquisite. Bound in Vellum decorated cover. 18/-; by post, 18/8.

**Explorers of East, Centre and West of Australia.** By Ernest Favenc, with introduction by Sir John Forrest. Containing 800 pages with 64 illustrations (size 9in. x 6in.). Bound in Cloth, 12/-; full calf or full Morocco, 20/-; postage, -/6 extra.

**The Animals of Australia.** Mammals, Reptiles and Amphibians. By A. H. S. Lucas, M.A., and W. H. Dudley Le Souëf, C.M.Z.S. Containing 887 pages with 171 illustrations. Bound in Cloth, 14/6; full calf or full Morocco, 20/-; postage, -/6 extra.

# BLACKIE & SONS' PUBLICATIONS.

Form a selection of the best and most interesting books in the English language including lives of heroes ancient and modern, records of travel and adventure by sea and land, fiction of the highest class, historical romances, books of natural history, and tales of domestic life. The books are also remarkable for the entire absence of anything of a sectarian character, and thus are particularly adapted for prizes and gifts for all sorts and conditions of young people.

The greatest care has been devoted to the get up of the books. They are clearly printed on good paper, and the binding is specially durable, to withstand the wear and tear to which well-circulated books are necessarily subjected.

**The Universe:** or, The Infinitely Great and the Infinitely Little. By F. A. Pouchet, M.D. New Edition, with nearly 300 illustrations and 7 Colored Plates. Cloth extra, gilt edges. Published at 7/6. Our price, 6/- By post, 6/8.

BY COMMAND.

"THE LETTERS OF QUEEN VICTORIA."

Copyrighted in Great Britain and Dependencies by His Majesty the King. Complete in Three Volumes.

The Letters were originally published in Three Volumes at £3 3/-, and a Popular Edition is now issued, containing all the original matter included in the larger edition.

The Three Volumes contain over 1500 pages and 16 Full-page Illustrations, and are Bound in Red Cloth, Stiff Covers, Stamped in Gold.

The Volumes are of convenient size, pages 7 1/2 x 5 in., slightly smaller than the £3 3/- Edition, and are well printed in clear-faced type.

"The Letters of Queen Victoria" form an important addition to contemporary literature, and throw light on events connected with the Development of the British Empire ... 2/8 the set; by post, 3/1

Others in Preparation

By exclusive arrangement with "THE TIMES."

WIT AND HUMOR ARE THE SUNSHINE OF LIFE.

"PUNCH" IS THE EMBODIMENT OF WIT AND HUMOR.

WIT MAKES A MAN SMILE, HUMOR MAKES HIM LAUGH.

HAPPY IS THE MAN WHO CAN MEET WORRIES WITH A SMILE, AND DISAPPOINTMENTS WITH A LAUGH.

As a cure for the evils of life we recommend a course of...

# ANTHONY HORDERN & SONS, LTD. ONLY UNIVERSAL PROVIDERS

## ENCYCLOPÆDIA.

**Chambers' Encyclopædia.** A Dictionary of Universal Knowledge. Edited by David Patrick, LL.D., assisted by an experienced staff. In ten volumes Imperial 8vo., with numerous Maps and Wood Engravings. Prices of Complete Sets: Cloth, £5. Our price **22/10/-**.

### OPINIONS OF THE PRESS:

"In many ways the 'Britannica' is a work rather for the specialist than the ordinary man, whose wants are far better supplied by the brief but far more comprehensive notes of 'Chambers'. Indeed, in the present form, 'Chambers' is almost an ideal work of reference." — *Pall Mall Gazette*, 5th March, 1888.

"There is exhaustiveness in the selection of subjects, enterprise in securing apposite illustrations, and accuracy, clearness, completeness, and conciseness in the treatment of the articles." — *Times*.

"The best Encyclopædia ever brought out." — *Daily Chronicle*.

"This edition of Chambers' Encyclopædia is perhaps the cheapest book ever published." — *The Spectator*.

"Probably the best reference work in the world is 'Chambers' Encyclopædia.' Contains just what the average man wants to know upon any matter—no more and no less. It speaks with the voice of authority, but it never says too much. It approaches the ideas of its kind." — *Sheffield Independent*, 4th January, 1888.

**Nuttall's Encyclopædia.** Being a Concise and Comprehensive Dictionary of General Knowledge. For the Home, the Study, the School, the Office, the Busy Man, the Man of Business. Edited by the Rev. James Wood. Compact, Up-to-date, Universal in Scope. With upwards of 16,000 terse Articles on History, Geography, Theology, Literature, Science and Art. With Biographies of Eminent Men and Women of all Times. 3/6 Ed., Cloth bound, Our price, 2/9, by post 3/2.

**Royle's Everyman's Cyclopædia** of Biography, History, Geography, Law, Spelling, Abbreviations, Synonyms, Pseudonyms and general information. Edited by Arnold Villiers. Cloth bound, 6/6 pages. 4/-, by post, 4/4.

**Cassell's Cabinet Cyclopædia.** 2,340 pages. With about 600 Illustrations. Royal 8vo., cloth — 7/6. Our price, 7/-, by post, 8/-.

**The Everyman's Encyclopædia**, in 12 volumes. Edited by Andrew Boyle. Each volume will contain about 640 pages, and each page about 900 words. There will be about 500,000 words in each volume, and the complete work will contain about six million words. This total exceeds that of any other Encyclopædia published at double the price. The work will contain the largest number of articles and although it is so well written, and well printed, yet it will be by far the cheapest and most comprehensive Encyclopædia yet published.

Our price, cloth bound, 12/-, leather, 24/- per set. Postage or freight extra.

**The New Encyclopædia**, in one volume. The number of articles treated in this volume would seem incredible if one did not bear in mind their concise character. No subject which receives any treatment, beyond the slightest, even in the largest Encyclopædias, has been omitted, and many that are not mentioned in the most recent have articles allotted to them. This Encyclopædia claims to explain all the subjects which daily find their place in everyone's conversation and in the newspapers. The articles are as short as they can be made without sacrificing intelligibility. This is the secret of the vast amount of knowledge presented in so small a compass. Short articles have this advantage, that they present at a glance the facts one wishes to know. The New Encyclopædia contains in one volume of convenient size (10½ x 7 x 2½ in.) 1600 pages of small but legible type illustrated with numerous maps and illustrations. Strongly bound in cloth.

Our price, 7/8, postage extra.

## DICTIONARIES.

**Cassell's English Dictionary.** Published at 3/6. Our price, 3/-, by post, 3/5.

## THE "MODEL ENGINEER" SERIES OF HANDBOOKS.

-1/6 each net; by post, 1/7.

Small Accumulators How Made and Used. A practical Guide to the charging and using of Small Accumulators. Latest Edition. 40 Illustrations.	Simple Electrical Working Models: How to Make and Use Them. Contains full instructions for making a Model Electric Telegraph, an Electric Bell, a Simple Telephone, a Shocking Coil, and several forms of Small Electric Motors. Fully Illustrated.
The Slide Valve. Simply Explained. Specially written for Young Engineers and Apprentices, giving a clear and simple explanation of the working of the Steam Engine Slide Valve. Latest Edition. 36 Illustrations.	Small Dynamos and Motors: How to Make and Use Them. Latest Edition. Fully Illustrated.
Electric Bells and Alarms. Contains full instructions on selecting, fixing, maintaining, and repairing Electric Bells and Alarms. A capital book for Bell-fitters, Amateur Electricians, and Householders. Latest Edition. 31 Illustrations.	Induction Coils for Amateurs: How to Make and Use Them. Fully Illustrated.
Telephones and Microphones. A practical Handbook on the making and using of simple forms of Telephones and Microphones. Latest Edition. Fully Illustrated.	Model Steamer Building: Halls and Deck Fittings. Fully Illustrated.
Electric Batteries: How to Make and Use Them. Containing a full explanation of the construction and uses of numerous forms of primary batteries. Latest Edition. 34 Illustrations.	Small Electric Motors. How to Make and Use Them. Fully Illustrated.
Model Boiler Making. Contains full instructions for designing and making Model, Stationary, Marine and Locomotive Boilers. Latest Edition. Fully Illustrated with original working drawings.	Acetylene Gas. How to Make and Use It. Patents Simply Explained.
Metal Working Tools and Their Uses. A Handbook for Young Engineers and Apprentices. Shows how to use simple Tools required in Metal Working and Model Making. Fully Illustrated.	Simple Experiments in Static Electricity.
Simple Mechanical Working Models: How to Make and Use Them. Latest Edition. Fully Illustrated.	The Beginner's Guide to the Lathe.
Machinery for Model Steamers. Fully Illustrated.	The Locomotive Simply Explained.
Electric Lighting for Amateurs. Fully Illustrated.	X-Rays Simply Explained.
Magnets and Magnetism. Simply Explained.	Model Steam Turbines: How to Design and Build Them. Simple Scientific Experiments.
	Small Electrical Measuring Instruments.
	Mechanical Drawing. Simply Explained.
	Gas and Oil Engines Simply Explained.
	Guide to Standard Screw Threads, Twist Drills, small sizes.
	Model Steam Engines.
	Alternating Currents.
	Simple Photographic Experiments.
	Simple Chemical Experiments.
	Electrical Apparatus Simply Explained.
	The Wimschurst Machine.
	Optical Instruments, Simply Explained.
	Windmills and Wind Motors. Wireless Telegraphy.

# SCIENTIFIC AND TECHNICAL BOOKS.

## ELECTRICAL.

- First Book of Electricity and Magnetism. By W. P. Maycock ... 2/6; by post, 2/9
- Elementary Lessons in Electricity and Magnetism. By Sylvanus Thompson. Latest Edition— 4/3; by post, 4/6
- Practical Telephone Handbook. By Joseph Poole— 6/8; by post, 5/10
- Telephones and Lightning Conductors. By S. R. Bottone ... 2/- net; by post, 2/1
- Elementary Principles of Electric Lighting. Fourth Edition. Revised. With 16 Illustrations— 1/6; by post, 1/7
- Electricity in the Service of Man. A Popular and Practical Treatise on the application of Electricity in Modern Life. By R. Mulineux Walsley. With full Plates and over 1,200 illustrations. New Edition, in two Vols. ... each 7/6; by post, 8/1
- Electricity and Magnetism. A Popular Introduction. By S. R. Bottone. ... 2/6; by post, 2/8
- The Amateur Electrician's Workshop. A Handbook of Practical Instruction in the Making of Electrical Models and Appliances. By S. R. Bottone. With 31 Illustrations ... 1/6; by post, 1/7
- Elementary Electrical Engineering in Theory and Practice. A Class Book for Junior and Senior Students and Working Electricians. By J. H. Alexander. With 181 Illustrations, 3/6; by post, 3/9
- Electrical Engineering, for Students. By S. R. Bottone. Part I: Magnetism and Magnetic Apparatus. Part II: Static Electrical Instruments, with 49 Illustrations ... 2/6; by post, 2/8
- Electrical Engineering, for Electric Light and Power Artisans and Students embracing those branches prescribed in the Syllabus issued by the City and Guild's Technical Institute. By W. Slingo and A. Brooker. With 389 Illustrations, 12/-; by post, 12/6
- Modern Dynamos and Batteries for Amateurs and Students, being Vol. II. of Electrical Engineering. By S. R. Bottone. 110 Illustrations— 1/8; by post, 1/8
- How to Make a Dynamo. A Practical Treatise for Amateurs, containing numerous Illustrations and detailed Instructions for Constructing a Small Dynamo to produce the Electric Light. By A. Crofts— 1/10; by post, 2/-
- Practical Dynamo and Motor Construction. A Handbook of Constructive Details and Workshop Methods used in Building Small Machines. By A. W. Marshall. Fully Illustrated ... 1/-; by post, 1/2
- Dynamo Construction. A Practical Handbook for the use of Engineer-constructors and Electricians in charge. By John W. Urquhart. With numerous Illustrations. Revised and enlarged— 7/-; by post, 7/3
- Galvanic Batteries, their Theory, Construction and Use, containing Primary, Single and Double Fluid Cells, Secondary and Gas Batteries. By S. R. Bottone. With 144 Illustrations ... 4/8; by post, 4/9
- Secondary Batteries, their Theory, Construction and Use. By E. J. Wade ... 10/6; by post, 11/-
- Electric Bells and All About Them. A Practical Book for Practical Men. By S. R. Bottone. With 106 Illustrations ... 2/-; by post, 2/2
- How to Install Electric Bells, Annunciators and Alarms. By Norman H. Schneider. With 59 Original Illustrations ... 1/6; by post, 1/7
- A Guide to Electric Lighting, for the use of Householders and Amateurs. With 122 Illustrations— 1/-; by post, 1/2
- Electric Light, its Production and Use. By John W. Urquhart. With numerous Illustrations— 7/-; by post, 7/4
- Electric Lighting and Power Distribution. An Elementary Manual of Electrical Engineering. By W. Perren Maycock. In Two Volumes. 407 Illustrations and Complete Index— Vol. I., 6/-; by post, 6/4. Vol. II., 7/-; by post, 7/4
- Electric Light Fitting. A Handbook for Working Electrical Engineers, embodying Practical Notes on Installation Management. By John W. Urquhart. With numerous Illustrations. Fourth Edition, including the New Rules for Wiring for Supply of Electrical Energy ... 4/9; by post, 5/1
- High Frequency Currents, their Production, Physical Properties, Physiological Effects, and Therapeutic Uses. By H. Evelyn Crook ... 7/6; by post, 7/9
- Electric Wiring, Diagrams and Switchboards. By Newton Harrison, E.E. Contains 105 Illustrations, showing the Principles and Technique of the Art of Wiring ... 5/- nett; by post, 5/8
- Electric Wiring Tables. By W. Perren Maycock— 3/3; by post, 3/4
- Electrical Tables and Memoranda. By Silvanus P. Thompson and Eustace Thomas. ... 1/-; by post, 1/1
- Induction Coils and Coil Making. A Treatise on the Construction and Working of Spark, Medical and Spark Coils. By F. C. Allsopp. With 125 Illustrations ... 3/6; by post, 3/8
- Induction Coils. A Practical Manual for Amateur Coil-makers. By G. E. Bonney. With 135 Illustrations— 3/-; by post, 3/2
- Practical Induction Coil making. By John Pike. Illustrated with Original Photographs and Drawings— 1/-; by post, 1/2
- The Induction Coil in Practical Work, including Röntgen X Rays. By Lewis Wright ... 4/3; by post, 4/6
- Electro Motors; how Made and how Used. A Handbook for Amateurs and Practical Men. By S. R. Bottone. With 87 Illustrations ... 2/6; by post, 2/8
- Systems of Electric Ignition for Motor Cars. By Douglas Leechman ... 1/6; by post, 1/8
- Electrical Dictionary: A Popular Encyclopedia of Words and Terms used in the Practice of Electrical Engineering. By T. O'Connor Sloane, 7/6; by post, 8/-
- Electric Light for Country Houses: A Practical Handbook. By J. H. Knight ... 1/-; by post, 1/2
- Magneto and Electro Ignition. By W. Hibbert— 2/-; by post, 2/2

# SCIENTIFIC AND TECHNICAL BOOKS.

## TELEGRAPHY.

Practical Telegraphy. A Guide for the use of Officers of the Commonwealth Post and Telegraph Departments. By H. W. Jenvey. Fourth Edition. Revised and enlarged, containing Parts I and II—  
10/-; by post, 10/6

## WIRELESS TELEGRAPHY.

Wireless Telephones and How They Work. By James Briskine Murray, D.Sc. ... 1/-; by post, 1/8  
Wireless Telegraphy for Amateurs. By R. P. Howgrave-Graham. Fully Illustrated ... 1/10; by post, 2/-  
Wireless Telegraphy and Hertzian Waves. By S. R. Bottonne. With 39 Illustrations ... 2/6; by post, 2/8  
Wireless Telegraphy and Telephony. By Professor Mazzotto. Translated from the original Italian by S. R. Bottonne. 238 Illustrations ... 3/6; by post, 3/9  
Wireless Telegraphy and Telephony. With 100 illustrations. By W. J. White ... 2/6; by post, 2/9  
A Handbook of Wireless Telegraphy: Its Theory and Practice. For the use of Electrical Engineers, Students, and Operators. By James Erskine-Murray, D.Sc. Third Edition. Revised and Enlarged ...  
10/6 net; by post, 11/-

## ENGINEERING.

Screw Threads and Methods of Producing Them. With numerous Tables and complete Directions for Using Screw-cutting Lathes. Waistcoat pocket size—  
1/5; by post, 1/6  
The Rudiments of Civil Engineering. By Henry Law. Including a Treatise on Hydraulic Engineering. By George R. Burnell. Seventh Edition. Revised. With large additions on recent practice in Civil Engineering. By D. Kinnear Clark—  
5/6; by post, 5/10  
Cassell's Engineers' Handbook. Comprising Facts and Formulae, Principles and Practice in all Branches of Engineering. By Prof. Henry Adams—  
7/6; by post, 8/-  
Tools for Engineers' and Woodworkers, including modern Instruments of Measurement. By J. Horner  
8/-; by post, 9/6  
Pocket Book of Useful Formulae and Memoranda for Civil, Mechanical and Electrical Engineers. By Sir Guilford and Henry B. Molesworth. With an Electrical Supplement by Walter H. Molesworth—  
5/-; by post, 5/1  
The Engineer's Pocket Companion and Practical Educator for Engine-men, Boiler Attendants and Mechanics. By Michael Reynolds. With 45 Illustrations and numerous Diagrams. ... 3/3; by post, 3/5  
Tables, Memoranda and Calculated Results for Mechanics, Engineers, Architects, Builders' Surveyors, &c. Selected and arranged by Francis Smith—  
1/5; by post, 1/6  
The Young Engineer and Amateur Carpenter and Electrician ... 3/6; by post, 4/-  
The Portable Steam Engine. A practical Manual on its Construction and Management. By W. D. Wansborough ... 5/3; by post, 5/6  
Lockwood's Dictionary of Mechanical Engineering Terms. Edited by J. G. Horner— 7/6; by post, 7/11  
Mechanics' Workshop Companion. By Wm. Templeton. Revised and enlarged by W. S. Hutton—  
5/6; by post, 5/9  
The Engineer's Master Key. A Handbook for all in charge of, or connected with Steam Engines, Pumps, Boilers, &c. By L. F. R. Schnabel, M.I.M.E.—  
5/6; by post, 5/9

The Model Engineer's Handy Book. By Paul N. Hasluck. With upwards of 100 Illustrations, -7/1; by post, 1/1  
The Care and Management of Stationary Steam Engines. By Chas. Hurst ... 1/-; by post, 1/2  
Text Book on the Steam Engine, with a Supplement on Gas Engines, and Part II. on Heat Engines. By T. M. Goodeve ... 5/6; by post, 5/10  
Locomotive Engine Driving. A Practical Manual for Engineers in charge of Locomotive Engines. By Michael Reynolds. Comprising, besides other additional matter, a Key to the Locomotive Engine. With numerous Illustrations ... 4/-; by post, 4/8  
Stationary Engine Driving. A Practical Manual for Engineers in charge of Stationary Engines. By Michael Reynolds. With numerous Illustrations. Cloth Cover ... 4/-; by post, 4/8  
The Engine Driver's Guide for the Management, Care and Working of Steam Boilers, Engines, Pumps, etc. With 100 Engravings. By A. C. Wannan. With two new chapters on Condensing Engines, by A. D. Wannan ... 5/-; by post, 5/8

## MARINE ENGINEERING.

Reed's Guide to the use and management of Yacht, Trawler and Launch Engines, including Deck and Auxiliary Machinery. By J. Denholm Young. Illustrated by 12 Plates and 120 Diagrams—  
7/6; by post, 7/10  
Wannan's Marine Engineer's Pocket Book, containing the latest Board of Trade Rules and data for Marine Engineers. Illustrated by A. C. Wannan—  
4/6; by post, 4/7  
Wannan's Marine Engineer's Guide, for Board of Trade Examinations for Certificate of Competency, containing all the latest questions to date, with simple, clear and correct solutions; with notes on beams, boilers, mechanical power, and the latest B.T. Regulations. By A. C. Wannan and D. Lindsay. Illustrated with sketches. 5th edition. Revised and enlarged. 2 vols. -  
12/- net; by post, 12/7  
Marine Engineers. 302 elementary questions for Marine Engineers with illustrated answers. By A. C. Wannan and J. W. Sothorn ... 3/6; by post, 3/8

## GAS AND OIL ENGINES.

On Gas Engines, with Appendix describing a recent Engine with Tube Igniter. By T. M. Goodeve—  
2/3; by post, 2/5  
Gas Engines: their Advantages, Action and Application. By W. A. Tookey ... 1/-; by post, 1/1  
Gas Producers for Power Purposes. By W. A. Tookey—  
1/-; by post, 1/1  
The Gas Engine Manual. A Practical Handbook of Gas Engine Construction and Management. By W. A. Tookey ... 3/6; by post, 3/9  
Gas and Petroleum Engines. By A. G. Elliott. With 53 Illustrations ... 2/3; by post, 2/5  
Oil Engines: their Selection, Erection and Correction. By W. A. Tookey ... 1/-; by post, 1/1  
Gas and Oil Engine Management. A practical guide for users and attendants ... 3/6; by post, 3/9  
Lighting by Acetylene. By W. E. Gibbs 7/-; by post, 7/2

## MOTORING.

The Autocar Handbook. A Guide to the Motor Car. Third Edition. Entirely Revised. Illustrated. ... 1/6; by post, 1/8  
The Car Encyclopedia of Component Parts, Motoring Definitions and Terms. Compiled by Chas. Braun. Edited by Lord Montagu ... 1/-; by post, 1/1

# SCIENTIFIC AND TECHNICAL BOOKS.

## MOTORING.

- Motor Car Mechanics for Beginners. An ABC of Automobile Construction, with Explanatory Diagrams. By G. Foster Peckley ... 1/-; by post, 1/1
- Practical Motor Car Repairing. A Handbook for Motor Car Owners' and Drivers'. By Eric W. Walford— 1/-; by post, 1/2
- The Motor Manual. Illustrated by 160 specially prepared Diagrams. Enlarged to 200 pages. Compiled and Illustrated by the staff of the "Motor" — 1/6; by post, 1/8
- Motor Cycling Manual. A Complete Guide to the Motor Cycle ... 1/9; by post, 1/11
- Motor Mechanics' Handbook. By F. H. Rogers and G. W. Watson ... 2/6; by post, 2/9
- Petrol Motors Simply Explained. A Practical Handbook on the Construction and Working of Petrol Motors. By T. H. Hawley ... 1/-; by post, 1/2
- The Chauffeurs' Companion ... 1/3; by post, 1/5
- Hints and Tips for Motor Cyclists ... 1/-; by post, 1/1
- Complete Hints and Tips for Automobileists— 2/6 net, by post, 2/8
- Motor Cycles, and how to Manage them 1/-; by post, 1/2
- Motor Cyclists' Handbook. A practical Manual on the construction and management of Motor Cycles. Fully illustrated ... 2/-; by post, 2/2
- Motor Boat Manual ... 1/8; by post, 1/8
- Magneto for Automobiles: How Made and Used. A Handbook of practical instruction and adaptation of the Magneto to the needs of motorists. By S. R. Battone ... 2/-; by post, 2/2

## NAVIGATION, AVIATION, &c.

- A Rudimentary Treatise on Navigation. Part I.: How to Keep the Log and Work It Off. Part II.: On Finding the Latitude and Longitude. By James Greenwood, B.A. With numerous Woodcuts and Colored Plates of Flags ... 8/-; by post, 8/4
- Model Sailing Yachts. How to Build, Rig and Sail Them. By Percival Marshall ... 1/-; by post, 1/2
- Models, and How to Make Them. Instructions for Building a Steam Locomotive. Model Steamboat, Electric Motor, Telephone, Turbine, etc. By Cyril Hall ... 7/-; by post, 7/6
- Flying Machines: Past, Present and Future. By A. W. Marshall and H. Greenby. Fully Illustrated— 1/-; by post, 1/2
- Model Aeroplanes. How to Build and Fly them. By B. W. Twining ... 1/-; by post, 1/1
- The Aeroplane Portfolio ... 1/-; " 1/1

## LATHES AND LATHE WORK.

- The Possibilities of Small Lathes. By Jas. Lukin— 1/6; by post, 1/8
- Simple Decorative Lathe Work. With 73 Illustrations. By Jas. Lukin ... 2/-; by post, 2/2
- Lathe Work. A Practical Treatise on the Tools, Appliances and Processes in the Art of Turning. By Paul N. Hasluck. With numerous Engravings drawn by the Author ... 4/9; by post, 5/-
- Toothed Gearing. A Practical Handbook for Offices and Workshops. By Joseph Horner. Illustrated with 184 Engravings ... 5/6; by post, 5/9
- English and American Lathes. By J. G. Horner. With 300 Illustrations ... 5/8; by post, 5/10
- Screw Threads and Methods of Producing Them. By Paul N. Hasluck ... 1/5; by post, 1/6

- The Principles of Fitting. By J. G. Horner— 5/-; by post, 5/3
- The Lathe and its Uses; or Instructions in the Art of Turning Wood and Metal. 10/8; by post, 10/10
- One Hundred Questions on Fitting and Turning. By James Hanley ... 1/9; by post, 1/11
- Turners' and Fitters' Handbook. By T. Greenwood— 2/-; by post, 2/1

## PRACTICAL MECHANICS.

- Elementary Manual on Applied Mechanics. By Andrew Jameson. Numerous Diagrams. Arithmetical Examples, etc. ... 3/6; by post, 3/9
- The Slide Rule and How to Use It. By Chas. Moore. With a Slide Rule in tack of cover 2/3; by post, 2/4
- The Slide Rule. A Practical Manual. By Chas. N. Pickworth ... 1/10; by post, 2/-
- The Steel Square and Its Uses. Simply explained. Illustrated. (Cassells' ed.) ... 2/-; by post, 2/2
- The Carpenter's Steel Square and its Uses. By Fred. T. Hodgson. Illustrated by nearly 100 Engravings— 2/-; by post, 2/2
- Cassell's Cyclopaedia of Mechanics' Memoranda for Workshop Use. Based on Personal Experience and Expert Knowledge. In 5 volumes. With about 6,500 Illustrations and an Index of about 30,000 items. Edited by Paul N. Hasluck 7/6 net each; by post, 8/3
- The Amateur Companion to the Workshop. Edited by Guilbert Pitman. With 66 illustrations— 1/8; by post, 1/8
- The Mechanic's Workshop Handybook. By Paul N. Hasluck ... 7/-; by post, 7/1
- Text Book of Applied Mechanics. With numerous Diagrams and Examples. By the late Henry Cryer and Henry G. Jordan ... 3/-; by post, 3/3
- Every Man His Own Mechanic. A Complete and Comprehensive Guide to every description of Constructive and Decorative Work that may be done by the Amateur Artisan at Home and in the Colonies. By Francis Young. Illustrated with 850 Engravings on Wood and large Workshop Receipts 6/6; by post, 7/1
- Manual of Machine Drawing and Design. By D. A. Low and A. W. Bevis ... 7/-; by post, 7/6

## BOILER MAKING.

- Boiler Making and Plating. A Practical Handbook for Workshop operations. By J. G. Horner— 7/-; by post, 7/6
- The Boilermaker's Assistant in Drawing, Tempering and Calculating Boiler Work and Tank Work, &c. By J. Courtney ... 1/10; by post, 2/-
- The Principles and Practice of Boiler Construction. By W. D. Cruikshank. Second Edition. Revised and enlarged ... 14/6; by post, 14/10

## PATTERN MAKING.

- The Pattern Maker's Handbook. By Paul Hasluck. With upwards of 100 Illustrations, 7/11; by post, 1/1
- Practical Pattern Making. By Paul Hasluck— 1/8; by post, 1/11
- Pattern Making. A Practical Guide on the Art of Making Patterns for Engineering and Foundry work. By F. W. Barrows ... 8/-; by post, 8/6
- Pattern Making. Embracing the Main Types of Engineering Construction. By J. G. Horner— 7/6; by post, 8/-

# SCIENTIFIC AND TECHNICAL BOOKS.

## METAL WORKING.

- The Metal Turner's Handbook. By Paul Hasluck. With upwards of 100 Illustrations. 11/-; by post, 1/1  
 Metal Turning. By Joseph G. Horner. Illustrated with 81 Engravings. 3/6; by post, 3/8  
 Metal Turning. A Practical Handbook for Engineers, Technical Students and Amateurs. By J. G. Horner. 9/-; by post, 9/6  
 Metal Working. A Book of Tools, Materials and Processes for the Handy Man. Edited by Paul N. Hasluck. 7/6; by post, 8/2  
 The Sheet Metal Worker's Guide. A practical Handbook for Tinmiths', Coppermiths', etc. by W. J. B. Crane. 1/5; by post, 1/6

## ARCHITECTURAL.

- Australian Architecture. A Technical Manual for all those engaged in Architectural and Building Work. By Robert J. Haddon. 15/-; by post, 15/3  
 A Handbook of Formulae, Tables and Memoranda for Architectural Surveyors, and others engaged in Building. By J. T. Hurst. 5/-; by post, 5/2  
 Hints to Young Architects. By George Wightwick. 3/-; by post, 3/2  
 Examples of Cheap Dwellings. Over 200 Plans, Sections, Details and Specifications selected from the "Building World." By Paul N. Hasluck. 1/-; by post, 1/2  
 Mayes' Australian Builders' and Contractors' Price Book. 7/-; by post, 7/2  
 General Building: Art and Practice. A Complete Guide to all Processes belonging to the Building Trade that can be carried out by the Amateur Artisan. With 224 Illustrations and Diagrams. 1/0; by post, 1/-  
 Rudimentary Treatise on the Erection of Dwelling-houses. Illustrated by a Perspective View, Plans, Elevations and Sections of a Pair of Semi-detached Villas, with the Specifications, Quantities and Estimates, &c. By S. H. Brooks. 2/8; by post, 2/5  
 Suburban Homes: their Accessories and Embellishment. By J. H. Woolfitt. With 70 Illustrations. 1/6; by post, 1/8  
 Bungalows: their Design, Construction and Furnishing. With suggestions also for Camps, Summer Homes and Cottages of a similar character. By Henry H. Saylor. 8/6; by post, 7/-

## DRAWING FOR DRAUGHTSMEN, ENGINEERS, &c.

- Machine Construction and Mechanical Drawing. By the late Thomas Cryer and Henry G. Jordan. Eleventh Edition. 3/-; by post, 3/3  
 Practical Draughtsmen's Work. By Paul Hasluck. 1/10; by post, 2/-

## BUILDING AND CONSTRUCTION.

- Building Construction, comprising Notes on Materials, Processes, Principles and Practice, including 2,284 Engravings and 12 Plates. By Prof. Henry Adams. 7/6; by post, 8/1  
 The Elements of Building Construction and Architectural Drawing, with 144 Illustrations Drawn on Wood by the Author. By Ellis A. Davidson. 1/10; by post, 2/-  
 The Principles of Construction in Arches, Piers, Buttresses, &c., being a series of Experimental Essays, made with a view to their being useful to the Practical Builder. By William Bland. With numerous Illustrations. 1/5; by post, 1/7  
 The Rudiments of Practical Bricklaying. By Adam Hammond. 1/5; by post, 1/7

- Practical Brickwork. With numerous Engravings and Diagrams. By Paul N. Hasluck. 1/10; by post, 2/-  
 Mortars, Plasters, Stuccos, Artificial Marbles, Concretes, Portland Cements and Compositions, etc. By Fred. T. Hodgson. Profusely Illustrated. 4/6; by post, 4/10  
 Rudimentary Treatise on Limes, Cement, Mortars, Concretes, etc. By G. Burnell. 1/5; by post, 1/7  
 The Practical Plasterer. A Compendium of Plain and Ornamental Plaster Work. By Wilfred Kemp. With 52 Illustrations. 1/10; by post, 2/4  
 Australian Building Practice. A Treatise for Australian Students of Building Construction. By James Nangle, F.R.A.S. With numerous Illustrations. 10/-; by post, 10/3  
 A Handbook on Reinforced Concrete for Architects, Engineers and Contractors. By F. D. Warren. 10/6; by post, 10/9  
 Graphical Handbook for Reinforced Concrete Designs. By John Hawksworth. 12/-; by post, 12/6

## SURVEYING.

- Land and Engineering Surveying. For Students and Practical Use. By T. Baker, C.E., and F. E. Dixon, C.E. Twenty-first Edition, with numerous Illustrations. 1/10; by post, 2/-  
 Practical Surveying. A Text Book for Students Preparing for Examinations or for Survey Work in the Colonies. By G. W. Usill. With 4 Lithographic Plates and 360 Illustrations. 7/-; by post, 7/4  
 Surveying. As Practised by Civil Engineers and Surveyors. By John Whitelaw. 10/6; by post, 11/-  
 Australasian Roads. A Treatise: Practical and Scientific—on the Location, Design, Construction and Maintenance of Roads and Pavements. By John Montgomery Coane, Henry Edward Coane, John Montgomery Coane, jun. With numerous Illustrations. 15/-; by post, 15/4  
 Surveying. Land and Marine. In reference to the Preparation of Plans for Roads and Railways, Canals, Town Water Supplies. With Description and Use of Surveying Instruments. By W. D. Haskell. 8/6; by post, 8/-

## PROSPECTING AND ASSAYING.

- Australian Prospector's Pocket Book. By G. A. Goyder. 1/1; by post, 1/1  
 The Prospector's Handbook. A Guide for the Prospector and Traveller in search of Metal-bearing or other valuable Minerals. By J. W. Anderson. 3/-; by post, 3/2  
 Gold Assaying. By Joshua Philips. With numerous Illustrations. 7/6; by post, 7/9  
 Prospecting for Gold. By Daniel J. Rankin. With Illustrations specially Drawn and Engraved for the Work. 7/-; by post, 7/8

## PAINTING AND DECORATING.

- Paint and Color Mixing. A Practical Handbook for Painters, Decorators, etc., containing 287 samples of Actual Oil and Water Colors, including the principal Graining Grounds, and upwards of 800 different Color Mixtures, with instructions on Color and Print Mixing generally, Testing Colors, etc., etc. With 13 Colored Plates. By Arthur S. Jennings. 5/6; by post, 5/10  
 Painters' Oils, Colors and Varnishes. With numerous Engravings and Diagrams. By Paul N. Hasluck. 1/10; by post, 2/-  
 Practical Painters' Work. With numerous Engravings and Diagrams. By Paul N. Hasluck. 1/10; by post, 2/-

# SCIENTIFIC AND TECHNICAL BOOKS.

## PAINTING AND DECORATING.

- A Practical Manual of House Painting, Graining, Marbling and Sign Writing. With 9 Colored Illustrations of Woods and Marbles, and numerous wood Engravings. By Ellis A. Davidson—  
Cloth Cover, 5/6; by post, 5/9
- Elementary Decoration. A Guide to the Simpler Forms of Everyday Art, as applied to the Interior and Exterior Decoration of Dwelling Houses. By James W. Facey ... .. 1/10; by post, 1/11
- Practical House Decoration. A Guide to the Art of Ornamental Painting. By James W. Facey. With numerous Illustrations ... .. 3/8; by post, 2/5
- Decorative Painting. A Practical Handbook of Painting and Etching upon Various Objects and Materials for the Decoration of our Homes. By B. C. Seward—  
3/3; by post, 3/6
- Practical Graining and Marbling. With numerous Engravings and Diagrams. By Paul N. Hasluck—  
1/10; by post, 2/-
- The Painter's Pocket Book. A reference guide in everyday work. Edited by Arthur S. Jennings—  
3/-; by post, 3/2
- Practical Stencil Work. By Fredk Scott Mitchell—  
3/-; by post, 3/2

## CARPENTRY, JOINERY, &c.

- Wood Turners' Handbook. By Paul N. Hasluck—  
-11; by post, 1/1
- Ornamental Turning. By J. H. Evans. With numerous Engravings and Plates. In 3 volumes—  
3/6 each; by post, 3/8
- Ornamental Turning. Complete popular edition. By J. H. Evans ... .. 5/-; by post, 5/5
- The Wood Worker's Handbook. By Paul N. Hasluck—  
-11; by post, 1/1
- Wood Working. A Book of Tools, Materials and Processes for the Handyman. Edited by Paul N. Hasluck. With 2545 Illustrations and Working Drawings ... .. 8/8; by post, 9/2
- Carpentry and Joinery. By Thos. Simmonds. With numerous Illustrations ... .. -10; by post, -11
- Elementary Principles of Carpentry. By T. Tredgold. And a Treatise on Joinery. By E. Wyndham Tarn—  
3/-; by post, 3/2
- Elementary Carpentry and Joinery. A description of the Timber, Tools, and simple processes used in Building and Wood working, etc. With 257 Illustrations, Diagrams, etc. ... .. -10; by post, 1/-

TRUCK

## THE "ORIOLE" CHAIR PRAM.

WITH RUBBER  
TYRED WHEELS.

Prices vary according to  
quality of Basketware.

Wheels, &c, are the same  
in all Frames.

### Directions for Using.

The Pram, as it leaves  
the Factory, is folded as  
a Baby Chair.

1. To wheel, place the  
child in Pram, and secure  
child with the strap; with  
right hand lift handle right  
up as far as it will go, then  
with left hand slightly lift  
pram to ease weight of  
wheels, at the same time  
drawing handle back to its  
full extent with right hand  
till the side spring catches  
on lowest notches.

Should the baby fall  
asleep, alter the angle of  
pram by lowering handle  
to catch first notch on  
spring.

To use as a chair, or to  
carry, release springs by  
pulling cord up at back  
push handle forward and  
then down.

By an ingenious contri-  
vance which in an instant  
switches the wheels out  
of sight, it fulfils the pur-  
poses of

### A Basinette for Baby to sleep in

**A Basket Chair**  
to carry baby in when  
entering or alighting from

# Bicycles Built of the Genuine B.S.A. Fittings.

Best Dunlop Tyres guaranteed for 12 months. Cassette Tyres guaranteed for 6 months.

IN STOCK OR BUILT TO ORDER AT OUR OWN WORKS.

Among the many trades we follow is that of Bicycle Builders, and in this capacity we have met with the success which generally follows pluck and perseverance.

## THE "UNIVERSAL" BICYCLE

made at our Factory will be found worthy of attention, and we wish it to be distinctly understood that all the B.S.A. machines we sell are fully warranted. Genuine Dunlop Tyres carry the Company's liberal 12 months' guarantee.

BUILT TO ORDER AND IN STOCK. ALL GENUINE B.S.A. PARTS.

THE BICYCLE BUILT TO ORDER AT OUR OWN WORKS.

### FRANCIS BIRTLES

...SELECTED...

### ANTHONY HORDERNS'

### "UNIVERSAL" BICYCLE

Built at our Own Factory, of B.S.A. parts, for his great ride all round Australia. The machine carried a weight of nearly 24 cwt., having first been ridden by the overlander from Perth to Sydney, in 1909, a distance of 3056 miles.

Francis Birtles on The "Universal" Bicycle.

### THE "UNIVERSAL" BICYCLE

Built by the highest skilled labor at our Own Factory, has demonstrated its worth as a reliable roadster, the identical machine ridden by Birtles on his Perth to Sydney trip, being used for his long ride all round Australia.

BUILT OF

GENUINE B.S.A. PARTS.

## SPECIFICATION.

**FRAME.**—Best weldless, double butted, steel tubing, D stays narrow tread, beautifully enamelled black.

**FRONT FORKS.**—Box crown, D shaped sides, fork crown plated on copper.

**WHEELS.**—28in. x 1 1/2in. or 1 1/4in., double butted plated spokes, Westwood steel rims, specially enamelled.

**HUBS.**—B.S.A., oil-retaining, plated on copper.

**CHAIN WHEEL.**—4in. or 1in., detachable, 22 to 26 teeth, or 44 to 52 x 1/2in. or 1in.

**CRANKS.**—Detachable, 6 1/2in. or 7in., right and left threads, square.

**HANDLE BARS.**—Reverable or fixed, with cork grips.

**SADDLE.**—English.

**CHAIN.**—B.S.A., 1/2in. or 1in. roller or block.

**PEDALS.**—3 1/2in. B.S.A., ruttrap, cross stays, right and left threads.

**TOOLS.**—Set of 3 B.S.A. wrenches, with tool bag.

**BRAKE.**—Duck, thumb

**FINISH.**—Black enamel of the highest quality, all bright parts heavily plated on copper.

**TYRES.**—Best Dunlop-Welch vulcanised, fully guaranteed.

This Machine, complete with Inflator and Oilier, fully guaranteed for 12 months ... .. £11/-

Can also be supplied fitted Dunlop Oceanic Vulcanised Tyres Guaranteed by Company for 6 months £10/-

The same machine, fitted with Eadie Coaster Hub, which includes free wheel, back pedalling brake and Dunlop tyres ... .. £11/10/-

With genuine B.S.A. free wheel clutch, and Bowden rim brake ... .. £12/10/-

With Eadie Two speed Coaster Hub, including free wheel on both gears, back pedalling brake (as used by Birtles, the overlander), and Brooks' saddle ... .. £12/10/-

Ladies' B.S.A. Bicycle, as above, including Celluloid Gear Guard ... .. 20/- extra

When ordering Cycles please state inside leg measurement.

**CUSTOMERS ORDERING BY POST** are treated in the same way as customers buying at the counter. The same prices are charged, and selections are made from the same stocks. Everything sent to the country is carefully packed by experienced men.

# ANTHONY HORDERNS' BUSHMEN'S UNIVERSAL BICYCLE.

Built of Genuine B.S.A. parts at our Redfern Factory.

NOTE the  
Strengthening Stays  
to stiffen  
FRAME.  
rendering this  
Machine the  
STRONGEST  
MODEL MADE

## SPECIFICATION:

**FRAME.**—Best Weldless Steel Tubing, Double Butted. This is a specially strengthened frame. The front forks being supplemented with girder front forks, and also fitted with pair of extra back stays, these making it very convenient for strapping tanks for carrying water, making it, at the same time, an almost unbreakable frame.

**WHEELS.**—28 x 1 1/4 in. Double butted spokes, Westwood steel rims, specially enamelled.

**HUBS.** B.S.A. front hub, Eadie Two speed Coaster back hub, which includes free wheel on both gears, also back pedalling brake on each gear.

**CHAIN WHEEL.**—1/2 x 1 1/2 or 1 1/4 in., 48 or 52 teeth.

**CHAINS.**—7 in. right and left hand threads.

**HANDLE BAR.**—Flat, half dropped, Major Taylor or Kelly.

**SADDLE.**—Brooks' B 10.

**CHAIN.**—B.S.A. 1/2 or 1 1/4 x 1/4 in. roller.

**PEDALS.**—4 in. Rattrap.

**TOOLS.**—Set of 3 B.S.A. wrenches with tool bag.

**BRAKE.** Front rim brake.

**FINISH.**—Black Enamel of highest quality, all bright parts heavily plated on copper.

**TYRES.**—Dunlop Bushmen's covers and heavy Dunlop tubes.

This Machine is complete with Inflator and Oiler, fully guaranteed for 12 months ... Price £13/10/-

This is a Bicycle we can specially recommend to Bushmen, Shearers, etc., as a reliable machine, and will stand any amount of rough usage.

ANTHONY HORDERN & SONS, LTD. ONLY UNIVERSAL PROVIDERS

BICYCLES BUILT OF B.S.A. FITTINGS.

LADY'S "UNIVERSAL" BICYCLE.

**Lady's Universal Bicycle**, fitted with Badde Coaster Hub including Free Wheel and Back Pedalling Brake, Blumel's Celluloid Gear Guard, complete with Dunlop Tyres, Inflator, Oiler, Tool Bag, and set of Tools—

**Lady's Universal Special** ... .. £12/10—  
£13/10—

The Lady's fittings are designed to take 28in. wheels, with clearance for 1½in. tyres, a frame very taking in appearance, the lines of which have been very carefully considered.

### B.S.A. IN TOWN AND COUNTRY.

There is no doubt that the majority of the cycles used in Australia are not required for racing purposes, but as a very necessary means of locomotion, and it is in this respect that the Universal Bicycle stands pre-eminent. We have already touched on the great importance of interchangeability, which can only be fully realised by the unfortunate cyclist who has purchased an imported bicycle and finds that in the event of any breakage his bicycle has to be laid up five or six months pending the special importation of duplicate parts. A rider of a Universal cycle need never fear this, as, being built of B.S.A. parts, wherever he is and of whatever date his bicycle may be, he will have no difficulty in getting any duplicate parts that may be required. When you add this fact to that other equally true fact that duplicate parts for B.S.A. fittings are seldom required, it is not surprising that the Commonwealth Government specify in their contract that B.S.A. fittings must be used throughout. The New Zealand Government also specify B.S.A. fittings in their contract, and the various Police and Military Authorities are equally particular in this respect. They always insist upon seeing the B.S.A. Trade Mark, and in this respect they set a good example to all classes of cyclists.

### A B.S.A. FEATURE.

**B.S.A.** Fittings are made chiefly from steel forgings, as it has been proved by long experience that this is the only reliable method. The illustrations below will, no doubt be of interest, showing, as they do, the comparative weights of the finished article and the steel forging from which the parts are made.

# ANTHONY HORDERN & SONS, LTD.. PALACE EMPORIUM, SYDNEY.

To suit the needs of those requiring a lower priced Machine we offer the following:—

## ROYAL ENFIELD BICYCLE

MADE LIKE A GUN

Manufactured by the Royal Enfield Cycle Co., Redditch, England.

### SPECIFICATION:

# ROYAL ENFIELD MOTOR CYCLES

The most UP-TO-DATE and RELIABLE  
MOTOR CYCLES ON THE MARKET.

Embodying features which are looked for in vain in other makes.

HERE are few Motor Cycles to-day which have a more "clean" yet business-like look than the two Royal Enfield Models. There is an air of gentility about them, yet withal they are capable of making a fine turn of speed when occasion demands it. The Enfield Company are no novices in the Motor Cycle industry. They were one of the pioneer firms in the early days, and their experience and knowledge are alike reflected in the two handsome Models which they are turning out in increasing numbers. The distinguishing feature in the appearance of the Enfield Models is the curved top tube, there is no missing an Enfield machine as it glides past, if this is looked for. The constructional advantages are many, and include the Enfield two-speed gear—a remarkable piece of mechanical efficiency—the Cush drive, the girder forks, improved front and rear mud guards, with engines of the twin cylinder type. No single cylinder engine can ever be run with the smoothness, silence and flexibility of a well-balanced Twin, and that is one of the secrets of the unalloyed success of the Royal Enfield Models.

Another great factor in the success of the Enfield Models is the stringent precautions which are taken throughout every process of manufacture. The smallest parts undergo the most rigid examination, and from first to last there is a strict system of inspection by thoroughly competent engineers.

The popular 3 h.p. two-speed and free engine Enfield is a model of neatness, as the illustration shows. The footboards are long and comfortable, the transmission by roller chain to the rear wheel, the mudguards extending over the wheels affording ample protection from the elements, and the magneto mounted in a position away from all likelihood of damage. A "kick starter" lever is fixed on the right-hand side of the machine, just behind the magneto, by sharply kicking down the lever and simultaneously dropping the exhaust valve after the engine is instantly started. No unsightly cables litter the handlebars; they are carried inside, and only the control levers appear outwardly. The handlebar is made remarkably strong by a lateral bridge. The engine dimensions are 60 mm by 75 mm. A noticeable feature of the tank is that it is attached to the frame by two supports of registered design, brazed to the middle tube of the frame. The weight being supported from the bottom, enables the tank to be constructed with the join at the top, thus obviating any possibility of leakage.

The mechanically forced lubrication fitted to the 3 h.p. model has been declared by experts to be the most perfect system yet evolved in motor cycle design. The oil is carried in a tank at the back of the down tube, and one of two pumps, fitted outside the timing gear case, induces the oil to the engine; thence, after lubricating each cylinder, the second (exhaust) pump forces the oil back again into the tank. When the engine is running there is a continuous circulation of oil, thoroughly and equally lubricating each cylinder.

The Enfield two-speed gear and free engine which is fitted to this machine, and also to the 6 h.p. side-car Model calls for special mention. Briefly, the power is transmitted from sprockets on the engine shaft by two chains, one for each gear, to a counter-shaft in the bottom bracket, which contains the two-speed mechanism. The final drive from the counter-shaft to the back wheel is by a chain on the right hand side of the machine. The chains are exceptionally well guarded, although the cover may be easily removed when required. The engine shocks are greatly absorbed by the spring clutch on the engine shaft, and also by the patent Cush Drive. This simple but ingenious device is the outcome of considerable experimenting by the Enfield Company. It is placed in the rear hub, the driving sprocket having a hollow cup in which are set three mitre valves, an inner drum provided with three similar vanes fits into the sprocket wheel, and between each two vanes is a rubber hook or buffer. The power is transmitted through three of the buffers, the other three taking the shock of any recoil.

The 6 h.p. side-car combination is a veritable vehicle de luxe. The dimensions of the engine are 76 mm by 85 mm. The two-speed gear and free engine is fitted in conjunction with the slipping clutch and Cush drive. It is a powerful machine, and every detail of it has been designed solely with the idea of it being used for passenger work. Perfect alignment of the machine and side-car are assured by the side-car fittings being permanently built into an integral part of the frame. No bending of the fittings when attaching the side-car is possible, and the machine always steers perfectly, and imposes no undue wearing strain on the tyres. On the three wheels grooved motor car tyres 1650 mm by 65 mm are fitted, a necessity for side-car work as the Enfield people have realized.

**ANTHONY HORDERN & SONS, LTD. ONLY UNIVERSAL PROVIDERS**

## **ROYAL ENFIELD,**

**3 Horse Power Two-speed and Free Engine Model.**

**ENGINE.**—Royal Enfield twin-cylinder, 60 x 75 m/m; mechanically operated overhead inlet valves, with working parts completely enclosed and dust-proof.

**TWO-SPEED AND FREE ENGINE GEAR.**—Royal Enfield Patent design; expanding clutch type, operated by the hand lever shown in illustration.

**KICK-STARTER.**—An entirely new type of "kick-starter" is fitted. The machine starts easily while the rider is seated in the saddle.

**TRANSMISSION.**—Roller chains,  $\frac{1}{2}$  in. pitch, in conjunction with the Royal Enfield Cush Drive Hub.

**CUSH DRIVE HUB.**—The Royal Patent Enfield Cush Drive Hub is fitted to the rear wheel, ensuring, in conjunction with the chain transmission, a perfectly smooth and supple drive.

**IGNITION.**—New Bosch waterproof magneto, controlled from handle bar.

**CARBURETTOR.**—A.M.A.C. multiple jet.

**LUBRICATION.** Royal Enfield Patent Mechanical Forced Feed Lubrication System. This marks an important improvement in the lubrication of motor cycles.

**TANK.**—Fitted with large glass-topped filler, with gauze strainer and needle valve to regulate flow of petrol. Lubricating oil is carried in separate tank. Petrol capacity,  $1\frac{1}{2}$  gallons.

**FRAME.** Royal Enfield design, dropped at back to give low saddle position, fitted with spring foot boards and registered spring forks.

**MUD GUARDS.**—Strong and wide, with front extension; side shields on both guards.

**TYRES.**—English Dunlop studded; front, 26 in. x 2 $\frac{1}{2}$  in.; back, 26 in. x 2 $\frac{1}{2}$  in.

**BRAKES.**—Powerful front rim brake actuated from handle bar, and rear brake operated by foot pedal.

**SADDLE.**—Specially large and well-sprung pan seat.

**TOOL BAGS.**—Two leather pannier bags, containing complete set of tools.

**CARRIER.**—Made from weldless tubular steel and strongly attached.

**STANDS.**—Two stands fitted, one for each wheel. Both stands fasten securely with spring clips.

**FINISH.** Enamelled in best black enamel, tank artistically panelled in two shades of green. Usual parts heavily plated.

**ALL SPARE PARTS IN STOCK.**

**Price - - £80.**

## ROYAL ENFIELD,

6 Horse Power Side Car Combination, with Royal Enfield Patent  
Two-speed and Free Engine Gear.

**ENGINE.**—Royal Enfield twin-cylinder; bore of stroke, 76 x 85 m/m; mechanically operated inlet valves; exceptionally large J.A.P. silencer situated under footboard.

**TWO-SPEED AND FREE ENGINE GEAR.**—Royal Enfield Patent design, expanding clutch type, handle starting.

**TRANSMISSION.**—Revolving chain, in conjunction with Royal Enfield Slipping Clutch and Patent Cash Drive Hub.

**CASH DRIVE HUB.**—The Royal Patent Enfield Cash Drive Hub is fitted to the rear wheel, ensuring, in conjunction with the chain transmission, a perfectly smooth and supple drive.

**IGNITION.**—Latest Bosch magneto, controlled from handle bar; waterproof terminals.

**CARBURETTOR.**—A.M.A.C. multiple jet.

**LUBRICATION.**—Automatic visible drip feed and auxiliary hand pump.

**TANK.**—Two compartments; petrol capacity, 2 gallons; oil capacity, 1½ quarts.

**FRAME.**—Royal Enfield design, plenty of ground clearance; side car attachments are built into frame, which is fitted with footboards and our registered spring forks.

**TYRES.**—500 x 65 m/m grooved light car tyres on the three wheels.

**MUD GUARDS.**—Strong and wide, front extension and side wheels to each guard. Back guard is divided so that a portion swings down to facilitate tyre repair.

**CARRIERS.**—Made of specially strong steel tubing.

**STANDS.**—Stands for front and rear wheels and side car fitted.

**HANDLE BAR.**—Royal Enfield registered design; carburettor and magneto controls; concealed cables.

**BRANES.**—Powerful front rim actuated from handle bar, and rear brake operated by foot pedal.

**SEAT.**—Large and comfortable pan seat with excellent springs.

**TOOL BAGS.**—Two pannier bags with complete set of tools in roll up.

**FINISH.**—Attractively enamelled in best black enamel; usual parts heavily plated.

**SIDE CAR.**—Royal Enfield chassis, with wicker body neatly upholstered, exceptionally well sprung, and vibrationless and comfortable.

**Price, complete with Side Car, £127/10/-**

GREENER'S BREECH-LOADING GUNS.

W. W. Greener's "Dominion" D.B.B.L. Gun, 12-gauge. Top Lever, Bar Locks, 30in. Steel Barrels, Hammers below line of sight, Patent Treble Wedge-fast Crossbolt, Chambered for 2½ cases, and proved for all nitro powders ... £12/-

W. W. Greener's D.B.B.L. Hammerless Gun, 12-gauge. This epitomises the chief features of the Greener Gun, viz., strong shooting, solidity of construction and simplicity of mechanism. The barrels are of special quality steel, 30in., Chambered for 2½ cases, proved for all nitro powders, Greener's Patent Treble Wedge-fast Crossbolt, Patent Safe Safe. The locks of this gun have fewer parts than any other hammerless gun made. Weight about 7½ lbs., European Walnut Stock, Pistol Grip ... £12/10/-

W. W. Greener's D.B.B.L. Hammerless Gun, made on W. W. Greener's Pacific Princess system of breech mechanism. Specially made for use in the Colonies. It should be noted that this mechanism is quicker in action than any other system, less time being occupied in striking the trigger has been pulled. This is an important advantage in pigeon shooting. Side Safe, 30in. Steel Barrels, both Choke. Engine-turned Rib, with Greener's Patent Treble Wedge Fast Cross Bolt, Chambered for 2½ cases, proved for all nitro powders, Walnut-heart Stock, neatly engraved, a good pigeon gun; weight, 7 to 8 lbs ... £26/10/-

GREENER'S BREACH-LOADING GUNS.

**W. W. Greener's D.B.B.L. Hammerless Gun, 12-gauge.** The Lowest-priced Gun made on the Facile Principles System, 30in. Steel Barrels, both Choke, Greener's Patent Wedge fast Crossbolt, Independent Side Safe, Pistol Grip, Walnut Stock, neatly finished as illustrated. ... .. £21/-

**W. W. Greener's D.B.B.L. Hammerless Gun, 12-gauge, 30in. Steel Barrels, both Choke, Greener's Crossbolt, Chambered for 2½ Cases, proved for all nitro powders, plain finish Independent Side Safe, Walnut Pistol Grip Stock ... .. £17/10/-**

# CONCERTINAS AND ACCORDEONS.

All the music in the world can be got out of these popular instruments. You can dance to them, sing to them, and awake the echoes with jolly choruses to their gladsome notes. A Concertina is almost as necessary in a country home as a Sewing Machine or a baby.

## German Concertinas

Imitation Rosewood, 20 keys

"Millions of Mischiefs"

And any amount of worry may be avoided by attention to the following simple directions:—

Write your Orders legibly, and your name and address in full. Give the Post Town where our answer will reach you.

State if goods and invoice are to be addressed Mr., Mrs., or Miss.

Give the correct route by which the goods are to be sent, and say to whom they are to be consigned if you live far from a Railway Station or Port.

Be careful to give sizes, colors, lengths and quantities of goods wanted, and state whether we may substitute if we have not the exact material or article in stock.

In the event of goods going astray in transit, or not arriving at their destination in reasonable time, it would be well for customers, in writing to us, to give date of invoice, to assist in tracing cause of delay.

# CLOCKS.

Clocks multiply as time goes on. Every year labor saving contrivances make clocks cheaper, so that a really good clock is within reach of the poorest household. Some of the Clocks on this page are of the Alarm variety, and for turning sluggards into lively risers they are not to be equalled. The Alarm Clock in the centre is a particularly effective rouser, on the efficiency of which long odds may be laid.

**The Improved Bee Alarm.**  
2in. Dial; 30 Hour time  
and Alarm.  
6/6

**The Repeater Alarm.**

One Day time; Dial, 5in.

Intermittent Alarm—

20 secs. Alarm,

15 secs. Silence,

and so on alternately for

25 mins. ... 7/6

**The Bee.**  
One Day time; Dial, 2in.  
4/-

**The Pirate Extra, One Day Time and  
Alarm; Dial, 4in. ... 4/6**

**The Startle Alarm, One Day Time; Dial,  
4in.; Intermittent Alarm Bell on back  
6/-**

ALL PRICES IN THIS  
CATALOGUE  
ARE SUBJECT TO  
MARKET  
FLUCTUATIONS.

TIME FLIES!

THE CHEAPEST 400-DAY CLOCK IN THE WORLD.

Every year improvements are effected in the machinery used in the manufacture of clocks, lessening the cost of production, but the acme of perfection in construction has been reached by the advent of the Clock illustrated, which is a Reliable Timekeeper, handsome in appearance, and only requires winding once a year.

NO ELECTRIC BATTERIES. SILENT IN WORKING

400-day Gift Clock, Enamelled Dial,  
complete with Glass Shade;  
Height 11 in. ... .. 97/6

Directions for placing and setting up Clock.

Clock must first be placed in a level position, then hang pendulum on the small pin to be found at the bottom end of the thin suspension wire; care must be taken not to bend this wire. To set in motion, pendulum must be turned about three-fourths of a revolution either to left or right, and then started revolving in alternate directions; it must not be swung from side to side. Hands to be set from dial. To regulate time-keeping, place small end of key on either of the squares at ends of adjusting rod of pendulum; should clock be losing, turn towards F (or A); if gaining towards S (or B).

ANTHONY HORDERN & SONS, LTD., PALACE EMPORIUM, SYDNEY.

## CHEAP AND RELIABLE CLOCKS.

**TERMS: SPOT CASH.** In doing business with our numerous customers, we claim a ready recognition of the necessity for Cash Payments. To pay cash and give credit in return would require the wealth of Croesus ten times told, and ample as are our means, and willing as we are to employ them in the service of the public, it would be impossible, except by the sacrifice of those low prices which have made our name so famous to do business except for prompt cash.

ALL PRICES ARE SUBJECT TO MARKET FLUCTUATIONS.

Heavier, 12/6, 15/-, up to 20/-

## FIELD GLASSES.

### CONSTRUCTED ON THE PRISM BINOCULAR SYSTEM.

The Zeiss Field Glass is small and neat in appearance, and possesses unequalled power in rendering distinct objects several miles distant. The most important consideration in Zeiss' Field GLASSES, is the sharpness of their definition, and the facility of focussing to each eye separately by means of an adjustable eye-piece. Prism Binocular Field Glasses are supplied to the Royal Navy and Military Officers, and their adoption by various Governments for military purposes, is evidence of their superiority. In the late South African War, an officer's outfit was considered incomplete without a Glass of this description, and instances are recorded of individual officers being distinctly recognised by a Prism Binocular Field Glass, whereas with an ordinary Field Glass of first class quality the outline of a man only was recognisable.

No. 983

**Zeiss Prismatic Field Glasses, latest model,** with rack adjustment, magnifying eight times, extra sharp and clear definition, Morocco Leather covered, Enamel finished Frame, in Solid Brown Leather Sling and Case (No. 983) ... .. £

**TERMS: SPOT CASH.** In doing business with our numerous customers, we claim a ready recognition of the necessity for Cash Payments. To pay cash and give credit in return would require the wealth of Croesus ten times told, and ample as are our means, and willing as we are to employ them in the service of the public, it would be impossible, except by the sacrifice of these famous low prices which have made our name so renowned, to do business except for prompt cash.

ALL PRICES IN THIS CATALOGUE ARE SUBJECT TO MARKET FLUCTUATIONS.

## BEST SHEFFIELD CUTLERY.

Since History took note of England, Sheffield has been renowned for its Cutlery. There are heaps of cheap German Knives and kindred goods, but we stock none of them.

**IVORY-HANDLED KNIVES.** Customers are advised that great care should be exercised in cleaning Ivory-handled Knives. The handles should never be placed in hot water, or they will become discolored and probably split. The Ivory used for the handles of knives is carefully selected by the Manufacturers, therefore no responsibility for handles cracking owing to climatic or other influences can be accepted.

# ELECTRO-SILVER-PLATED SPOONS AND FORKS.

Of late, the old-fashioned Steel Forks and the commoner kind of Spoons have almost disappeared. In Australia, this is chiefly due to Anthony Horder's Famous Low Prices, which enable people, even of limited means, to buy the best of everything. The saying "Fingers were made before Forks" dates from the time of James I., and sprung from the desire of certain people to cling to old-fashioned notions.

ANTHONY HORDERN & SONS, LTD., PALACE EMPORIUM, SYDNEY.

## RAZORS—ANCIENT AND MODERN.

Razors have been used from time immemorial. In the book of Ezekiel, the words "take thee a barber's razor" occur, and there is evidence that before those days, a clean shave was fashionable. Famous men in modern times were barbers. There was Oliver le Dain, the celebrated barber of Louis XI, of France; then Richard Arkwright, who, before he invented the Spinning Jenny, was known as the underground barber, being so poor that he had to shave his customers in a cellar for want of a better place; and what reader of "penny dreadfuls" does not remember Sweeney Todd, the barber of Fleet Street, who cut his customers' throats and robbed them afterwards.

# USEFUL KNIVES.

Had it not been for the necessity for careful appropriation of space, we might have considered the possibility of making all the sketches in this book natural size, like those on this and other pages. But, under such circumstances, a book as big as a bookcase would be required to hold the thousands of illustrations descriptive of the stock carried by us.

(See also illustrations on pages 260 and 261.)

## SORTS OF SCISSORS.

It is, indeed, a strange household that does not number among its utilities a pair of scissors. If not a pair for every purpose, a pair for general utility.

The following list shows how various scissors are, and how different scissors are desirable for different kinds of work. How button holes are best cut with one sort, and hair cut with another. How Drapers are provided with their own special scissors, and how Paperhangers are not properly equipped unless they hang paper by the aid of Paperhangers' Scissors. Ladies and Gentlemen, choose the scissors you require from the following.

### George Wostenholm's IXL Cutting Out Scissors—

(No. 1008)	Length	6	6½	7	8 in.
		2/9	3/-	3/8	4/4 pair

### Joseph Rodgers and Sons' Cutting Out Scissors—

	Length	6	6½	7	8 in.

Packing for Country, 2/6 extra.

**CAUTION.** We would warn buyers against Stoves and Ranges made somewhat similar in appearance to our designs but which, when put into use, turn out to be nothing more than cheaply got up rough imitations of original patterns.

ANTHONY HORDERN & SONS, LTD., PALACE EMPORIUM, SYDNEY.

# THE "BONNYBRIDGE DOVER" RANGE.

FOR WOOD OR COAL.

THE "BONNYBRIDGE" is constructed for burning all kinds of fuel, and being fitted with an invention for removing the Flue Divider at the bottom of Oven, and a Sliding Soot Door in front, is very easily kept clean. Oven of strong Cast Iron with Bulged Door, thus giving greater accommodation than the measurements indicate, at the same time adding to the HANDSOME AND MASSIVE APPEARANCE OF THE STOVE. Hot Plate with five large openings, and movable Extension Hob which can be placed at either end. The Front Fire Grate, with Brick Linings for Coal, and the Fall-down Bars, with Cast Iron Linings for Wood, ARE INTERCHANGEABLE. The Fire and Oven Door Knobs and Name Plate are handsomely Nickel-plated.

When ordering say whether you intend to burn Coal or Wood.

Prices include Ring Lifter, Scraper, Poker, Brush, and 5 feet of Stove Pipe to fit Flue.

## THE "ELECTRIC LIGHT" RANGE.

FOR EITHER WOOD OR COAL.

This Stove has been specially constructed for Australian requirements. One of its strongest recommendations is the number of movable rings on the top plate, there being four over the oven and two over the fire, so that the boiling capacity is far in excess of what is usually the case. The Range has a deep Fire Box, Central Flue, Automatic Damper, and Pull Down Grate to admit logs of wood. It is strong and well finished, with bright mouldings round the hob and in front. The oven is large and well ventilated, and hinged on left hand of Range. Altogether this Stove makes a handsome addition to the furniture of the kitchen.

### SIZE OF OVEN.

	Width.	Height.	Width.	Depth.	Height.	Weight cwt. qrs. lb.	
No. 7 ...	29in.	23in.	15in.	15in.	8½in.	2 1 14	£3 2s. 6d.
No. 8 ...	32in.	24in.	17in.	17in.	9½in.	2 3 14	£3 12s. 6d.
No. 9 ...	34in.	25in.	18½in.	18½in.	10½in.	3 0 12	£4 10s. 0d.

Prices include Ring Lifter, Scraper, Poker, Brush, and 4 feet of Pipe to fit Flue.

### PACKING FOR COUNTRY, 2/6 EACH EXTRA.

Every Stove is carefully packed, so as to stand any ordinary usage consequent upon transit by either boat or rail. In taking delivery at the railway station or port of destination, the condition of the Stove should be closely scrutinized, so that, in case of its being damaged, the matter may be at once brought to the notice of the railway authorities or steamship owners, who are alone responsible. Our responsibility ceases on receiving a receipt for the goods in Sydney, as being in good condition. These remarks apply to all goods forwarded by rail.

### DUPLICATE PARTS OF STOVES.

It must not be supposed that, because some parts of your Stove gets cracked or lost, the Stove is done for. By sending to us for duplicates of missing or broken parts, many an excellently cooked feast will follow the repairs. We stock duplicates of top and bottom plates, oven linings, rings, cups, and firebricks in connection with any of the Stoves in this Catalogue. Prices on application.

The Stoves listed on this and other pages can be recommended as the best in the market. But, should other Stoves be required, we shall be pleased to send quotations and full particulars by return of post.

All Prices in this Catalogue are subject to Market Fluctuations.

# THE "BEACON LIGHT" RANGE.

FOR WOOD ONLY.

This well constructed Portable Stove is specially arranged for family use, possessing as it does great capacity for all kinds of cooking. There is accommodation on the top plate for six separate boilers, kettles, or stewpanes; it is also fitted with a large and capacious oven. The Beacon Light Range is specially adapted for burning wood. The fire box has iron lining and movable back, which can be adjusted so as to take long billets of wood.

Prices include Ring Lifter, Scraper, Poker, Brush, and 4 feet of Pipe to fit Flue.

Packing for the Country, 2/6 each extra.

**CAUTION.** We would warn buyers against Stoves and Ranges made somewhat similar in appearance to our designs; but which, when put into use, turn out to be nothing more than cheaply got up rough imitations of original patterns.

## "MILLIONS OF MISCHIEFS"

And any amount of worry, may be avoided by attention to the following simple directions:—

Write your Orders legibly, and your name and address in full. Give the Post Town where our answer will reach you. State if goods and invoice are to be addressed Mr., Mrs., or Miss.

Give the correct route by which the goods are to be sent, and say to whom they are to be consigned if you live far from a Railway Station or Port.

Be careful to give sizes, colors, lengths and quantities of goods wanted, and state whether we may substitute if we have not the exact material or article in stock.

In the event of goods going astray in transit, or not arriving at their destination in reasonable time, it would be well for customers, in writing to us, to give date of invoice, to assist in tracing cause of delay.

ANTHONY HORDERN & SONS, LTD. ONLY UNIVERSAL PROVIDERS

## THE "SEARCHLIGHT" RANGE.

FOR COAL, COKE, OR WOOD FUEL.

MADE IN THREE SIZES.

A NEW AND HANDSOME RANGE, with specially large Hot Plate and Oven accommodation. The Hearth Plate is removable, thus saving freight and reducing liability to damage in transit.

OVEN.—Constructed with Cast-iron Plates, and fitted with a removable Oven Bottom Plate. Ventilator inside of Oven. Sliding Cleaning Door in front.

HOT PLATE has six full size openings on top, and bold outer Mouldings.

FIRE CHAMBER. Fitted with Clear way Fire-bars, with Brick Linings for Coal, and Fall-down Fire-bars for Wood Fuel.

FINISH.—Polished Hot Plate Mouldings, Nickel-plated Shield on Oven Door, and Nickel-plated Oven and Fire Door Handles.

	SIZE OF HOT PLATE.			SIZE OF OVEN.			Weight

Packing for Country, 2/6 each extra. See remarks on pages 556 and 568.

# THE NEW MATRON RANGE.

FOR EITHER WOOD OR COAL.

THIS STRONG AND SERVICEABLE STOVE is entirely suited for both TOWN AND COUNTRY. It is made with many improvements to our order. Complete with Ring Lifter, Poker, Griller, Flue Scraper and Brush, and 4 feet of Stove Pipe to fit flue. Some of the leading points in construction are as follow :—

THE FLUE is EXTENDED at the centre of the back, as shewn in the sketch, so as to give the oven the full depth of the Stove. We claim this as a decided improvement on the plan of placing the flue immediately at the back of the fire, because it allows the flame to pass underneath the top plate before escaping from the Stove.

INSTEAD OF THE ORDINARY DROP DOOR, THE FIRE DOOR of this Stove is fitted on hinges, and the FIRE GRATE is made to drop, forming a ledge.

ATTACHED TO THE TOP PLATE is a polished extended ledge, a very convenient arrangement when the top of the Stove is full and extra space is required.

THE STOVE is FITTED WITH AN AUTOMATIC SHELF, which falls from inside when the oven door is opened, thus forming a useful attachment, out of the way when not in use.

When you order, say if the Stove is required to burn Wood or Coal

## THE MODERN MISTRESS RANGE

..AND..

## THE MODERN AIDRESS RANGE.

These Stoves are practically the same, the difference being that the MISTRESS Oven is on the right hand, and the AIDRESS Oven to the left of the fire grate. The MISTRESS Stove is shown in the illustration.

BURNS EITHER COAL OR (SHORT) WOOD.

These Stoves have attained great popularity. Each Range is metal clad and the Oven Door lined, thus affording the power of conserving and concentrating the heat upon a small consumption of fuel. Both the MISTRESS and the AIDRESS show a grand combination of the good qualities of the most up-to-date American and British made Stoves.

Prices include Ring Lifter, Scraper, Poker, Brush, and 4 feet of Stove Pipe to fit Flue.

# THE "COUNTY" CLOSE FIRE RANGE.

Close Fire Double Open Range with iron coverings all round. Plate Back, Lamb Mouldings and Projecting Round Ends. Ovens are constructed of strong Wrought Steel with Cast Iron Tops, and are fitted with Ventilators and Steam Escape Valve. Fire Chamber can be made suitable for burning Coal or Long Wood Fuel, and is fitted with removable Horizontal Fire Bars. Round Ends, besides improving the appearance of Ranges, lessen the depth of fire place opening necessary for building in. Hot Plate is extra strong and is 4 in. thick throughout. Automatic In-venting Dampers are the simplest to work. They are conveniently placed and easily seen. By simply pulling the handle over to the desired position on the Indicator.

A competent bricklayer should be employed to set the flues, &c., in connection with this Range.

When you order, say if the Range is required for Wood or Coal.

The Close Fire Ranges without Cove Plates have 6 in. Siding only at sides and back, instead of the enclosing top shown in the illustration. Prices include Scraper, Lifter and Floor Brush.

These Ranges can be fitted for Hot Water Service for Bathrooms and Scullery, for the work in connection with which we shall be pleased to quote price on application, or by return of post.

Packing for Country, 5/- each extra. See remarks on pages 556 and 568.

ANTHONY HORDERN & SONS, LTD. ONLY UNIVERSAL PROVIDERS

# THE "GRAND SYDNEY" RANGE.

SELF SETTING.

The "Grand Sydney" Range has been designed to meet the demand for a large Range with commodious Ovens, completely self setting, and very strongly constructed to stand the extra heavy wear experienced in Hotel and Restaurant Kitchens, Stations and Farms.

Ovens are constructed of heavy Steel Plates, with Cast Iron Protecting Plates, and are fitted with inside and outside Ventilators. The temperature can be regulated by means of the Adjustable Dampers. The Doors have bright riveted hinges.

Hot Plate is ground smooth on the surface, and measures (with six inches of projection at the back to make it flush with the Flue Box) 30 inches by half an-inch thick. It is made with an extra large number of openings to suit a variety of Cooking Utensils.

Fire Chamber is lined with Fire Bricks for Coal, and Iron Linings for Wood Fuel, and the Bottom Bars are made loose. There is a direct Flue for kindling. The sizes of Fire Chamber are arranged to suit the class of fuel likely to be used, and it is advisable, when ordering, to state whether ranges are required for Coal or Wood.

SIZE OF RANGE.			SIZE OF OVEN.			Weight, cwt. qr. lb.

Can be fitted with High Pressure Boiler for Hot Water Supply

Packing for Country, 5 each extra.

See remarks on pages 556 and 568.

## THE CRITERION RANGE.

Strong and Serviceable, and most Convenient  
and Reliable.

PRICES INCLUDE  
Ring Lifter, Scraper, Poker,  
Brush, and  
ft. of Pipe to fit Flue

Combining the convenience, cooking power, form and appearance of the approved English Close Fire Range, with the portability of the American Cooking Stove. The illustration shews a Criterion Range with a Double Oven. The Single Oven Stove has an Oven on one side only of the fire grate. The flue is carefully adjusted, the draught free, and the distribution of heat round the Oven so thorough that the different operations of Baking, Boiling, Roasting, Steaming, &c., may be carried on at the same time. This Range is a perfect cure for smoky chimneys, and will burn any kind of fuel.

## THE Mrs. SAM RANGE.

A PERFECT COOKING STOVE.

SUITABLE FOR BURNING EITHER COAL  
OR WOOD.

A strongly constructed Cooking Range, carefully fitted, and well finished in every respect. Bright Bracket Shelf to Oven; Ash Pan and Square Flue Pipe (tapering to round at top), with Cleaning Door and Regulating Valve Damper. Large Oven, efficiently ventilated. Mouldings on Hob, Fire Door, Oven Door, and Ash Pan Front all polished bright. When required for burning Wood, the Fire Chamber is fitted with Iron Linings and Fall-down Front Bars, and is extra deep from front to back. Flues large and easily cleaned.

When you order, say if the Stove is required to burn Coal or Wood.

Prices include Ring Lifter, Scraper, Poker, Brush, and 4 feet of Stove Pipe to fit Flue.

**CAUTION.** We would warn buyers against Stoves and Ranges made somewhat similar in appearance to our designs; but which, when put into use, turn out to be nothing more than cheaply got up rough imitations of original patterns.

# THE Mrs. SAM RANGE.

Prices include Ring Lifter, Scraper.

Poker, Brush, and

4 feet of Stove Pipe to fit Flue.

When you order, say if the Stove is  
required to burn Wood or Coal.

Packing for Country, 2/6 each extra.

A strong and substantially constructed Cooking Range, carefully fitted, and well finished in every way

Specially adapted for high pressure work, being fitted with strong Wrought-iron Arch Boiler when required, at back of Fire Chamber, giving an ample supply of hot water at very short notice. The High Pressure Boiler has a Manhole on top, so arranged that it can be taken off and the boiler is thoroughly cleaned without moving it out of position, or even disconnecting the Flow and Return Tubes, a convenience which will be thoroughly appreciated.

The Stove has two large Ovens of Heavy Steel Plate, with Cast-iron Guard Plate on top of each, well ventilated, rapidly and uniformly heated, the temperature being under perfect control.

Bright Bracket Shelf to each Oven, Ash Pan and Flue Pipe, with Cleaning Door and Regulating Valve Damper Mouldings on Hob, Fire Door, Oven Door, and Ash Pan Front, are all polished bright. No. 10 has three, and Nos. 11 and 12, seven Round Openings on top, with Contracting Rings to suit different sizes of saucepans, kettles, etc.

Quotation for Hot Water service for above Ranges on application.

Packing for Country, 5/- extra.

For Hot Water system, see page 572

# THE "MAORIDESS" RANGE.

Three Sizes.

For Coal, Coke or Wood Fuel.

SELF-SETTING CLOSE FIRE RANGE.

This is a very compact and efficient Self-setting Range, thoroughly reliable as a Cooker, and Heater of Water in Side Boiler. Strongly built, and finished in a first-class manner. Has large sheet-iron Oven (with cast iron top), thoroughly ventilated. Fire has Drop-down Front Bars, and is specially arranged to burn either Wood or Coal; Iron fire-bricks all round and easily replaced. Copper Side Boiler is supplied with 42in. range, and fitted with brass tap; large Hot Closet under fire and boiler; Bracket Shelf to Oven; Projecting Ashes Pan, with Ornamental Screen. For kindling fire there is a direct flue to pipe; for heating oven flue goes over top, down side, under bottom, and up back of oven, and with fire at remaining side it is equally and perfectly heated. Openings on Hob at side of, and in front underneath oven, for cleaning flues. It is fitted with cast-iron skirting at back and ends, and also cast-iron flue pipe, with cleaning door and damper. Mouldings, Hinges and other Fittings Polished Bright.

ANTHONY HORDERN & SONS, LTD., ONLY UNIVERSAL PROVIDERS

## THE UNIVERSAL RANGE.

SPECIALLY ADAPTED FOR BURNING WOOD.

This is one of the best portable Ranges ever placed on the market. It has been built to our order for the Australian trade, will stand carrying by either rail or boat well, and is adapted for hard wear and tear.

This Stove has a large serviceable Oven, and roomy Fire Box suitable for either wood or coal. Prices include Ring Lifter, Scraper, Poker, Brush, and 4 feet of Stove Pipe to fit flue.

When you order, say if the Range is required to burn Coal or Wood.

For the Universal Range with Double Oven, see next page.

**CAUTION.** We would warn buyers against Stoves and Ranges made somewhat similar in appearance to our designs; but which, when put into use, turn out to be nothing more than cheaply got up rough imitations of original patterns.

### PACKING FOR COUNTRY, 2/6 EACH EXTRA.

Every Stove is carefully packed, so as to stand any ordinary usage consequent upon transit by either boat or rail. In making delivery at the railway station or port of destination the condition of the Stove should be closely scrutinised, so that, in case of its being damaged, the matter may be at once brought to the notice of the railway authorities or steamship owners, who are alone responsible. Our responsibility ceases on receiving a receipt for the goods in Sydney, as being in good condition.

### DUPLICATE PARTS OF STOVES.

It must not be supposed that, because some of the parts of your Stove gets cracked or lost, the Stove is done for. By sending to us for duplicates of missing or broken parts, many an excellently cooked feast will follow the repairs. We stock duplicates of top and bottom plates, oven linings, rings, cups, and fire-bricks in connection with any of the Stoves in this Catalogue. Prices on application.

## THE UNIVERSAL RANGE.

SPECIALLY ADAPTED FOR BURNING WOOD.

This strongly made and serviceable portable Cooking Range has been specially constructed to our order. It is fitted with two roomy Ovens and large fire box, is well ventilated, and adapted to resist more than ordinary wear and tear.

The Universal Range is very suitable for Stations, Hotels and other large establishments. Will burn either wood or coal.

Prices include Ring Lifter, Scraper, Poker, Brush, and 4 feet of Stove Pipe to fit flue.

When you order, say if the Range is required to burn Wood or Coal.

## PARTS FOR REPAIRS.

Illustrations showing various parts of Ranges. For particulars see next page.

## PARTS FOR REPAIRS.

To facilitate customers when ordering spare fittings for Cooking Ranges, we have shown on opposite page the various castings, etc., used in their construction, and give a list below of the names by which they are known. With different patterns and sizes of Ranges the various parts naturally differ somewhat in size and shape, but customers will have no difficulty in naming the parts they require from those shown in the illustrations.

Please note in all cases to state Number as well as NAME of  
Range or Stove.

### SPECIAL WOOD-BURNING HEATING STOVE.

### PIONEER DAIRY STOVE.

For Wood, Turf or Brush Fuel.

No. 1—24in. long, over all	x 14in. wide	x 16in. high;	weight, 0 cwt., 3 qr., 0 lb.	..	..	..	27/6
No. 2—30in. ..	..	x 23in. ..	x 19in. ..	..	1 ..	0 .. 14 ..	40/-
No. 3—36in. ..	..	x 26in. ..	x 20in. ..	..	1 ..	2 .. 14 ..	55/6

This is one of the Strongest and Heaviest of Wood-burning Stoves, holds a large supply of fuel, and being constructed with corrugated sides, has large radiating surface, and gives out a great amount of heat.

Tops of larger sizes made in sections as a safety against cracking. Door hinged in two parts.

We have supplied a large number of these Stoves for Dairy and other purposes, and they have given every satisfaction. There is a large hole on top, with ring and cover, for a saucepan.

Packing for Country, 2/6 extra.

CONTINUOUS BURNING

**"ESSE" Patent Coke Stoves.**

"ESSE" Stoves are smokeless, healthier than gas fires, cheaper than gas, and burn ordinary coke. They are cleaner than open grates and the heat can be regulated as desired.

No. 4s ...	8	15 0	11	10 0	12	10 0

**Why were they invented?** Because for long there has been a demand for a coal fire that would keep in all night and not require to be kindled afresh every day, and that could be regulated to give more or less heat to meet the variations of our changeable climate.

**What fuel do they burn?** Gas Coke, Shale Coke, or any patent smokeless fuel. All these fuels are noted for the great heat they give off, and are quite smokeless. The fuel used should be about the size of walnuts.

**How is the fire lit?** In the usual way—with paper and sticks. The mica-panelled fire door is opened, and the fire laid with the paper, sticks, and a little anthracite Coal or Coke. The fire door is then closed, and when the fire is well alight fill the Stove slowly with fuel through the top door. When convenient, the fire may be started with a shovelful of red-hot cinders from another fire.

**Are "Esse" Stoves easily fixed?** Yes! They can be placed in front of any grate, and the flue can be carried into the chimney by means of an elbow pipe, the chimney opening being made air-tight with a piece of sheet iron cemented in.

## The "QUEEN" Heating Stove.

Burns Coal or Wood

Useful as well as Ornamental

May be used for Boiling by removing the top

ANTHONY HORDERN & SONS, LTD., ONLY UNIVERSAL PROVIDERS

**"FAIR MAID"  
HEATING STOVE.**

Three Sizes: Nos. 1, 2 and 3.

**For Coal or Wood Fuel.**

This New Pattern Stove has been specially got up with a view of placing within the reach of all, at a moderate price, a really excellent Stove of handsome and artistic design, suitable for Parlour or Sitting Room, Hall, Library, Shop, Warehouse, Office, or Ships Saloon or Cabin use. It is fitted with Cast Iron Blower, which can be raised or lowered at pleasure, wholly or partially, handsome Cast-iron Trivet for kettle or tea pot, Sheet iron Ash Pan, with Cast Front, Fire brick Lintels, and all of first-class material and workmanship.

**"ELLESSBEE"  
HEATING STOVE.**

Three Sizes: Nos. 1, 2 and 3.

**For Coal or Wood Fuel.**

A Plain Massive Design, of extra strong construction, specially suitable for use in Hospitals, Schoolrooms, Barrack Rooms, etc. All wearing parts are renewable and can be replaced in a few minutes. The upper part of the stove forms a splendid Hot Air Chamber, and the formation of the base permits of a free circulation of air below the Stove.

ANTHONY HORDERN & SONS, LTD., ONLY UNIVERSAL PROVIDERS

## NEW "OCTAGON" HEATING IRON STOVE.

No. 0 has no "Plain" section

No. 1 (as illustrated) has three sections with doors, and one "Plain" section

No. 2 has two "Plain" sections, and so on, the distinguishing No. of the Stove being the quantity of "Plain" sections used.

A very simple and economical Laundry Stove of extra heavy construction, made in horizontal sections

The bottom section rests upon a heavy cast iron base, and has a sliding door which enables the user to regulate the draught perfectly, and obtain the necessary heat with a minimum consumption of fuel.

The second section contains the fire, fitted with loose furnace bars, and the right hand side is "Dished" to take two round-faced polishing irons, and fitted with a movable rest to hold them in position

The top section has a feeding door, and is fitted with a damper in the flue nozzle for further regulating the draught.

The fire door and top section have holes to take Crimping Irons

No. 0. Heating say 30 Irons	...	...	...	...	£4/2/6

## GAS HEATING STOVES, &c.

No. 18.

### GAS HEATING STOVES.

**Black Stove, Enamelled, fitted with Patent Ball Fire,** suitable for rooms up to 14ft. square (No. 18)—

No. 800, 14½ in. high, 13 in. wide	15/9
No. 200, 16½ in. " 14 in. " "	21/6
No. 300, 21 in. " 18 in. " "	27/6

**The Nursery, Black Stove Enamelled, 21½ in. high, 14½ in. wide, flat top, with opening in top for warming Saucepan** ... .. 32/6

**The Nursery Boiling Stove, same pattern as above, but fitted with Gas Boiling Ring** ... .. 47/6

For larger sized rooms—

No. 400, 23 in. high, 19 in. wide	25/-
No. 500, 23 in. " 14 in. " "	42/6
No. 600, 30 in. " 24 in. " "	57/6

### GAS LOG FIRES

#### OF THE LATEST PATTERNS.

These logs represent actual logs of trees. There are single logs, and two or more logs attached together, forming various natural designs, as Straight, Split and Rustic.

**Gas Log Fires, as above—**

Size	12	14	16	18 in.
One log	12/-	14/9	—	—
Two logs	15/-	18/-	—	—
Two forked logs	17/6	21/-	24/6	27/6
Five logs	18/6	22/6	—	—
Six logs	—	—	25/-	28/6
Five logs crossed	18/6	22/6	25/-	28/6

**Rests (not included in above prices) for standing above logs upon—**

	10	12	14	16 in.
	2/6	3/-	3/6	4/-

4 10 in. Rest supports 12 in. Logs, and so on.

No. 20

**Burners for Asbestos Fires, for fitting in ordinary Grates, with Straight or Curved Fronts (No. 20)—**

Extreme Length over all	8	10	12	14 in.
Clear Bore Gas Supply required	½	¾	¾	¾ in.
	7/9	8/6	9/6	10/6

**Patent Hollow Ball Fuel, for above** ... .. 1/9 doz.

No. 21.

**Fire Bricks** 8 and 10 in., 2/3; 12 in., 2/6; 14 in., 2/9

To obtain the best results, the use of the Fire Brick back, as shown in (Illustration No. 21), is recommended. This assists in throwing the heat out into the room, and reduces the quantity of fuel required. When the brick is used, the number of fuel balls required is about 6 for each inch in width of burner.

### THE WELSBACH KERN GAS RADIATORS.

Embody the latest discoveries in connection with the use of gas for heating purposes, and are, moreover, of convenient size and handsome appearance.

A small Welsbach Kern Radiator sufficiently warms an average sized room on a consumption of 10 cubic feet of gas per hour.

The cost is, therefore, only **One half-penny per hour**

Prices—  
from 3/6 to 80/-

**Write for Price Lists.**

(No 1102x) ... 1/

No. 1102x.

ANTHONY HORDERN & SONS, LTD., PALACE EMPORIUM, SYDNEY.

## BOILERS, HEATERS AND WARMERS

Per Medium of Kerosene, &c.

PORTABLE ODORLESS SMOKELESS OIL ROOM HEATERS.

Simple in construction and easy to re-wick. Strong and well made, beautiful in finish and ornamental in design. Constructed of Stamped Steel, Nickel or Black Finish. They are suitable for Bedroom, Bathroom, Sitting-room, Camp or Cottage, and will be found economical and useful.

The Matador.

The Petrolia Brazing Lamp, burns Kerosene, 27/6

These lamps are very powerful, suitable for brazing on a large scale, Cycle Brazing, &c. The flame is long and concentrated and can be regulated or extinguished in means of the burner valve without releasing the air pressure in tank.

The Matador, with Automatic Extinguisher, Nickelled Reflector, with Ruby Wired Chimneys—

Nos.	14	15	16
Diameter	18	15	17 in.
Height	30 1/2	33	33 in.
	26/-	30/-	37/6

We stock extra Wicks and Chimneys.

The Key Kerosene Stove, for boiling or heating

This is a very useful Stove, burning 4in. wick, having a capacity of 3 1/2 pints of kerosene, which will burn for 7 hours. The height of the Stove is 12 in.

The Perfection—

Nos.	100	120
	16/-	18/6

The Primus Atmospheric Stove

9/6  
BURNS WITHOUT A WICK. GIVES A GREATER HEAT than any other Stove. Boils a quart of water in THREE MINUTES. Burns a chord to perfection. Makes toast better than any other Stove. SWEETENS beautifully, and people who understand cooking know how important that is. COSTS LESS THAN A BAKING OVEN HOUR.

A Damper, an arrangement for stifling the noise of these stoves can be supplied if required

—/9 each

Primus Boiling Plate ... 3/6

The Stove and Utensils shewn in the illustration are, of course, extra.

The Primus Ironing Plate—

8 Irons	...	...	1/8

## BIRD CAGES.

Made in all kinds of pretty designs, attractively finished, and provided with everything necessary for the comfort and health of the birds. All the Cages are pretty Japanned in bright colors. After Japanning the Cages are put through the furnace process, so that the material used can in no way be injurious to the birds.

**Square Japanned Canary Cages**, well made and strong, with plenty of depth; sliding bottom—

10in. x 10in. x 13in. high ... .. 7/9

Also many other patterns in Square Cages, 3/9 to 6/9

Sliding bottoms ... .. 5/9, 6/3, 6/9

**Oblong Japanned Canary Cages—**

10in. x 8in. x 15in. high ... .. 5/8

Other patterns in Oblong Cages—

3/9, 4/6, 5/-, 5/6, 6/-, 6/9

Brass, 7 1/2in. x 10 1/2in. x 10 1/2in. high, 10/9; also 7/-, 8/4

**Oblong Japanned Canary Cages.** In two sizes—

9 1/2in. x 6 1/2in. x 12in. high ... .. 6/6

10 1/2in. x 7in. x 12in. .. .. 6/9

Sliding bottom, larger ... .. 7/3, 8/-

**Brass Cages**, with wood bottom and zinc slide for cleaning purposes ... .. 10/9

**Oblong Brass Cages**, in many patterns and varieties—

# HOUSEHOLD AIDS—FAMILY LABOR SAVERS.

The following pages are full of goods of this character, and all of them will commend themselves to our housekeeping friends as ingenious and trouble saving not only in the department of cookery, but also in various other branches.

## SARGENT'S GEM FOOD CHOPPER

A modern household utensil that is needed in every kitchen. Carefully made, nicely turned, self cleaning, self-sharpening. It has steel cutters, and is made in four sizes as described below:—

Nos.	Capacity per Minute	Diameter of Hopper		Diameter of Barrel		Height from Table to Bottom of Barrel	Price.
		Inside	Outside	Inside	Outside		
16	1 lb.	2½ in.	3 in.	1½ in.	1½ in.	1½ in.	3/-
20	1 lbs.	3 " "	3½ " "	1½ " "	2 " "	2½ " "	4/6
22	2½ "	3½ " "	4 " "	1½ " "	2½ " "	2½ " "	5/3
24	3 " "	4½ " "	4½ " "	2½ " "	2½ " "	3½ " "	7/-

No. 20 is the size generally purchased for family use; No. 22 stands higher from the table and has a larger hopper; No. 24 is extra large and heavy.

Each chopper is packed in a paste-board box.

## STEEL CUTTERS.

IMPROVED

## Salting Machines.

Used by Butchers, Hotelkeepers, Squatters  
Farmers, and Private Families.

To preserve, fresh meat inject a small quantity of very strong brine into that part of the meat most likely to become tainted. Six strokes of the handle will inject a sufficient quantity. After using, put a little lukewarm water into the box and pump through the Machine. Pull directions are sent with every Machine.

ANTHONY HORDERN & SONS, LTD., PALACE EMPORIUM, SYDNEY.

## THE CHILCOTT REFRIGERATORS.

MADE AT OUR REDFERN CABINET WORKS.

Scientifically constructed, more economical in consumption of ice, and less trouble to work than any other Refrigerators on the market. Moreover, these Refrigerators offer splendid examples of the goodness that is in

**ANTHONY HORDERNS' FAMOUS LOW PRICES.**

Corrugated Cup.

### HINTS ABOUT REFRIGERATORS.

Stand the Refrigerator in a dry airy place, and keep the lid open when there is no ice inside.

When the Refrigerator comes home, and before using it, fill both Ice and Provision Chambers with Ice, this will thoroughly cool the apparatus.

When the Refrigerator is once cool do not place any ice in the Provision Chamber, or Provisions in the Ice Chamber. Never put **hot food** in the Refrigerator; let the food be thoroughly cool first, and by this means there will be a great saving of ice.

Once a week, at least, wash all the inside parts, but do not use soda, remove all incrustations from zinc and parts, and wipe with a perfectly dry cloth to free from dampness.

A Corrugated Cup is supplied to be fixed on pipe under bottom of Refrigerator, and the end of the pipe must be kept submerged in the water, exactly as shown in illustration, to prevent the warm air from passing through into the Ice Chamber.

A dish should be placed underneath Refrigerator to catch the waste water from the Ice Chamber.

Design No. 1, in three sizes.

Design No. 2, in two sizes.

Size.	Length	Depth.	Height.	
A	2ft. 1in.	1ft. 4in.	3ft. 3in.	Grained Oak 82/6

Extra Rubber Rings for Preserving Jars—

Mason's Improved	Quarts	5 Gall.
..	..	8/-
..	..	80/-

Directions for Using Fruit Preserving Jars on this page.—Fill the jar, with cold water, fruit, or other contents, and put the jar in a boiler, with a grate, pebbles, or straw underneath, to keep the glass from touching the bottom, and fill the boiler to the neck of the jar with cold water. The boiling being completed, remove the jar, and, after allowing it to stand for about five minutes, put on the rubber ring and cap and partly fasten down. After five minutes more have elapsed, fasten down tightly. Wipe the top of the jar clean, and put away in a cool place. REMEMBER! For Cold Jars—Cold Fruit; for Hot Jars—Hot Fruit.

## VACUUM VESSELS.

They possess the property of keeping their contents at nearly the same degree of heat or cold for a considerable time, without regard to the temperature outside; keep hot for 24 hours, food and drinks which are bottled hot, even during the most severe winter weather; keep cold for days, food and drinks which are bottled cold, even during the hottest weather.

No preparation needed, the vessels are always ready for use, and permanently retain their powers of insulation. The interior of the vessel is of glass, and therefore can be kept clean without difficulty. The glass is covered by an elegant and tasteful casing as a protection against breakage.

## Useful Household Aids and Family Labor Savers.

Contrivances that will commend themselves to our Labor friends as calculated to save much time and giving great satisfaction; indeed, such ingenious utilities are in many households deemed to be indispensable to help the family coach along. Town clients are invited to make an inspection of these goods in our spacious Show Rooms, but country customers may rely with certainty on their requirements being met to a nicety, the same prices being charged and the packing carefully attended to by experienced men.

### WASHING AND WRINGING MACHINES.

Labor saving contrivances of immense value, lessening the terror of washing day, and tending towards an expeditious clear up.

#### WE MAKE WASHDAY THE EASY DAY.

These Washers are made of the best seasoned timber obtainable, thus assuring durability. They have been in use for over 20 years in the United States of America, a sufficient guarantee of their durability.

#### THE UNIVERSAL WRINGER.

Wood Frame, Galvanized Iron Fittings  
and Rubber Rollers . . . . .

Self adjusting to Tubs of any size and thickness.

Rollers	10	11	12 inches long
	15/6	20/-	30/-

This Wringer has been greatly improved by a steel spring which gives an even and elastic pressure; and an improved Guide Board, which spreads the clothes as they pass through, causing the rollers to wear more evenly and last longer.

The manner of fixing the Wringer to the Tub is the same with the UNIVERSAL as with the EUREKA.

#### THE AMERICAN COLONIAL WRINGER,

With Relief Pressure Screw, Galvanized Iron Frame  
and high grade Rubber Rollers.

Will fit any size Wood or Galvanized Tub. Makers recommend the use of Pressure Screw, thereby prolonging the life of rollers.

12	14	16 inches
20/-	24/-	40/-

ALL PRICES IN THIS CATALOGUE ARE SUBJECT TO MARKET FLUCTUATIONS.

## THE CINCY HIGH-SPEED WASHER

can be operated by Hand or Engine-power. To change from one to the other, it is only necessary to unscrew a Nut, remove the Flywheel, and put the Belt Pulley in its place.

**For Hand Power.**—The operating handle is adjustable to various positions—horizontal, diagonal or vertical, so that the machine may be operated while operator is seated or standing. The change from one position to another can be made in a moment by simply loosening a thumb-screw. No other high-speed rotary has this advantageous feature. When the lever is operated the flywheel runs at a speed of 300 revolutions per minute. This terrific momentum creates sufficient power to practically run the machine with a full load, without exerting the operator, and this also gives the dasher a quick alternate rotary action, thus producing a thorough agitation in the tub, with quick and perfect results.

**For Belt Power.** The mechanism is so constructed that no idle pulley is necessary. Machine can be directly belted to engine or line shaft and can be opened and closed while running. No shifting of belts, or frequent stopping or starting of engine or machine necessary. Dealers should carry machines in stock equipped with regular flywheel, and should have extra Belt Pulleys on hand to furnish to customers desiring the power machine. Pulleys may be ordered separately at a small cost. When operated by power the pulley should run at a speed of about 300 revolutions per minute. Pulley is 8 in. in diameter with 1 1/2 in. face, and has groove for round belt.

Capacity, 8 Shirts. Shipping Weight, 90lbs.

Price - - 50/-

Anthony Horderns' Famous Low Prices, are for both town and country. To country customers ordering through the post the same prices are charged as to people buying over the counter, and the same goods are sent, for if it be true that the country helps the town, it is also true that Anthony Horderns' Famous Low Prices help the country.

### **CHAMPION WASHER.**

**AN ENTIRELY NEW ROTARY MOVEMENT.**

It having been the desire of the trade in general, that there be built a Rotary Washing Machine that would have more than a full revolution to the pin wheel before reversing each time, no expense and time has been spared in perfecting a machine on a rotary principle that would answer fully the requirements of the market. Such can be fully claimed for the "Champion Rotary."

Twice as much agitation is created in the tub. The clothes travel twice as far as they do when the dasher revolves only  $\frac{1}{2}$  of the round before reversing. This means that all the clothes in the tub are kept in a constant and rapid movement through the water, and inasmuch as there is no lost motion, there is no jerking of the dasher, and consequently no tearing of clothes.

**Price - 40/-**

### **"THE VERIBEST."**

#### **A WATER MOTOR DRIVEN WASHING MACHINE.**

30lb. pressure required.

Equal in every respect to other washers, but worked by water power.

Average weight of Machine, 90lbs.

Average measurements, 24in. diameter, 15in. deep.

**Price - 85 -**

### **DIRECTIONS FOR OPERATING WASHING MACHINES.**

1. Fill tub, and keep it full, within 3 inches of top with boiling water, into which has been dissolved sufficient soap.
2. Dampen all clothes which are soiled or stained (such as collars or wristbands of shirts), and soap well before putting them into the tub.
3. Put in at one time, 7 or 8 shirts, or 3 or 4 sheets, or an equal bulk of clothes. Crowding the machine does not save time or labor.
4. If you have a large wash, and your water becomes too dirty, draw some off, and fill again with clean hot water, and add more soap.
5. When not in use, the machine should be kept in a cool place, the lid slightly raised. Do not set in the sun & dry. It is optional whether the clothes are soaked or no, many people do neither, thus saving time.
6. Deviate from these instructions only as you find a better way to suit your requirements.

# PORTABLE AND FIXED COPPERS.

Wilkes' Best Quality Riveted, also our Own Manufacture.

Country people not having the convenience of a regular laundry or wash house, find in these Portable Coppers an immense improvement on the old idea, that consisted of a kerosene tin placed on an improvised stove made of bricks or pieces of wood.

## PORTABLE COPPERS.

Require no fixing, only frame space to stand in. Copper Pans may be ordered in any size to hold from ten to fifty gallons. Prices and dimensions as follow:—

**Copper Pans, Riveted, to stand in frame or for bricking in—**

To hold	10	12	14	16	18	20 gallons
	18/6	21	22/9	30	33	37

<b>Copper Pans, Brazed—</b>	To hold	10	12	14 gallons
		16/3	17/8	18/6

These prices do not include cost of Frames, which are priced below.

**Japanned Iron Frames** for above, fitted with Cast Iron Elbow, Fireplace and Chimney, as shown in the illustration

For	10	12	14	16	18	20 gallon Copper Pan
	17/-	18/-	19/6	21/-	23/6	25/6

When Copper Pans are required for building in, we supply the necessary Grates and Doors. Prices for Grate and Door together—

Size of Door across 8in. x 6in., 2/9; 9in. x 7in., 3/6; 10in. x 8in., 4/-

Quotations for larger sizes of Coppers and Frames on application

**Cast Iron Furnace Pans**, which can be either built in brickwork or set on iron bars—

To hold	20	40	60	80	100 gallons
	13/4	28/8	40/-	53/4	66/8

## PORTABLE BOILERS—For Dairy, Farm, Laundry or other purposes.

**On Case** ... 10 galls., £2/6; 20 galls., 75/-

These Boilers are constructed entirely of Cast Iron, the Fire Chamber being lined with Fire Bricks to prevent the over-heating of the Frame, they are strong and durable and extremely rapid in their action with a very small consumption of fuel. Will work splendidly in the open air when attached to Smoke Pipe. The 10 and 20 gall. sizes are on Cast, and the 40 and 50 gall. sizes are mounted on wheels for moving about from place to place even when in operation. The inside Pan can easily be lifted out of Frame for cleaning purposes.

Six feet of Pipe and Cap supplied with each Portable Boiler. If coated with Anti-rust preparation, 1/- each extra.

**On Wheels** ... 10 galls., £5/15/-; 50 galls., £8/17/6

# ANTHONY HORDERN & SONS, LTD. ONLY UNIVERSAL PROVIDERS

## TILES FOR VERANDAHS, HEARTHES, &c.

### VERANDAH TILES.

We offer a great variety of designs, from plain patterns formed by tiles of different colors, to more elaborate designs made up of White, Blue, and other colored tiles, and enriched by the interspersation of encaustic tiles in various shades and styles.

The tiling of the verandah is made complete by bordering to match in any width requisite or desirable.

Prices range 5/9, 7/8, 8/-, 8/6, 10/6 per square yard including border tiles.

### VERANDAH NOSING.

For putting round the edges of verandahs, so as to make a finished job. Prices on application.

#### White Marble

12 x 1in.; 12 x 1½in.; 12 x 1½in. running ft.

Slate ... 12 x 1½in.; 12 x 1½in.; 12 x 2in. running ft.

The measurements given indicate width and thickness, thus 12 x 1 means 12 inches wide and 1 inch thick.

Nosing for Verandahs, or for use as Verandah Strips made to any required size.

When ordering it will be necessary to send as a rough plan of the space to be tiled, with measurements distinctly marked thereon.

## HEARTH TILES.

Somewhat different from the preceding lines. They are cheap and attractive, save much trouble and labor, and are altogether preferable to the old style of hearth. Hearth Tiles are in Squares, measuring 6in. x 6in., except where otherwise noted.

Plain Printed Glazed Tiles, 6in. x 6in. ...	...	...	...	...	...	...	...	...	3/-	doz.
Colored " " " 6in. x 6in. ...	...	...	...	...	...	...	...	...	4/-	"
" " Fancy Majolica Tiles, 6in. x 6in. ...	...	...	...	...	...	...	...	...	6/-, 7/-, 8/-	"
" " Strips for Borders, 6in. x 3in. ...	...	...	...	...	...	...	...	...	2/6, 3/-	"
Panels for Grates, 30in. x 6in., artistic designs	...	...	...	...	...	...	...	...	7/6, 10/6, 13/6	pair
Majolica Hearths, patterned designs	...	...	...	...	...	...	...	...	8/6, 10/6	each
Wall Tiles, White glazed, 6in. x 3in. ...	...	...	...	...	...	...	...	...	7/6	yard
Plain Enamelled Tiles, 4 colors, Red, Red, Old Gold, Dark or Light Green, Light Blue, Peacock and various Art shades. Sizes, 6in. x 2in., 6in. x 3in. ...	...	...	...	...	...	...	...	...	10/6, 13/6	per Hearth

When matched with the other decorations of the room these tiles are very effective.

## MARBLE KERBS FOR HEARTHES.

Placed upon a prettily tiled hearth, a Marble Kerb makes a handsome addition to a well furnished room, being essentially artistic and superior looking. The prices quoted are for Kerbs of 18 inches long, with ends of 12 inches each, inside measurements, but hearths of any size or shape can be accurately fitted. In any case, measurements of the hearth to be enclosed should be sent with order. Following are illustrations of the patterns in which Marble Kerbs are made:—

Round Top. Chamfer. 3 Bead. O.G.

#### White Sicilian—

3in. high x 1½in. wide, Round Top, Solid	...	16/6
3in. " x 2in. " " " " " " "	...	23/-
4in. " x 3in. " " " " " " "	...	35/-
4in. " x 3in. " " Chamfer " " "	...	33/-
4in. " x 3in. " " 3 Bead or O.G. " " "	...	45/-

#### St. Anne's or Rouge—

3in. high x 2in. wide, Round Top	...	29/6
4in. " x 3in. " " " " " " "	...	41/-

#### Rouge or St. Anne's—

4in. high x 3in. wide, 3 Bead	...	55/-
-------------------------------	-----	------

These Prices are approximate only.

# ANTHONY HORDERN & SONS, LTD., PALACE EMPORIUM, SYDNEY.

## Anthony Hordern & Sons, Ltd., Slate and Marble Works.

These works were established for the same reason that induced us to start factories for the manufacture of various kinds of goods for the purpose of cheapening commodities to the actual user or consumer.

### THE SLATE AND MARBLE WORKS

are intended for a large and comprehensive scheme of operations. The building itself is a substantial brick structure, with over 7000 square feet of floorage, and is equipped with the finest and most modern plant this side of the line.

The machinery includes Floats for grinding edges and faces, large Polishing Machines for Slab Marble; Lathes, Saws, and every useful and up-to-date appliance known to the trade.

The large Saws for cutting Marble—designed and manufactured in New South Wales—are very massive, and take blocks weighing up to three tons.

There is also a Lifting Crane of the latest type. It has a travelling run of 75 feet, thus enabling heavy work to be done with a minimum of labor and at small cost.

### THE IMPORTED RAW MATERIAL

used at the Works comes to us direct from the countries of origin, as White Marble from Carrara, in Italy, and Slate from well-known Quarries. Of Australian Marble we get large quantities, principally from the Orange District, including Rouge, St. Anne's, Bardella and Brocatella, all of which have given the greatest satisfaction.

Among the work turned out are included:—

MANTELPieces  
WASH TOPS  
LAVATORIES

DOOR STEPS  
VERANDAH NOSING  
MARBLE BATHS

MARBLE TABLETS  
GENERAL DECORATIVE WORKS

These goods are listed in various parts of the catalogue, and the saving of the middleman's profit is made manifest by the remarkably low prices at which we are enabled to supply

### DIAGRAM SHEWING MEASUREMENTS TO BE SENT WITH ORDER FOR MANTELPieces AND REGISTER GRATES.

For Price Lists of Register Grates and Mantelpieces, see page 34 and following pages.

#### FOR MANTELPieces.

Send measurement across breast of chimney from A to A; height of opening from B to B and D to D; and width of opening from C to C.

#### FOR REGISTER GRATES.

Send measurements of height of opening from B to B and D to D; and width of opening from C to C.

## EMBOSSED STEEL CEILINGS.

The old fashioned lath and plaster ceiling is a thing of the past, its place being taken by a strong, sanitary, hand-some looking, non-inflammable ceiling of steel. The ornamental embossing work required for Steel Ceilings is done at

### OUR REDFERN FACTORY,

and, in accordance with our invariable policy, only first-class work is executed.

No. 4—Sheet of Embossed Steel, 1/5 sheet.

Supplied in sheets 6 feet x 18 inches. Panels are sometimes used instead of sheets.

The three illustrations shewn upon this page give examples of this class of work done by us, viz., an Embossed Steel Sheet ready for placing, a Centre Piece and a length of Steel Cornice. A comprehensive price list shewing a variety of designs, &c., will be posted to any address on application.

18in. Ceiling Centre, 2/3

No. 102—Length of Steel Cornice.

5 x 4in., 1/3 per foot; Mistle Leaves, -1/5 each.

If you are about to build, or own property that would be improved by the new method of ceiling the rooms we shall be glad, on receipt of necessary measurements and particulars, to send estimates for fixing ceilings in town or country, or to supply the necessary material.

All Steel Ceilings, Cornices, &c., are primed with one coat of oil paint before leaving the factory. Special quotations for plain painting or decorative work.

In placing orders for Steel Ceilings with us you will not only get the best of material and first-class workmanship, you may also rely upon making a considerable saving in cost.

## SECTIONS OF STEEL EMBOSSSED CEILINGS.

— 10 —

No. 115—Shewing section of Steel Embossed Ceiling, made of Sheets, Moulding and Centre Piece. Any of the designs on the foregoing pages can be used.

More elaborate effects may be obtained by the introduction of Cornices and other ornamental features

No. 116—Section of Ceiling composed of Sheets or Panels, with Border, Moulding, Cornice, Corner Pieces and Centre Piece (not shewn). Any of the designs illustrated on the foregoing pages can be employed

Particulars of Ceilings of more elaborate designs, involving greater variety of material, sent on application.

## WATER HEATERS.—GAS AND FUEL.

The programme of things that can be done with gas is a useful one, which even the advocates of other mediums will hardly seek to deny. In other Catalogues we deal with Gas as a Heater of Halls, Churches, Rooms, and other places requiring artificial warmth, as a Cooker and as a Lighter, and the particulars given in connection with all these departments of usefulness will be found worthy of attention. An illustration of a Fuel Water Heater, together with particulars of same, is also given on this page.

### "BOSS" WATER HEATERS.

Made at our Redfern Factory, and possessing points of excellence peculiar to themselves.

#### SPRAY WATER HEATERS FOR GAS.

Made of Copper throughout.

The water is sprayed over a large surface of heated copper, immediately before it falls into the bath.

No. 1 Spray Water Heater, throws two gallons of water, heated to 120° Fahr. per minute, thus ensuring a hot bath in a very short time ... .. 75/-

No. 1a Spray Water Heater, same size as No. 1, but fitted with Patent Combination Safety Taps, turning water and gas on at the one time ... .. 90/-

No. 5 Water Heater, for Kerosene. This Heater, being heated by kerosene, makes the apparatus valuable for country use ... .. 90/6

No. 6. This Heater is specially constructed as a circulating Boiler, making it valuable for Refreshment Rooms, Hospitals, Warehouses, for making Tea, &c., where a large quantity of heated water is needed ... .. 45/10/-

No. 7 Fuel Water Heater (as illustration). Being heated by a handful of small chips makes it valuable for country use. This heater throws two gallons of water heated to 130° Fahr. per minute, made of Copper throughout ... .. 90/-

No. 7a Fuel Water Heater, same as No. 7, but made of galvanized Iron and Japanned ... .. 52/6

All these Water Heaters can be made of Iron at about £1 per Heater cheaper, but we strongly recommend Copper.

The "Boss."

No. 8.—The "Instanta" Heater is constructed entirely of heavy Copper on our Patent Tubular System, and, being tinned inside, ensures absolute purity of water. It is also fitted with our Patent Locking Cocks and Hot Water Shower Attachments. It has been specially designed to meet the demands of the Medical Profession, Hospitals, &c., and all those who recognise the great value of a plentiful supply of pure Hot Water which can be obtained instantly when it is required. It is absolutely safe, silent, and efficient in operation—

Copper, £9/12/6; Nickel-plated, £10/12/6

The above Heaters can be seen in operation at our Showrooms.

ALL PRICES IN THIS CATALOGUE ARE SUBJECT TO MARKET FLUCTUATIONS.

# THE BUCKEYE FOLDING VAPOR BATH CABINET.

## THE BUCKEYE FOLDING BATH CABINET

is a small room or enclosure supported by a galvanized steel frame, covered with antiseptic rubber lined drill, in which the bather sits on a chair while a specially designed spirit stove, supplied with each Cabinet, gradually raises the temperature to from 100 to 150 degrees, according to how the stove is regulated.

This is the latest improved method for taking vapor Turkish, Russian, Steam, Hot Air and Medicated Baths, and a Buckeye Cabinet is the only Cabinet that can be used for all kinds of baths with equally beneficial results.

In the Treatment of Disease these baths have most marvellous curative powers. The healing vapors penetrate through the pores of the skin direct to the cause of the trouble, cleansing and purifying the entire system, eliminating the poisonous secretions, dispelling inflammation, and applying soothing medication to the very root of the disease.

Vapor, hot air and steam baths are absolutely necessary for perfect health. Too little attention is paid to the importance of thorough bathing. Diseases cannot exist where there is nothing for it to build upon, and dirt is its favorite breeding place.

W R HAZARD, the eminent authority, says in the *New York Journal*, relative to using the bath:—"You have 38 miles of pores. They do three-quarters of the work to keep you open. We advise you to bathe just as we would advise the mayor of a city to keep the streets cleaned. The human body is really very much like a great city in its different departments, its plumbing, sewerage, and so on."

The greatest work of all is done by the pores of the skin. The bath opens the pores, enables the skin to do its share of the work, relieves the liver and other organs from over exertion and gives health. The pores are the lungs of the skin. Keep them open.

When by the excessive, or even moderate use of alcohol, tobacco or narcotics, the system has become impregnated with poison, impairing the nervous system,

weakening the mental faculties, and generally breaking up the physical condition, the renovating, cleansing and soothing treatment afforded by the Buckeye Bath Cabinet will give relief. It will act like magic, recuperating, and restoring the physical and mental condition to a thoroughly healthy and normal state.

## A BUCKEYE CABINET.

is ready for immediate use as soon as received. No trouble. No bother.

It has all the latest improvements, full width door, one piece removable top, armhole, steel frame, ten uprights to support it; folds within the space on which it stands; when folded is less than one inch thick; is lower in front than at the back; the neck-cloth is adjustable to any size desired; it is roomy on the inside, and is four inches longer than any other cabinet.

These exclusive features are absolutely necessary in a perfect bath cabinet, and a Buckeye Cabinet is the only one which has them. They save time, save expense, guarantee comfort to the bather, insure perfect operation, best results and absolute safety.

The covering of the Buckeye Cabinet is the best that years of experience, unlimited capital, the best of material and skilled mechanics can produce. There is nothing better for the purpose.

The inside is jet black, rubber lined, and can be washed or fumigated as often as desired. It is odorless, air-tight, non-absorbent, germ and disease proof, safe, sanitary, antiseptic, and will not rub or peel off.

The outside is light duck, beautifully designed, which makes the Cabinet very handsome. With ordinary care it will last a lifetime.

The top of a Buckeye Cabinet is removable. It is all one piece; has a substantial, independent frame and is held firmly in place at the back of the Cabinet by a flange.

The neck-cloth of the Buckeye Cabinet is adjustable. By means of a draw-string, it can be made any size desired. No towel or other covering is required around the neck.

When set up for use, a Buckeye Cabinet is 42 inches high at back, 27 inches high in front; 34 inches long; 28 inches wide.

The above dimensions conform to the lines of the body in a sitting position. The Cabinet is wide and high at the back, and lower and narrower in front. The top slants downward from back to front, cutting off all unused space. The Buckeye is the only Cabinet built in this way.

To close the Cabinet, slightly pull on the middle of the back of the Buckeye, when it folds inwardly within the space on which it stands.

## GAS FITTINGS.

Suitable for use with Ordinary Incandescent, or Acetylene Gas Burners.

### INCANDESCENT GASLIGHT APPLIANCES.

This department is conducted on the same lines as all the other sections, the best of everything is offered, and the lowest prices are charged.

Included in the stock are all the ordinary requirements of the Gasfitters' trade, as well as the more ornamental adjuncts.

Everything needful for gas lighting in Private Houses, Halls, Churches, Hospitals, Banks, Warehouses and other places is at the service of our patrons, and should further information than the following lists supply be wanted, we shall be pleased to supply it by return of post.

### ALL PRICES IN THIS CATALOGUE

ARE SUBJECT TO

MARKET FLUCTUATIONS,

FROM WHATEVER CAUSE ARISING.

Our Selling Prices are effected in various ways, and they rise and fall accordingly. They are influenced by the current rate of wages in various parts of the world where manufacturing enterprise is carried on; by alterations in the cost of raw materials; by the operations of Trusts and Combines, and by various other things beyond our control.

Our system of paying Spot Cash for everything enables us to buy in the best markets at the lowest rates and these advantages are passed on to all who honor us with their custom.

# WIRE STRAINERS.

No. Xu 15

Donald's Multigrip Wire Strainer (No. Xu 15) 17 each

Its special features are that when the gripping teeth are worn in one place, the segment which contains such teeth can be shifted at least five times, which brings no less than six different gripping surfaces into operation. The life of the Strainer is therefore increased many times over.

Some of the reasons why Donald's Strainer is the best:

1. It is the lightest, and combines a complete fence repair outfit.
2. It can be placed in position in two seconds.
3. It will take up an unlimited length of loose wire.
4. It works automatically, and requires no skill.
5. It does not damage the wire.
6. It stretches the wire equally well at the post or any part of the fence.
7. The wire does not slacken, when the strainer is removed.
8. It stretches barbed wire without any difficulty.
9. It folds into a small compass, and is very light.
10. A wire can be stretched tight, fastened off, and the machine removed, in 45 seconds.
11. It is an ideal strainer for telephone work.
12. The "Donald" Knot will never slip with hard or soft wire.
13. The material used in manufacture is the best obtainable.
14. It will stretch any kind of fence—plain or netted, &c.
15. It may be used for other purposes besides straining wire, such as hauling logs, pulling animals, motor cars or vehicles out of bogs, guiding trees when being felled, &c., &c.

Page's Patent Automatic Wire Strainer and Gripper, new pattern ... 24/- each

This tool is designed to strain any kind, size or quality of wire, new or old, barbed, strand or plain, and can be used at a straining post, whether bored with holes or not, or any point along the wire.

The tool consists of: A lever fitted with automatically working hooks, and to this is attached a wire gripper; a light steel chain, also with a wire gripper attached, and a key for making the knots. The whole weighing 5 lbs.

**CUSTOMERS ORDERING BY POST** are treated in the same way as customers buying at the counter. The same prices are charged, and selections are made by specially trained assistants from the same stocks. Everything sent to the country is carefully packed by experienced men.

No. Xu 16

## "MILLIONS OF MISCHIEFS"

And any amount of worry may be avoided by attention to the following simple directions:—

Write your Orders legibly, and your name and address in full. Give the Post Town where an answer will reach you.

State if parcel and invoice are to be addressed Mr., Mrs., or Miss.

Give the correct route by which the goods are to be sent, and say to whom they are to be consigned if you live far from a Railway Station or Port.

Be careful to give correct sizes, measurements, and quantities of articles required.

In the event of goods going astray in transit, or not arriving at their destination in reasonable time, it would be well for customers, in writing to us, to give date of invoice, to assist in tracing cause of delay.

# RISISTOID BUILDING MATERIALS.

Sole Australian Agents: ANTHONY HORDERN & SONS, Ltd.

Risistoid, in its various forms, is recommended as a Permanent Roofing, an Effective Dampcourse, an Ideal Building Paper, an Economical Floorcloth, and a Useful Non-Conductor. It is Cheaper than that which it supplants, resists Vermin and Vapours, is proof against Acids and Chemicals, and is Odorless and Hygienic.

**Risistoid Floorcloth**, of Grey color. First-class Floor Covering, being Damp Proof and Vermin Proof. Each roll guaranteed to cover 200 square feet of surface—

36in. wide, 34/8 per roll 72ft. long  
**Risistoid Roofing**, made of felt, saturated with Waterproof material; resists alike the heaviest rainstorms and the heat of the sun. Cement, tacks and washers, for laying, furnished free with each roll—

4 ply, 36in. wide, - 11 yard, 17/6 roll 72ft. long	2 ply, 36in. wide, 1/4 yard, 28/- roll 72ft. long
1 " 36in. " 1/1 " 21/6 " 72ft. "	3 " 36in. " 1/8 " 34/8 " 72ft. "

**Risistoid Dampcourse**, manufactured of the same material as Risistoid Roofing, and specially made to resist the pressure of masonry. Will not rot. Is unaffected by contact with lime or cement—

4 1/2 in. wide ... 5/6 per roll 72ft. long	2 1/2 in. wide ... 22/6 per roll 72ft. long
9 1/2 in. " ... 10/6 " 72ft. "	2 7/8 in. " ... 26/6 " 72ft. "
14 in. " ... 15/- " 72ft. "	3 1/2 in. " ... 32/6 " 72ft. "
18 1/2 in. " ... 19/6 " 72ft. "	

**Risistoid Building Paper**, for use as lining only, good and strong, and thoroughly saturated with Waterproofing. Each roll will cover 1000 square feet of surface—

1 ply, 36in. wide, - 1/2 yard, 15/- roll 336ft. long	3 ply, 36in. wide, - 1/4 yard, 27/6 roll 336ft. long
2 " 36in. " - 1/3 " 21/6 " 336ft. "	4 " 36in. " - 1/5 " 36/6 " 336ft. "

**Risistoid Asphalt Saturated Felt**, No. 2. Width, 32in.; Length, 125ft. ... 10/- per roll  
 No. 3. " 37in. " 140ft. ... 10/- "

**Risistoid Waterproof Paint**. Risistoid Paint is absolutely waterproof, and made to withstand the action of the sun's rays, Black only ... 1 American gallon, 8/- per tin

**Risistoid Special Paint**, Damp Proof and Acid Proof, Black only—

No. 2 ... 1 American gall., 8/6; 5 American galls., 40/- tin

No. 2 is of medium consistency. Is equal in covering capacity to two coats of ordinary paint; a gallon will cover a surface of 200 square feet.

No. 3 ... 1 American gall., 8/6; 5 American galls., 38/6 tin

No. 3 is a heavy paste of good penetrating quality, and leaves a good protecting coating, equal to three coats of good metallic paint. A gallon will cover a surface of 150 square feet.

**Risistoid Red Paint**, for Roofs. A beautiful Dark Terra Cotta color. Prevents the absorption of moisture, and resists the action of the elements ... 1 American gallon, 9/6; 5 American gallons, 45/- per tin

**Risistoid Cement**, for Roofing Seams 1/2 American gallon, 2/3; 1/4 American gallon, 4/- 1 American gallon, 7/6 per tin  
 Tin Caps for Roofing, - 7 lb. Nails, with fixed washers, galvanized, - 6 lb.

## WOOLPACKS, &c.

**Woolpacks**—

# **GALVANIZED CORRUGATED IRON.**

CURRENT QUOTATIONS FURNISHED ON APPLICATION.

We keep all the Standard Brands of Iron in stock, and sell at lowest rates. When no special make is specified in an order, we supply, in execution thereof, the best. The following information will assist buyers in making calculations.

ALL PRICES ARE SUBJECT TO MARKET FLUCTUATIONS.

Each sheet covers 2 feet wide, allowing for full lap. Each case contains about half a ton, and about the following number of sheets:—

24g. "ORB" CORRUGATED IRON.							26g. "REDCLIFFE CROWN" CORRUGATED IRON.						
Lengths	5	6	7	8	9	10 feet	Lengths	5	6	7	8	9	10 feet
Sheets in case	83	69	59	51	45	41	Sheets in case	118	98	84	73	65	58

26g. "ORB" CORRUGATED IRON.							28g. "ORB" CEILING IRON—1-inch Corrugations.						
Lengths	5	6	7	8	9	10 feet	Lengths	5	6	7	8	9	10 feet
Sheets in case	118	98	84	73	65	58	Sheets in case	133	113	95	83	75	70

12 case lots, including 2 cases 9 feet and 1 case 10 feet, delivered at wharf, railway, or anywhere in the City at same price per ton as 5 to 8 feet.

## **CHARGES FOR CURVING GALVANIZED CORRUGATED IRON.**

For Verandahs, Bull-nosed, O G, or D Sheds, per curve,  $2\frac{1}{2}$  for Tanks, etc., ha.-f.-crete, 5, circle,  $7\frac{1}{2}$  per sheet.

## RIM NIGHT LATCHES.

**Cylinder Rim Night Latches, Japanned Cast Case,**  
3½ in. x 2½ in., Brass Bolt, Turn Knob, slide stop,  
Brass Cylinder (No. Xu 70) 3/9 each; 41/6 doz.

With 3 Keys, adjustable to doors from ½ in. to 2½ in. thick  
Operated from the outside by a key only, and on the inside by  
a knob. The bolt may be fastened back by the spring catch  
on the inside. Can be adjusted both to right or left hand  
doors. Each latch packed with 3 keys. Complete fittings, and  
screws.

No. Xu 70

No. Xu 71

**Rim Night Latches, Cast Case, 3 in. x 2 in., Copper  
Finish, Bronze Metal Knob, with Brass Tubular  
Nozzle, 2 Nickel-plated Steel Keys (No. Xu 71)—**  
1/10 each; 20/6 doz.

## THE YALE CYLINDER LOCK.

Fig. 1.—Yale Cylinder and Key.

The Cylinder as it would look if out in half to expose  
the mechanism. The key is only partly inserted, so that  
some of the pins keep the plug from turning.

The Yale Cylinder Lock possesses the security against picking and substantial construction to resist  
violence which are the first requisites for an adequate defence of the home or other building which it guards.  
There is no case on record of the picking of the Yale Cylinder Lock under the conditions of actual use by  
a burglar or unauthorised persons.

The four chief essentials of a good lock are—

1. Security against picking.
2. Security against accidental interchange of keys.
3. Security against illicit duplication of keys.
4. Convenience of a small neat key.

The Yale Cylinder Lock possesses each and all of these essentials in the highest degree. The key is smaller,  
lighter, and more convenient than any other, yet fully adequate to its work. The insertion of the true key  
moves the pin-tumblers, as shown by Fig. 1, and sets them in correct position, as shown by Fig. 2, thus  
permitting the key to rotate and operate the bolt. The Yale Cylinder Lock should be on every door guarding  
something of value.

Fig. 2.—Yale Cylinder and Key.

The key being fully inserted, the pins are raised to an  
exact line, and the key and plug may turn freely.

## YALE DEADLOCKING LATCHES.

**Yale Deadlocking Latches.**—For residences, offices, cupboards, and in fact every kind of door. A new model with an automatic deadlocking bolt, giving the convenience of a spring bolt with the security of a dead bolt.

Case,  $2\frac{1}{2} \times 3\frac{1}{2} \times 1\frac{1}{2}$  in.; iron, old copper finish; bronze cylinder, bolt, turn knob and stop; backset,  $2\frac{1}{2}$  in.; for doors  $\frac{1}{2}$  to  $2\frac{1}{2}$  in. thick (No. 44)

7/8 each; '80/6 doz.

Operated from outside by key, from inside by knob; bolt may be held back by stop

No. 44.

No. 90.

**Yale Rim Deadlocking Latches.**—The most convenient and secure lock for entrance doors which require to be locked only at night. Note operation below. For use in offices, stores, etc.

Case,  $3\frac{1}{2} \times 3 \times 1\frac{1}{2}$  in., iron, old copper finish; Bronze cylinder, turn knob, bolts and stop; Backset,  $2\frac{1}{2}$  in. For doors  $\frac{1}{2}$  to  $2\frac{1}{2}$  in. thick; (No. 90) ... 10/6 each; '25/11/- doz.

Operated from outside by key, from inside by turn a/c b. When unlocked by key or turn knob both dead and trigger bolts are withdrawn and held back in case. When stop on case is pushed down the trigger bolt is released and thrown out. When door is closed the trigger bolt automatically releases the dead bolt, which is also thrown and locked.

## RIM AND NIGHT LATCHES.

No. 42

**Yale Rim Night Latches.**—A similar lock to No. 42, with the added function that the spring latch bolt may be deadlocked by the key, and also by the stop when desired.

Case,  $2\frac{1}{2} \times 3\frac{1}{2} \times 1\frac{1}{2}$  in., iron, old copper finish; Bronze cylinder, bolt and knob, 3 keys; Backset,  $2\frac{1}{2}$  in. For doors  $\frac{1}{2}$  to  $2\frac{1}{2}$  in. thick (No. 43)—

6/9 each; 75/- doz.

No. 543.

**Yale Rim Night Latches,**  $2\frac{1}{2} \times 2\frac{1}{2} \times 1\frac{1}{2}$  in.; Backset  $1\frac{1}{2}$  in.; suitable for doors with narrow stiles—

(No. 543) ... 7/6 each; 89/- doz.

No. 95

**Yale Rim Night Latches.**—A compact and inexpensive night latch, in neat Cast iron case of the warded type, and of fair security.

Case,  $2 \times 2\frac{1}{2} \times \frac{1}{2}$  in., cast iron, Nickel-plated steel knob and key plate, wrought Brass tube, Bronze-plated iron bolt, 2 Nickel-plated flat steel keys; Backset,  $2\frac{1}{2}$  in. For doors up to  $1\frac{1}{2}$  in. thick (No. 95)

1/4 each; 14/10 doz.

No. 72

**Rim Latches,** Japanned Machine-made Steel Case,  $5\frac{1}{2}$  in.  $\times$   $4\frac{1}{2}$  in.  $\times$   $2\frac{1}{2}$  in., Brass bushed, double Springs, Brass Bolt, improved Stop,  $\frac{1}{2}$  in. Spindle hole in follower, complete with Brass Furniture (No. 72) —

1/1 each; 12/1 doz.

# ANTHONY HORDERN & SONS, LTD., ONLY UNIVERSAL PROVIDERS

## YALE RIM NIGHT LATCHES.

**Yale Rim Night Latches.** For residences, offices, cupboards, and in fact any kind of door. The best and most popular night latch in the world. All screws are concealed when door is closed. Very easy to apply.

Case,  $3\frac{1}{2} \times 3 \times 1\frac{1}{2}$  in.; iron, old copper finish; bronze cylinder, bolt and knob, backset,  $2\frac{1}{2}$  in.; for doors  $\frac{1}{2}$  to  $2\frac{1}{2}$  in. thick (No. 49) ... 5/9 each; 64/- doz.

Operated from outside by key, from inside by knob; bolt may be held back by stop

No. 42.

**Yale Rim Night Latches.**—An earlier model than the No. 49. Until the advent of the latter the leading night latch on the market, and still very popular.

Case,  $2\frac{1}{2} \times 3\frac{1}{2} \times 1\frac{1}{2}$  in.; japanned iron, bronze cylinder, bolt and knob; backset,  $2\frac{1}{2}$  in.; for doors  $\frac{1}{2}$  to  $2\frac{1}{2}$  in. thick (No. 042)—5/4 each; 59/- doz.

Operated from outside by key; from inside by knob; bolt may be held back by stop.

No. 042.

No. 85.

**Yale Rim Night Latches.**—Similar to No. 042, but of lighter construction, and with corrugated keys, case,  $2\frac{1}{2} \times 3\frac{1}{2} \times 1\frac{1}{2}$  in.; japanned iron, bronze cylinder, front bolt and knob, backset,  $2\frac{1}{2}$  in.; for doors  $\frac{1}{2}$  to  $2\frac{1}{2}$  in. thick (No. 85) ... 4/- each; 44/6 doz.

No. 043.

**Yale Rim Night Latches.**—Similar to No. 042, but of smaller size to suit doors with narrow styles, case  $2\frac{1}{2} \times 2\frac{1}{2} \times 1\frac{1}{2}$  in.; japanned iron, bronze cylinder, bolt and knob, 3 keys; backset,  $1\frac{1}{2}$  in.; for doors  $\frac{1}{2}$  to  $2\frac{1}{2}$  in. thick (No. 043) ... 4/- each; 64/- doz.

The following Yale Rim Latches are deadlocking, that is, they act as an ordinary latch when door is closing, but when door is closed the latch is, or can be, set so that it can only be retracted by the knob or key. Many doors are poorly hung and it is possible to gain access to an ordinary latch with a thin edge tool, through the door jamb and retract the latch. The deadlocking feature renders this impossible. These latches offer the greatest security against sneak thieves; and their use on front doors is recommended.

## YALE DEADLOCKING LATCHES.

No. 46.

Operated by key from outside by turn knob from inside. Bolt may be held back by stop. The bolt may be given a second throw by key from outside or turn knob from inside which deadlocks making it proof against end pressure

**Yale Deadlocking Latches.**—For residences, offices, cupboards, and in fact any kind of door. A new model with double-throw bolt. A second throw by key or knob deadlocking it, and making it proof against end pressure

Case,  $2\frac{1}{2} \times 3\frac{1}{2} \times 1\frac{1}{2}$  in.; iron, old copper finish; bronze cylinder, bolt, turn knob and stop; backset,  $2\frac{1}{2}$  in.; for doors  $\frac{1}{2}$  to  $2\frac{1}{2}$  in. thick (No. 46)—8/- each; 59/- doz.

# A PAGE OF PADLOCKS.

Padlocks of Yale manufacture are produced in more than 200 styles and sizes, to suit all purposes and conditions of use. We here show a few of the most popular numbers.

The value of a Padlock is in its interior construction rather than its appearance; though, in its production both have been carefully considered.

**Yale Standard Padlocks, Lever-tumbler mechanism.**—These Padlocks are made wholly of bronze metal. The shackle is drop-forged to increase its strength and improve its appearance. Its action is automatic both in locking and unlocking, and the shackle hole is protected by a stopper against the entrance of dirt when the lock is open—

No. 850.

**Yale Padlocks, Pin-tumbler mechanism.**—This line of Padlocks can be master-keyed in series with other locks shown in this Catalogue taking the same size key—

No. 850—Steel shackle, 2in. ... 7/- each  
No. 870— " 2 1/2in. ... 10/6 "

Heavy cast Bronze case, nickel-plated steel shackle, 2 para-centric keys, coined, gold-plated bows, changes practically unlimited. May be master-keyed if desired.

BUTT HINGES.

No. Xu 173

Angus Patent Steel Butt Hinge (No. Xu 173)—  
2 1/2 in., without screws ... 1/1 doz. pairs  
.. with .. .. 2 pair

These Hinges are designed to reduce the labor of hanging Doors, Windows, &c., to a minimum; all that is necessary being to screw the hinge to door and then to frame, as shown in the illustration. Sinking into wood is absolutely dispensed with. The shape of the hinge enables the joint to be set in perfect line with edge of frame. Doors recessed in frames hung as easy.

No. Xu 175

Fancy Surface Half-mortise Steel Butt Hinges, Ball Tip, Loose Pin, Antique Copper finish (No. Xu 175)

	3	3 1/2	4 in.
With Screws ...	9/8	11/2	17/8 doz. pairs
.. ..	-10	1/-	1/7 pair

These Hinges are reversible, and can be made either right or left hand by unscrewing the ball tip, reversing the pin, and screwing the tip in the opposite direction. Time and labor are saved in hanging doors with these hinges, as the casement only is mortised, the door put in place, and the ornamental leaf screwed to the surface of door.

No. Xu 174

## The Yale Double-acting Door Check.

This is a check of the "Yale" type, modified for service on doors hung on double-acting hinges, which permit the doors to swing in both directions. It performs the same usual functions for such doors, as do the Yale and Blount Checks for single-acting doors.

As double-acting hinges always contain springs which operate to close the door, this article is a checking device only.

By a very ingenious construction the main arm swings over the top of the door and under the soffit of the door frame in accordance with the direction in which the door is moved.

It brings a double-acting door promptly and quietly to rest at the centre every time, without any of the jarring and dangerous flip-flap which previous to the introduction of this check was inevitable with such doors.

The Yale Double-acting Door Check, Gold Bronze finish—

No. 58—For double doors under all ordinary conditions of use ... 30/- each

**TERMS: SPOT CASH.** In doing business with our numerous customers, we claim a ready recognition of the necessity for **Cash Payments**. To pay cash and give credit in return would require the **wealth of Croesus** ten times told, and ample as are our means, and willing as we are to employ them in the service of the public, it would be impossible, except by the sacrifice of **those low prices** which have made our name so famous, to do business except for **prompt cash**.

## Yale & Towne Door Closing Devices.

### THE "YALE" AND "BLOUNT" DOOR CHECKS.

The trade name "Yale" is used to designate several new door closing devices recently brought out, each the best of its kind, embodying the latest improvements and the highest quality.

The trade name "Blount" is continued to designate the line of door checks which for twenty years has been recognised as embodying the earliest, and until now the best, liquid door checks on the market.

The combined line embodies three styles (and many sizes) as follows:—

**The Yale Door Check.**—The latest and best device, embodying the principles of the original Blount check, with many improvements. See below.

**The Blount Door Check.**—The earliest and most popular liquid door check. See below.

**The Yale Double-acting Door Check.** For double-acting doors, making such doors convenient, noiseless and safe. See next page.

### WHAT A DOOR CHECK DOES.

It closes a door behind you, gently but firmly, without your touching it.

It prevents drafts, thus promoting comfort and health.

It stops slamming of doors, thus preventing noise and injury.

It reduces coal bills and doctor's bills.

It costs little, but is worth much.

The faults of the door spring prompted the discovery of the door check. Not only does it prevent the annoyance of slamming but saves many a doctor's bill by keeping out drafts and the germ laden dust.

#### THE YALE DOOR CHECK.

The Yale Check here illustrated is the latest addition to the line of Yale Door Closing Devices. It embodies all the good features of the earlier Blount Check (which it resembles, both in appearance and construction), and has many and important improvements of its own.

The Yale Door Check, Gold Bronze finish—

|--|-----------|
| No. 12—For light inside doors ...      | 18/6 each |
| No. 13—For inside doors of medium size | 22/- "    |

#### THE BLOUNT DOOR CHECK.

The only successful door checks are those of the liquid type and those of the Blount is the earliest, and until the introduction of the Yale Check, illustrated and described above, it was the best and most popular.

It still enjoys extensive sale.

The Blount Door Check, Gold Bronze finish—

# DOOR SPRINGS AND DOOR STOPS.

## Bargent's Liquid Door Check and Spring—

For light inside doors, Gold bronzed, No. 322, 18/6 each

Suitable for either right or left hand doors without changing any of the parts. Is light, strong, durable. Easy to apply, regulate and keep in order, and prompt and effective in its action. Prevents the slamming of doors, destruction of glass, and jarring of the building.

## Eclipse Door Springs—

For ordinary doors, No. 1253 ... 6/- each  
 " heavy " " 1255 ... 7/- "

Eclipse Door Checks can be used with any ordinary door springs, and are packed with detachable brackets, so that the same check can be applied either to the doors or casing as desired. The detachable foot for attaching to door is so arranged that the cylinder may be properly adjusted in or out to suit doors differently set in their frames, the set screw holds the cylinder firmly when adjusted. Have the cylinder indoors when possible; by screwing the cap at the end of cylinder, the checks may be instantly varied for light or heavy draught.

Eclipse Door Checks, No. 1223 ... 7/- each

Eclipse Springs are suitable and recommended for use with Eclipse Checks, and will suit right or left hand doors; they are adjustable in tension, very compact and powerful, and made from extra heavy clock spring steel of the finest quality.

"Cinch" Japanned Iron

Steel Track, for hanging rollers, in 6 and 8 feet lengths,  
1 1/2 in. . . . . 1/3, 2/4 length

## McCABE'S PATENT DOOR HANGERS.

No. Xa 256

Section showing fitting of Parlor Door Hangers.

The Parlor door Hanger No. Xa 256 has fibre wheels and is absolutely noiseless. It is ball-bearing, and all parts are case hardened. The bearings are constructed with the same care as those in bicycles, thereby reducing friction to a minimum. The inside surfaces of the track in which the ball-bearing carriages travel are as smooth as it is possible to make them. There is an adjustment on the track, also on the carriage, making adjustment convenient at any time.

McCabe's Patent Ball Bearing Door Hangers, No. 10, for Double Doors, consisting of 4 Hangers, Track, Brackets, Centre Stops and Screws (No. Xu 256)—

6 6 1/2 7 8 feet width of opening  
24/- 24/- 27/6 29/6 per set

70/- 78/- set, including Track

Other size of openings in proportion

The Track can be cut to suit intermediate sizes.

Single Door Sets consist of Track, Brackets, 2 Carriages, Aprons, and Screws.

Double Sets as above, but with 4 Carriages.

No. Xu 257

Brackets for the above track to screw underneath joists. 1/3 each

# McCABE'S PATENT DOOR HANGERS.

No. Xu 258

First.—The doors should not exceed 3ft. in width, or 100 lbs. in weight.

Second.—Any number of doors may be placed in the opening, commencing with a one-half door hinged to jamb at either side of the opening. This half door must be exactly one-half the width of the other doors, less the throw of the hinge as shown in plan.

Third.—There should be one carriage on each alternate door only, and this carriage should be placed on the exact centre of the top rail of the door (see cut). To accomplish this it is best to hinge the doors together, fold them and strike a line across the centres and set carriage on this line; then when the doors are hung and folded back, hangers will be in perfect alignment and work easily.

McCabe's Patent Accordion or Folding Door Hangers, Full Bearing Swivelled Carriage No. Xu 258; For 20ft. opening. Consisting of 20ft. of Track, with Brackets, 3 Door Hangers, and Screws ... 92/6 set  
Distance from upper side of Jamb Head to underside of Header is 4 1/2 in. Other size of openings in proportion.

## " MILLIONS OF MISCHIEFS "

And any amount of worry, may be avoided by attention to the following simple directions:—

**Write** your Orders legibly, and your name and address in full. Give the **Post Town** where our answer will reach you. **State** if goods and invoice are to be addressed Mr., Mrs., or Miss.

**Give** the correct route by which the goods are to be sent, and say to whom they are to be consigned if you live far from a Railway Station or Port.

Be careful to give sizes, colors, lengths and quantities of goods wanted, and state whether we may substitute if we have not the exact material or article in stock.

In the event of goods going astray in transit, or not arriving at their destination in reasonable time, it would be well for customers, in writing to us, to give date of invoice, to assist in tracing cause of delay.

Our Selling Prices are affected in various ways, and they rise and fall accordingly. They are influenced by the current rates of wages in various parts of the world where manufacturing enterprise is carried on, by alterations in the cost of raw materials; by the operations of Trusts and Combines, and by various other things beyond our control.

Our system of paying Spot Cash for everything enables us to buy in the best markets at the lowest rates, and these advantages are passed on to all who honor us with their custom.

36 x 30in.	...	...	...	13/6

Samples of India-Rubber Matting sent free on application.

Motor Car Body Builders, Fittings of all description, in Nickel or Brass, in great variety of styles and designs at Anthony Horderns' Famous Low Prices.

## "MILLIONS OF MISCHIEFS"

And any amount of worry may be avoided by attention to the following simple directions:—

Write your Orders legibly, and your name and address in full. Give the Post Town where an answer will reach you.

State if parcel and invoice are to be addressed Mr., Mrs., or Miss.

Give the correct route by which the goods are to be sent, and say to whom they are to be consigned if you live far from a Railway Station or Port.

Be careful to give correct sizes, measurements, and quantities of articles required.

In the event of goods going astray in transit, or not arriving at their destination in reasonable time, it would be well for customers, in writing to us, to give date of invoice, to assist in tracing cause of delay.

# .. DIAGRAMS ..

## In connection with the Installation of Electric Bells, &c.

In the following diagrams the pushes are represented thus,  $\equiv$ , the Batteries thus,  $\text{BATTERY}$  and the Earth Returns thus,  $E$ . Of the two vertical lines that represent Batteries, the longer line indicates the Carbon, or Positive Pole, and the shorter line Zinc, or Negative Pole. In the Leclanche cell, or other Wet cell, the Positive Pole is the terminal screw on the top of the carbon in the Porous Pot; in a Dry cell, the Positive Pole is the centre terminal screw, fixed to the Carbon Plate. Where the Battery or symbol thus,  $\text{BATTERY}$ , is repeated, it signifies, according to the number of repetitions, how many cells are required.

DIAGRAM 1. Simple Bell circuit—bell and battery connected to one push, as in the case of fixing a front door bell to ring in kitchen, explained on page 860.

DIAGRAM 2.—In some cases when fixing Electric Bells it is more convenient to run one insulated wire for the line wire, the return circuit being made by Earth return, than to run two insulated wires, one for the line, and the other for the return. The best earth return is made by firmly fixing the wires at each end (shown in diagram No 2 as E) to a water supply pipe by first scraping the pipe clean and by twisting about six turns of the bare end of the wire around the pipe and tightly securing it. Where there is no such pipe, fasten wire to a piece of metal, with not less than 4 square feet of surface, which, bury in as damp a place as possible. Should a sufficiently damp place not be available (see page 873), two lines of wire are needed, as shown in diagram No. 1. This way of installing an Electric Bell can be used for connecting inside the house to stables or offices outside.

DIAGRAM 3.—Two, three or more pushes in different parts of the house to ring the same bell. Useful when it is desirable to be able to communicate from three or four points to a central position.

DIAGRAM 4. Two bells in separate rooms, either of which can be rung singly by means of a switch. A two way switch is inserted in the circuit as shown. Either bell can be rung as desired by moving lever on switch to right or left. The number of bells to be rung singly can be increased by means of a suitable switch.

Useful for Night and Day Bell for Chemists and Doctors

# ANTHONY HORDERN & SONS, LTD. ONLY UNIVERSAL PROVIDERS

## DIAGRAMS.

IN CONNECTION WITH THE INSTALLATION OF ELECTRIC BELLS, &c.

DIAGRAM 5.—Bells connected so that when the push is pressed, two, three or more bells ring simultaneously, but not singly. Only one bell must be of the trembler type, the others must be single stroke. Any of the bells listed in the following pages can be made single stroke at the additional cost of sixpence. For use in factories or other places where a simultaneous signal has to be given to different places.

DIAGRAM 6. Bell circuit with relay suitable for long distances. The zinc of battery at one end (left hand side of diagram), and the wire from relay at the other end, are connected to earth. For method of earth returns, see diagram 2, on page 857. On pressing push the armature of relay is attracted and causes the bell to ring as long as the push is pressed. For connecting two buildings, office, works, &c.

DIAGRAM 7 Continuous action Bell circuit for Burglar Alarm. When contact is closed by the opening of door or window by an intruder, the bell rings and continues ringing until switched off. This style of connection has been the means of frightening away many a burglar. Burglar Alarm Traps (see page 864) make a useful addition.

DIAGRAM 8. Two bells at different points and two pushes at different points with one battery. A good instance in point is in connection with a mine. One push at the top, ringing bell at the bottom of the shaft, the other push at the bottom, ringing bell at the top. Three wires and one battery are required.

# DIAGRAMS.

IN CONNECTION WITH THE INSTALLATION OF ELECTRIC BELLS, &c.

DIAGRAM 9 Two bells and two double contact (Morse) pushes for ringing as described under diagram 8. One wire with earth return and two batteries are required. For method of earth returns, see diagram 2, on page 857.

DIAGRAM 10. Four pushes and indicator for ringing one bell from different parts of the house. When any one of the pushes is pressed the corresponding number in the indicator box indicates from which room the bell has been rung. This method of connection enables each of the rooms of a house to communicate with a central point.

DIAGRAM 12.—Two bells, five pushes, indicator and switch, to ring at either one of two different places from five different points. The object of this connection is similar to that of No. 10, with the additional advantage of an extra bell.

DIAGRAM 11.—One bell and indicator and five pushes to ring from five different places. Useful for long distances and loud sounding bells, relay being provided. Two batteries are required. For use in Hotels, Boarding houses, Hospitals, &c.

# DIAGRAMS.

## IN CONNECTION WITH ELECTRIC BELL FITTING.

of the glass jar. The terminal on top of the porous pot must be clean and bright, and tightly screwed down on connecting wire. For larger or smaller Leclanche cells, sal-ammoniac crystal and water in the proportion of 2oz. of the crystal to one pint of water.

DIAGRAM 13.—Illustrates how the Leclanche two pint cell for an electric bell battery should be connected. The diagram shows three Leclanche cells connected in series, ready for Electric Bell work. A Leclanche cell consists of a porous pot containing a carbon plate, and a zinc rod, contained in a glass jar. Four ounces of sal-ammoniac crystal should be put into the glass jar round about the porous pot, then fill with water to within two inches of the top of the jar; water should be added occasionally to maintain this level and care should be taken to avoid splashing the top of the porous pot or of the glass jar. The terminal on top of the porous pot must be clean and bright, and tightly screwed down on connecting wire. For larger or smaller Leclanche cells, sal-ammoniac crystal and water in the proportion of 2oz. of the crystal to one pint of water.

DIAGRAM 14.—Illustrates how the wires are attached to the springs of an electric bell push. The insulating material over the wire must be removed, the wire scraped bright and one end fastened firmly to each of the two springs of the push by placing the bare ends under the washers of the two screws. Care must be taken not to remove the insulating material from that part of the wire that passes through the hole.

No. 14a.

DIAGRAM 14a.—Illustrates the correct method of splicing electric wires, whether iron or copper, large or small. If the wire is insulated, the insulation must be removed, and the metal scraped clean and bright at the point where the wires come in contact. The join should then be soldered (using resin as flux) and covered with insulating tape.

## FIXING ELECTRIC BELLS.

By the aid of diagrams 1 to 14a, there should be little trouble in installing Electric Bells in any desired position. Take as an instance, the fitting up of a front door bell in a finished house.

Having obtained the necessary articles, start by fixing the push. A position being chosen, bore a quarter inch hole in door post for wires to pass through, divide the wire into two equal lengths and fix an end of each length of wire underneath each of the two metal springs of push, as per diagram 14.

Then pass the two wires through the hole in door post and screw up push outside. Fix the two wires with staples along the woodwork until the position for the bell is reached, taking care not to place two wires under one staple. Screw the bell firmly to wall, by holes or plates provided, cut one wire at the point it reaches the bell, and remove one inch of insulating material from each of the cut ends.

Place one of the cut ends under one of the two brass terminals on top of bell, and the other end under the other brass terminal. Continue stapling the two wires along woodwork, until the position (as cool a place as possible, the shelf of a pantry is handy) for the battery is reached, then cut off the surplus wire, and connect one end to the zinc, and the other to the carbon of battery.

The battery for a simple circuit, generally, consists of two cells, either wet or dry. For the Battery we recommend the use of "UNI" Dry Cells as giving the most satisfactory results. To connect battery of wet cell type, see diagram 13, which shows three cells connected in series, two are generally sufficient. Dry cells are connected in the same way; they are supplied ready charged.

# ANTHONY HORDERN & SONS, LTD., PALACE EMPORIUM, SYDNEY.

## BELL PUSHES.

Electric Bell Pushes are too well known to need much explanation. They generally consist of two metal springs encased in plain or fancy covers, which, when pressed together, allow the current to continue along the wire, thus causing the bell to ring. See diagram 14, page 860.

### DOOR, WINDOW, AND FLOOR CONTACTS.

To connect Burglar Alarms with Bell, see diagram on page 858.

(B) Simple Alarm Trap

To use this Alarm Trap, screw it up in a suitable place, connect the ends of two lengths of insulated wire to screws, as shown in illustration, the other ends of the wire to be connected in the ordinary way to the bell and battery, as per diagram No. 1. A piece of fine string must be run from the top of the Alarm Trap, across the area desired to be protected and fastened to any convenient article. The alarm is specially useful for Fowl runs.

### RELAYS.

For long lines or for ringing loud sounding bells, see diagram No. 8, page 858—

For open circuit	...	40 ohms.	...	5/-
" " " "	...	120 "	...	8/6

### ELECTRIC BURGLAR ALARM MATTING.

3 feet wide

...	...	3/-	per foot
-----	-----	-----	----------

The Matting can be laid in any room, under the floor covering. Connect two ends of insulated wire (after scraping, &c., see diagram No. 14a, on page 860) one to bell, the other to battery, to the two bare ends of wires attached to matting. Anyone treading on the matting the bell will instantly ring.

CUSTOMERS ORDERING BY POST are treated in the same way as customers buying at the counter. The same prices are charged, and selections are made from the same stocks. Everything sent to the country is carefully packed by experienced men.

Terms: SPOT CASH,

## LECLANCHE CELLS.

For use with Electric Bells, Telephonettes, &c.

**DESCRIPTION.**—The negative element, in the cells, consists of a carbon capped carbon plate, surrounded by peroxide of manganese and crushed carbon contained in a porous pot. The positive element is a rod of zinc amalgamated with mercury. The connecting wire on zinc is attached by a special process, making it impossible to pull it out. Both elements are placed in a glass jar, which is filled within two inches of the top with a solution of sal-ammoniac, in the proportion of 2 ounces to a pint of water. The tops of porous pot, zinc and jar are dipped in a special compound to prevent the salts creeping.

ANTHONY HORDERN & SONS, LTD. ONLY UNIVERSAL PROVIDERS

## NECESSARY APPLIANCES AND MATERIAL FOR TELEPHONE INSTALLATION.

The following appliances and material are necessary to set up Telephonic communication:—

**Battery for the Transmitter.**—Consisting of two, either wet or dry, cells to be placed adjacent to the instrument.

**Battery for Ringing** (for Battery Ringing Telephone), consisting of three or more cells, according to the distance required to ring over, but as both ringing and speaking do not take place at the same time, the two cells used for the Transmitter Battery can be utilized, thus practically only one or more cells beyond the two for Transmitter are required. Batteries are supplied with or without box.

**Sufficient wire** for connection between the various stations where Telephone instruments are placed. When the wire is to be placed out of doors, Galvanized Iron Wire, or preferably, hard drawn Copper Wire may be used, when indoors all the way, Insulated Copper Wire is the proper thing.

**Porcelain Insulators.**—About 30 or more to the mile, according to the character of the ground to be covered.

**Staples, Screws, Tie Wire,** and heavily insulated **Leading in Wire;** also known as Electric Light Wire, in quantities in accordance with the extent of the installation.

### DIAGRAM IN CONNECTION WITH THE INSTALLATION OF ECHOPHONE SERVICE.

No. 15.

DIAGRAM NO. 15.—Showing how to connect the Echophone Set with an existing Bell Circuit. The Echophone is the best for this purpose and consists of a pair of telephone instruments and a special push (see price list, page 874), which should be wired up, as shown in the diagram.

Telephone communication, say, between a bedroom and the kitchen, will then be established. The Bell circuit will work as before.

## Diagrams showing Telephone Systems.

DIAGRAM 16.—Shows the connections necessary to erect two "Sterling" or other Telephonettes, so as to set-up communication between two points not exceeding quarter a mile apart. Two "Sterling" Telephonettes, six cells, wet or dry, to form two three-cell batteries and sufficient wire, are required.

If the wire connecting the two stations is to be under cover all the way, 20 gauge Insulated India Rubber and Cotton Covered Copper Wire should be used. If the wire is to be out of doors part of the way, the line should consist of 16 gauge Hard Drawn Copper Wire, supported by Button Insulators on wood posts. "Sterling" Telephonettes can be used for intercommunication between any number of points as effectively as the better class instruments, at the cost of an additional Telephonette instrument, Battery and Switch at each point, and of extra wire for connection.

DIAGRAM 17.—Shows an Ericsson Wall Pattern Telephone at a terminal or central station. The Telephone can be connected with any number of stations, far and near, by means of a similar instrument at each station, a Switch Board at the central station and the necessary wire and material.

If the installation is to be independent of the Government system, No. 12 gauge Galvanized soft iron Telephone Wire may be used; if, on the other hand, the wire, at any point, joins the Government line, certain regulations have to be respected. For a private line the wire may be supported by Porcelain insulators on wood posts; for a Government line, according to the regulations

DIAGRAM 18.—In most respects for the same purpose as shown in Diagram 17, with the addition of an extension bell to give notice of a call. Extension bells can be placed at any desired point in connection with any of the telephone instruments on the line, and can be fitted to any kind of instrument. When ordering tel. us what description of Telephone instrument is in use.

DIAGRAM 19.—Extension Bell shown can be connected only on an Ericsson Bridging (B) Telephone and can be used in the same way as provided in Diagram 18. The bell must be of high resistance.

To connect Extension Bells with existing Telephone.—Obtain a Magneto Extension Bell, Switch, and sufficient 20 gauge insulated wire to make a double line from the Telephone to the position where the bell is to be placed and screws and staples for fixing. Screw up Switch and Bell as shown in diagram, and run wire in accordance with dotted lines, fastening with staples, and make secure to terminal screws attached.

## Diagrams showing various Telephone Systems.

DIAGRAM 20.—Telephone for communication between three stations, showing Switch and Indicator at central station, necessary to enable the central station to connect the two remaining stations with each other.

DIAGRAM 21 Same as shown in Diagram 20, but for connection with either Metallic or Earth Return, the Switch can be used for Earth Return circuit by joining terminals 1, 3 and 5 together and connecting to Earth. The Earth Connection shown is for Lightning Arrester

DIAGRAM 22 Telephone and Ericsson Wall Switch, with intercommunication through central station, for five single lines, there being a Telephone fixed at each of the five stations as well as at the central station

DIAGRAM 23.—Rosette, by means of which Table Telephone (Ericsson Magneto Table Telephone) connection is established.

# HOW TO ERECT A TELEPHONE.—No. 1.

440 YARDS OR LESS APART.

*This diagram "X" shows the Instrument in position, and the way the connections are made, at each end of line*

The following particulars on pages 870, 871 and 872 are given by way of instruction to set up three different telephone systems—

No. 1. Diagram marked X. To set up telephonic communication between two points, 200 yards apart.

Select the following materials from this Price list.

Two Battery-ringing Telephone Instruments, one for each end.

Six Wet or Dry Cells, to make two Three-cell Batteries.

Two Hundred yards of Hard-drawn Copper Wire, 16-gauge.

Sufficient Insulated Copper Wire, 20-gauge, for the part of the work that is indoors.

Sufficient Electric Light Wire to reach from point P to point O at both ends.

Staples and Screws.

With these materials, start by creating the line along the proposed route, of Hard-drawn Copper Wire, marked A in the diagram, supporting the wire on insulators, placed at equal distances of about 70 yards, against wood posts, trees, fences, or anything available, taking care the wire does not touch anything but the insulators.

Screw up a Telephone instrument at each end of the route, in the desired position. The instruments should then be connected, and the following instructions refer to the connections at both ends:—

Fasten enough 20 gauge insulated Copper Wire (B in diagram) after removing an inch of the insulating material, to the terminal screw (L in diagram) to reach to point O. At point O, join on enough Electric Light Wire (C in diagram) to pass through a hole in the wall to reach to point P. At point P, join the Electric Light Wire (C in diagram) to the hard-drawn copper wire (A in diagram). For the method of making these joins (see diagram 14a, on page 880).

The main line is now complete, leaving the Earth return and the Battery connections to be made.

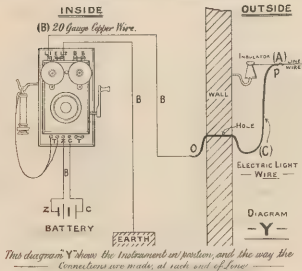

For Earth return, fasten enough 20 gauge insulated Copper Wire (B in diagram) to terminal screw at point E C, and carry it to top of porous pot (point C in battery). From point C, run another piece of 20-gauge copper wire, and fasten it to the water supply pipe or if there is no water supply pipe, fasten wire to a piece of metal with not less than 4 square feet of surface, which bury in as damp a place as possible. (See paragraph at foot of page 878).

For Battery connection at both ends of the line, fasten 20-gauge insulated copper wire to terminal at point M Z, carry the wire to point X, and fasten under terminal screw on top of porous pot. Carry another length of 20 gauge copper wire from terminal screw at point B Z to point Z, and fasten to the wire at top of zinc rod, after scraping away insulating material.

The above instructions refer to both ends of the system established.

# HOW TO ERECT A TELEPHONE.—No. 2.

NOT EXCEEDING 10 MILES APART.

No. 2.—Diagram marked Y.—To set up Telephonic communication between two points, not more than ten miles apart

Select the following materials from this Price list.

Two Magneto-ringing Telephone Instruments, one for each end.

Four Wet or Dry Cells, to make two two-cell Batteries.

Ten miles (or less) of 10 or 12 gauge Galvanized Iron Telephone Wire, or if better work is desired, ten miles (or less) of hard drawn Copper Wire, 14 or 16 gauge.

Sufficient Insulated Copper Wire, 20 gauge, for the work that is indoors.

Sufficient Electric Light Wire to reach from point O to point P, at both ends.

Staples and Screws.

The instructions for erecting a ten mile (or less) line are, as far as the work commencing at point O, and continuing to the same point at the other end of the line, the same as given with respect to a 200 yard line (see Diagram on page 871).

The instructions for the other parts of the work are somewhat different, as follows:—

Screw up a Telephone instrument at each end of the route, in the desired position. The instruments should then be connected, and the following instructions refer to the connections at both ends:—

Fasten enough 20 gauge Insulated Copper Wire (B in diagram Y, after removing an inch of the insulating material, to the terminal screw L in diagram Y, to reach to point O, then, after following the instructions given with regard to a 200 yard line, the main line will be complete, leaving the Earth Return and Battery Connections to be made

For Earth Return, fasten as much as necessary, 20 gauge Insulated Copper Wire (B in diagram Y) to terminal screw marked L, 2, to reach to the nearest Water Supply Pipe, or, in the event of no such pipe, to a plate of metal with not less than 9 square feet of surface, which bury in as damp a place as possible. In the event of no suitable damp place,—for instruction, see paragraph at foot of page 873.

For Battery Connections, fasten 20 gauge Insulated Copper Wire to terminal screw C on the instrument, and carry to terminal at top of Porous Pot, point C on Battery, and do the same from terminal screw Z on instrument to point Z top of Zinc rods of Battery, fastening in manner described in diagram 14a, page 880.

The above instructions refer to both ends of the system established.

## HOW TO ERECT A TELEPHONE.—No. 3.

LONG DISTANCE. 60 MILES.

*This diagram "Z" shows the Instrument in position, and the way the connections are made, at each end of line.*

No. 3—Marked Z in Diagram. To set up Telephonic communication between two points about sixty miles apart, select the following materials from this price list.

Two Ericsson long distance Telephone Instruments, one for each end.

Batteries as included in the instrument.

About sixty miles, 10 or 12 gauge Galvanized Iron Telephone Wire. 10 gauge for preference on account of its low resistance. Sufficient Electric Light Wire to reach from point O to point P at both ends. Sufficient Insulated Copper Wire, 20 gauge, for the work that is indoors.

Staples and screws.

The battery is contained in the Telephone Instrument instead of being separate from it, as is the case with No. 1 and No. 2. In each battery (diagram Z, of this kind, sufficient wire is already attached to the zinc to connect with terminal marked Z. A short piece of 20 gauge insulated copper wire is however required to connect the carbon of the second cell to the terminal screw marked C.

The instructions for erecting a line between two points about sixty miles apart, are practically the same as are given concerning No. 2, Diagram Y, on page 872.

### THE FOLLOWING REFERS TO DIAGRAMS X, Y AND Z.

Should a sufficiently damp place not be available, a second wire must be fixed from terminal screw L2 on the instrument at one end to terminal screw L2 on the instrument at the other end of the line, as follows:—

From L2 to P, run 20 gauge insulated Copper Wire, at the point (P) join this wire to the second Galvanized Iron Telephone Wire, which runs to P at the other end, then join 20 gauge insulated Copper Wire, and connect at terminal screw L2. This condition of things however does not often occur.

# ANTHONY HORDERN & SONS, LTD., ONLY UNIVERSAL PROVIDERS

## TELEPHONETTES FOR OFFICES.

For Domestic use we would specially recommend the Echophone, which can be attached to any ordinary Electric Bell circuit, no additional wiring or batteries being required. No experience of electrical work is necessary. See diagram, No. 15, page 968.

The Echophone, price per pair, ready for fixing to existing electric bell circuits ... .. 18/- pair

Single Instruments, for extension ... .. 8/6 each

The Echophone Correspondence Sets, with buzzer at each end to call both ways ... .. 28/6 set

All that is required to make this set complete is the wire and batteries. The quantities depending on the distance required to speak over, with Echophone instruments about 100ft. apart, two cells (either wet or dry) will be found sufficient for the batteries.

### BATTERY RINGING TELEPHONES for INTERCOMMUNICATION IN WAREHOUSES and OFFICES.

Battery ringing system, telephonettes of this class can be satisfactorily used on lines up to quarter a mile in length.

The following are examples:

Wall Telephonettes, consisting of the following parts:—Patent Loud Speaking Transmitter, Induction Coil, Double Pole Watch Receiver, Call Bell, Ringing Key and Automatic Switch-hook; mounted in solid Walnut case, with all metal parts nickel plated—

Sterling ... .. 17/-, 18/6, 28/6

Sterling Table Telephonettes ... 45/- each  
" Wall " ... 35/- "

Sterling Desk Telephonettes, sloping front, consisting of similar parts to wall instruments, with buzzer, and supplied with two yards of Flexible Conductor and Connecting Rosette to enable instrument to be placed in any required position on desk or table ... .. 25/-

L. M. Ericsson's Table Pattern Telephonette, No. 765.—Similar to No. 400, but fitted with Ericsson's Special Locking 10-way Switch for intercommunication with other stations ... .. 85/-

The foregoing Telephonette Instruments are only for use over distances not exceeding quarter a-mile.

# ANTHONY HORDERN & SONS, LTD., PALACE EMPORIUM, SYDNEY.

## AUTOMATIC TELEPHONETTES, WIRE AND SWITCHES.

### STERLING PRIMAX AUTOMATIC TELEPHONETTES.

All these instruments are fitted so that when conversation is finished the act of replacing the receiver automatically disconnects the switch. It is only necessary to move the Line Selector when making a call. Calls may be received and answered irrespective of the position of the Line Selector. It is impossible to inadvertently make contact with more than one line at a time. All local batteries are entirely dispensed with.

## TELEGRAPH INSTRUMENTS, WIRELESS TELEGRAPHY SETS, &c.

"Eureka" Learner's Set is a first-class full size Telegraph Set, all working parts—Key lever, Sounder lever, Sounder Yoke or Anvil, Adjusting Screws, &c., are of finely-finished composition metal, the sounder and key base are japanned and gilt. Key knob, circuit closing knob and magnet heads are polished vulcanite. The key is of the steel lever pattern, and the sounder gives a loud clear sound. One "Mesco" dry cell will operate the instrument, but we recommend the "Mesco" for use on single instruments only. The key must be left open when not being used.

### UNINTERCHANGEABLE SAFETY FUSES.

These Fuses have been designed with the object of putting a cheap fuse upon the market, one which, at the same time, answers to the requirements of the most Modern Electrical Installations. This has been accomplished by means of a Porcelain Cartridge contained in a universal base, suitable for any fuse from 2 to 40 Amperes. The fuse consists of a Silver Wire placed in the interior of the cartridge. The interior is cellular in formation and filled with mica dust, thus effectually damping the arc. The rules laid down by Modern Electrical Installations generally specify that fuses shall not be liable to interchangeability, in the sense that a fuse for a greater amperage might, through oversight, be used where one for a much smaller current should have been fixed. This has been met in a very simple and effective manner, by making the hole through the cartridge of different diameters, so that only a smaller size fuse than the one originally intended can be placed in the base, without altering the number of washers on centre pin. Even with a sudden absolute short circuit at the highest working pressure a permanent arc is not formed, the melting of the fuse taking place without damage to the cartridge. The fuse can take a permanent overload of 25 per cent., and if the normal working current is doubled, will melt in two minutes. Each cartridge is fitted with an indicator which denotes when the fuse is intact.

8 in. Diam. Plate Machines ... .. 35/

A complete Book of Instructions supplied with each machine.

These machines are fitted with two ebonite plates, rotating in opposite directions. The greatest length of spark obtainable is from  $\frac{1}{4}$  to  $\frac{1}{2}$  diameter of plate.

Sets of Experiments, for use with Wimshurst  
Machines 10 s. 10s. 24s.

Contact Breakers, for Induction Coils—  
1/3, 1/6, 2/-, 3/6 each

**Ever Ready Portable Coil Set**, with Massage Roller and Sponge Clip, for use on the face, complete with Coil and Battery, also Regulating Tube

## CURRENT COLLECTORS, MILLIAMPERE METERS AND SPARK COILS.

### MOTOR ACCESSORIES

**Double Pole—**  
For 30 Cells.  
.. 40 ..

67/6, 77/6  
77/6

### LODGE IGNITION SYSTEM.

With this system it is possible to fire very weak mixtures, and it is decidedly economical of battery current, is unaffected by soot, oil, or moisture.

It consists of Dashboard type hinged polished wood case, with glass front and lid, fitted with outside spark gap and special coil having two tremblers, either of which can be put in circuit by means of a change over switch. It is also fitted with double pole change over switch for reversing current in coil to prevent pitting of platinum points

Can be used on Engines having any number of Cylinders by means of High Tension Distributor .. 28/-

**Type B Igniter**, fitted with 1 Trembler and Spark Gap ... 80/-

**Lodge Distributors**, for use with the above Igniter or any Trembler Coil, enabling one coil to fire each cylinder in turn—

3-cylinder ... 90/-  
4 .. 95/-

Lodge Distributor.

No. 29.

### D'Arsonval Milliampere Meters (No. 29)—

Milliampere Meter, with shunt, 0-5, 0-50, 0-500 milliamperes, 4in. face ... .. 35/-  
Standards for mounting Meters on Switchboards, 4/6 pair

These instruments have the following advantages: They are dead beat, independent of the Earth's magnetism, can be used horizontally or vertically, they will indicate correctly even in the neighbourhood of a dynamo; also fitted with cut out switch.

### HIGH TENSION JUMP SPARK TREMBLER COILS.

**Four Cylinder Gueset Trembler Coils**, with single Detachable Trembler, and fitted in Polished Wood case ... 28/10/-

**Two Cylinder Gueset Trembler Coils**, with single Fixed Trembler ... .. 65/-

**Bassee Michel Trembler Coils—**  
Single Cylinder, 37/6, 40/-  
Small size Single Cylinder—

27/6  
**American Pattern Trembler Coils**, to work up to 8 volts ... .. 25/-

### SPARES FOR TREMBLER COILS.

362 Tremblers complete, for use with Detachable Unit Coils ... .. 15/-

**No. 6 Bassee Michel—**  
Platinum Blades ... 6/-  
Screws ... 4/6  
Armature Blades ... 2

## "UNI" DRY CELLS.

For making up Batteries for use in connection with Electric Bells, Burglar Alarms, Fire Alarms, Motor Ignition, &c.

No. 1, Type B, 1.5 Volts,  
4 1/2 in. x 4 1/2 in. x 3 in.

TRADE  
MARK.

No. 14—"Sparker," 4.5 Volts,  
2 1/2 in. x 4 1/2 in. x 6 1/2 in.

Registered  
No. 6982.

No. 13, Type A, 1.5 Volts,  
2 1/2 in. x 8 1/2 in.

These Cells are made on a strictly scientific basis, and from the most modern formula, which includes all the special precautions necessary to overcome evaporation, crystallisation, and trouble arising from local action, only the purest metal and highest grade chemicals being used in their manufacture.

The most important feature in the efficiency of Dry Cells for electric ignition and other purposes is to be able to obtain them freshly manufactured. With imported Dry Cells this is practically impossible owing to the amount of time wasted in transit. We have been endeavouring to overcome this difficulty for many years, and are now in the unique position of being able to offer, to our many patrons the "Uni" Dry Cell, of Australian manufacture, which we can confidently recommend as being the best Electric Dry Cells at present obtainable, with the added advantage of the economy resulting from Anthony Horderns' Famous Low Prices.

No. 14 Special for Motor Cycles.

For a great many purposes where fluid Leclanché Cells have been used with little success, the adoption of "Uni" Dry Cells, which have been through many critical and severe tests, will be an improvement.

Among the many advantages claimed for the "Uni" Dry Cells are: -

Polarisation Reduced to a Minimum -

Enabling Cells to give a continuous and steady output of current until exhausted.

Freedom from Local Action.

Great Recuperative Power.

Low Internal Resistance.

# ANTHONY HORDERN & SONS, LTD., ONLY UNIVERSAL PROVIDERS

## EDISON PRIMARY CELLS FOR IGNITION AND FAN MOTORS.

Type	Capacity in Amperes-hours	Continuous current in Amperes	Size of Cells	Average Internal Resistance in ohms	Weight of complete cell with at 1/2 charge	Price complete in £/s	On Zn plates	1 in.	2 in.	3 in.	4 in.	Complete renewal

BSCO (1)	200	2.5	9 x 5 1/2	.070	6 1/2 "	10/9						6/9

The third column gives the limiting currents advisable to take from the cells when worked continuously. The elements employed in these batteries are pure zinc plates (Negative pole), compressed plate of oxide of copper (Positive pole), in a solution of high grade caustic soda.

Edison Primary Cell "V" type.

As Edison Primary Batteries are very largely used in connection with gas and gasoline engines, the following suggestions in regard to their use in this class of work may be found of interest. For stationary gas engine work use "BSCO" cells rather than "BB" if you have the necessary space. The internal resistance of "BSCO" is less than that of "BB" consequently the available current is greater. The "BB" cell is the smallest suitable for stationary work, and has one-fourth the life of "BSCO". 6 "BSCO" cells will replace 7 "BB". It is customary to use 5 or 6 "BSCO" cells or 6 to 8 "BB" for Portable and Marine engine work. "BSCO" is more suitable, the containing jars being of porcelain, rendered watertight by means of **waterproof tape**. Use "BSCO" in place of "BB" for reasons mentioned above. The various classes of work for which the different types of Edison cells are most useful are as follow: -

Type "BB" for Slot Machines, Gas engines, and Annunciators.

Type "V" or "BSCO" for Gas Engines, small Fan Motors, Spark Coils, large Annunciators, Burglar Alarms and Slot Machines

Type "S" for Fan Motors, Phonographs, Electro-plating, Chemical Analysis, Miniature Lamps, Sewing Machines, X Ray Coils, Railroad and Crossing Bell Signals, and recharging small Secondary Batteries for Motor Cycle use.

Types "V" Liquid-tight—for Marine and Traction Gas and Gasoline Engines, Slot Machines and Portable Batteries for Phonographs.

## VOLT AND AMPERE METERS.

FOR TESTING BATTERIES OF ALL DESCRIPTIONS.

## FOR THE MOTORIST.

### SHOCK ABSORBERS FOR MOTOR CARS.

The King Shock Absorber and Spring Damper has greater capacity and efficiency than any other type, and is the simplest to fit. There are 80 springs in each pair—24 light multiple springs to absorb vibration, 48 convex steel springs to absorb shocks, and 8 counter springs to suppress rebound.

The King Shock Absorber improves the suspension of the car, prevents the road wheels lifting, and the body from swaying or rocking, and absorbs all vibration and violent road shocks—

No. 1 For springs 1½ in. to 1½ in. for cars up to 20 cwt. ... £8/

No. 2—For springs 1½ in., for cars 20 cwt. to 25 cwt.—£7/10/

No. 2—For springs 2 in. to 2½ in., for cars 25 cwt. to 30 cwt. ... £9/

No. 55.

Handle Bar Switches, to fit in handles (No. 55) ... 8/6 pair

1-way "Duco" Ebonite Switch, for clamping to handle bar, 3/-

2-way Ebonite Switch, for ditto ... 2/6

Nickel-plated Switch for ditto, best quality, heavy 4/9

" " removable handle, 2 way, 3/6

Plug Switches, for handle bar ... 1/3, 1/6

Zinc Switches, for fixing to coils or dashboards—

1-way, 2/-

Ebonite Switch, flat back, 2-way ... 4/6

Throw-over Knife Switches, suitable for motor-boats—

1-way, 1/1; 2-way, 1/3

1-way Switches, for inside of motor cars—1/8, 2/-, 3/-, 3/9

Miniature Wall Plugs, for inside of motor cars ... 2/-, 2/6

Series Parallel Switches, for use with 2 sets of dry cells—

3 6

2-way Motor Boat Switch, porcelain base ... 1/9

### SPARK AND THROTTLE CONTROL LEVERS,

For Motor Cars, Cycles and Boats.

No. 550

Nickel-plated Control Levers, with wood handle, for clamping to 1½ in. tube (No. 550)—

1-way, 6/9; 2-way, 7/-

Brass quadrant pattern for marine work—

1-way, 5/-, 6/-; 2-way, 8/6

Bowden double lever pattern ... 9/-

# TOOLS OF ALL TRADES.

"The true Epic of our time is, not Arms and the Man, but  
Tools and the Man—an infinitely wider kind of Epic." Carlyle.

This department is the most complete of its kind in Australia. There are more than a thousand illustrations in the following lists, as well as detailed descriptions of various Tools and Appliances of novel or complicated construction. Mechanics and Artisans all over Australia are fully alive to the advantages to be gained from Anthony Horderns' Famous Low Prices, which, while showing a considerable saving, represent goods of undoubted quality, the makers' names, in every instance, being a satisfactory guarantee of excellence.

Drill Brace, with cogwheel attachment, making Ratchet Brace and Drill (No. Tx 17) ... 11/6

This is a 10in. sweep Ratchet Brace, with gear wheels, speeded about three to one, to be used for drilling. When not needed, the gear wheel can be removed in one second, leaving a Ratchet Brace. The Brace is made of Steel, and is heavily nickel-plated, with Rosewood handle and Conchelo head. The jaws are of forged steel, and will centre and hold firmly round twist drills from 1/16 to 1/16in. in diameter; also square shank bits and drills of all sizes, and square and flat screwdriver bits. In fact, they will hold tool shanks in any size or shape. There is no other chuck in existence that will do this.

$\frac{1}{2}$	$\frac{2}{2}$	$\frac{3}{2}$	$\frac{4}{2}$	$\frac{5}{2}$	$\frac{6}{2}$	$\frac{7}{2}$	$\frac{8}{2}$	in.
$\frac{1}{2}$	$\frac{2}{2}$	$\frac{3}{2}$	$\frac{4}{2}$	$\frac{5}{2}$	$\frac{6}{2}$	$\frac{7}{2}$	$\frac{8}{2}$	each

In ordering above, add price of any bits required.

Angular Bit Stocks—  
(No. Tx 46) ... 5/9

The Universal Angular Bit Stock is presented to the public as a time economizer, to be used in connection with a Brace and Bit for boring holes in places where the Brace and Bit alone could not be used. As will be seen, it can be placed in the many angles or positions between the upper and lower braces represented in the above figure. The ability to vary the angles, either at the commencement or during the operation of boring a hole, is an important feature.

# FRETWORK.

By means of which much may be accomplished and many useful articles made. The art, if it may be so called, is easy of attainment, and as skill follows patient practice and careful experiment, the worker soon finds out what a capital thing Fretwork is. There is hardly a limit to the work that can be done, and to the amount of artistic decoration resulting.

Marsh's Patent Mitre Cramp (No. Tx 173) ... 17 6

Box Bench

No. Tx 173a.

The "Universal" Flooring Cramp, saves 50% in cost  
of labor in cramping a floor (No. Tx 173a) ... 30/-

SPECIAL FEATURES.

1. Enormous Leverage.
2. Ample Strength—well-tempered cast steel throughout.
3. Will Cramp the Last Board.
4. Will Cramp on Concrete Flooring.
5. Weight only 14 lbs.
6. Cramps on Girded Joists.

The "Universal" Lining Cramp ... 12/6

Is not an attempt to use a Flooring Cramp for an unsuitable purpose. It is designed especially for matching and similar work, and will be found the handiest article on the market, and the cheapest.

No. Tx 173b

Open  
Bench

Dadd's Patent Combination Bench Stop and Cramp  
(No. Tx 173b) ... 5/6

This valuable little Tool is made of the best material. The Stop is of cast annealed steel, and is unbreakable.

The great advantage of this Stop above all others, is that the dust and shavings get away through the aperture where the head of the Stop comes through the Bench, thus saving the trouble of cleaning out each time the Stop is lowered.

The Stop can be used as a Cramp for holding the wood firmly either sideways or across the bench, and effects a great saving of time over the ordinary methods of cramping wood to the bench.

DIRECTIONS FOR FIXING.—Cut hole in top of bench the exact size of head of Stop across the bench. But fix shorter lengthways, so that the teeth of the Stop can lay on a bevel edge.

These Stops are made to suit Box or Open Benches

# CLAMPS AND BENCH STOPS.

## DRILLS AND BITS.

A Bit of Drill is good for most people, and to Drill your bit of money into economical ways, is essential to success. Tools of all trades are best bought at Anthony Horderns' Famous Low Prices.

No. Tx 107.

No. Tx 108.

No. Tx 109.

Archimedian Drills (No. Tx 107), with 6 bits ... 3/3

Archimedian Drills, with 6 bits, 6-1/8 Archimedian Drills (No. Tx 109), with 6 bits— 8 10 12 in. 1/8 1/9 2/3

Hand Drill, No. 1 (No. Tx 108) - Price, including 6 fluted points in hollow handle ... 5/-

These Drills are made with three jaws, resting in solid sockets and there are no springs to get out of place or out of order. The chucks are nickel-plated and the handle is made of solid brass. from 0 to 1/4 in. are included in the price.

Drill Bits (No. Tx 110), set of 36, for Archimedian Drills ... 1/5

Drill Bits (No. Tx 112), set of 24, for Drills ... -10

No. Tx 110.

No. Tx 112.

Hand Drill, No. 2, ball-bearing— Price, with 6 fluted points ... 10/-

This Drill is same in general finish as No. 1, described above. It has cut gears and an adjustable friction roll to prevent gears from springing out of engagement. The chuck holds six drill bits, from 0 to 1/4 in. are included in the price.

An extra handle, to be attached when it is desired for use in manner of a breast drill, is now furnished with drills Nos. 1 and 2.

Hand Drill, No. 3 ... 4

Hand Drill, No. 4 - Price, of Stock and Drills ... 2/-

This Drill Stock is eight inches in length, and weighs eight ounces. It is made of iron, with rosewood handle and chuck for holding the drill points. This chuck is made on a new plan, and it centres and holds the drill perfectly. Each drill stock contains six superior drill points of various sizes.

Hand Drill, No. 5— Price, including 6 fluted points ... 6/-

This Drill has same chuck as No. 1, but is double-gear, has a longer handle, and is provided with a wide rim gear, to be grasped between thumb and fingers when the drill is used for delicate work. In this manner it can be run without liability of breaking points. Length, over all, eleven and a half inches, weight, twenty ounces. Six drill bits are included in the price.

No. Tx 111

No. Tx 111a

Breast Drill, No. 12 (No. Tx 111), ball-bearing ... 9/9

No. 13 (No. Tx 111a) ... 14/6

No. 12—Changeable gear from seven, to speeded about three to one. This drill has been greatly improved recently. As now made, the drive wheel is five inches in diameter. The gears are cut from solid metal, and run absolutely true. A roller is placed at back of drive gear, which makes it as firm and substantial as a double-gear drill. The crank is adjustable to three different heights, and is held in place by a round lead thumb screw with milled edges, which give the drill an attractive appearance. The drive gear is held by similar screw. The chuck is nickel-plated, and has the new Alligator jaws, suitable for both round and square shafts. They hold from 5/16ths up. The handles are cocobolo. A new feature is the level attachment, which enables the operator to see when the drill is being held true. Everything about the tool will be found durable and nicely finished.

Breast Drill ... No. 10, 11/9 : No. 11, 11/9

These Drills are made of round wrought iron, five-eighths of an inch in diameter, and is similar to No. 12 (Illustration No. Tx 111). The handles are rosewood, the head malleable iron, and the chuck jaws of steel. It has a changeable gear, can run, and the other speeded three to one. The change from one to the other can be made in one second.

The Drill Stock is heavily nickel-plated, and presents a very beautiful appearance. It has cut gears. No. 10, will hold Round or Square Shank Drills. No. 11, has 3 Jaw Chuck for Round Shank Drills.

All Prices in this Catalogue are subject to Market Fluctuations from whatever cause arising.

# YANKEE BREAST DRILLS.

Yankee Breast Drills, with Right and Left Hand and Continuous Ratchet Movement—

No. 555, Double Speed, 2 Jaw Chuck ...	19/6
No. 1558 " " " 3 " " " " " "	19/6

The "Yankee" Breast Drill differs from all others, stands in a class by itself, and is not only unique, but embodies the capacity for a variety of work never done before with a tool of this kind. Not only so, but it is built Mechanically on lines of a tool rather than as a piece of hardware.

It is pre-eminently a machine shop tool, but its superior advantages will be soon the less appreciated in places outside of shops where a Breast Drill can be used. In many places for lighter work it will be even more convenient than the Bit Brace.

The peculiar feature of this tool is found in the shifter on cylinder between the small gears. The mere movement of this shifter in the various notches causes the tool to perform different movements. In the first notch nearest the chuck it is an ordinary or plain Breast Drill. In the second notch it becomes a left hand ratchet useful in removing taps, but especially to loosen drill if it becomes jammed in a hole and cannot be moved forward or crank revolved backward. In the third notch it becomes a right hand ratchet. In the fourth notch it becomes what is difficult to describe, but when seen excites admiration for what it does and celerity as to how accomplished. When in this notch any movement of the crank, however short, or turned continuously in either direction, or a combination of the two, the drill in the chuck will always turn to the right and drill continuously, hence no time lost and double the work is done as compared with single or a right hand ratchet.

This peculiar movement is obtained through a more extended combination of pawls and ratchets used in other Yankee Tools. It is absolutely positive in action and cannot get out of order. In the fifth or lowest notch, the spindle is locked tight so that the drill chuck can be rapidly opened or closed.

No simpler operation can be conceived than the movement of this little shifter within convenient reach, to produce such widely varied movements in one tool.

The change of speed on the No. 555 (double speed) is made by pushing the little lever at the hub of the crank toward gear

far fast and away from gear for slow speed. This is done in the fractional part of the revolution and at any time even while drilling, without removing the tool from work, and with any of the various movements of the shifter explained above. The convenience of doing this will be appreciated when using the fast speed in drilling to slow up in going through castings, or in running against hard spots. In no other Breast Drill can the speed be changed quickly or conveniently while the tool is at work, nor in some of them when they are not at work.

The side handle on the Yankee Breast Drill can be unscrewed and has on it a screw driver bit to take care of all the screws on the tool.

The breast plate can be adjusted to right angle of position shown, and thus enable the tool to be used close against partitions or in corners.

The adjustable ball bearings in spindle take up all the strain or thrust and relieve all other parts of the tool. Any lost motion can be readily taken up by the adjustment provided on same.

The chuck is of new design and will hold accurately and securely with the two jaws either square or round shank drills or other tools up to 3/4 inch.

A hexagon at the end of the shell of chuck permits the use of a monkey wrench for tightening large drills instead of the common practice of holding the chuck shell in view to the detriment, if it does not entirely ruin chuck.

This chuck will hold any tools that can be held in chuck of a Bit Brace, as screw driver bits, countersinks, or rose bits, etc.

In design and construction the Yankee Breast Drill is a machine built and finished as such. The frame is malleable iron, the spindle of steel, turned and fitted, the gears have the teeth cut from the solid to run smooth and accurately. The tool is finished in a dead black color to keeping with its character of a machine, and not in bright or gaudy color as hardware. The bright parts are nickel-plated and polished, and will not rust in use.

No. 555—Double Speed. Extreme length 18 in. Weight 4 lbs. net.

Bit Gauge (No. Tx 205) 11

Not included in price.

No. 74 236

Stanley Angle Divider (No. Tx 206) 5/-

With this tool any angle can be found and bisected. Fitting moulding or other woodwork to odd angles can be done with ease and certainty. It is also graduated for the parts of circle commonly used. A handy tool for laying out work. The Angle Divider is accurately made and can be used as a Try or "T" Square.

By using the Stanley Adjustable Bit Gauge the workman is able to bore any number of holes to a given depth. A stop being placed on both sides of the bit, when the proper depth is reached, the bit remains upright and does not bend or break the work. Being adjustable, the gauge can be attached to any size bit, up to 1 in. in diameter. By loosening the thumb screws, the shank of the bit can be inserted in the gauge, and the twist of the bit turned to the required depth. Bit not included in price.

No. T-202

Stanley Adjustable Bit Gauge  
(No. T-1073)

Block Plane, No. 120, 7½ x 1½ in. Cutter with Lever  
adjustment ... 2/6

Stanley Low Angle Block Plane  
No. 65. " 7 in., 1½ in. Cutter ... 4/9

# STANLEY PLANES.

Manufactured by the Stanley Rule and Level Co.

Stanley Block Plane, No. 16 1/2, 7in. x 1 1/2in. Cutter, shifting mouth ... 4/9

Stanley Rabbit and Block Plane, No. 140, with detachable side, length 7in., 1 1/2in. Cutter ... 7/8

A detachable side will easily change this Tool from a Block Plane to a Rabbit Plane, or vice versa; it can also be used as a small Shoulder Plane. The cutter is set on a shoe.

Cast Steel Cutters, for above Block Planes ... -/7

In ordering Planes from Stanley's Planes, or Stanley's Planes, state by number the Plane for which they are wanted.

Stanley Carriage Makers' Rabbit Plane—  
No. 10, 13in. x 2 1/2in. Cutter ... 10/9  
No. 10 1/2, 9in. x 2 1/2in. ... 8/9

Stanley Improved Scrub Plane, No. 40, Iron Stock, length, 9 1/2in., 1 1/2in. Cutter ... 3/9

Stanley Scrub Plane, No. 40 1/2, 9 1/2 x 1 1/2in. cutter ... 5/-

This Tool has a single iron, with the cutting edge rounded. It is particularly adapted for roughing down work before using a Jack or other Plane.

Additional Sections for No. 57 Plane for working large diameters, each 2 1/2 inches wide ... 3/6 pair

Core-Box Plane, No. 57, for working semi-circles up to 6 inch diameter ... 14/-

A Tool much needed by Pattern Makers, Wheelwrights, and others, for planing out semi-circles.

This Plane is constructed so that the sides can be extended by additional sections, 1/4 inches wide, until a diameter of 10 inches can be worked if desired.

Compass Plane, No. 113 ... 10/-

This Plane has a flexible steel face, which can be easily shaped to any required arc either concave or convex, by turning the knob on the front of the Plane.

No. 13 same as 113, but with screw at each end instead of at centre ... 10/-

Compass Plane, Japaned, No. 20 1/2, 10in x 1 1/2in ... 11/6

Compass Plane, No. 20, nickel plated, New Victor 13/9

The flexible steel face of this Plane can be made concave or convex by turning the screw which is attached to its centre.

# STANLEY PLANES.

The Planes are made by the Stanley Rule and Level Co.

Stanley Dovetail Tongue and Groove Plane, No. 444, 9in. ... 23/6

This Plane will cut any size grooves and tongues to fit with sides at flare of 35 degrees, where the width of the neck is more than  $\frac{1}{2}$  in. The tongues and grooves are cut separately, and can be made with tapering or parallel sides. The operation of the Plane is simple. Instructions supplied with each tool.

Flow Dado and Match Plane, No. 46, 10 $\frac{1}{2}$  in., nickel-plated, with 11 Cutters: 6 Flow and Dado Bits,  $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{3}{8}$ ,  $\frac{1}{2}$ ,  $\frac{5}{8}$  and  $1\frac{1}{2}$  in.; Fillister Cutter,  $1\frac{1}{2}$  in.; Tongueing Toe,  $\frac{3}{4}$  in., and a Slitting Cutter ... 18/6

Stanley Curve Rabbit Plane—No. 186, 9in. ... 13/6

This Plane will cut rabbets on circular or other curved and irregular edges.

Stanley Swinging Fence Match Plane—

No. 48, cuts  $\frac{1}{8}$  in. groove on boards  $\frac{3}{4}$  to  $1\frac{1}{2}$  in. centres ... 4in., 9/-

No. 49, cuts  $\frac{3}{8}$  in. groove on boards  $\frac{1}{2}$  to  $\frac{3}{4}$  in. centres ... 4in., 9/-

Stanley Edge Trimming Plane—No. 95, 6 in x 3 in cutter ... 4/-

# ANTHONY HORDERN & SONS, LTD., ONLY UNIVERSAL PROVIDERS

## STANLEY PLANES.

The Planes are by the Stanley Rule and Level Co.

Chamfer Plane, No 72 $\frac{1}{2}$ , with Beading Attachment, length 2in. 1 $\frac{1}{2}$ in. Cutter ... 11/-

For Beading, Reeding or Moulding a Chamfer, with six cutters, sharpened at both ends, including a large variety of ornamental forms.

Chamfer only, No. 72, without Beading Attachment ... 7/-

No 72 $\frac{1}{2}$

No 72

Bull-nose Rabbet, No 75 ... 1/3

No. Tx 271

Stanley Patent Cornering or Chamfer Tool (No. Tx 271) ... 1/-

## STANLEY MARKING GAUGES, &c.

Stanley's Butt and Rabbit Gauge, No. 82, for hanging Doors, Mortising, Marking, &c. ... 4/-

This Gauge has two bars, both of brass, one movable within the other. The two steel blades or markers at the extreme end of the inner bar can be moved to any position by means of thumb screw at opposite end of gauge.

Nickel-plated Marking Gauge, No. 90 ... 1 1

Nickel-plated Marking and Mortising Gauge, No. 91. 2/-

The steel points are attached very near the ends of the bars, to admit of being used close up into a rabbit or corner. The head of the marking gauge can be turned over, for a broad or narrow bearing, as desired.

Marking Gauge, with Metal Head Pin Points and Roller Cutter, No. 97 ... 2/-

Improved Butt Gauge, No. 95, Nickel-plated, ... 2/6

Has one bar with two steel cutters fixed upon it. When the cutter at the outer end of this bar is set for gauging on the edge of the door, the cutter at the inner end of the bar is already set for gauging from the face of the joint. The other bar has a steel cutter to accurately gauge for the thickness of the butt.

Mortise Gauge, with Metal Head Points and Roller Cutters, No. 98 ... 2/9

Stanley Clapboard (Siding) Marker, No. 88, Metal Stock, Wood Handle, Steel Blade ... 1/8

This ingenious tool can be used with one hand, while the other is employed in holding a clapboard in position. The marking blade is easily adjusted to any thickness of clapboard, or siding. The sharp edge of the teeth are parallel with the face when placed against the corner-board or window casing. By moving the tool half an inch, it will mark a full line across the clapboard, exactly over and conforming to the side of the corner-board. There is then no difficulty in sawing for a perfectly close joint.

Stanley Eureka Flush T Bevel, No. 18—  
6in., 2/-; 8in., 2/3; 10in., 2/6 each.

These Bevels have Nickel-plated Metallic Handles. The Blade is secured at the end of the handle by a thumb screw at the lower end of the handle.

Stanley "Victor" Mitre Box, without  
Saws, No. 50 1/2 ... .. 20/-

This has a single-piece frame, both the base and the back of which are accurately machined.

The Saw Guide Uprights are steel rods and carry the Saw Guides in which the saw works. The Uprights, which are instantly removable, are adjustable.

The special feature of these boxes is that any ordinary Panel Saw may be used in place of a Back Saw if desired.

A strong and accurate tool at a moderate price.

Mitre Box Saws, see page 387.

## STANLEY MITRE BOXES.

N<sup>o</sup> 358

### Stanley New Improved Mitre Boxes, without Saws

No.	Saw	Capacity Right Angle	Capacity Mitre (45°)	Capacity at Stock Guide each
338	5in.	9½in.	6½in.	4½in. 37/6
240	4in.	8in.	5½in.	3½in. 33/6
346	4in.	9½in.	6½in.	4½in. 37/-

These Mitre Boxes have the widest range of adjustment of any Mitre Box made. For strength, accuracy, and durability they are unsurpassed.

The Back Frame, Graduated Quadrant and Swivel Arm Bearing is one piece and accurately machined.

The Swivel is so constructed that it will automatically lock at any point desired. On the edge of the solid metal base, degrees are accurately graduated, enabling the operator to set saw to cut any angle needed.

The Saw Guide Uprights are securely clamped in tapered socket in the Swivel Arm, and can be adjusted to hold the saw without play, and also to counteract a saw that runs out of true, due to improper setting or filing.

A Second Socket in the Swivel Arm is provided, in which the front Saw Guide Upright can be placed, permitting the use of a short saw or allowing a much longer stroke with the stand and or regular saw. By placing the Saw Guide Uprights in the outer hole, an extra wide range of work can be done with these boxes, and they will then saw at an angle of 30 degrees without using the Stock Guide.

By placing straight work against one of the guides, instead of against the back of the box, the most acute angles can be cut.

Automatic catches at the top of the Saw Guides hold the saw locked and clear of the work when not in use, allowing the workman to use both hands in placing the work. By simply moving the Stop on the saw against the Lever Trip, the front Catch is released and the saw falls slightly pitched forward, automatically releasing the rear Catch, without any further

for the workman taking his hand from the saw or touching the Lever Trip. Movable stops on the Saw Uprights can be set to the depth of the cut.

Stock Guides are fitted in the Lock of the Frame and are held in a special Device and may be used for holding the work, or as a Length Gauge, by clamping Guides on the Plate in the Board.

No. Tx 524.

Stanley Mitre Shuter, with Plane—

(No. Tx 254) ... 42/-

No. Tx 253.

The Stanley Mitre Box, arranged for Back Saw (No. Tx 253), will take in mouldings up to 4in.

This Mitre Box has the additional feature of easy adjustment to any possible angle.

## FOX'S UNIVERSAL WOOD TRIMMERS, &c.

Reduce the cost of Patterns. Also adapted to Interior Finish, Cabinet Works, &c.

The Universal Wood Trimmer, for trimming pieces of wood smoothly and accurately on any angle, was originated and patented in 1879, and first placed on the market in 1885, since when twelve new patents have been granted.

The requirements of these tools have constantly been given the most careful attention for their improvement and perfection, further sizes being added to meet the growing demand.

The 4A Machine was the first size built and is to be found in the greater part of the progressive pattern shops of the world.

No. 4A—Front View.

No. 4A—Rear View. The Springs shown bring the gauges back for the square cut. Gauges have solid support their full height.

2in., £4/-/-; 3½in., £5/2/6; 4in., £8/-/-  
2in., 8/-; 3½in., 10/-; 4in., 12/- pair

The Rogers Mitre Planer is made of steel and is arranged for planing any bevelled angle on straight or curved work. The upper or movable Bed Plate is in standard form, having a right angle on under which act as guides for the material to be planed and revolving on a pivot. The lower or fixed Bed Plate is the centre of the material being planed and elevates from the exact mitre, so that no change is required in planing the ends of parts for frames of four sides.

## NEW LANGDON MITRE BOX.

No. Tx 257 - Fox & Sons, London

New Langdon Mitre Box, arranged for Back Saw, will cut up to 6in. Price of Mitre Box only (No. Tx 257)

No. Tx 290.

"India" sharpening Stones are made from Alundum, a remarkable reproduction of one of the minerals of nature, i.e., Corundum, but in quality far superior.

India Oilstones were placed upon the market in the year 1927, since which time their merits have been rapidly recognised and their uses have widely increased, so that they are now demanded for all kinds of sharpening work in every part of the world. On account of uniformity satisfactory stones can be duplicated exactly.

These stones are furnished in three grades, — Fine, Medium, and Coarse.

The Fine Stone is fast-cutting and close grained, leaving a smooth keen edge on the hardest and finest of steel tools; is adapted for all descriptions of glass, wood and metal working tools, and for knives for the finest grades of cutlery, like safety razors, and other fabrics, and for all classes of tools requiring fine cutting edges.

The Medium Stone, though coarser in grain than the Fine Stone, makes a good working edge on all ordinary tools in every-day practice, and will lead all other stones in common use. The Medium Stones are a perfect for carpenters' and pearl workers' tools, and ordinary machine shop use, and also cloth, leather, rubber and paper-cutting machines or hand-knives, and will make a quick-cutting edge.

The Coarse Stone is a heavier, stout in demand for work where speed is considered before fine finish, and if used under proper conditions will give surprising results on the class of work attended.

THE "YOST" UNIVERSAL VICE.

The "Yost" Universal Vice has six pairs of jaws, so that it is adapted to grasp any kind of work without regard to irregularity of form. The workman who has the use of one of these Vices is as thoroughly equipped as though he has access to a dozen different vices in as many different positions, without being obstructed and encumbered with the presence of a lot of useless tools. In this quality it stands among all the tools in a pattern shop **without a peer**. See Illustrations.

No. Ts 391.

Universal Pattern Makers' and Wood Workers' Vice (No. Tx 391) -

Universal Pattern Makers' Hand Wood Workers' Vice (No. 1 & 2) -											60/-
No. 1,	Jaw 7 x 18in.,	opens 14in.,	weight 86lbs.	..	..	..	..	..	..	..	54/-
No. 2,	" 5 x 14in.,	" 12in.,	" 56lbs.	.	.	..	..	.	.	..	

The Standard and only Vice for Pattern and Wood Work. It is made of iron and steel and weighs about 80 lbs. The main jaws of this Vice are smoothly planed and moving normally parallel. The ends are squared, and the planed screw sleeves run through the centre, so that the operator can place his work on either side, making it a right or left handed vice. Of the main jaws, the moving one is fitted with a device which throws the entire jaw out of parallel to permit the gripping of tapered work.

THE UNIVERSAL METAL WORKERS' VICE.

This Vice is so constructed as to be used in any conceivable position. It is supplied with one set of groove jaws to hold all classes of round work; one set of jaws which will hold any class of taper work; one set to hold copper work; and one set to hold any size ring. It is also supplied with a rough jaw for cast iron work, with one smooth jaw for finished work, and with pipe jaws.

No. 18 392.

Universal Metal Workers Vices, Patent  
Adjustable Jaw and Swivel Bottom  
No. Tx 393)—

Vice showing at angle, one of the most convenient positions for the tool-maker, and impossible to obtain in any other Vice on the market.

## SARGENT'S STEEL SQUARES.

Sargent's Squares are made of the best double refined Steel and on approved machinery of delicate adjustment. The squares are 'true,' they have the "hang" which makes them just right, and they are accurately marked and nicely finished. Squares for all purposes and with different markings and labor saving tables and scales are made by this Company.

The No. 100 was used to solve the problems shown in the well-known book, "The Steel Square and its Uses." Fred. T. Hodgson, author of this book, which is a standard authority on this subject, says that the No. 100 Square is "the most complete and decidedly the most convenient Square for the operative workman in the market."

No. 100.

The No. 100, 24 x 16in.	...	3/3
24 x 18in.	...	3/6
No. 100 B, same as the No. 100, but blued with White Enamel Figures and Marks,		
24 x 16in.	...	4/9
No. 100 YB, same as the No. 100, but blued with Yellow Enamel Figures and Marks,		
24 x 18in.	...	4/9
Brace, 8-square and Essex—Board measure.		
No. 100 R, polished, 24 x 16in., Brace, 8-square and Patent Rafter Table	...	4/-
No. 10—Stonemasons' Steel Squares, 12 x 8in., polished steel, marked in $\frac{1}{8}$ ths and quarters on front, and $\frac{1}{16}$ ths and quarters on back ... 1/8		
No. 30—Stonemasons' Steel Squares, 18 x 12in., polished steel, marked in $\frac{1}{8}$ ths and quarters on front, and $\frac{1}{16}$ ths and quarters on back ... 2/2		
No. 10.		
"The Steel Square and its uses," by Fred. T. Hodgson ... 2/6		
The Grenulated Steel Square, for the use of Carpenters and Builders, similar to the No. 100—		
Polished Steel, 24 x 18in.	...	8/9
Plated Steel, 24 x 18in.	...	9/9

The graduations are 1-32, 1-16, 1-8, 1-4, and 1-2, into brace measure, 8 square and 1-320ths scale; also Reed's new board measure, giving feet and inches a full 16ths in width, length, and area.

By the use of this square one can lay off more timber in the same length of time than two men can in the ordinary way. You can mark on either side or overhead.

Diminutive for Use. Take the square in the left hand, lay the tongue of the square upon the surface to be marked, for a tenon or mortise, lower the end of the main arm of the square next to you, say about two or three inches from the upper surface, place theawl, held in the right hand, in the notch, draughting the timber, and with one forward movement the mark is made. Replace the square as before. Place the awl in the notch desired, at a width of mortise, or tenon, and again mark as before. For a square, replace the awl, place the awl in a notch equidistant from marks already made, and again mark, for a guide to the scribe, doing away with witness marks.

## Plumbers' and Gasfitters' Tools.

Green River Screw Plate, for Brass Tubing (26 threads) —

No. 1375 —  $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{3}{8}$ ,  $\frac{1}{2}$ ,  $\frac{5}{8}$ ,  $\frac{3}{4}$ ,  $\frac{7}{8}$ ,  $\frac{1}{2}$  in. 78/6 set

„ 1371 —  $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{3}{8}$ ,  $\frac{1}{2}$ ,  $\frac{5}{8}$ ,  $\frac{3}{4}$ ,  $\frac{7}{8}$ ,  $\frac{1}{2}$  in. ... 34/- „

„ 1373 —  $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{3}{8}$ ,  $\frac{1}{2}$ ,  $\frac{5}{8}$ ,  $\frac{3}{4}$ ,  $\frac{7}{8}$ ,  $\frac{1}{2}$  in. ... 56/- „

No. Tx 481a.

English Standard Pipe Threads, adjustable for size and wear (No. Tx 481a) —

No. 211 —  $\frac{1}{4}$ ,  $\frac{3}{8}$ ,  $\frac{1}{2}$  in. ... 15/6 set

No. Tx 458

Screw Plates for Threading Pipes, Wiley & Russell's, consisting of Stock 35in. long and 5 sizes of Dies (right), and Guides,  $\frac{1}{4}$ ,  $\frac{3}{8}$ ,  $\frac{1}{2}$ ,  $\frac{5}{8}$ , and 1in., in substantial case (No. Tx 458) ... 40/-

Green River Screw Plate for Pipes, Set C,  $\frac{1}{4}$ ,  $\frac{3}{8}$ ,  $\frac{1}{2}$ ,  $\frac{5}{8}$ , 1, with right and left hand Dies ... 62/6 set

No. Tx 481.

English Standard Pipe Threads, adjustable for size and wear (No. Tx 481) —

No. 1 —  $\frac{1}{4}$ ,  $\frac{3}{8}$ ,  $\frac{1}{2}$ ,  $\frac{5}{8}$  in. ... 21/- set

„ 2 —  $1\frac{1}{4}$ ,  $1\frac{1}{2}$ , 2in. ... 36/- „

No. Tx 466.

Screw Plates, Wiley & Russell's Sets C and D in one box,  $\frac{1}{4}$  in. to 2in. Dies,  $\frac{1}{4}$ ,  $\frac{3}{8}$ ,  $\frac{1}{2}$ ,  $\frac{5}{8}$ , 1,  $1\frac{1}{2}$ ,  $1\frac{3}{4}$ , 2in. (No. Tx 466) 105/-

The Dies in these Plates are always ready for use, like solid Dies. No time is lost in fitting them to size. They can be taken apart to be ground, and are adjustable for irregular sizes of fittings. They are made of the finest steel, and all parts are finished in the most perfect and handsome manner throughout.

No. Tx 467.

Screw Plates, Wiley & Russell's Set D, consisting of Stock 53in. long, with a Leader Screw and 3 sizes of Dies (right), and Guides,  $1\frac{1}{4}$ ,  $1\frac{1}{2}$ , and 2in., in substantial case (No. Tx 467) ... 65/-

Or with 1,  $1\frac{1}{4}$ ,  $1\frac{1}{2}$ , 2in. ... 75/-

# ANTHONY HORDERN & SONS, LTD. ONLY UNIVERSAL PROVIDERS

## Plumbers' and Gasfitters' Tools.

No. Tx 422A.

Hart's Patent Duplex Die Stocks for Pipe, New Pattern (No. Tx 422A)

No.	Sizes of Pipe Threaded.	Without Cut-off.	With Cut-off.
41	$\frac{1}{2}$ , $\frac{3}{4}$ , $1$ , $1\frac{1}{2}$ ...	30/-	26/-
41 $\frac{1}{2}$	$\frac{1}{2}$ , $\frac{3}{4}$ , $1$ , $1\frac{1}{2}$ , $2$ ...	35/-	40/-
42 $\frac{1}{2}$	$\frac{1}{2}$ , $\frac{3}{4}$ , $1$ , $1\frac{1}{2}$ , $2$ ...	40/-	47/6
43	$1$ , $1\frac{1}{2}$ , $2$ ...	52/-	58/8
44	$1\frac{1}{2}$ , $2$ , $2\frac{1}{2}$ , $3$ ...	60/-	70/-
44 $\frac{1}{2}$	$2$ , $2\frac{1}{2}$ , $3$ ...	85/-	85/7/6
45	$2\frac{1}{2}$ , $3$ , $3\frac{1}{2}$ , $4$ ...	108/10/-	127/-

These tools are fitted with adjustable dies and guide or centring jaws. What may be spoken of as the distinguishing features between them and other similar tools, are the means for setting the dies to size, for holding the dies in position, and releasing them at the end of a cut. The setting is done with great accuracy and by simply using the hand. The holding does not depend on any frictional clamps, screws or nuts, but on a positive lock. The releasing is accomplished instantly, and avoids turning back over threads.

DIES. These dies are of the **double form** which is the most readily adjusted and sharpened. They do their work while held stationary. Their adjustment enables the operator to at once alter the size of the threads, so as to suit any variation in the pipe fittings.

**GUIDE JAWS**—These centre the pipe accurately to the dies they are adjusted simultaneously to all sizes of pipe. The mechanism for accomplishing is self-locking, and its adjustment cannot be accidentally disturbed.

**CUTTING-OFF DEVICE**—This as has been mentioned, is also furnished in the equipment of the tools, unless its omission be specified. It cuts the pipe squarely and cleanly.

### Extra Dies for Hart's Patent Duplex—

Number of Tools.	Complete Set of Dies.	Single Sets in Comp. Set.	Single Sets (4 pieces).
41	14/-	2	7/-
41 $\frac{1}{2}$	21/-	3	7
42 $\frac{1}{2}$	21/-	3	8 -
43	19/-	2	9/6
43 $\frac{1}{2}$	29/6	3	9/6
44	32/-	2	18 -
45	36/-	2	18

With the exception of those for  $\frac{1}{2}$  inch pipe, each set of Dies threads two sizes.

## WELLS BROS.' "LITTLE GIANT" STOCKS AND DIES.

*Little Giant.*

Wells Bros.' "Little Giant" Stocks and Dies.—

*Little Giant.*

The "Little Giant" Dies are made of flat drawn steel. Flat steel is hammered very close to size, then drawn, it is thus refined. In the "Little Giant" Dies the grain of the steel is laid across the out of the Die, hence the strength and durability. The "Little Giant" principle is fundamentally correct.

## BARNES' WELL-KNOWN SCREW CUTTING LATHES.

It has been said that "Every improver of tools had a weary and difficult battle to fight, for every improvement in effective power was sure to touch the interests of some established craft." This is all over now, and the majority of people accept the wisdom of saying that which gives the "greatest good for the greatest number."

No. T. 515.

**Barnes' Screw Cutting Lathe, No. 4 1/2, 9 in. Swing, Compound Rest (No. T. 515),** ... .. £24/-

This is a Back-gear Screw Cutting Lathe. Feeds right or left, and cuts screws right or left without change of gearing. The tool carriage swivels so that the tool can be set to any desired angle, and it also adjusts the guide for taper setting. The tool stock has a side movement to adjust centres for turning tapers. The head stock has hollow spindle for rods 1/4 to 1 inch. All gearing is cut from solid metal. It is in level for threads 5 to 40 and the change gears furnished can be substituted for many other threads. It swings 9 inches, and takes 22 inches between centres. It swings 14 inches over tool carriage.

Weight, 970 lbs. Packed for transit, 340 lbs. Measurement, 10 1/2 cubic feet.

**Band Rests** ... .. for No. 4 1/2, 14/-

**Countershafts** ... .. 95/-

# BARNES' WELL-KNOWN SCREW-CUTTING LATHE.

For Tools, Drills, and Centres, see pages 1023, 1027 and 1030.

No. Tx 518

Barnes' Screw Cutting Lathe, No. 5, with Compound Rest, Swings 11in. on Face Plate 8 $\frac{1}{2}$ in. over the Tool Carriage, and 34in. between Centres (No. Tx 518) ... .. £281/10/-

The head stock has a steel spindle with 10-32 inch hole through its entire length. The spindle of both head and tail stock are of steel, with positively true taper holes for the reception of the centres, and the tail stock centre is self-aligning. The tool carriage is the same as on No. 4, but slightly larger. It is adapted for threads 4 to 40, but like No. 4, many more combinations can be arranged with the gears furnished. Weight of lathe, 355 lbs. Packed for transit, 600 lbs. Measurement, 154 cubic feet.

Countershafts for No. 5 ... .. £5/-

Hand Rests for No. 5 ... .. 18/-

No. Tx 520.

Turret Lathe Tool, "The Almond" ... .. 70/-

The tool herewith presented is an expensive tool that may be used in an ordinary lathe for many purposes for which a turret lathe would be used. It consists of two pieces, one of which is rigidly fastened to the centre, while the other revolves upon it, being suitably guided and interlocked to make it reliable. The revolving piece has six holes to receive tools, and by the latch is instantly locked, so as to hold either of the tools in position to do its particular work. Size, 84 inches in diameter.

These Lathes are all fitted with Countershaft, included in price

**Improved Self-aligning, sliding, Surfacing, and Sealing Lathes.** The new powerful double geared headstocks "steep up new" even on the conical or parallel cone metal barstock. The new lathes are designed for cutting 1/2" and 1" tapered drives. For 1/2" up to 1" the front rest at 45° without the use of an extra rest in quadrant. The Guide Screw is accurately cut and full length of bed, fitted with double clamp that will slip away at top and bottom, the main self-compensating for wear in the thread; quick hand traverses; rack, pinion and double purchase wheel thereby being under easy and ready control. The bed is accurately planed and surfaced fitted on standards and provided with new big bridge gaps or gap supports to hold rest supports for bed and turning, oval, traversing, steady stay. Guide rest can be made to move sideways for taper, side part, side part, new bar, turning, sliding and surfacing rest on by lathe, lathe, independent of a size screw. 2" Change wheels are face planed and cleaned by Tooth Cleaning Machine.

-----------------------------	-----	-----

This Tool Steel, of the best quality and perfectly annealed, will be found useful for many purposes.

# DRILL CHUCKS.

No. 3. Tightens at 1 rev. while Machine is running.

No. 4.

No. 5. Automatic Release Chuck.

**Reliance Patent Drill Chuck, made in three sizes to hold straight shank Drills (Nos. 1, 2, 3, 4, 5) —**

No. 0, with Morse Taper Arbor or Shank, No. 1—	Capacity from 0 to $\frac{1}{16}$ in. ....	17/6
No. 1, with Morse Taper Arbor or Shank, No. 1—	Capacity from $\frac{1}{16}$ to $\frac{1}{8}$ in. ....	21/-
No. 2, with Morse Taper Arbor or Shank, No. 1—	Capacity from $\frac{1}{8}$ to $\frac{1}{4}$ in. ....	27/6

Self tightening. Hand operated. Ball bearing.

Tightens and centres drills (from 0) automatically by its own working pressure, and releases them again instantly by hand without the use of key, spanner or wrench. Therefore, even large Drills can be changed while the Chuck is running at full speed.

Positive grip that never slips, and the greater the working pressure on the Drill, the tighter it grips. Small diameter. Large capacity.

**Morrow Hand Operated Ball Bearing Drill Chuck (No. Tx 521a) —**

No. 1—Capacity from 0 to 3-16 in. ....	19/6
No. 2— " " 0 to 5-16 in. ....	21/-
No. 3— " " 0 to $\frac{1}{8}$ in. ....	32/-
No. 4— " " $\frac{1}{8}$ to $\frac{1}{4}$ in. ....	70/-
No. 5— " " $\frac{1}{4}$ to 1 in. ....	87/6

No key, spanner or wrench required. Automatic positive grip that never slips. Quick unresisting release by hand for straight shank Drills.

No. Tx 521a.

3 AND 4-JAW—UNIVERSAL.

Two sets of jaws are furnished with this Chuck— one set of No. 1 style and one set of No. 2 style. They can be changed very easily and quickly. Having both sets, the Chuck is adapted for any kind of work and we sell more of this style than any other. 3 Pinion gears in all sizes except the 2-inch. Holes recessed in back for flange plate. Jaws are not reversible. Steel bar and 8 screws for attaching to flange plate furnished with each Chuck.

No. Tx 536

### Cushman's Chucks, 4 Jaw "Independent," reversible Jaws (No. Tx 526)

4 1/2	6	8	10	12 in.

				£8 17/6

The reversible jaws and screws of these Chucks are made of a superior quality of open-hearth steel, and the former are carefully case-hardened by a special process. The reversible jaws are made in one piece of such shape that they are not easily broken by use or misuse, and they will hold a piece as large as the body of the Chuck. A key wrench, made of bar steel, and four bolts for attaching to face plate, are furnished with each Chuck.

ANTHONY HORDERN & SONS, LTD., PALACE EMPORIUM, SYDNEY.

# ARMSTRONG BROS.' LATHE TOOLS.

Man without Tools is nothing, with Tools he is all.

No. Tx 505.

Drop Head Tool Holders, especially designed for use on lathes of European make, and American lathes of similar design having Clamp tool rest. Head and screw are extra heavy, and the cutter point, while retaining the correct cutting angle, is dropped to a position suitable for use on lathes with high slide rest or low centres, while it's "goose neck" shape makes it exceptionally

efficient when used on the planer. Set right, right and left hand. Price includes 2 Self-hardening Steel Cutters and Drop Forged Wrench (No. Tx 528)—

No. 100—Holder, $\frac{1}{2}$ x $\frac{3}{4}$ x 6 in.	Cutter, $\frac{1}{2}$ in. sq.	Height to point of Cutter, $\frac{1}{2}$ in.	8

No. Tx 529.

Grad cutter on a line from point to centre, being careful to adjust it so that cutting edge is in a horizontal line, A to A.

## The Armstrong Threading Tool (No. Tx 529)—

Simplicity, strength and permanence of adjustment are prominent features of this tool.

Cutters are backed off, thus insuring proper clearance which cannot be obtained in a round cutter.

Price includes one Single Point Cutter and Wrench.

No. 00T—Shank, $\frac{1}{2}$ x $\frac{3}{4}$ x 6 in.	...	...	11/-
" 60 — " $\frac{1}{2}$ x $\frac{3}{4}$ x 6 in.	...	...	11/6

No. Tx 587.

**Armstrong Planer Tools** cost about the same as steel and forging of one forged tool—effectively it equals a dozen (No. Tx 587)—

No. 40—Shank, $\frac{1}{2}$ x $\frac{1}{2}$ in.; Length, 7 in.; Cutter, $\frac{1}{2}$ x $\frac{1}{2}$ in., 19/6
" 401 — " $\frac{3}{4}$ x $\frac{1}{2}$ in. " 8 in. " $\frac{3}{4}$ x $\frac{1}{2}$ in., 15/6
" 41 — " $\frac{1}{2}$ x $\frac{1}{2}$ in. " 10 in. " $\frac{1}{2}$ x $\frac{1}{2}$ in., 20/6

Each Tool is packed in a cardboard box, and price includes a Drop Forged Wrench, and 2 Self-hardening Steel Cutters ground to shape.

**The Armstrong Gang Planer Tool**, for planing large surfaces (No. Tx 588)—

No. Tx 588.

No. 61—Shank,  $\frac{1}{2}$  x  $\frac{1}{2}$  x  $\frac{1}{2}$  in.; Length, 10 in.; Cutter,  $\frac{1}{2}$  x  $\frac{1}{2}$  in.; Feed Adjustment, 0 to  $\frac{1}{2}$  in. ... 51/-

On that class of work it will effect a saving of 30 to 75 per cent. in time required by Single Point Tool.

It has a record of having finished a Three-hour job in One hour.

As each chip is comparatively light, a planer will, with this tool, carry with ease a feed and depth of cut much greater than is possible when using an ordinary tool, and there is much less tendency to "break out" at the end of cut.

Price includes 1 set of self-hardening Steel Cutters, Gauge for grinding Cutters and Wrench.

### Armstrong Cutting-off Tools (No. Tx 585)—

In no other form of lathe tool is the proportion of cost of maintenance to effective work performed so great as in a Cutting-off Tool. Therefore in no other form should the tool holder principle be so effective or economical.

The blades are made of special grade self-hardening steel, rolled bevelled on both sides, giving proper clearance to insure a clean cutting tool, and require grinding on the cutting end only.

Price includes one Self-Hardening Steel Blade and Drop Forged Wrench.

No. Tx 589.

**Armstrong Drill and Reamer Holder**, made in three sizes. Morse Taper 1, 2 and 3. These holders are simply a heavy Morse Taper Socket with a deep centre to take dead centre of lathe, and a good strong handle to hold it by. They eliminate 90 per cent of drill breakages on the lathe and save all mutilation of Drill Shanks and Sockets (No. Tx 589)

No. 1, holds Morse Taper Shank, Drills $\frac{1}{16}$ to $\frac{1}{2}$ in., 4/-
" 2, " " " $\frac{1}{4}$ to $\frac{3}{4}$ in., 5/6
" 3, " " " $\frac{1}{2}$ to $1\frac{1}{2}$ in., 7/3

No. Tx 589A

**Armstrong Automatic Drill Drift**, practically it is the ordinary Drift and Hammer combined in one, with the great advantage that it only requires one hand to operate it, leaving the other free to hold drill or chuck, and prevent its falling (No. Tx 589A)—

No. 1A, for Morse Tapers, No. 1 or 2 ... 4/6
No. 2A, " " No. 2 " 3 ... 5/6
No. 3A, " " No. 3 " 4 ... 7/-

## Armstrong Clamp Lathe Dog (No. Tx 542).—

This dog is so constructed as to combine the convenient features of the clamp dog with the simplicity and strength of the ordinary lathe dog. It will accommodate itself readily to work of any shape and will hold it securely and squarely, being especially adapted for use on finished work which would be liable to be damaged by the set screw of a common lathe dog. One advantage of this dog is that it can be adjusted without removing work from centres. It possesses a wide range of adjustment.

No. Tx 564.

### Live Spindle (No. Tx 564)—

Size 1, body 1in. sq. x 4in. long 48/-

Size 2, body 1 1/2in. sq. x 5 1/2in. long 55/-

Size 3, body 2in. sq. x 7in. long 94/-

These tools will be found of great value for use with the lathe, enabling grinding, boring, polishing, milling, and many hitherto unobtainable jobs, both roughing out and finishing, to be done without disturbing the work in the chuck or centres. They have been designed with an eye to the latest practice in using corundum or emery discs, and the bearings running in an oil bath enable the highest speeds to be attained. They are intended to be held in the slides like an ordinary tool, but can be held in a variety of other positions. Made in the best cast steel, polished all over, cases for round or flat belt. The tool is also made with double gear, cut from the solid, at moderate extra charge.

No. Tx 565

Cutters (No. Tx 2064) 1/8 to 3/4 in. have straight teeth, 1 to 3 in. have teeth of a spiral form.

No. Tx 570

**Morse & B. S. Mfg. Co.'s Angle Cutters.** These are suitable for cutting the teeth of cutters. They are stocked in 45, 60, 70, and 90 degree angles, for both Right and Left Hand. Diameter, 2 1/2 in.; Thickness, 1/2 in.; Size of Spindle, 1/2 in. (No. Tx 570) ... 9/8 in. diameter x 1/2 in. thickness, 1 1/2 in. spindle hole 12/8 in. Please state, when ordering, whether Right or Left Hand, and number of degree.

**Double Angle Cutters, made by Morse Twist Drill Co.** These cutters are stocked with 45, 60 or 90 degree included angle. Diameter, 2 1/2 in.; thickness, 1/2 in.; hole, 1/2 in. (No. Tx 570A) 10/8

No. Tx 570A

### PATENT INVOLUTE CUTTERS—For Teeth of Gear Wheels.

All Gears of same pitch cut with these Cutters are interchangeable.

**Involute Cutters, Eight Cutters are made for each pitch as follows—**

No. 1 will cut wheel from 135 to rack

2	"	"	55	134
3	"	"	35	54
4	"	"	25	34
5	"	"	21	25
6	"	"	18	20
7	"	"	14	16
8	"	"	12	13

When going to cut a new wheel or cog to replace or copy another, a simple method of finding out the diametral pitch of gear cutter required, is as follows:—Count the number of teeth on cog and add 2 more to it; then measure diameter, overall, of cog and divide the number of teeth by the diameter.

For example, take a wheel 5 in. in diameter, with 38 cogs, add 2, i.e., 40 plus 2 equals 42; divide 40 by 5 in. gives 8 as result. Thus an 8 diametral pitch cutter would be the one required.

**Patent Involute Cutters, for teeth of Spur Gear Wheels, made by Morse Twist Drill Co., and Brown and Sharpe Mfg. Co. (No. Tx 571)—**

**Ground Flat Stock**.—Manufactured by Brown & Sharpe Co., and L. S. Starrett Co.; in lengths of 18 in.; widths assorted, 2 1/2 to 4 in. (No. Tx 548)—

1/8	3/8	1/2	3/4	1	1 1/4
4/8	3/8	2/8	2/6	2 3/8	1 lb.

This stock is of service in tool work for making flat gauges, test tools, jig work, &c., and in all work requiring steel of a definite thickness. It is much less expensive to use steel of this kind than to plane or grind single pieces to a size as required. The Ground Steel that we carry in stock is of first quality, cut the length of the sheet, annealed and ground to within a limit of .001 of the given thickness.

- No. 721. English and Metric English Pattern Rules, graduated on one side only, top edge 5 centimetres in 1 m/m, the balance in m/m, bottom edge 8 inches in 32nds,  $\frac{1}{2}$  inch in 64ths, balance in 16ths—  
4in., -/7; 6in., -/8; 12in., 1/2 each

- No. 732.—Starrett English Pattern Flexible Rules—These flexible rules are all approximately  $\frac{1}{16}$ in. wide by .012 thick and are made with one end round, with hole. They are all machine divided. 64ths, 32nd, 16ths and 8ths. ... 4in., -/6; 6in., -/7; 12in., 1/2 ea.

- No. 733. English Pattern Rules. Graduated one side only. Top edge 2in. in 32nds, 1in. in 64ths, 1in. in 16ths; bottom edge 1in. in 80ths, 1in. in 50ths, 1in. in 100ths, 1in. in 10ths ... 6in., -/9; 12in., 1/3 each

- No. 741. All Metric Flexible English Pattern Rules. Graduated one side only. Top edge m.m, bottom edge  $\frac{1}{16}$  m/m... 10 c/m, -/9 each; 20 c/m, 1/- each

- No. 296.—Slide Caliper Rules ... 4/6 each

These rules are 4 inches long, about  $\frac{3}{8}$  inch wide and 1-4/16 inch thick, with a jaw on the end. The graduations are No. 4, with 32nds and 64ths on the front as shown and the 16ths and 8ths on the back. The jaws are  $\frac{1}{2}$  inch deep.

These tools are most convenient for measuring small rods, tubing, etc., and in many cases will be found a substitute for a more expensive Caliper Square.

# ANTHONY HORDERN & SONS, LTD. ONLY UNIVERSAL PROVIDERS ENGINEERS' TOOLS.

MANUFACTURED BY THE L. S. STARRETT COMPANY.

No. 422. - Narrow Hook Rules, for taking measurements through holes, and large, graduated in either, and in the  
2/6 8/3 4/6 6/3 each

This little tool is used to clamp two or three together, and to make one line blade. The rules may be of the same or different widths up to 12 in. The clamps will be of special value to mechanics, whose tool chests will usually not hold rules longer than 12 in.

No. 299. - Rule Clamps

Starrett's Bevel Protractor

No 12

No. 12. Improved Bevel Protractors, with Blade, 6 in., complete ... 9/6  
12 in. ... 10/6  
18 in. ... 12/6

An adjustable rule, held firmly at any point by a thumb nail, passes through a revolving turret which is usually graduated in degrees from 0 to 90, each right and left, and can be accurately adjusted to show any angle.

A valuable auxiliary is made in the shape of a small level attached to the turret, forming an adjustable level to show any degree, this is greatly increasing the usefulness of the instrument. This level is attached to one side of the head as shown in the accompanying drawing.

The blades are the same as those used on No. 11 squares. The head is 7 in. long.

No. 490. New Bevel Protractor, with Hand-screw Blade and Beveled Head

This tool is of the same general design as No. 12 Protractor, with the additional feature of having the head extend both sides of the blade. This greatly improves the usefulness of the tool, as the same angles may be transferred from either side of the blade without the necessity of turning the head. The head is graduated in degrees from 0 to 90, each right and left, and can be accurately adjusted to show any angle. The blade is 6 in. long, and the head is 7 in. long. The head is attached to one side of the blade as shown in the accompanying drawing.

No. 298. - Key-Seat Clamps ... pair 2/6

Designed to transfer any combination of angles from one work to another. The tool is made of brass, and the head is 7 in. long. The head is attached to one side of the blade as shown in the accompanying drawing.

Centre Gauges, for use in grinding and setting screw cutting tools.

No. 390. - Not tempered, graduated one corner each in 32nds, 24ths, 20ths and 14ths ... 1/-  
No. 325. - Whitworth, not tempered ... 1/-  
No. 396. - " spring tempered ... 1/4  
No. 397. - Metric, not tempered ... 1/4

The above are 70", except on No 395 and No 396, in which they are 50"

No. 392. Centre Gauge Attachment ... 1/3

The above attachment is a V block with a slot above the V, containing a flat spring to frictionally hold the centre gauge parallel with the block. Placing the V block against a lathe spindle or face plate, a threading tool can be adjusted to line up with the centre of the work. The attachment is adapted to hold the gauge vertically or horizontally, and is used for setting up the tool for grinding and setting screw cutting tools.

Patent Key-seat Rule—

No. 105A ... 8/- ... No. 105D 10/6  
No. 107A ... 9/6 ... No. 105A 12/-  
No. 105C ... 10/6 ... No. 105B 15/-

The improved feature in this rule consists of a handle for the rule, which is made of one piece of steel, and is attached to the rule by a screw. The handle is graduated in degrees from 0 to 90, each right and left, and can be accurately adjusted to show any angle. The rule is 6 in. long, and the handle is 7 in. long. The handle is attached to one side of the rule as shown in the accompanying drawing.

# ENGINEERS' TOOLS.

MANUFACTURED BY THE L. S. STARRETT COMPANY.

In ordering do not fail to give the size and number of each tool wanted.

No. 11

Every tool warranted accurate. With the adjustable scale this forms one of the most convenient and useful tools ever devised for mechanics' use. It is a complete substitute for a whole set of common try squares, and is one of the best sources for transferring exact measurements or laying out work. It is also convenient for a depth gauge or to square in a mortise. For a square it is perfect, while with the auxiliary centre head it forms a centreing square, both inside and outside, which for convenience and accuracy has no equal. The blades are hardened and graduated with heavy figures, reading both ways.

No. 33. Drop Forged Steel Combination Squares, Starrett Patent, with hardened Heads and hardened Blades.

8in., with centre head	...	...	...	8/6	18in. with centre head	...	...	...	13/-
9in. "	...	...	...	10/-	24in. "	...	...	...	15/-
12in. "	...	...	...	10/6					

8 1/2 inch Stock and Centre Head are hardened, as well as the Blade, which is graduated with heavy figures reading both ways.

No. 289.—Attachment for Combination Squares—

2/9 each

The use of this attachment is so well shown by the illustration that a further description is hardly necessary. The attachment is made to fit the 12, 18 and 24 inch blades of No. 11 and 33 squares and can be used in connection with any of Starrett's rubber rules as wide as one inch, or with the flat steel square No. 21 for laying out key seats, etc.

No. 32.—Centre Square, with 12in. Blade 7/-ea.

The centre head on this tool is made with broader sides than those on No. 11 centre head, which feature is of value in many kinds of work. The sides are 1 1/2 inches wide at the ends.

No. 9

No. 9.—Combination Set, with hardened blade—

9 inch, set complete	...	...	...	13/-
12 "	...	...	...	14
18 "	...	...	...	17/-
24 "	...	...	...	18/6

This set shows Combination Square with centre head and 7 1/2 in. Bevel Protractor head. Each head may be instantly removed, or replaced and used interchangeably with the scale, thus forming the most useful combination set of tools ever devised for mechanics' use.

# ANTHONY HORDEEN & SONS, LTD. ONLY UNIVERSAL PROVIDERS ENGINEERS' TOOLS.

This set consists of Combination Square with hardened, drop forged stock and centre head, and new reversible protractor head.

## No. 433.—Patent Builders' Combination Tool—

18in.	...	...	...	11/6
24in.	...	...	...	24/6

This is a very simple tool to handle, yet a masterpiece of combinations, being a complete substitute for several high cost tools, with more good points than any other tool in its line ever produced. The stock is 9 inches long, with sliding blade either 18 or 24 inches long, 1 1/2 inches wide, with No. 1 graduations. This blade is adjustable through the revolving turret, which is graduated on one side in degrees with two rows of figures reading either right or left, and on the other to show the pitch to foot, the graduations showing 1 inch pitch. With levels set in each side of the stock, any incline in degrees or pitch to foot can be leveled up, either on top or under the work. For laying out to cut for valleys or rise of whatever pitch, set the blade to show pitch desired, lay off the line, then place the square end of stock against the work and draw the line against blade, which will give, without mental calculation, the complementary angle to that angle or pitch.

For a try square it is an improved substitute for the old fashioned carpenter's two foot steel square, which cannot be folded to put in a chest or the blade shortened when it makes obstructions. Neither can it be used as a level or plumb or as a corner or depth gauge as can this simple tool, which forms not only a try square of any length blade within its scope, but when full length blade is not needed it is slipped back to balance in the stock, making it more agreeable to handle. In short, it is a substitute for a full set of try squares, a level protractor, pitch to foot indicator, a 24 inch level or plumb against the blade, and a 9 inch using the work, and a complementary angle indicator, all in one simple compact tool, weighing with a 24 inch blade less than 3 lbs. The tool is nicely made and warranted accurate in all its functions.

No. 10.

## No. 10.—Patent Inclinometer, with hardened Blade.

With 12in. blade, without centre head ... 14/-

It is an inclinometer, try square, and level protractor combined. It is compact, convenient and a complete and perfect substitute for several costly tools. It consists of a stock and disc, both slotted to receive the blade, which folds in the stock. The blade attached to the graduated rotary disc may be secured at any angle from 0 to 90 degrees, and by loosening the clamp screw it may be shortened or extended full length, or removed for a straight edge. The working face of the stock, extending both sides of the blade, admits of its being reversed, so that the same angle may be laid off in opposite directions without changing the angle in the tool, thus requiring but 1/2 of a graduated circle to obtain all angles both ways. At 90 degrees, the blade brings up against a case-hardened screw, accurately adjusted, thus forming a try square; by holding the blade perpendicular (the level in the stock being at right angles), a plumb; by folding the tool a level, length of blade. The blades are graduated one edge each in 15ths, 30ths, 45ths, and 60ths.

An excellent feature of this instrument is the spiral spring between jaw and clasp, which not only takes up all backlash, but limits the pressure against the work to strength of spring. This is instantly felt through released pressure on the nut, and prevents springing the jaws, thus calibrating to a nicety.

## ENGINEERS' TOOLS.

MANUFACTURED BY THE L. S. STARRETT COMPANY.

No. 223.—Paper Gauge Micrometers, with ring— 24/- each

This micrometer is used in measuring the thickness of paper, sheet rubber, cardboard, &c. The dies are placed on the anvil and spindle so that measurements can be taken without compressing the articles measured. Measures all sizes less than 11-32nds of an inch by thousandths of an inch.

- No. 3M. Metric Micrometers, 25 millimeters, for measurement by 100ths of a millimeter up to 25 millimeters. Has lock nut and ratchet stop ... 22/-
- No. 2M.—Metric Micrometers, for measurement by 100ths of a millimeter from 25 mm to 60 mm. Has lock nut and ratchet stop ... 25/-
- No. 220.—Micrometer, with lock nut and ratchet stop and finger ring for measurements by thousandths up to 1 in. ... 24/-
- No. 221.—Micrometer, for measurements by thousandths up to 1 in., with lock nut and ratchet stop and finger ring ... 21/-

- No. 212.—Attachment for Two Inch Micrometer. This is an attachment by means of which a 2 in. micrometer may be instantly converted into a 1 in. tool ... 7/-
- No. 232.—Half Inch Micrometers, for measurement by thousandths up to 1/2 in. Has lock nut and ratchet stop ... 19/-
- No. 233.—Half Inch Micrometers, for measurement by ten thousandths up to 1/2 in. Has lock, nut, ratchet stop and short anvil ... 22/-

The anvil is shortened for use in places where the ordinary anvil is too long to be inserted.

No. 226.—New Micrometers. From one to six inches. With Ratchet

0 in. to 1 in. ...	22/-
1 in. to 2 in. ...	18/-
2 in. to 3 in. ...	25/-
3 in. to 4 in. ...	24/6
4 in. to 5 in. ...	27/-
5 in. to 6 in. ...	30/-

Standards—

1 in. to 2 in. ...	8/6
2 in. to 3 in. ...	8/6
3 in. to 4 in. ...	4/-
4 in. to 5 in. ...	4/6
5 in. to 6 in. ...	5/6

These micrometers, both in 1 in. and 1/2 in. sizes, are made as a low price. They are better adapted for general use than the standard micrometer, as they are made with a lock nut and ratchet stop. The frames are made of steel and the rods are made of brass. The micrometer is made of steel and the rods are made of brass. The micrometer is made of steel and the rods are made of brass. The micrometer is made of steel and the rods are made of brass.

# ENGINEERS' TOOLS.

MANUFACTURED BY THE L. S. STARRETT COMPANY.

In ordering do not fail to give the size and number of each tool wanted.

## No. 222.—Micrometer Sheet Metal Gauges ... 22/- each

This gauge has 2in. depth of throat to reach over the edge of sheet metal to gauge its thickness across the centre. The 2in. movement screw. The screw is covered by our patent shell with its indicator mark, which enables one to take up wear to a steady and insure a correct reading, the screw remaining solid. It also has our patent ratchet friction feed, which ensures uniform pressure against the work without springing the frame, as well as our patent lock nut to lock the spindle firm when desired to make a solid gauge. Decimal equivalents are stamped on the frame. Weights of gauge, 3oz.

## No. 128. Patent Six Inch Micrometers ... 84/- In Leatherette case ... 92/-

This micrometer will measure round work to 2in., and flat work to 6in. It weighs 21 ounces, and is rigid and accurate. It can be quickly set to exact position from 1 to 6in., by unscrewing a plug. A valuable feature of this tool is a set of six independent holes through both the movable part and the beam, each hole being bristled with hardened steel ballpins, ground and lapped to fit the plug, which locates to measure the various inch settings.

## No. 226.—Micrometers in Sets, with Ratchet Stop. In case—

0 to 3in., with standards ... 75/-  
0 to 6in. ... 83/15/-

The cases for these micrometers are well made and nicely furnished. They are covered with morocco leather and lined with velvet.

## No. 124. Inside Micrometers—

A, in case ... ..	19/6 set
B, " " " " " " " " " " " "	24/- "
C, " " " " " " " " " " " "	30/- "
D, " " " " " " " " " " " "	45/- "

Auxiliary Handle, extra ... 2/-

Set A has 4 rods and one 1/2-inch gauge, and measures from 2in. to 8in.

Set B has 10 rods and one 1/2-inch gauge, and measures from 2in. to 12in.

Set C has 4 rods and one 1in. and two 2in. gauges, and measures from 2in. to 32in.

Set D comprises sets A and C, and measures from 2in. to 32in. No. 124, which, like No. 120, is designed for internal and linear measurements, such as measuring cylinders, rods, also for setting callipers, comparing gauges, etc. It is also useful in measuring parallel surfaces. The micrometer screw in the head has 1in. movement in sets A and B, and, by means of the extension rods furnished, the scale is given for each set as obtained. The extension rods are provided with a collar, against which the rods are conveniently and accurately set in the micrometer head. In setting these rods, see that the zero mark on the collar coincides with the zero mark on the micrometer head. With the rods are sent standard gauges or rings to slip on the rods, under the collar, to further extend the rod. The contact surfaces are all hardened, and provide is made for adjustment, to compensate for wear of the screw and contact surfaces.

The auxiliary handle can be used with sets A, B and D. The handle is screwed in the side of the micrometer head, in place of the knurled set screw, which can be removed, thus fitting the tool for use in places too small for the hand.

## No. 120.—Inside Micrometers—

Set A, with 4 rods to measure from 2 to 8in., with case ... ..	18/-
Set B, with 7 rods to measure from 2 to 12in., with case ... ..	22/6
Set C, with 4 rods to measure from 8 to 32in., with case ... ..	28/-
Set D, comprising sets A and C, with case ... ..	42/6
Auxiliary Handle, extra ... ..	2/-

The screw and nut read in 1000ths. Set A measures from 2 to 8in., has 1in. movement of screw and requires four extension rods. The rods are provided with a hardened steel adjustable spring in each, which permits adjusting for wear. A small binding screw locks rods when set. Rods are marked in 10in. divisions and set to a similar line on a projection of the barrel. Set C is similar in all respects with the exception that it measures from 8 to 32in., with four extension rods, and has a lock for the rods, and has 1 inch movement of the screw. This is a very strong and serviceable tool as well as an accurate one.

## No. 228.—Hub Micrometer,

to measure by 1000ths up to 1in., has lock nut and ratchet, will pass through 3/4in. hole, 22/-

# ANTHONY HORDERN & SONS, LTD., ONLY UNIVERSAL PROVIDERS

## ENGINEERS' TOOLS.

MANUFACTURED BY THE L. S. STARRETT COMPANY.

In ordering, do not fail to give the size and number of each tool wanted.

No. 127.—Micrometer Gauges, in case—  
No. 127A—Range 0 to 4in. ... 45/-  
No. 127B " 4 to 8in. ... 47/10/-

These gauges were designed and made to meet the requirements of the Government. In making both axes and other work in the Ordnance Department of Government shops. The frames are cut from steel plates, nicely finished. The sides are covered with hard rubber, put on with brass screws, preventing inaccuracy through expansion caused by change of temperature when held in warm hands. The micrometer screw adjusts 1 inch, reading 100ths of an inch, and is provided with our patent lock nut. The different length tail spindles, forming anvils, are interchangeable and have positive stops to set against the micrometer barrel. The adjusting collar on these anvils have notches to facilitate the removal of dirt, which would prevent them from setting accurately, against the work. The contact ends of the anvils are slightly convex to prevent catching on cylindrical work. Furnished with catched stop.

### No. 229.—Telescoping Inside Gauges—

No. 229A	Range 1/4 in. to 1/2 in.	...	...	4/6
" 229B	" 1/2 in. to 1 1/4 in.	...	...	5/6
" 229C	" 1 1/4 in. to 2 1/4 in.	...	...	6/6
" 229D	" 2 1/4 in. to 3 1/4 in.	...	...	8/3
" 229E	" 3 1/4 in. to 6 in.	...	...	11/6

These are instruments from which the exact size of holes or slots can be taken by an outside caliper or micrometer, or that shrink, close or loose fit, varying in thousandths, or less, can be made and measured. To use the instrument to measure a hole. Compress the telescopic head and lock the plunger by a slight turn of the knurled screw in the end of the handle, insert the head inside the hole, release the lock and the plunger will expand across the hole to a fit. Now lock the plunger by a slight turn of the screw, withdraw and caliper over the ends of the head with a micrometer, which will give the exact size of the hole. The ends of each telescope 1 and 2 are hardened and are made on a radius of the smallest hole it will enter. These instruments are more reliable than ordinary leg calipers on account of the tendency of the legs of the latter to give up, and of the points to catch in blow holes or other depressions. They can be used, of course, either in fitting cylinders to holes or holes to cylinders. The anvils are made in steel to enter holes from 1/4 inch to 5 inches.

Adjustable Caliper Gauge. Designed for internal measurements of large cylinders and of distances between uprights. The body of the tool is a steel tube provided with a sliding chuck on each of its ends. Into one end is clamped a plain rod, that, when the chuck is loosened, can be quickly adjusted to any approximate size. Into the other end is screwed a threaded anvil for fine adjustment.

To set the gauge, loosen the chuck that clamps the wire rod, slide the rod out or in to the required size, and clamp it. If not quite correct, loosen the chuck on the opposite end and turn the anvil out or in what little is needed.

Made from steel throughout, and nicely finished.

No. 128.—Adjustable Caliper Gauge, 2 1/4 in., with three rods, capacity from 2 1/4 in. to 6 1/2 in. ... 3/9  
" " " " 6 in. " " " " 6 in. to 10 in. ... 4/9  
The diameter of the steel rod is .160 inch.

### No. 19.—Protractor ... 5/-

Graduated in degrees from 0 to 90, both ways. The blade is six inches long, and by means of our patent lock joint is set firmly to a slight turn of the nut. The back of the tool is flat. This protractor is accurate, and is convenient for setting bevels, for transferring angles, as a small T-square, or for a large number of other uses which will readily occur to a machinist or draughtsman, and will be found reliable, and very satisfactory by any mechanic, especially those who do not care to pay for a more expensive tool.

ANTHONY HORDERN & SONS, LTD., PALACE EMPORIUM, SYDNEY.

## ENGINEERS' TOOLS.

MANUFACTURED BY THE L. S. STARRETT COMPANY.

In ordering do not fail to give the size and number of each tool wanted.

No. 183.—Protractor	...	...	...	7½
---------------------	-----	-----	-----	----

Similar to No. 10, but with rectangular head, gives four working faces. Also two rows of figures reading both ways to show the complementary degrees. The blade is six inches long and by means of our patent lock joint is set truly by a slight turn of the nut. The back of the tool is flat, the protractor accurate, nicely finished, and convenient for a draughtsman or machinist for setting bevels, transferring angles, or for use for a T-square, etc.

## No. 350. Universal Bevel Protractor

No. 360A, Tin. ....	22
" 360C, 12in. ....	24 60
" 360E, with both 7 and 12in. blades	26 60
G. Attachment extra ....	3 00

Cases for A, 8/-; E, 6/- each extra.

This tool weighs 6 oz. The blade is 7 or 12 in. in, the stock 1 in. long, and both are made from shw. steel, nicely finished. The disc is graduated in degrees from 0 to 90 each way, and rotates the entire circle on a central stud inside the case. The blade (clamped by an eccentric stud against the edge of the disc) may be slipped back and forth its full length, or turned at any angle around the circle and firmly clamped at any point, adopting it for work in positions where others cannot be used, and rendering the workman's life easier, by transferring the work to the tool. One side of the stock being a flat surface, it is a convenient tool for laying on paper in drafting, etc., and it has the quality of any other tool of the kind.

The attachment shown in the smaller engraving will be found very convenient for grinding worm thread tools, tapers on lathe centres, and all long tapers.

## No. 362.—Universal Bevel Protractor with Vernier—

No. 862B, 7 in. in Leather case ... ..	32/6
" 362D, 19 in. " " " " " "	89/-
" 862F, 7 and 12 in. Blades, in Leather case	45/-
" 862G, Attachment, extra ... ..	3/6

This Protractor is the same as No. 560 described above, except that it is made with Verniers reading five minutes or one-twelfth of a degree.

On the Verniers are placed with relation to the graduated main circle so as to make the Protractor readable by Vernier in any position. The Protractor scale is 4 in. long and has either a 7 or a 12 in. blade, 4 in. wide. With the 7 in. blade, the tool weighs 16 ounces. The disc is graduated in 100 equal parts, 90 each way, and has an entire circle on a central stud in-100  
The blade, carried by an eccentric stop against the edge of the disc, may be slipped back and forth its full length, or turned to any angle around the circle and firmly clamped at any point. Attention is called to the fact that the figures on the Vernier are read from the right, thus making it easy to read the tool when taking measurements. Attention is also called to the central locking nut on this Protractor. By a slight turn of this nut, the Protractor is firmly held in position.

## No. 47.—Improved Bevel—

6in., length of stock	3½in....	...	...	...	4/6
9in. " "	4½in....	...	...	...	5/6

The advantage of this bevel over any other tool of this kind made, consist in its having not only the blade slotted but the stock as well, through and through, thus admitting adjustments that cannot be obtained with a common bevel. The clamping screw head, which the illustration does not show, is set into a rabbet, flush with the surface of the stock, which it fits on the work.

No. 15. Universal Bevel, 9in.	...	...	...	5/6
-------------------------------	-----	-----	-----	-----

**Improved features.** The set-off in the blade increases its capacity and usefulness for bevel gear work, etc., so that any angle, however slight, may be obtained. Another valuable feature is, one edge of the case being solid, a rest is formed directly under the blade, where thin terminations may be raised and accurately fitted.

# ENGINEERS' TOOLS.

MANUFACTURED BY THE L. S. STARRETT COMPANY.

In ordering do not fail to give the size and number of each tool wanted.

No. 361.—Draughtsman's Protractor—

No. 361B, in leather case ... .. 27/-

This protractor is graduated in degrees and minutes to read from either right or left, with vernier to read in five minutes. The three straight edges of the protractor are graduated in inches and Mils, the longer part 6 in. The tool will lie flat on the paper. The knurled locking nut is convenient for picking up the instrument. To obtain the complement of an angle without resetting, place the opposite part of the stock against the T-square or straight edge of a drawing board, and the reverse angle can be obtained by placing the straight part of the arc against the T-square or straight edge. By loosening the locking nut, friction is taken off, making it easy to adjust to degrees, when the tool may be again firmly locked. This is a high grade protractor and can greatly be appreciated by draughtsmen.

No. 193.—Protractor, used for setting Bevels No. 15, No. 47, and No. 49 at any desired angle, thus converting them into Bevel Protractors at slight cost ... .. 3/9

toys

No. 49.—Combination Bevel ... .. 7/-

This bevel has a stock riveted in the straight edge stock or head, on which the split blade is hinged, so as to swing over the stock and be clamped at any angle. The slotted auxiliary blade with clamp bolt may be slipped on to the split blade and be clamped at any desired angle and used in combination with the stock of the other, for laying out work, measuring, or showing any angle desired, and when so combined will be flat upon its work. The stock is about 4 inches long.

No. 40.—Improved Screw-Pitch Gauge ... 3/6

The gauge has twenty-two pitches, viz. 8, 9, 11, 13, 15, 16, 18, 20, 22, 24, 26, 27, 28, 30, 32, 34, 36, 38, 40. This gauge can be used inside a nut as well as on the outside of a screw or bolt. A late improvement in the Screw Pitch Gauge consists in stamping on each leaf desirable showing the double depth of thread on said leaf, and this of course equals the depth of threads on the two sides of a tap having the same pitch, and helps the workman in determining the size of drill needed to drill the hole the right size to leave a full V thread for a tap having the same pitch. To do this, caliper with a micrometer over the threads of the tap and from its size to 1,000ths show, deduct the decimals given on the pitch gauge leaf, according with the pitch of the tap. The result will show in thousandths the size of drill needed for a full thread. An allowance is to be made for the extent to which it is desired the thread should be flattened. A further improvement has recently been made in reducing the width of the leaves having the finer pitches, so that they will enter small nuts.

Formula for depth of threads for a V thread	$\frac{1}{2} \frac{D}{N}$	Formula for U Standard	$\frac{1}{2} \frac{D}{N}$
	$\frac{1}{2} \frac{D}{N}$		$\frac{1}{2} \frac{D}{N}$

D = Outside diameter of tap.

U = Bottom U

N = Number of threads per inch

# ENGINEERS' TOOLS.

MANUFACTURED BY THE L. S. STARRETT COMPANY.

In ordering, do not fail to give the size and number of each tool wanted.

## No. 4.—Screw Pitch Gauge, 24 pitches, 4 to 30 ... 4/6

Has the following pitches: 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24. The teeth are sharp and clean cut. Like our No. 40 it can be used inside of a nut as well as on outside of a screw or bolt. It is also a convenient and reliable tool to use as a 50-degree centre gauge and gauge to test the grinding of either an inside or outside screwing tool.

## No. 5.—Screw Pitch Gauge, 26 pitches, 32 to 82 ... 4/6

Of the same form as our No. 40 Screw Pitch Gauge, for inside and outside work. Has the following pitches: 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82.

## No. 6.—Screw Pitch Gauge, 30 pitches, 4 to 42 ... 5/6

Of the same form as our No. 40 Screw Pitch Gauge. Has the following pitches: 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42.

## No. 7.—Whitworth Screw Pitch Gauge, 26 Pitches, 4 to 60. For Whitworth Standard Thread only... 4/6

Has the following pitches: 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 22, 24, 25, 26, 28, 30, 32, 40, 45, 60.

## No. 105.—U.S. Standard Screw Pitch Gauge ... 5/6

This gauge has 25 pitches, viz.: 24, 26, 28, 32, 36, 40, 44, 48, 52, 56, 60, 64, 68, 72, 76, 80, 84, 88, 92, 96, 100, 104, 108, 112, 116, 120, 124, 128, 132, 136, 140, 144, 148, 152, 156, 160, 164, 168, 172, 176, 180, 184, 188, 192, 196, 200, 204, 208, 212, 216, 220, 224, 228, 232, 236, 240. Also a centre with coarse and fine notch.

## No. 156.—Metric Screw Pitch Gauge. 20 Pitches, 50 to 2.50 ... 7/6

This gauge is similar in design to our No. 40, with V thread. The base of this system is one millimetre, and the blades are stamped with the pitch or the distance from the centre of one tooth to the centre of the next, expressed in millimetres, or fractional parts thereof. The tool contains blades in the following pitches: 25, 30, 35, 40, 45, 50, 55, 60, 65, 70, 75, 80, 85, 90, 95, 100, 110, 120, 130, 140, 150, 160, 170, 180, 190, 200, 2.50, 5.00, 7.50, 10.00, 12.50, 15.00, 17.50, 20.00, 22.50, 25.00. That is from 1 millimetre up to 25 millimetres.

## No. 157.—Bicycle Screw Pitch Gauge ... 3/9

Has 22 pitches. Similar in design to No. 40. It is made for the use of bicycle manufacturers, electricians and others using screws with fine V threads. It has the following pitches: 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74.

## No. 158.—International Standard Screw Pitch Gauge—3/8

It is made after the French system adopted by the Society for Encouragement of National Industries. The leaves are stamped to show in millimetres, both the pitch and diameter of both. The gauge contains the following pitches: 1, 1.25, 1.5, 1.75, 2, 2.5, 3, 3.5, 4, 4.5, 5, 5.5, 6, 6.5, 7, 7.5, 8, 8.5, 9, 9.5, 10, 10.5, 11, 11.5.

## No. 159.—Screw Pitch for Metric System ... 5/6

This gauge is somewhat different to No. 158. The scale is the same, viz., 50deg, but it has more pitches than the No. 158. The diameter of screw or bolt is stamped on the leaves as well as the pitch in millimetres. The gauge contains the following pitches: 1, 1.5, 2, 2.5, 3, 3.5, 4, 4.5, 5, 5.5, 6, 6.5, 7, 7.5, 8, 8.5, 9, 9.5, 10, 10.5, 11, 11.5.

## No. 72.—Thickness Gauge or Feeler ... 5/6

This gauge has 21 leaves, varying in thickness by thousandths, running from .004 to .020. The thickness of each leaf is designated by the number upon it. Each leaf may be used singly or in combination with others, and any thickness in thousandths within their limits may be quickly obtained. The leaves fold within the case, which is 2 1/2 inches long, a convenient size to carry in the pocket.

## No. 172.—Thickness Gauge—

No. 172 A. Case 3 1/2 in. long x 1/2 in. wide; leaves 3 1/2 in. long x 1/2 in. wide. ... 3/6 each

No. 172 B. Case 4 1/2 in. long x 1/2 in. wide; leaves 4 1/2 in. long x 1/2 in. wide. ... 5/6 each

No. 172 C. Case 6 1/2 in. long x 1/2 in. wide; leaves 6 1/2 in. long x 1/2 in. wide. ... 7/6 each

B and C have 8 leaves, viz., .002, .003, .004, .005, .006, .007, .008, .009, .010. The leaves are tapered, and have the thickness marked upon them. A has the same, and a .0015 leaf also.

A has the same, and a .0015 leaf also.

## No. 178. Fillet or Radius Gauge—

No. 178A ... 3/6 each

No. 178B ... 5/6 "

This gauge may also be described as a concave and is especially adapted for use in laying out special forming tools, dies, &c., as well as for measuring fillets. The illustrations show a few of the ways in which the gauge can be used. We recommend it for the use of machinists and tool makers as well as pattern makers. Size A has 36 leaves stamped to indicate radii or fillets, from 1/16th to 1/2 in. (two-half diametric steel). Diameters are from 1/16th to 1/2 in., varying by 3/64ths. Size B is made with 24 leaves stamped to indicate radii or fillets, from 1/16th to 1/2 in. Diameters are from 1/16th to 1/2 in., varying by 3/64ths.

Size A has 36 leaves stamped to indicate radii or fillets, from 1/16th to 1/2 in. (two-half diametric steel). Diameters are from 1/16th to 1/2 in., varying by 3/64ths.

Size B is made with 24 leaves stamped to indicate radii or fillets, from 1/16th to 1/2 in. Diameters are from 1/16th to 1/2 in., varying by 3/64ths.

Diameters are from 1/16th to 1/2 in., varying by 3/64ths.

Size C is made with 12 leaves stamped to indicate radii or fillets, from 1/16th to 1/2 in. Diameters are from 1/16th to 1/2 in., varying by 3/64ths.

Diameters are from 1/16th to 1/2 in., varying by 3/64ths.

Size D is made with 6 leaves stamped to indicate radii or fillets, from 1/16th to 1/2 in. Diameters are from 1/16th to 1/2 in., varying by 3/64ths.

Diameters are from 1/16th to 1/2 in., varying by 3/64ths.

Size E is made with 3 leaves stamped to indicate radii or fillets, from 1/16th to 1/2 in. Diameters are from 1/16th to 1/2 in., varying by 3/64ths.

Diameters are from 1/16th to 1/2 in., varying by 3/64ths.

Size F is made with 1 leaf stamped to indicate radii or fillets, from 1/16th to 1/2 in. Diameter is from 1/16th to 1/2 in., varying by 3/64ths.

Diameter is from 1/16th to 1/2 in., varying by 3/64ths.

## ENGINEERS' TOOLS.

MANUFACTURED BY THE L. S. STARRETT COMPANY.

In ordering do not fail to give the size and number of each tool wanted.

### No. 287.—New Taper Gauge... .. 16/-

The thin leaves of this gauge are tapering, the width varying by 1/64th inch, to 1 inch of their length. They are graduated in 1/2 inches and figured to read in fractions of an inch from 1/16th up to 1 1/16th inch. The gauge is designed for brass and steel tube manufacturers for inside measurements, and it is also very convenient for mechanics use to measure the width of slots and size of holes in case drilled for tapping. It is also useful for setting calipers to sizes within its capacity.

### No. 245.—Engineers' Taper, Wire and Thickness Gauge... .. 12/6

This gauge is especially designed for the use of marine engineers, machinists, and others desiring a set of gauges in compact form. The taper gauge shows the thickness in 64ths to 128ths of an inch on one side, and on the reverse side is graduated as a wire three inches of its length, reading in 32nds and 128ths of an inch. The wire gauge, English Standard, shows on one side sizes numbered from 12 to 36, with two extra sizes, one 1/16th, the other 1/8th of an inch, and on the reverse side shows the decimal equivalents expressed in thousandths. This gauge has also 3 thickness or feeler gauge leaves, approximately 4 inches long, of the following thicknesses: .008, .013, .014, .006, .008, .010, .013, .015 and 1/16th of an inch, all folded within the case, which is 4 1/2 inches long, convenient to handle or to carry in the pocket.

### No. 246.—Planer and Shaper Gauge ... 12/-

This tool is made from drop forgings, nicely finished, case-hardened and ground, and is designed to supply the great need of planer, shaper and milling machine workers for an instrument by which to set a cutter, planer or shaper tool to plane or mill any desired thickness without the "cut and try" process. The gauge, with extensions, will give any measure from 4 inch to 45 inches. For planer work. Set the adjustable slide (using a scale caliper or micrometer) so that one of its ends, with or without the extensions, will measure the height or thickness wanted, place it under the planer or shaper tool, raising or lowering the tool until it touches the seat. Remove the gauge and the work will come as measured. For milling machine work: After the gauge is set to thickness of work wanted, place it on the table or seat for the work, raising or lowering the cutter to touch the gauge. It may also be used for a slot or a height gauge. For a plumb. Place the right angle end on the base against the work and read the level. This will go in places where nothing else can be used.

In ordering, do not fail to give the size and number of each tool wanted.

No. 160.—Tool Maker's Parallel Clamps, 1in. ... 8/9 pair  
2in. ... 4/8 "

These clamps are made from drop forgings, nicely finished, case hardened, and have take-up blocks to slip on and off end of screw, and are held to same in a novel manner. They will hold work square and parallel for laying out on surface plates, fitting or drilling. A round piece may be rigidly held in two of the clamps and drilled on an upright, central and parallel. Put up and sold in pairs. With the small block in use, the capacity of the smaller clamp is a little over one inch, and that of the larger clamp, two inches.

No. 161. Tool Maker's Parallel Clamps.—These clamps are made of steel, case hardened and are very useful for holding small work together, in tapping, drilling, &c.—

## ENGINEERS' TOOLS.

MANUFACTURED BY THE L. S. STARRETT COMPANY.

In ordering, do not fail to give the size and number of each tool wanted.

### No. 190.—Little Giant Jack Screws— Jack, with all Attachments ... 7/- set

These are designed for tool-room use, for leveling up work on a planer bed or under an upright drill, setting up machinery, etc. All parts are case-hardened.

No. 190. The Jack (A) is 12 inches in diameter at the base and has a range from 34 to 58 inches. It will raise 1000 pounds or more. Two extension bases (B and C) are made to fit the base of the main part (A) and are 2 and 1 inch high respectively. With these two extensions used singly or together a reach from 24 to 84 inches may be obtained. An auxiliary pointed screw (D) is supplied to be used in place of the screw with rivet cap in certain places where it may be preferable. The base (B) is also provided, for use in cases where such a shape may be desirable.

### No. 65.—Universal Test Indicator, with tool-post holder, complete ... 9/9

This indicator may be used to test inside, outside or surface work. It can be instantly attached to the spindle or the needle of any surface gauge, and used in connection with surface to show the slightest variation in 1000ths. It may be clamped to a flat or round support, varying in size from a surface gauge needle up to 10 in., flat or round. A special holder, as shown in illustration, is designed to go in the tool-post of a lathe, turning, chucking, or locating and centering work on face plate. The head of the needle has three working points, equally divided from the fulcrum, so the ball-like needle will vibrate, reading in 1000ths, when work is in contact with either point—in front, above or below it. When in front, the spring operating the ball-like needle needs to be reversed to throw point of needle up or down as work is used above or below the work. This may be instantly done by a slight turn of the disc to which the vibrating spring is attached. The working parts of the head are hardened. In using the indicator, bring the contact point against the work so that the needle will point to 0, when any variation either way will show.

### No. 249.—Screw Slotting Saw Blades.—

#### No. 249a—Set of four Blades, one of each thickness ... 3/- set

These blades are made for cutting slots in screw heads and can be used in any adjustable or 8 inch Hack Saw Frame. They are hardened throughout, have 14 teeth to the inch, and taper in thickness from the teeth to the back, thus providing good clearance, which prevents binding and allows the blades to cut easily and quickly.

All blades are 8 inches long by 1 1/2 inch wide. They are made in four different thicknesses, covering a wide range of work, and will be found invaluable in any machine shop. Packed in sets of four, consisting of one blade of each thickness.

### No. 65.—Centre Tester ... 9/-

This instrument was designed to use in adjusting and locating centrally any point or hole in a plate of work operated upon in a lathe chuck or on a face-plate; also to test the truth of lathe centres or a slide between the centres, the instrument being held in the tool post.

The indicator is of improved design and nicely made. The indicating needle passes through the ball, having a split stem, forming a chuck for holding the needle adjusted to any desired length. The ball is protected from a screw point, but may be instantly converted into a screw point by a turning motion by only glancing the knurled nut, adapting a 1/8 inch needle and adapting surface with a steel bead, not shown in the cut, and curved in the needle, to cover the point of same when used for screw work. The instrument is joined to a tool-post chuck by a flexible steel ribbon with self-set spring to properly hold the needle in contact with the work.

5in. Graduated (beam 15-64th in.)	3.6
6in. " " 5-16th in.	4.6

This marker is made of steel with the beam cast steel, and the eye is a steel casting which the screw acts to hold it firm. The beam is graduated in 64ths of an inch. The marker is a thin square piece of steel, nicely tempered, which is firmly held against the end of the beam, presenting four marking points.

**ENGINEERS' TOOLS**—Manufactured by The L. S. Starrett Company.

In ordering do not fail to give size and number of each tool wanted.

No. 67.—Improved Scriber.	Complete	.....	1/2
---------------------------	----------	-------	-----

This species is unique for the marine fish world in that it has been heretofore unobtainable. Three points are indicated on the dorsal fin, which are the only ones of the kind in the fish world. The long, bent point will be found a valuable auxiliary for reaching through holes. Length, with short, bent point, 9 inches; with long point, 12 inches. All parts are interchangeable. The knurled edge is nickled.

No. 88.—Improved Adjustable Sleeve Scribe—  
Complete with Knife Point . . . . . 2/6

THE L. STARRETT CO., NO. 68, ATHOL, MASS., U.S.A.

The knurled sleeve has hole clear through and a clamping device at each end, adapting it for slipping on or off different tools, securely holding them near to or away from the working point. The knurled sleeve is nickel-plated.

This Scriber is made in two lengths, 8 in. and 12 in. Tool makers will find the small size more desirable for general use, and the larger one for heavier work. For pattern makers a Knife Scriber, made of a fine grade of steel, is supplied as an auxiliary.

No. 182.—Pin Vices—				
No. 182A	...	0	to	040 inch
No. 182B	...	030	„	062 „
No. 182C	...	060	„	125 „
No. 182D	...	115	„	187 „

Set complete (one of each size) ... 8/8

These vices have hardened jaws with chucks so made that they will hold firmly anything inserted in them. The bolt extends through full length of the handle. The handle is reduced in size, so that it may be more rapidly rotated between thumb and finger when filing small work. They are convenient handles for holding scribers, small files, etc. Nickel plated.

No. 180. —Crank Shaft  
Calipers—  
6in. spring nut 3/8

These Calipers were designed to use in turning automobile crank shafts and for reaching into difficult places. They are very stiff and nicely finished, and can be depended upon for accurate results. Made in one size only.

No. 79 and 73.—Yankee Outside  
and Inside Calipers—

The Yankee Calipers and Dividers are manufactured under the Fay patent, are not quite so heavy as the Fay, and cost less. They are much liked, and on account of price are preferred by many to the latter class tools. All sizes are supplied with either solid or inside transfer. N. T. Thayer & Co. have the right of sale in the United States. After getting inside transfer, the maker reduces the spring in the jaws, so they may be withdrawn, and they spring back will show the exact size calipered.

### No. 26 and 27.—Improved Firm-Joint Calipers—

8 4 6 8 10 12 14 16 18 24 in.

1/2 1/4 1/6 1/11 3/4 2/8 2/11 4/6 5/6 6/3 9/- each

The above sizes refer to the length of the Calipers. Their capacity is about one-third greater than the sizes given.

The improvement in these Calipers (Nos 26 and 27) consists in the construction of the joint, which is so made as to be drawn together by means of a screw. The main stud is squared and fitted to cast leg, thus preventing the stud from turning when loosening and tightening, and ensuring a secure and various friction, of more or less tension to suit the user.

The quality of these calipers is incomparably superior to that of any old style riveted-joint caliper on the market.

No. 85E—12in., " " " "	"	"	"	"	"	"	"	"	"	"	96

Ball Points, No. 88, may be used with this tool.

This is a well-made, nicely finished Divider, with auxiliary calliper legs, which, together with a common pencil, form convenient combinations. The patent locking nut between the arms, after the adjustment is made, may be turned back, looking at the spring and arms firmly, thus removing the weak point which renders the divider liable to breakage. The adjustment of the first arm is a full-threaded nut on the stud, through which the quadrant passes, is more durable faster than two or three threads passed over the end of the screw. The calliper legs are made of this tool are made from best available iron, the rest of steel. The points are hardened and ground first-class. The smallest size is 1 1/8 inch diameter. The largest size will scribble in 22-inch circles; will caliper 11 inches outside and 18 inches inside. The second size is 1 1/2 inches; by adjustment of points it becomes 12 inches outside and 19 inches inside.

SPRING NUT

The  $F_{85}$  Calipers and Dividers, Nos. 74 to 77 all sizes

### No. 58.—Extension Steel Beam Trammels

No. 58C—With three sections, 42in. ... 10/-  
Ball Points, No. 88, may be used with this tool.

The beam of this tool is 5-16th in. round, with one side flattened. It is made in one, two or three sections, of 14in. length each, and coupled together by means of our improved socket coupling and grip nut, richly holding them for long reaches. With one 14in. section only, it weighs but 5ozs. The slides carry the steel points both beam and points in a partial turn of the knurled nut. Fine adjustments are made by a slight rotation of one or the other eccentric point, which by friction springs remain in when the nut is loosened. The beams are nicely finished and will be supplied with any number of the sections desired.

### No. 59.—New Trammels

No. 59P—Set, complete ... 17/-

The trammels are fastened to a wooden beam, which may be any size from 2in. to 12in. wide, and of any thickness desired (requires no fitting, giving stiffness according to the length and adapting it for small or large work. The auxiliaries designed to go with the trammel heads are inside and outside caliper legs, an extra pair of long points, a set of four ball points with holder, which enable one to scribe a circle from the centre of any hole up to 14 inches and under. A lead pencil may be used in place of either of the steel points. The clamping device is adapted to take in either a small or common-sized pencil.

### No. 77.—The Fay Patent Spring Dividers, with Spring Nut

	Spring Nut.		Solid Nut
24in. . . . .	3/8 each		2.9 each
3in. . . . .	3/4 " "		2/11 "
4in. . . . .	4/- " "		3/9 "
5in. . . . .	4/8 " "		3/10 "
6in. . . . .	5/- " "		4/9 "
8in. . . . .	5/8 " "		5/6 "

The above nut represents our Spring Dividers with new quick adjusting, automatic closing spring nut, a critical examination of which will at once show their superiority over all others on the market. The use will save much valuable time in opening and closing spring bow calipers and dividers. They are also made with a solid nut.

### No. 88.—Ball Points. For use with No. 85 or No. 90 Dividers and No. 51, No. 58 and No. 59 Trammels.

Complete, 4 Balls and Holder 4/6

The attachment consists of four balls, of 10-Mth, 1, 2 and 3 in. diameter respectively, and a holder which fits either divider leg or trammel head. It is used to form a seat for the divider leg in describing circles around a hole. In ordering the set for use with trammels, please give tool number of the trammel, so that the proper holder may be sent.

### No. 50.—Improved Trammel Points, nickel-plated—

No. 50A, with 8in. points, adjustable ... 8/6  
No. 50B " non-adjustable ... 5/6

Made of bronze metal, with forged steel points, hardened. Either point can be removed, and the pencil mark accompanying each pair put in the place. Adjustable like spring dividers. Light and durable.

### No. 109.—Surface Speed Attachment Only, for Speed Indicators

This attachment applied to one of our speed indicators is designed to show the number of linear feet per minute the periphery of a shaft or pulley is running, and thus enable a workman to know if the speed is too fast, or is too slow to get the most work the tool will stand. For instance, the speed of a cone pulley being turned needs to be changed at every step. Heretofore it has been all guesswork as to the number of feet per minute the periphery of the work is travelling. It may be so fast as to heat and spoil the tool, or it may not be nearly fast enough to perform what should be done. The same is true when shearing the tool from the hub to the rim of a pulley. The rubber-banded indicator wheel may be instantly slipped off or on the spindle of any of our speed indicators, and when held against the periphery of a shaft or pulley a half minute or a minute, by dividing the figure showing the revolution on the dial of the indicator by 2, the number of feet the surface of the thing is travelling is obtained, as each revolution of the indicator wheel shows six inches, twice for this attachment, but it will be found very convenient and adequate for the purposes intended, as suggested above.

# STARRETT'S SPEED INDICATORS.

No. 104. - High Speed Indicator—  
In pasteboard box 3/9

This indicator may be used at high speeds and is fitted with a bearing, and the instrument of a very fine bearing against which the outer end of the spindle revolves. The main parts of this instrument are the dial, and the dial plate has two rows of figures, reading either left or right hand. A large transparent glass cover is carried in the dial plate, being carried by a spring, and is moved to the right or left, where it is held in position by a small screw. When the spindle is placed in connection with the machine, the dial plate is moved to the right and the dial is held in position by a small screw. The dial plate is moved to the right or left, where it is held in position by a small screw. The dial plate is moved to the right or left, where it is held in position by a small screw.

All Starrett's indicators are supplied with Rubber Tips for Pointed and Hollow Centres without extra charge, which not only remove the jar and run smoothly, but are also a standard functional revolution between the spindle and the indicator.

No. 106. - Improved Speed Indicator—  
In Pasteboard Box, 5/6

This is a piece of machinery which is used for measuring the speed of a machine. It consists of a dial with a needle, and a rubber band handle. The dial is graduated in revolutions per minute, and the needle indicates the speed. The rubber band handle is used to operate the instrument. The instrument is used for measuring the speed of a machine, and is a very useful and accurate instrument. The instrument is used for measuring the speed of a machine, and is a very useful and accurate instrument. The instrument is used for measuring the speed of a machine, and is a very useful and accurate instrument.

No. 107. - Registering Speed Indicator—  
In Pasteboard Box ... 11/6  
Cases for Indicator ... 2/3

This instrument was devised to automatically register hundreds as well as tens and units, and also to give the time from the beginning to the end of the revolution. The instrument is used for measuring the speed of a machine, and is a very useful and accurate instrument. The instrument is used for measuring the speed of a machine, and is a very useful and accurate instrument. The instrument is used for measuring the speed of a machine, and is a very useful and accurate instrument.

### No. 18.—Automatic Adjustable Stroke Centre Punch—

No. 18AA—3 $\frac{1}{2}$ in. long,  $\frac{3}{8}$ in. dia. ... 5/6

No. 18A—5in. "  $\frac{3}{8}$ in. " ... 7/-

No. 18B—6in. "  $\frac{3}{8}$ in. " ... 8/3

This centre punch (patent applied for) is provided with knurled adjustable screw cap, which, working in connection with a spring, regulates the stroke. For work requiring a heavy mark, turn cap down, for work requiring a light mark, turn it up. For use on flat surfaces, the punch being placed in an upright position over the working line, a downward pressure releases the spring, the punch strikes the work, and the work is marked. When adjusted for either light or heavy strokes all indentations are of a uniform size for the starting of the drill, &c., and accurate and quicker work can be done. The working parts are hardened, durable and accessible for work repairs as may ever be needed. The adjustable cap fits the head, with no stroke adjusting screw through and above it to bother. The point can be removed for regrounding and easily replaced. The AA size is 3 $\frac{1}{2}$ in. long when adjusted for medium stroke,  $\frac{3}{8}$ in. in diameter, and weighs 8 ounces. The B size is 6in. long when adjusted for a medium stroke,  $\frac{3}{8}$ in. in diameter weighs 4 ounces. It differs from the A size in being stouter and capable of striking a heavier blow.

# ENGINEERS' TOOLS.

MANUFACTURED BY THE L. S. STARRETT COMPANY.

No. 138

No. 138.—Cross-Test Level ... .. 2/4

As the cut shows two levels are united in one frame, extending at right angles 2 inches each way. The level weighs only 2 ounces. When placed on work to be levelled in both directions, it will not be necessary to move the tool.

Extra Tubes for Starratt's Levels. All sizes 1/6 each

No. 134

No. 134. Cross Test Level and Plumb. Nickel Plate. 5/6

This is a well made and reliable tool, valuable in plumbing, squaring, and levelling up work. Just the thing to use when a plumb or in setting up machinery. Levelling is indicated every way without moving the tool. It weighs 1 lb. 5 oz. 5 gr. 5 gr. 5 gr. thick. Can be easily carried in the pocket.

No. 101

No. 101.—Japanned Instrument—  
No. 101, Japanned, nickelled tube ... .. 40/-

Designed for the use of architects, contractors, carpenters, millwrights, masons, surveyors, etc. Its lightness, simple construction, and extremely moderate price, combined with the wide range of work to which it can be applied, make it very desirable for all who have occasion to use such an instrument. The tripod is of iron, and has improved extension legs. The upper parts are hollow, to receive within them the lower parts which may be held at any desired length by clasp screws. The upper plate is connected to the tripod head by a ball and socket

joint, and can be levelled by the levelling screws. This plate is recessed to contain a graduated arc having its upper surface, and has a centre stud on which the arc and level turn. The graduated arc is of steel, and has on its one half of a circumference divided to degrees and properly numbered. This arc turns on the centre stud of the upper plate, independent of the level or sight tube. The sight tube is a brass tube 18 inches long, and is secured in a small eye aperture, while the other end has the usual cross wires. With extension legs, the height can be from two feet six inches to four feet six inches. The sight tube, level case, and graduated arcs are nickel plated, the other parts are japanned. The advantages of this instrument are as follows: The head is held to the tripod with a bolt and nut, so as to make it stationary at any given point, the graduated arc can be clamped to the base point by throwing a small cam arrangement. Weight packed in box for shipment, 134 pounds.

No. 92.—Transit or Surveyors' Levels

No. 92B, with plain sight tube and long legs 43/10/-  
No. 90F, with telescope, long legs, and ground level vial ... .. 25/16/-

Target to go on common 10ft. pole, 6/3 extra

This instrument consists of a tripod, to the head of which is connected an upper plate carrying a graduated arc and a level with plain sight tube.

It is designed for architects, carpenters, and contractors, to lay out building sites and determine the levels; for masons and millwrights in the construction of water wheels, building of dams and raceways. The farmer will find it convenient to ascertain the amount of fall for the location of drains, or to find the height of springs, and when the bearing of lines is not required, the surveyor will find this superior to the ordinary level compass, for angles may be taken where, from local attraction, it would not be possible to set them off with the needle. It will be especially appreciated by all who require the use of a level and some instrument for the taking of angles, but do not care to pay the price usually charged for a surveyors' or engineers' transit.

The instrument is composed of iron and brass, and consists of a tripod, to the head of which is connected by a ball-and-socket joint an upper plate, which can be levelled by the levelling screws. This plate is recessed to contain a graduated arc for taking angles. On this plate rests a triangular frame to which are attached a level, a graduated arc for taking vertical angles, and a sight tube. The plain sight tube has no lenses, is brass, 18 in. long; in one end is a small eye aperture, in the other the usual cross wires. The telescope has cross lines, is adjustable to distances, and is same size and length as plain sight tube. With long extension legs, the height can be from 2 ft. 6 in. to 4 ft. 6 in. The sight tube, level case, and graduated arcs are nickel plated, the other parts are japanned.

The advantages of this transit are as follows: The head is held to the tripod with a bolt and nut, so as to make it stationary at any given point, the graduated arc can be clamped to the base-plate by throwing a small cam arrangement. All points taken into consideration, this transit is one of the best of the kind in the market. It is adapted to almost all kinds of work, is made of the best of materials, and finished and adjusted by skilled workmen. It is warranted perfect and accurate in every respect.

When packed and ready for shipment it weighs about 16 pounds.

Directions for setting up and using are enclosed with each transit.

[illegible]

This is the only double lip self-centering wood clamping tool that has a smooth, strong edge, and the only one made on the true principle for a wood working tool. It will clear itself of its shavings in any kind of wood and will cut a smooth round hole. It is made from the best of steel, forged, twisted, and tempered. It can be sharpened from the inside with a file.

No. 174.	Tap Wrench.	Sig. long	...	...	1/10
----------	-------------	-----------	-----	-----	------

This little tool is made of steel, nicely finished, and will hold any tool that can be put into it.—taps, reamers, drills, etc. It holds tools of any shape, round, square or oval.

No. 864.—Screw Driver for Eye Glasses ... 1/- each

This screw driver is made with a chuck to hold the blade firmly into a split socket when in use. To carry in the pocket, on key-ring or watch-chain, the blade may be removed by simply loosening the chuck, then reversed and telescoped through the socket inside the handle and held safely by tightening the chuck. Nickel-plated.

No. 556.—Screw Driver for Eye Glasses ... -/7 each

Screw-in eye glasses have a provoking way of getting loose. This little tool is set the thing to have at hand in such cases. It is made in two pieces and screwed together, telescoping the driver blade when not in use. It is nickel plated, neat and safe to carry in the pocket, on key ring or to attach to a watch chain. The illustration shows the exact size of the screw driver.

No. 858.—Screw Driver for Eye Glasses ... -/9 each

This screw driver is so made that the blade and may be reversed and screwed into the stock, thus giving a longer handle. Nickel plated.

No. 555. —Jewellers' Screw Drivers. Set of five 6/-

- They are made and substantially made from steel tubing, knurled and nickel plated. Five constitute a set, with blades varying from 640 inch to 100 in. The blades are held from turning in the handle by a solid lock, and from coming out by a slight turn of a nest chuck. The top is finished with a sweet knob, contoured to fit the finger and hexagonal in shape to prevent rolling off the bench.

## ENGINEERS' TOOLS.

MANUFACTURED BY THE L. S. STARRETT COMPANY.

In ordering do not fail to give the size and number of each tool wanted.

No. 150.—Pocket Screw Driver. With Bradawl and Wrench ... Plain, 1/-; Nickelled, 1/2 each

A compact combination of three tools a man is apt to wish he had with him a dozen times a day. Consists of a neat, finely finished steel handle with a knurled nut which firmly holds a screw driver and bradawl made in one piece, which telescopes into the handle when not in use. The shape of the handle enables it to be used as an emergency wrench—often of the greatest convenience. The tool weighs only two ounces. It is of special value to wheelmen, as it takes the place of a number of tools usually carried with a bicycle.

No. 151.—Pocket Screw Driver. Plain ... This the same as No. 150 above, except that there is a screw driver at both ends of the blade, one larger than the other

No. 552.—Opticians' Screw Holder and Driver—

No. 552A, Complete Screw Driver, with two blades and screw holder ... 2/3

No. 552B, Screw Driver with two blades ... 1/9

This screw driver is designed for those using small screws, especially opticians, watch and clock makers. The body is made of 3-16 inch steel tubing, having a hexagonal handle and a chuck to admit of interchangeable blades. The spring fingers are frictionally held to the screw driver blade and may be slipped off or on. Pressing the bowed part between the thumb and fingers opens the jaws to pick up by the head and hold the smallest screw. Drawing the holder back on the blade and rotating same the blade will enter the slot in screw, which, being held to the screw driver blade, may be placed and screwed home without danger of dropping or losing it. Screws may also be held and inserted in places where it would otherwise be difficult or impossible. When the screw holder is not needed it may be slipped back on the blade, out of the way.

No. 557. Starrett's Patent Magazine Screw Driver. Complete ... 3/6

Extra Blades ... 2/- set

This is the best tool yet offered for a set of pocket screw drivers. It has four blades of different widths, any of which may be taken out of the magazine and inserted in the screw. The blades are held in the magazine by a spring which may be slipped off or on. Pressing the bowed part between the thumb and fingers opens the jaws to pick up by the head and hold the smallest screw. Drawing the holder back on the blade and rotating same the blade will enter the slot in screw, which, being held to the screw driver blade, may be placed and screwed home without danger of dropping or losing it. Screws may also be held and inserted in places where it would otherwise be difficult or impossible. When the screw holder is not needed it may be slipped back on the blade, out of the way.

No. 560.—Electricians' Pocket Screw Driver—

Complete ... 5/-

Extra Blades ... 2/- set

This screw driver is the same as No. 557, except that the handle is covered with hard rubber for insulation from electrical currents, and is nicely ribbed so as to ensure a firm grip when using the tool. It has four blades of different widths, any of which may quickly be taken from the telescope handle and inserted in the end, where it is automatically locked and firmly held for use. Any or all of the blades are carried in the handle, where by a spring pressure they are held from rattling when carried in the pocket, and from being lost when the cap is off. While in use, the handle is insulated from the blade by a rubber cap which may be slipped off or on. Pressing the bowed part between the thumb and fingers opens the jaws to pick up by the head and hold the smallest screw. Drawing the holder back on the blade and rotating same the blade will enter the slot in screw, which, being held to the screw driver blade, may be placed and screwed home without danger of dropping or losing it. Screws may also be held and inserted in places where it would otherwise be difficult or impossible. When the screw holder is not needed it may be slipped back on the blade, out of the way.

No. 71.—Pipe Attachment, 2in. ... 1

Note.—Wrench not included in price

(For Wrench see pages 1071 and 1000)

The 1001, 1002 attachment for monkey wrenches is made of the cylinder of hardened steel, with a pin between the jaw of the wrench and any round iron or pipe, causing the wrench to grip it firmly.

# ANTHONY HORDERN & SONS, LTD. ONLY UNIVERSAL PROVIDERS ENGINEERS' TOOLS.

MANUFACTURED BY THE L. S. STARRETT COMPANY.

These tapes are 1/2 in. wide, in strong and well finished nickel plated steel cases, with flush handle and push button on opposite side, a slight pressure of which will instantly release the handle; are graduated in feet and 1/16ths of a foot, also in inches and 1/16ths of an inch.

## "MILLIONS OF MISCHIEFS"

And any amount of worry may be avoided by attention to the following simple directions:—

Write your Orders legibly, and your name and address in full. Give the Post Town where an answer will reach you. State if parcel and invoice are to be addressed Mr., Mrs., or Miss.

Give the correct route by which the goods are to be sent, and say to whom they are to be consigned if you live far from a Railway Station or Port.

Be careful to give correct sizes, measurements, and quantities of articles required.

In the event of goods going astray in transit, or not arriving at their destination in reasonable time, it would be well for customers, in writing to us, to give date of invoice, to assist in tracing cause of delay.

## ENGINEERS' TOOLS.

In ordering do not fail to give the size and number of each tool wanted.

No. 87.

## No. 87.—Improved Mercury Plumb Bobs—

[illegible]

The three elements consists in: a patented device for fastening the string, with 16 stitches to tie or make simply by drawing it in to tie, a special elastic filament, and the special cup line the required length, when the ball will have perfect fit. These three elements are made from the most selected materials with care. Noteworthy features are their great weight in proportion to size, low cost of 1000 ft., much shorter end, hand and good points, smooth on the body and the simple and effective device at top for fastening end of line after winding up. Nickel-plated. Each is provided with a braided silk line.

No. 194.—Universal Scraper...	...	...	8/6
-------------------------------	-----	-----	-----

The edges of the blade are ground perfectly square. There are therefore eight sharp cutting edges, and any one of them can be used instantly be brought into use. Instead of the handle with the ball point connections, to lock or release the joint, or place the blade at any angle, it is simply necessary to give the handle a slight turn. The wing nut is used when the blade is removed from the handle. The stand may be instantly slipped on or off either side or end of the blade, and enables one to use the tool with a firm grip, bearing on heavily, or lightly as may be desired. It is the mostest, simplest and best all-around Scraper on the market.

# BROWN & SHARPE'S ENGINEERING TOOLS.

**Brown & Sharpe's Inside Micrometer Caliper—**

No. 906—900 to 1 in. In case ... 19/- each  
No. 907—1 to 2 in. ... 22/- each  
Graduated to read in thousandths of an inch.

**Brown & Sharpe's Vernier Calipers**, graduated to read by means of a Vernier, for outside and inside measurement. 19 in. long in polished plush lined case—

To read by thousandths of an inch one side, and 1-50th of a millimeter on other ... 24/-

To read by thousandths of an inch one side and 1-64th of an inch on other—

To read by 1-50th millimeters one side and 1/2 millimeters on the other ... 24/-

**Brown & Sharpe's Vernier Gear Tooth Caliper** £5/12/6

This caliper is for the purpose of accurately measuring the distance from the top to pitch line, and thickness at pitch line of gear teeth. The sliding jaw moves on a bar and is graduated to read by thousandths of an inch. A tongue moving as teeth sizes vary, is graduated in 1/32 inch increments. Will measure 1/2 to 1 1/2 inches in 1/32 inch increments.

For Metric Measure ... £5/12/6

1 inch scale, graduated to read in 1/32 inch of a millimeter.

**Brown & Sharpe's Steel Rules, with Holder** 5 Rules interchangeable in one Holder. Set, complete 6/-

Three rules of 12, 18 and 24 in. on both sides. 1/16 in. on one side, on the other 1/32 in. on both sides. For use in 1/32 in. or 1/64 in. increments where the rule is 1/16 in. or 1/32 in.

Metric, graduated in millimeters and 1/2 millimeters—

Set, complete ... 6/-

**No. 55.—Brown & Sharpe Micrometer Calipers**, range 3 to 6 inch, in thousandths of an inch, with standards, in case ... £2/15/-

19° Screw Thread Tool  
Gauge, Acme Standard  
(No. Tx 591) ... 116

### Setting Gauge

This Gauge is for the purpose of furnishing a correct standard to which tools can be ground to cut threads, of a uniform angle, to take the place of square threads, and to standardize the threads of various angles and depths now in use. This thread has the same depth as the square threads, but is stronger. The sides are at an inclination of 14 1-2°, or 28° included angle, which angle is the same as is now generally adopted in casting worms.

A tool setting gauge is furnished and included in the price of each gauge.

Oil Syringes, straight (No. Tx 624) ... 6/-

No. Tx 624

No. 307

No. 0307

No. 316

No. 0316

**No. 307.** This device will be found very useful in connection with a Bit Brace or Breast Drill in many places where it is not convenient to bring a Ratchet Drill into use. It has an entirely Automatic Feed, the End Thrust has its friction reduced by ball bearings; it has an equipment of three feet No. AA steel chain. The Chuck is suitable for holding square shanks. The whole tool is well made and attractively finished. 7/6

**No. 0307.** This Chain Drill is the same as No. 307, except that it is not automatic. The feed is controlled by turning the knurled end of feed screw. 7 -

**No. 316.** This tool has a 3 Jawed Chuck for holding round shank Drills 0 to 1 inch, this is a valuable addition and one which cannot fail to be appreciated, as it enables the operator to get a degree of accuracy not obtainable where square shanks are used. 11/6  
Automatic Feed similar to the above.

**No. 0316.** This Drill is only hand feed, but fitted with a 3-jaw chuck, capacity 0 to 1 in. 10/6

All Prices in this Catalogue are subject to Market Fluctuations.

HANDY TOOLS FOR LAPIDARIES, &c.

No. Tx 635

Small Polishing Lathe (No. Tx 635).

The 3 Jaw Chuck will take 0 to 3" of an inch. It is furnished as illustrated, the bed is milled, and the spindle is hollow. Bed is 12 inches long, and Swings 5-inches on the Centres. Weight 18lbs. 83/-

No. Tx 636.

No. Tx 636—This head is similar to No. Tx 637, but fitted with a 3 Jaw Chuck. Capacity 0 to 3 in. Weight 24lbs. ... 10/-

No. Tx 637.

No. Tx 763—Has a Solid Iron Frame 6 inches in height; Steel Spindle 1/2 inch in diameter, and 8 inches long. The Boxes are adjustable; Screws and Caps are of brass; and it is finished in japan. The Taper Screws on each end are carefully threaded. The distance between the flanges admit of placing therein a wheel 3/4 inch in thickness. The pulley is grooved for a 1/2-inch round belt, and 1 1/4 inches in diameter,—Weight 2 1/2 lbs. ... 5/-

No. Tx 638.

No. Tx 638.—It is slightly more than 6 inches in height, and is fitted with 1/2-inch spindle, 10 inches in length. The Boxes are adjustable; Screws and Caps are of Brass. The distance between the flanges admit of taking in a wheel 1/2 inch thick. The Taper Threads upon each end are carefully cut. The diameter of the pulley is 2 1/4 inches, and it is grooved to take a 1/2-inch round belt. Weight 5lbs. .... 10/-

LABOR-SAVING APPLIANCES.

No. Tx 627.

**No. 26. - Grinding Head.** This machine is 7 inches high, and is equipped with a spindle 9 inches long, the diameter of the spindle in the bearing is  $\frac{1}{2}$  inch, between flanges, where vice, runs,  $\frac{1}{2}$  inch, it will take wheels  $\frac{1}{2}$  of an inch thick and 8 inches in diameter. We would however recommend wheels 6 inches by  $\frac{1}{2}$  inch for use in connection with it. It is equipped with patent oil caps, the nuts are finished and case hardened, and the whole machine is in every way thoroughly practical for use up to its capacity. We desire to call particular attention to the shape of the base which insures great rigidity. Each machine packed in a box. Weight, 13lbs. Price, Grinding wheel not included (No. Tx 627) ... 24/-

No. 26 1/2.

**No. 26 1/2.**—This machine is identical with No. 26, except that it is supplied with two adjustable detachable work rests. Weight, 15lbs. ... 30/-

**No. 50.**—This machine is similar to No. 26 1/2, but is larger and heavier. It is 8 in. high, spindle 12 in. long, will take wheels up to 8 x 1 in. diameter; flat polley 2 in. diameter x  $\frac{1}{4}$  in. face. Gross weight packed, 28lbs. Net weight, 21lbs. ... 39/-

**No. 43.** This machine is similar to No. 27, but is larger and heavier. Has 3 Jaw Chuck. Capacity, 0 to 3 in. will take wheels up to 8 x 1 in. Gross weight, 26lbs. Net weight, 21lbs. ... 39/-

## PIKE TOOL GRINDERS.

No. Tx 641A.

**Pike Domestic Tool Grinder** (No. Tx 641A) ... 13/-

It is a remarkably nice running machine, especially desirable where there is not a great deal of grinding to be done, and will prove very popular amongst mechanics for grinding all sorts of small tools. It is equipped with a thin & fine, pure Corundum Wheel, and is built very strongly and compactly. Just the one for a mechanic to have along in his tool chest. It will last years with proper care.

No. Tx 641B.

**Pike Household Tool Grinder** (No. Tx 641B) ... 10/-

A wonderfully well built little machine. Similar in construction as the domestic one, but with an improved design, and is especially adapted for grinding all sorts of small tools, where there is not a great deal of grinding to be done, but where there are some small edges to be sharpened. It is equipped with a fine Corundum Wheel, and the range of work that can be performed is truly remarkable.

# PIKE TOOL GRINDERS.

FOR SHARPENING KNIVES, TOOLS, &c.

The Pike line of Tool Grinding Machines is built entirely with the idea of giving full value for every shilling expended, and every effort has been directed towards producing high-grade appliances which would give perfect satisfaction to the user, and not prove a source of trouble and annoyance.

No. Tx 641C

**Pike Whirlwind Tool Grinder (No. Tx 641C) ... 22/-**

This machine is a wonderful combination of high speed and great power. It is geared 30:1 and develops a periphery speed of over 5,000 feet per minute, making it the fastest running hand power grinder ever constructed. All parts are made heavy, strong and accurate to withstand the heavy hard work a machine of this class must perform. It is especially adapted for railway construction work, quarrying, mining, and for contracting and building and kindred trades. Equipped with Universal Tool Rest.

No. Tx 843

**Pyko Peerless Senior No. 9 Tool Grinders—**  
 (No. Tx 843) ... .. 22/6  
 Foot power Attachment, extra... .. 5/6  
 Polishing Outfit, extra ... .. 4/6

The Peerless line of hand tool grinders stands absolutely without an equal on the market to-day. There are no other competing machines which combine in one article so many attractive and useful features. The patented tool rest and chisel guide enables even the most amateur to sharpen chisels, plane irons, shears, twist drills, etc., with but little practice. The extension crank handle makes easy work of the most awkward grinding job. Gears are cut from steel blanks, pinions are case hardened and castings are machine turned. The Senior Model is a powerful compact grinding machine, upon which a wider range of work can be performed than upon any other portable hand power grinder. It is equipped with a fine 4 1/2 in. pure Chromium Wheel manufactured especially for all-round grinding. Shipping weight, 20 lbs.

**Peerless Junior Grinder, same design as Senior, but smaller in size, Grinding Wheel, 5 in. x 1 in. ... 16/6**

No. Tx 841.

**Artisan Grinder, Size of Wheel, 6 1/4 in. x 1 in.; Weight, 13 lbs.; packed, 18 lbs. (No. Tx 841) ... 18/6**

These machines are plain and strongly constructed, built for service and cheapness.

No. Tx 844.

**The Pike Grinder, No. 3, Grinding Wheel, 6 x 1 1/2 in. Weight, gross, 14 1/2 lbs.; net, 10 lbs. (No. Tx 844) 20/-**  
 This machine is chain driven and is a good serviceable machine.

**No. 2 Same design as No. 3, but smaller. Grinding Wheel, 4 x 1 in. Weight, gross, 4 1/2 lbs.; net, 4 1/4 lbs. ... 12/-**

No. Tx 844

No. Tx 645

No. Tx 846

**Barnes' Bench Friction Disc Drill, 8in. Swing (No. Tx 644)** .. .. . £7/2/6

With drive from the gears, and at the centre of an 8 1/2 inch circle. Height, 20 inches; height from base, to spindle, 18 inches; diameter of spindle, 1 1/2 inches; vertical travel, 5 inches; table, 5 x 7 1/2 inches; size of fast and loose pulleys, 4 x 1 1/2 inch; speed, 6 to 1,800 revolutions per minute; weight 85lbs.

**No. 22, Silver's Self-feed Post Drill, with ball bearings and intermediate gear, for belt or hand power, fast and loose pulleys, fly wheel, weight 130lbs. (No. Tx 645)** .. .. . 62/6

**No. 23, Silver's Drill, for belt or hand power, fast or Slow Speed. A perfect drill for light and medium work. No. 23 weight 22lbs.** .. .. . 85/-

The general design of this drill is same as No. 2, on page 1099, with exception of the intermediate gear wheel introduced to change the direction of the drive gear wheel on the slow speed. This allows the crank to turn the right direction (from the operator) on both speeds. The drill is also somewhat heavier, which adapts it for larger work.

**Dimensions.**—Size of spindle, 1 1/2 in.; run of spindle, 4 in.; size of column, 2 in. greatest distance of spindle to table, 16 in.; spindle turns 11 times to 1 turn of crank on fast speed; crank turns 1 1/2 times to 1 turn of spindle on slow speed; drills to extent of 1 1/2 in. circle and up to 1 1/2 in. holes. Spindle bored for 1/2 in. shank drills unless otherwise ordered.

The illustration represents the **Universal Hand Drill Press with Special Drilling Attachment** provided for it. This Drilling Attachment has double gears (large, 5 in.; small, 2 in. in diameter), extension handle, three-jawed chuck, taking straight shank drills from 0 to 1/2 inch. Weight, packed, 17lb. (No. Tx 646) .. .. . 29/-

Our Selling Prices are effected in various ways, and they rise and fall accordingly. They are influenced by the current rate of wages in various parts of the world where manufacturing enterprise is carried out; by alterations in the cost of raw materials; by the operations of Trusts and Combines, and by various other things beyond our control.

Our system of paying Spot Cash for everything enables us to buy in the best markets at the lowest rates and these advantages are passed on to all who honor us with their custom.

# SILVER'S 20-INCH SWING DRILLS.

This machine was designed for use in carriage and waggon shops, machine shops, repair shops and factories of every kind, for light and medium drilling and tapping.

The drill table is easily and quickly raised and lowered on the column by one hand of the operator from his position at the drill either standing or sitting. The table can be swung to the right or left, allowing work to be placed directly on the floor.

When using the wheel-holding attachment for drilling tyres, the base of the drill does not interfere with the wheel extending into the pit.

The bevel gears are accurately cut from solid blanks. The cog rack is forged from steel and the teeth are milled to gauge.

Every part is well made and durable, and the drill is guaranteed to do satisfactory work up to its capacity.

When the tool is wanted only for drilling, the countershaft for 1 is provided with right and left pulleys, 8 in diameter on 2 in face, as shown in the accompanying engraving, and should make 200 revolutions per minute. For tapping and drilling, a friction countershaft is required.

Drive shaft turns 1½ times to 1 turn of spindle.

Height, 63 in.; diameter column, 5½ in.; diameter table, 15½ in.; diameter spindle, 1½ in.; vertical travel, 7½ in. Spindle bored for No. 3 Morse taper. Greatest distance from spindle to table, 28 in.; distance from spindle to floor, 42 in.; diameter large pulley on cone, 7 in.; diameter small pulley on cone, 3 in. Cones cast in 2 in. belt, countershaft pulleys, 2½ in. Weight, 560 lbs.

No. Tx 642.

## Silver's Drill (No. Tx 642)—

With plain lever feed ... .. £14/-

The illustration shows the drill equipped with the plain lever feed. This lever is long and suited for all ordinary work that comes to a drill of this size. The weight at its lower end serves to carry the lever to an upright position, out of the way of the operator, after use. It is disconnected from feed by simply pressing a thumb catch at the hand hold.

No. Tx 643.

## Silver's Drill (No. Tx 643)

With combined lever and screw feed, and round base, same as No. Tx 642 ... .. £16/-

This drill is also manufactured with the combined lever and screw feed, which is so constructed that either the lever or the screw can be used with an effecting the other. The screw feed can be disconnected by means of a small hand wheel.

# ANTHONY HORDERN & SONS, LTD. ONLY UNIVERSAL PROVIDERS

## ENGINEERS' UPRIGHT DRILLS.

Also various things indispensable to those useful trades.

No. Tx 648.

**Barnes' No. 4 Upright Drill, with Combination Lever, Automatic Stop, and grand Self-feed:** weight, 976 lbs. (No. Tx 648) ... 22½ in. swing, £34/-

Very strong and stiff, thoroughly well made, high-grade in every respect. Spindle fitted for No. 3 Morse taper, roller bearing for spindle thrust. Positive Self-feed, with four changes of feed.

Height, 74 in.; diameter of column, 6½ in.; diameter of spindle, 1 11-16 in.; vertical travel, 12 in.; diameter of table, 18 in., from spindle to table, 26 in.; diameter of large pulley in cone, 16 in.; diameter of small pulley in cone, 4 in.; ratio of back gearing, 5½ to 1; floor space required, 52 x 19 in.; belt required, 24 in.; fast and loose pulleys, 10 x 3½ in. Countershaft should make 300 revolutions per minute. Back geared.

Fitted with quick return lever for spindle.

**Barnes' No. 5 Upright Drilling Machine—**  
28 in. swing, £49.10/-

Back geared, automatic stop, automatic grand self-feed, with eight changes of feed combined lever and worm feed. Quick return.

Height, 71 in.; greatest distance from spindle to base, 53 in. minimum, 21 in.; spindle to table, 16 in.; diameter of column, 3 in. diameter of spindle, 1 11-16 in. diameter of table, 23 in. weight, 1490 lbs. fast and loose pulley, 10 in. x 3 in.; floor space, 41 in. x 21 in.; speed countershaft, 175 revolutions.

### PAYMENT FOR GOODS.

Our terms being Spot Cash, sufficient to cover the cost of the goods required, and freight or postage, should be sent with every order.

No. Tx 649.

**Barnes' No. 7 Upright Drill, 15 in. Swing (No. Tx 649) —**  
£13.10/-

With Combination Lever and Wheel Feed. The operator has the choice of either. The change is made by inserting or removing the lever. The bevel gearing is cut from the solid, and is as nearly non-slip as it is possible for metal gearing to be.

Height, 66 inches spindle to base, 47 inches diameter of column, 4½ inches diameter spindle, 1 1-16 inch; travel of spindle, 7 inches hole in spindle. No. 3 Morse taper; diameter of table, 10 x 3 inches; fast and loose pulleys, 6 x 2½ inches; diameter of large pulley, 8 inches; diameter of small pulley, 4 inches (takes 1½ inch belt); occupies floor space, 30 x 31 inches; speed of pulley, 300 revolutions per minute weight, 330 lbs.

# LABOR-SAVING MACHINERY.

No. 647.

**Green River Bolt Cutter, Nut Tapper and Pipe Threader**, showing plain Countershaft, for power or hand use; Capacity,  $\frac{1}{4}$  to 1 $\frac{1}{2}$  in. bolts and nuts, and  $\frac{1}{2}$  to 2 in. pipes; fitted with Standard Whitworth Thread to bolts, and English Threads for the pipe, complete with Countershaft (No. Tx 647) ... .. £45/-

The capacity of this machine is for  $\frac{1}{4}$  to 1 $\frac{1}{2}$  in. bolts and nuts, and  $\frac{1}{2}$  to 2 in. pipe. It does equally well straight or crooked work. Has three changes of speed; takes 3 in. bolt; hollow spindle with hole 1 $\frac{1}{2}$  in. Collets have 2 in. shanks. The vice is made to centre and hold properly the various sizes, and is also a set of regular vices. The machine is suitable to be used by hand or frequently of service on repair work at times when power is not available. It can be thrown out of gear when not in use. Speed of countershaft should be 125 revolutions per minute. Floor space 55 x 22 inches.

Equipped with Oil Tank and Cock for Oiling work. Not with Oil Pump as illustrated.

**Green River Hand Bolt Cutter and Nut Tapper**, fitted with Taps and Dies, Whitworth Standard Thread, 7 sizes  $\frac{1}{4}$  to  $\frac{1}{2}$  in. (for Bench) ... .. £12/7 $\frac{1}{2}$

**Green River Hand Bolt Thread Cutter and Nut Tapper**, for the Bench. Fitted with 9 sizes,  $\frac{1}{4}$ ,  $\frac{1}{2}$ ,  $\frac{3}{4}$ , 1, 1 $\frac{1}{2}$ , 2, 2 $\frac{1}{2}$ , 3, 4 and 1 inch; also Taps, Dies in Collets, Chuck Wrenches, (No. 20, Fig. 754) ... .. £17/10/

Weight packed ready for shipment, 3 cwt.

Extra steel dogs are attached to the vice to secure large smooth pipe which might sometimes slip into the jaws. These are both made to cut exact Whitworth threads.

An excellent *adapter* for *lances* and all repair work. The *adapter* is *threaded* and *then* doing light work, and *are* *running* to *off* *in* *the* *lance* *and* *quick* *and* *it* *is* *to* *work* *on* *straight* *and* *crooked*.

**Green River Bolt Thread Cutter, Nut Tapper, and Pipe Threading Machine**, for Bench. Machine complete with Taps, Dies in Collets for Bolts,  $\frac{1}{4}$ ,  $\frac{1}{2}$ ,  $\frac{3}{4}$ , 1, 1 $\frac{1}{2}$ , 2, 2 $\frac{1}{2}$ , 3, 4, 1 $\frac{1}{2}$ , 1 $\frac{3}{4}$ , 1 $\frac{1}{2}$  and 1 $\frac{3}{4}$  inch also for Pipe with adjustable Dies in Collet (set hand),  $\frac{1}{4}$ ,  $\frac{1}{2}$ , 1, 1 $\frac{1}{2}$ , 1 $\frac{3}{4}$  and 2 inch (No. 10, Fig. 758) ... .. £28/-

Weight packed ready for shipment, 4 cwt. 0 qrs. 2 lbs.

Any crooked or odd shaped pieces can be threaded without straightening. The spindle is hollow, and bolts of any length can be cut. For bolts and nuts are cut in the lathe or on the bench. The larger sizes, the larger the dies, the dies are run sufficiently far on the work, the gears may instantly be thrown out and the Die whirled swiftly back off the thread by means of the balance wheel, making quick return.

For Machine Dies and Taps, see page 1006.

No. 21, Fig. 754.

ANTHONY HORDERN & SONS, LTD., PALACE EMPORIUM, SYDNEY.

## LABOR-SAVING MACHINERY.

No. 1, £50—The Star Power Saw.

Marvel Draw Cut Hack Saw Capacity, 4 x 4 inches. Length of Blade, 12 inches. Revolutions, 60 to 90 per minute. Weight, 110 pounds. £5

Saws fast and straight. Saws Saw Blades, and is exceptionally well made, and includes the following valuable improvements.  
 A Draw Cut. An eccentric, in rear portion of frame, fixed to an arm that presses against the coiled steel spring, through which extends a steel rod, and forms a part of a frame bearing the tension pressing the blade in a material in the direction of the return of push, and the tension of the blade is regulated by hand nut at end of spring.  
 A Quick Action Vice that saves time.  
 A frame that raises or lowers saw and holds it at any desired angle, allowing free use of both hands in measuring material.  
 Saws close to vice.  
 An extension to hold so material rests on both sides of saw.  
 The wear can be taken up to any extent in the two saw bearings, which have also receptacles for oiled waste.  
 The drive shaft has bronze bearings. Starter and Automatic Stop are at Front of Machine.

No. 2, £51.

Marvel Draw Cut Saw No. 2, with Swivel Vice that works both ways. Has adjustable stroke. Longest 64 in., shortest 4 in. Capacity 6 x 6 in. on long stroke, and 8 x 8 in. on short stroke. Take blades from 12 in. to 17 in. Revolutions, 60 to 75 per minute. Weight, 30 lbs. (No. 2, £51) £10/6-

The Star Power Saw (No. 1, £50)

Price includes six Saw Blades

For extra Saw Blades, see page 987.

This Machine is designed for cutting iron and steel. It will cut any size up to 4 inches in diameter, and any shape that can be held in the vice. It also cuts piping very nicely. We do not claim great speed in cutting, but metal can be cut much more rapidly in this Machine than can be done in a Lathe or Planer, or by heating and cutting with a Blacksmith's Hack, and at a trivial cost. By its use a good percentage of metal is saved, as the pieces cut are left smooth, and no labor or metal is lost in squaring up, as in the case after heating and cutting with the Hack.

For cutting up die blocks, and a thousand and one other things, the advantage of using this saw will be manifest.

The Blades used for cutting are Star Hack Saws.

For Brass work or thin tubing blades with 22 points will prove most satisfactory. Ordinary stock has 14 points.

Saws fast and straight. - Saves blades.

Heavy and exceptionally rigid in construction. Pressure on saw blade is actuated by an eccentric in connection with the compression spring, alternately pressing on the Draw Stroke and relieving on the return stroke. The tension on spring is regulated by hand nut on top of spring.

Feed lever at top carries tension thumb screw, and should be left engaged when sawing medium or light material. The same lever raises or lowers saw and holds it in any position, a great convenience in measuring.

The quick action, Heavy Vice Swivels Both Ways so that material can be inserted to cut on an angle either way.

The wear can be taken up to any extent in the two saw bearings which have also receptacles for oiled waste.

The drive shaft has bronze bearings.

Sawer and all main supports a front of machine.

Note: The entire saw can be instantly removed leaving a T-shaped table for turning, regular shapes, and makes an excellent tool for stamping work in all positions.

For Hack Saw Blades see Page 986.

cuts free and true on lightest stock;  $\frac{1}{4}$ ,  $\frac{1}{2}$ ,  $\frac{3}{4}$ , 1 in. round with shear for each size ensuring true round cut; angle iron in two cuts up to  $\frac{1}{2}$  x 3 x  $\frac{1}{2}$  in. It Punches  $\frac{1}{2}$  in. hole in  $\frac{1}{2}$  in. stock;  $\frac{1}{2}$  in. hole in  $\frac{1}{2}$  in. stock. Throat, 3 in. Flat shear blades, 8 in. long. Complete with 2 Steel Levers, 3 Punches, 3 Dies and Gauge for flat and round shearing. Weight, 156 lbs. (No. Tx 686) ... .. £11/-

Equipped with double or compound eccentrics, one through the other, and one attached to each lever socket. The double lever is short for light, quick work, and has a pin that locks both sockets, and at the same time the two eccentrics together, thus working as a single eccentric. When thus locked the outside or long lever may also be inserted if more leverage is desired. For heavy work the small lever is turned half round in the socket, which unlocks sockets and eccentrics, and immediately by bringing forward long lever the power is tremendously increased, and in this manner the operator can take a long or short swing with the long lever, with a pumping motion if desired, the short lever being brought forward each time the long lever is raised, which gives the long lever a new bite in the cut or punch without moving the work. This feature is indeed a marvel.

No. Tx 687.

Marvel Rod Cutter, with lever, gauge and gauge-rod. Cuts rods  $\frac{1}{4}$ ,  $\frac{1}{2}$ ,  $\frac{3}{4}$ , 1 in. and intermediate sizes. Weight, 98 lbs. (No. Tx 687) ... .. £25/5-

Marvel Rod Cutter (as No. Tx 687), to cut  $\frac{1}{4}$ ,  $\frac{1}{2}$ ,  $\frac{3}{4}$ , 1 in. Weight, 12 lbs. ... .. 32/6

The cutting dies have round openings of correct size to cut off rods and were within the capacity of the machine. This rod cutter is so arranged as to bring the lever at a convenient height from the bench so as to remove all danger to the operator's hands. The gauge is very handy when cutting a number of pieces of the same length.

ANTHONY HORDERN & SONS, LTD., ONLY UNIVERSAL PROVIDERS

## CIRCULAR SAW MACHINES.

No. 75, 499

**Barnes' Improved Combined Machine;** the table of this machine is 28 x 30 in., boxed for shipment, weighs 350 lbs. (No. Tx 696)—

With Circular Saws only	...	...	.. £95/-
Complete with Circular Saws, Boring and Jig Saw			
Saw attachments	...	...	£18/-

This machine combines a Circular and Scroll Saw, the Circular Saw being the machine proper, with the Scroll Saw as an attachment. We are therefore prepared to furnish the machine with or without the Scroll Saw, as may be preferred. This combination is absolutely perfect, as neither the Circular nor the Scroll Saw interferes in the slightest degree with the successful operation of the other, and thus practically combining two machines in one, we are able to make the price considerably lower than would be possible were they distinct and separate machines.

The capacity of the Sewall Saw is the same as that of No. 4 Saw, the warranty is what it must be, and it applies equally to this. For light general cutting, no length, cut-off work, etc., the Circular Saw of the Combs and Machine is invaluable. In short for general use, no more profitable investment can be made by any carpenter or cabinet-maker, or almost any wood-worker, than this Combined Machine with its different combinations and attachments.

The Circular Saw, while remaining on its mandrel, can be taken at once out of the way when the Scroll Saw is to be used. The machine is set in its bearings in such a manner as to enable the operator to take the whole (mandrel and saw) from the machine in an instant.

All varieties of joint-work can be done truly and rapidly. The table can be handily adjusted up or down by a cam, to allow any desired depth of cut being made by the saws or cutter tools. The Circular Saws are 6 1/2 inches in diameter, and reach 1 1/2 inches above the table. A seven or eight inch saw can be used if desired.

Emery wheels in size up to 1 inch face by six inches in diameter, can be used to good advantage on this machine.

No. 7.

**No. 7—Scroll Saw. Weight, 60lbs. Boxed for shipment, 95lbs. Including one dozen blades with each machine ... 24/3/6**

This machine is designed for practical service in the workshops of carpenters and builders, cabinet makers and other wood workers. Warranted to be well made, of good material and workmanship, and with reasonable practice to saw at the following rates: Pine, 2in thick 1 foot per minute; 1in. thick, 2 feet per minute; Walnut, 3in. thick, 4 feet per minute; 1in. thick, 2 feet per minute, and other woods and thicknesses at proportionate rates. The ordinary rate of speed when sawing is from 800 to 1200 strokes per minute. The saw leaves the wood as smooth as it is possible for any saw to do, and can be taken out and replaced in an instant for inside work. The swing around the blade under the arm is 24in.; length of blade, 7in. Table and arms are made of hard maple, frame of cast iron, strong yet light; balance wheel runs on a steel arbor.

No. 2.

**No. 2—Velocipede Scroll Saw. with boring attachment. Weight, 90lbs. Boxed for shipment, 130lbs. Including one dozen blades with each machine.**

With Boring Attachment ... 25/7/6  
Without Boring Attachment ... 24/15/-

**Extra Blades for Scroll Saws No. 2 and No. 7—**  
—/3 each; 2/6 doz.

This machine has about the same capacity as Scroll Saw No. 7, the warranty as to what the machine will do applying equally to it, but this is preferred by many on account of the velocipede foot power, and because of its having a boring attachment to open for inside work. The swing around the blade under the arm is 24in.; length of blade, 7in. Table and arms are of hard maple; frame of cast iron; balance and drive wheels run on steel arbors.

# CIRCULAR SAWS AND SAW BENCH.

Fig. 1.

No. 4—Circular Saw, complete with self feed, with two 10in. circular saws, one each rip and cut-off Boring Attachment, £24/12/6 extra; Universal Mitre Gauge, £2/12/6 extra.

£18/-

Fig. 2

This machine is very strong and rigid, and the workmanship throughout first-class. The table is of iron, planed perfectly true, Size of table 30 x 30 inches. Weight of machine, 400lbs. crated for shipment, approximately 500lbs.

Figure No. 1 shows the machine arranged for ripping, with the self-feed mechanism in position.

Figure No. 2 shows the machine with the self-feed arrangement and rip gauge thrown back, with the table clear for cut-off work.

The use of the patent perforated belt running over a spur or pin pulley is an important factor in giving the machine powers of superiority over any other foot or hand power saw made. It enables us to use a short belt from the drive wheel to the saw mandrel, securing great speed without loss of power, as the spur or pin pulley prevents absolute any slipping of the belt. The motion is always stout and strong and positive, and the machine runs at high speed with far less noise than any machine in which the power is transmitted by gearing. The machine can be supplied with the special universal gauge which adapts it particularly for the use of picture frame makers and any other work where a perfectly accurate joint is required. Weight of machine, 400lbs.; crated for shipment, approximately 500lbs.

No. Tx 708

## Improved Farmer's Saw Bench (No. Tx 708)—

No. 1, size, 45 x 29in., fitted with fast and loose pulleys, 6 x 34in. sliding fence and 24in. saw—  
£19/10/-

No. 2, size, 52 x 24in., fitted with fast and loose pulleys, 10 x 4in. sliding fence and 30in. saw—  
£15/-

No. 3, size, 56 x 24in., fitted with fast and loose pulleys, 10 x 4in. sliding fence and 36in. saw—  
£17/-

This Bench as illustrated, is well made. The table is accurately planed and mounted on legs which are strongly braced together with steel straps, it is also fitted with a removable centre so that the Saw can be taken off quite easily. The spindle is of steel, and works in long gun-metal bearings. The sliding fence is of steel, and works in long gun-metal bearings. The sliding fence is adjustable for sawing timber of any required thickness, or any bevel, and can be turned back when required for cross cutting.

# ANTHONY HORDERN & SONS, LTD., PALACE EMPORIUM, SYDNEY.

## PORTABLE WOOD WORKER, HAND MORTISING MACHINES, ETC.

The "Grimm" Portable Wood Worker or General Joiner (No. Tx 704A) ... £295/-

NOTE MACHINES IN ONE, viz—Saw, Rip Saw, Sn. Circular Saw, 6in. Dado Head, 3 Boring Machine Bits, 4in. Joiner, 3in. Sander, 8 pairs Moulder Knives, 3 1/2in. Saw Blades, and 1 square faced and round faced Emery Wheel.

This machine is fitted with the latest style of 3 cycle water cooled engine. The table top is 35in. x 35in. standing 32in. high. The mandrel, to which all the attachments secure at one end or the other, is of fine machinery steel, running in a cast iron yoke, with long ball-bearing bearings which will wear indefinitely. The mandrel speed is from 1,500 to 3,000 revolutions. All adjustments are made by interchangeable hand wheels. The rip saw will cut up to 2in. at a single cut, 4in. timber can be cut by turning the material and re-sawing. Its general capacity is 1in. timber, 75 to 125 ft. per minute: 2in. timber 55 to 100 ft. per minute. The Dado Head is adjustable in width from 1/8in. of an inch to 1 1/2in. The depth of cut can be regulated by raising or lowering the table top, will cut with or across the grain. The Joiner has an adjustable gauge which makes it possible to cut at any angle up to 45 degrees. The Boring Apparatus is made up of a solid iron carriage carrying a vertically adjustable table which supports the material to be bored. The bits are 1/2 and 1in. The sand disc screws on to the right end of mandrel. The 3 emery wheels are for sharpening the tools and cutters, and are fixed in the same way as the sander.

The other numbers can be imported to order.

The illustration represents a machine for moulding edges on brackets, small work, panel-work, regular and irregular mouldings of all styles up to 2 in. The speed of the knives is from 2000 to 2500 per minute. By the aid of the Patent Velocipede Foot Power the knives are, at the will of the operator, caused to rotate in either direction, thus the grain of the wood may require, thus saving all complicated devices for reversing motion usually employed on single Spindle Formers. The great speed of the knives ensures rapid and smooth work. Articles that look very plain can be made elegant and costly in appearance by the rapid and perfect work of this machine. It supplies a want long felt by every mechanic. The spindle and its bearings are of steel, with adjustments to take up the wear. The parts to suit the machine for the use of different knives and work are convenient, and all substantial and durable. The table can be lowered to give 2 in. between it and the lower cutting edge of the knife.

No. Tx 705

### Barnes' Foot-power Mortising Machine (No. Tx 705)—

Provided with 10 Self-cleaning Chisels.  $\frac{3}{8}$ ,  $\frac{1}{2}$ ,  $\frac{5}{8}$ ,  $\frac{3}{4}$ ,  $\frac{7}{8}$ ,  $\frac{1}{2}$ ,  $\frac{3}{4}$ ,  $\frac{5}{8}$ ,  $\frac{3}{4}$ , and 1 inch ... £27/15/

This machine is strong, simple, and reliable, and cuts and squares but is not a ram. With the exception of the table the machine is made entirely of steel and is a masterpiece of construction makes it almost impossible to get out of order. The table can be set at any desired angle. Weight, 155 lbs. packed, 170 lbs.

Green River Tire Shrinker, No. 1 or No. 14.

## Green River Tire Shrinkers—

No. 1, for smallest tires and up to 3in. x 4in.  
weight 180lb. ... .. 80

No. 14, for tires up to 4in. x 1in., weight 250lb. 92/6

These machines save all cutting and welding of tires. They can be managed by one man with ease, and work well on all tires within their capacity. The Nos. 1 and 14 occupy a space of 2ft. square on the floor. See illustration. The handle can be removed when not in use.

Green River Upright Tire Shrinker, No. 6 or No. 2.

## Green River Tire Shrinkers, Improved—

No. 0, with straight handle, for any tires up to 2in. x 4in., weight 100lb. ... .. 80/-

No. 2, for tires up to 4in. x 1in., weight 250lb. ... 85/-

The Grasping Claws standing open to receive the work are constantly adjusted to the tire, and are easily withdrawn after the operation.

No. 2.

No. 1.

No. 0.

## Green River Patent Taper Mandrels, made in one piece—

No. 0, Base, 8in. diameter; Point, 1 1/2in.; Height, 36in., No. 0 has ears for fastening to the bench 24/-

No. 1, Base, 10in.; Point, 2in.; Height, 47in. 37/6

No. 2, Base, 14in.; Point, 2 1/2in.; Height, 58in. 75/-

The groove, as shown in illustration, gives room for grasping the work with the tongs. When a ring with an eye-bolt is being made, the eye and bolt lie in the groove while the ring is being rounded up.

No. Tx 825

## Green River Tire Measuring Wheel, graduated—

(No. Tx 825) ... .. 7/3

The Graduated Tire Wheel, a drop forging, is on side so sharp the flanges and lines are raised above the surface of the wheel and cannot be filled or defaced with rust or dirt. It is a perfect running wheel, turned carefully to a circle, exactly 34in. in circumference and not lately graduated. The index hand saves trouble of marking with chalk, and the whole, made of metal, is light accurate and long and strong.

FLUXITE.

For Tin Soldering, in tins ... -/7, 1/2, 2, 4

The most effective Flux known.

It solders All Metals except Aluminium.

Dirty, greasy, and even Painted Metals (except Iron),  
can be soldered without cleaning.

It does not corrode, and is as safe as Resin for  
Electrical work.

It is a paste which cannot be apt, and will adhere to  
the surface to be soldered.

It affords true economy, being cheap to buy, economi-  
cal in use, and effecting a big saving in time and in solder.

No. 100, Wiard's Patented Steel Beam Plough, 2 horse ... .. 75/-  
Extra Shares, 1/9 each.

Ploughs 6 to 9in. deep, 10 to 14in. wide. Fitted with ordinary Colonial Coulter Weight 106lb. Fitted with Iron handles.

This Plough is one of the easiest of draught of the whole Wiard series.

ANTHONY HORDERN & SONS, LTD., PALACE EMPORIUM, SYDNEY.

## WIARD ONE-HORSE GARDEN PLOUGH.

RIGHT HAND. WOOD BEAM.

No. 62.

No. 62 . . . . . as illustrated, with wheel, 23/6  
 No. 73, Small Two-Horse, steel beams, 4 to 6in. deep, 7 to 11in. wide; weight, 85lb. . . . . 57 6

Similar to Nos. 74 and 75. but with Straight Steel Beam

The smallest Wiard Plough made. It has an adjustable beam, allowing the horse to walk in the furrow or on the land. It turns a furrow three to five inches deep and six to eight inches wide, and weighs forty pounds.

This series has wood beam, chilled or soft centre steel mould board, Scotch clevis. Wheel adjusts to either side of beam, and can be set to run under beam if desired. These ploughs have proven one of our most popular series, and for simplicity of construction, ease in handling, light draught and great strength, it has no equal.

## WIARD ONE-HORSE STEEL BEAM PLOUGH.

RIGHT HAND.

These one-horse ploughs, with forged steel beams, are furnished with chilled iron or soft centre steel mouldboards, and can be rigged with wheel and jointer or coulter when wanted. The beam is set for the horse to walk in the furrow; the handles shift from left to right, allowing the plough to run close to trees, vines, &c. They are strong, simple in adjustment, and cheaper than any other plough with such advantages. All the parts of these two ploughs are interchangeable.

No. 74.

No. 74, One-Horse, 4 to 7in. deep, 6 to 11in. wide; weight with clevis, 84lb. (No. 74) . . . . . 50/-  
 No. 75, One-Horse, 4 to 7in. deep, 6 to 10in. wide; weight with clevis, 80lb. . . . . 50/-

Can be had with iron handles if required.

Extra Shares . . . . . No. 62, -9; No. 73, 1/3; Nos. 74, 75, 1/2 each

## WIARD SUB-SOIL PLOUGH.

No. Tx 1054.

A strong and serviceable sub-soil plough, intended to follow in the furrow of the turning plough, and to loosen the soil in the bottom of the furrow from three to six inches deep.

This plough is being used by some of our best practical farmers, and is especially adapted for use in the culture of the sugar beet and similar crops, where deep cultivation gives the best results. For ditching purposes it has no equal.

Weight, 106lb. (No. Tx 1054) ... .. 50/-

## WIARD PATENT STEEL BEAM SWIVEL PLOUGHS.

WITH STRAIGHT COULTER.

No. 120.

These are the first practical Steel-beam Side-hill Ploughs ever produced. The beams are of the highest grade forged steel, and are stronger than any other beam made. They are so adjusted that the plough works perfectly when reversed either way, and all the parts are attached in the simplest but strongest manner. The Coulter is the ordinary Colonial pattern, not as shewn.

No. 120, Steel Beam, 5 to 8 in. deep, 8 to 12 in. wide; weight with clevis, 118lb. ... .. 78/6

21 Wiard One-horse Hillside Plough, with Wood Beam, Ploughs 4 to 7 in. deep, 6 to 10 in. wide.  
Weight, 78 lbs. ... .. 42/6

# WIARD'S PLOUGHS.

Moulding or Hilling Plough (No. Tx 1056) ... 45/-

This illustrates the Middlebreaker Wood Beam Plough, made with chilled mouldboard and cast point, 8in. cut. The capacity of the double mould is 16in. spread. This plough is especially adapted for cultivating crops where it is desired to throw the bed into ridges, and is used in the cultivation of potatoes and for corn ploughing; also for ditching purposes. Is a great labor-saver, and gives entire satisfaction wherever used.

No. 65.

Wiard Road or Contractors' Ploughs, medium, weight 200lbs. (No. 65) ... £5/10/-

The above illustrates the No. 65 Plough, which is very substantial and is heavy enough for ordinary road or contractors' work when used with two or four horses. Extra Steel Shares, Wrought ... 20/-

The No. 66 Plough, extra heavy, weight 250lbs. ... £6/1/-

Extra Wrought Steel Shares ... 20/-

The No. 66 Plough is built with extra heavy construction and reinforcements throughout, and is intended for heavy contractors' work where great strength is necessary, and four or more horses are used. The Points and Mouldboards are especially designed for digging and loosening the hardest clay, gravel, and rocky ground. The Beams are made of charcoal iron, extra heavy. The Handles are made wholly of steel, well braced. The Shares on these Ploughs being subject to more wear and tear than any other part of the Plough. A Forged Crucible Steel Point. This point is made very heavy, and is strong and durable, and can be forged or drawn by any blacksmith.

We can recommend these Ploughs for heavy excavating and all kinds of contractors work. "Good Roads" work, to builders and users of road machines, and in all cases where great strength and capacity are required.

No. Tx 1066.

"New Model" One Horse Plough, wood handles, low set, like the famous Scotch ploughs (No. Tx 1056) ... 50/-

Extra Shares ... 16

**ANTHONY HORDERN & SONS, LTD. ONLY UNIVERSAL PROVIDERS**

## CANTON No. 4 DISC PLOUGH.

We are now stocking disc ploughs, which are made exclusively for certain selections, but for general use everywhere, in hard, soft, dry, wet, old or new soil, No. 4 is better adapted than any other make or style.

The discs are 26 inches in diameter, and the single disc will turn furrows from 3 to 12 inches, and the gang ploughs have adjustments of equal dimensions between each disc. The discs are all ball bearing, have dust-proof boxes, and are set at the proper angle to revolve freely when in contact with the soil. The soil is turned completely over and is thoroughly pulverized, can be adjusted to cut 10 or 12 inches.

We know that the problem of disc ploughs is a hard one, as evidenced by the general desire to supply ploughs of this class, many of which, have proven costly experiments. The CANTON DISC PLOUGH has been universally successful.

No. Tx 1057.

2 Furrow Disc Plough, weight 780lbs. (No. Tx 1057) ... .. £16/5/-

Our Own Make.

Covers 4ft. wide by 3ft. 6in., with attachment for whippetree, weight 70 lbs. (No. Tx 1061).

It is made to fill a long-felt want among small holders and orchardists.

Complete ... 32/6  
Extra Teeth - 1/8 each

Harrows, in pairs, with long bar 65/- pair

These are similar to Tx 1061, but are only 4 bar instead of 5 as shown, consequently are only 6ft wide.

No. Tx 1061

No. Tx 1062

### CANTON GUARD LEVER HARROWS.

(No. Tx 1062).

Similar in construction to the ordinary U-Bar Lever Harrow with the addition of the Guards that protect the ends of the tooth bars.

This Harrow is superior to all others for use in orchards, vineyards, or trashy ground. The ends of the tooth bars being protected prevents injury from colliding with trees or shrubs, and avoids the accumulation of trash that would foul the ordinary harrow.

By throwing the levers forward the teeth are thrown back for transporting, or to clear the Harrow of trash. Made in 2 sections of 25 or 30 teeth to the section. The teeth are 8 inches long by  $\frac{1}{2}$  inch square.

2 Sections of 25 teeth each with bars as shown, weight 203 lb., width 8 ft.	...	...	complete, 75/-

## The "Star" Disc Harrow.

**THE STAR DISC HARROW** contains all the features of any importance in a disc harrow, and includes besides many advantages and conveniences for the cheap and successful use of such an implement, among which we mention the following:—

**Frames & Braces.** The strong channel-steel frame and braces that hold both ends of each gang down to their work, and at the same time, give the desired flexibility.

**Seat.** A seat so arranged that it can be adjusted for a light or heavy driver, and all excess of weight taken off the horses' necks.

**Pole.** Now dispensed with, a two wheeled fore truck taking its place, doing away with all friction on the horses, and enabling operator to turn his team in their own length.

**Rollers.** Anti friction rollers over the draw irons, by which the gangs can be placed at any angle without strain or friction, and with least power. Also fitted with 2 and 3-Horse Swingle Trees, i.e., 2 for 5ft.; 3 for 6ft.

**Bearings.** Most durable bearings, with oil-holes protected from dust with spring steel covers.

**Complete Machine.** The whole excellently finished, and made with every modern improvement and convenience, and to be operated with greatest ease for man and team.

## The "Keystone" Dehorners.

It is different from any other Dehorners, both in its plan of construction and operation, and in the materials, used in its manufacture, and yet it is a very simple instrument.

The clipper proper is formed by two V shaped knives, when, in the process of dehorning, come together, giving four cutting blades.

When the handles are pressed together, the knives cut into the horn at four places. It cannot be put better than to say that the action is like that of two pair of shears working in opposite directions.

The leverage is such that one man can bring-to bear the strength of forty-eight men in the knives in the act of cutting.

The total length of the dehorners is 3ft. 8in. The blades open 5in.

When the dehorners is closed to carry, the length is 3ft., and the weight is 218lbs (No. Tx 1066) ... .. 36

## THE MATTHEWS NEW UNIVERSAL CULTIVATING AND SEEDING IMPLEMENTS.

Remarkable for simplicity of adjustment and durability.

**The Matthews New Universal High Arch Expansion Wheel Hoe, Cultivator, Rake and Plough.** A double or single wheel implement at will (No. Tx 1067) ... 36/-

The wheels are 12in. in diameter, and the arch high enough to cultivate over plants 20in. or more in height.

The adjustable arch is made of best spring steel, and affords means of regulating depth, and for setting pitch of teeth, a very valuable feature in using the hoe blades.

The cultivating attachments included in the price are as follows: - One pair each Long Bladed Hoes, Short Bladed Hoes, Narrow Cultivators, Wide Cultivators, Ploughs, Rakes, Vine Guards, one Centre Tooth Holder, and one Centre Cultivator.

No. Tx 1068.

**The Matthews New Universal Hand Wheel Plough**  
(No. Tx 1068) ... 11/-

Weight, 14lbs.; packed, 19lbs.

A labor saving implement that commends itself to all gardeners. Can be used to prepare the ground, to furrow out, to cover, and to cultivate.

No. Tx 1069.

**The Matthews New Universal Steel Frame Garden Plough and Attachments (No. 1069)** ... 17/6

A very acceptable implement Weight, 29lbs. ; packed, 37lbs. The wheel is adjustable and is 15 1/2 in. in diameter. This is now fitted with a back balance wheel.

## "FERRIS" POST HOLE DIGGER.

(Patented).

Simpler, stronger, and quicker than any other digging tools.

For pastoralists, farmers, contractors, railway and telegraph companies, and others who have holes to dig. Orchardists and nurserymen, &c., for tree planting—they are great labor savers.

With it one man can do four times the amount of work that can be done by any other means.

The blade and point are of malleable steel, the upright bar is of wrought iron pipe, the handle wood.

Cuts a clean hole just large enough for the ordinary posts, not so much ramming.

It leaves the hole level on the bottom, and brings up every bit of core.

Will stand plenty of rough usage.

By extending the pipe a man can bore for water through wet or dry sand and clay.

Its simplicity ensures durability. There are no parts to get out of order, or need removal.

The edge can be sharpened or set by anyone.

One man can work any of the sizes in wet or dry ground.

From blade to handle is 3ft. 4in., a convenient height for ordinary purposes, but if deeper holes are required, the handle has merely to be unscrewed and extended lengths attached. Any lengths can be supplied at nominal cost.

Gives unqualified satisfaction.

## "MILLIONS OF MISCHIEFS"

And any amount of worry, may be avoided by attention to the following simple directions:—

Write your Orders legibly, and your name and address in full. Give the Post Town where our answer will reach you. State if goods and invoice are to be addressed Mr., Mrs., or Miss.

Give the correct route by which the goods are to be sent, and say to whom they are to be consigned if you live far from a Railway Station or Port.

Be careful to give correct sizes, measurements, and quantities of articles required.

In the event of goods going astray in transit, or not arriving at their destination in reasonable time, it would be well for customers, in writing to us, to give date of invoice, to assist in tracing cause of delay.

## FOR FARM AND STATION.

No. Tx 1050.

The Ohio Lever Chaff Cutter (No. Tx 1050) 20/

The Cutter is 11 ft. long, of tapered, sickle shape. Will cut hay, straw, corn stalks, and all sorts of rough feed. Particularly useful on small poultry farms for cutting green food for poultry. Weight, 33 lbs.

No. Tx 1051.

Pony Hand Feed Cutter, 1 knife, 11 ft. long (No. Tx 1051) ... .. 62/

This machine will cut hay, corn stalks, and all kinds of rough feed. One man can cut one bushel of hay in 30 seconds. Cuts from 1/2 to 2 in. Weight, 185 lbs.

"Ohio" Standard Feed Cutter (No. 9) £9/10/-

No. 9 is the smallest size "Ohio" Standard Feed Cutter, and the general features of the construction may be readily seen from the illustration, which is correct in detail. Although more especially a hand machine, it is supplied with pulley, and makes a satisfactory light-power machine, but it is too small to cut ensilage advantageously, and on this account cutters for this use are never furnished.

The construction is identical in principle with that in other "Ohio" machines, but, of course, is lighter than the larger ones.

The safety fly-wheel, adjustable home-made knives, hard cutter bar, patented gears and regular "Ohio" finish, are on the No. 9, making it a durable, light-running, practical machine.

Henceforth, shredding has been synonymous with high speed, great power and comparatively small capacity. Our new shredder blade successfully reduces the fodder to the proper condition with but slight additional power, the speed necessary to make it work perfectly and at same capacity as "Ohio" Cutters being 60 to 750 revolutions. Interchangeable with knives on sizes from No 9 up. Nothing extra but the shredder blades. Does not pulverise the leaves like saw-blade or tooth shredders, but splits and tears the stalks perfectly.

The capacity of the No. 9, operated by hand, is 60 to 70 bushels of hay, straw, corn stalks, and rough feed of every kind, and 1,500 to 2,000 lbs. per hour when driven by power, one horse actual power being sufficient. Four lengths of cut, two or four knives. Weight, 200 lbs.

A pulley 12 inches in diameter by 4 inches face is regularly furnished.

Speed 400 to 600 revolutions per minute.

9-inch Shredder Blades ... .. 8/-

We carry a large stock of Extras for Ensilage Cutters.

Anthony Horderns' Famous Low Prices, are for both town and country. To country customers ordering through the post the same prices are charged as to people buying over the counter, and the same goods are sent, for if it be true that the country helps the town, it is also true that Anthony Horderns' Famous Low Prices help the country.

"OHIO" MONARCH SELF-FEED ENSILAGE CUTTER, WITH BLOWER ELEVATOR.

This illustration of the No. 12 shows the Blower side of all Monarch machines with fan case removed to give detail illustration of fan wheel paddles, and manner of attaching same to fan wheel. Note the solidity of wheel and blades or paddles which are of best steel. Note also the enlarged & very smooth far reaching feed, which is a recent improvement on all Monarch machines. The picture also indicates the handsome varnished and decorative effect of "Ohio" machines.

GENERAL DESCRIPTION OF "OHIO" MONARCH MACHINES Nos. 12 and 14

We do not "claim" the machines to be the best—any one can do that and nearly every one does. But we can "prove" it. We simply state plainly just what the machines will do—and then we urge you to compare with other makes and prove it to yourself. But be careful to consider all the data. For instance, if you find another machine that requires the same horse power as an "Ohio," just note the great difference in capacity. Or, find a machine of the same capacity and you will find also that it requires several more horse power to run. Or, where the price is the same, carefully compare the construction, capacity in same length of cut, easy feeding and light running qualities.

We invite comparison for the more you know of other machines, the better we are pleased. An intelligent comparison can result only one way.

The reason is that we "keep moving"—we are constantly on the lookout for the slightest improvement. Every year has seen some change for the better. This year is no exception. Changes making for greater simplicity, and for easier and stronger feeding have been made. All of the gears have been placed in a small cluster on one side of the machine and carefully covered with guards. A rough enclosed disc lower roller has taken the place of the former smooth roller, and this not only secures a building grip on the feed, but makes it absolutely impossible for any leaves to get down between the lower roller and the cutter bar.

"Ohio" Monarch Self-Feed Ensilage Cutter, No. 14 with Blower Elevator, fitted on New Steel Truck

Capacity, 12 to 15 tons per hour; steam power required, 8 to 10 horse, B.H.P.; speed, 650 to 700 revolutions per minute; pulley, 12 x 8 in., leather covered, with four 14 in. knives, cuts  $\frac{3}{4}$ ,  $\frac{1}{2}$ , and 1 inch; weight, with truck, 2,100 lbs.

£48/10/-

Above prices are for machines complete with Blower, covered Pulley and Distributor, but no Pipe

10 in. Galvanized Pipe, in 6 ft. lengths. Weight, 4 lbs. to foot ... 3/3 per foot

Cutting Knives ... 11/- each

Shredder Blades, 14/- "

Size of Spindle, 1 1/2 in.

The above illustrates the No. 14 "Ohio" Ensilage Cutter and Blower, mounted on new steel truck, which is fully described below.

A good view of the travelling feed table and turning index is also obtained above.

The "Ohio" Monarch line of Ensilage Cutters and Blowers includes Nos. 12 and 14. They are the same in construction and design, and are fitted with travelling self-feed table and Blower Elevator. The cutter of the great blower is that it will do the work of two machines feeding, so that the famous "Ohio" capacity is not diminished in the slightest.

Our No. 12 Machine has since its introduction last year, had a very large demand, involving, as it does moderate capacity and medium power requirements.

By comparing the capacities of the different styles and sizes we believe it will be an easy matter to select proper size, but if in doubt about any point, we will gladly give you the benefit of our long experience in these matters.

The characteristic feature of the "Ohio" Monarch is its ability to produce—its immense capacity using so little power. This is due to its construction. Not only is the power applied primarily to the main shaft, but all the heavy work—cutting and elevating—is done directly from it—so that not an ounce of power is wasted through shaft belts, transmission gear, etc. Moreover, the liability of breakage and wear is reduced to a minimum. The strain of the drive pulley is perfectly counterbalanced by the heavy fan wheel on the opposite side of the machine.

"OHIO"

# STANDARD FEED AND ENSILAGE CUTTER.

Equipped with Blower Elevator.

"Ohio" Standard Feed and Ensilage Cutter, with Blower (Fig. 801)—

Fig. 801 No. 11.

No. 11, with two 11in. knives, cuts  $\frac{3}{4}$ ,  $\frac{1}{2}$  and 1-inch ... .. £21 -/-  
The same Machine, fitted with self-feeding Table ... .. £26 -/-

Above prices are for Machines complete with Blower and Hood, but no pipe.

7in. Galvanized Pipe, in 6ft. lengths ... .. 1/7 per foot  
Shredder Blades, interchangeable with knives ... .. 11/8 each

The Machine is sent out fitted with four knives, but can be worked with two. Size of Spindle, 1 1/2in.

This illustration shows the No. 11 Feed and Ensilage Cutter, equipped with Blower Elevator. This addition has been made in order to meet a growing demand for a Blower Cutter to be operated with light power—4 to 8 horse.

This cutter has long been our most popular size for general farm use. It is adapted to cutting all kinds of dry feed as well as ensilage, is strongly and durably built, has large capacity and requires but slight power to run.

The fan wheel is heavy, and carries three blades or paddles. The paddles are securely riveted to an L-shaped steel flange and are fitted over the outer edge of the fan wheel and down both sides in grooves provided, where they are securely bolted. This method makes it quite impossible for the blade to work loose in any direction whatever. The fan case is made of heavy steel and is closely riveted. It is of ample size to take care of the cut material up to full capacity of the machine. The general construction is identical with that of the Blower so successfully used for the past four years in connection with the Hordern machines. "Ohio" Blowers have demonstrated their ability to elevate more ensilage per horse power than any other Blower. The reason is plain. The construction requires no power transmission mechanism, for the same shaft that receives the power from the engine carries the cutting knives and the blower fan. There is thus no possible loophole for lost power—the positive motion using every ounce.

An auger conveys the cut material into the Blower.

The frame throughout is of the best hardwood, rigidly put together. It is nicely striped and finished in the natural color—the iron work is mangan, and the whole machine is splanished, giving a very attractive appearance. The knives are made of a high carbon steel, are carefully tempered and very durable. They are securely bolted to solid knife heads and are readily adjustable. The knife shaft is of steel, 1 1/2in. in diameter. The shaft bearings are long and well habilitated. The feeding mechanism is excellent. As the upper feed roller raises to allow the feed to pass through the cog wheels remain in proper mesh without binding, making an easy-running, durable device. The throw-out or feed lever is also very simple and easy of operation. Its use enables the operator to stop the feed instantly in case of accident or otherwise.

The pipe is 7 in. in diameter, and is made of galvanized steel with stand-off seam on the outside, running lengthwise being very rigid. It is made in 8ft. lengths, with 7in. slip joints. The pipe connection at the fan case is a swivel joint, which gives the pipe the proper angle for convenience and best results, and allows it to turn in any direction. Included with each machine is a hood or elbow which is to connect to upper end of pipe and convey the cut ensilage into the silo.

Set pipe nearly perpendicular for ensilage; dry feed can be blown in any direction. If lateral delivery is desired, suitable elbows can be furnished at slight cost. For green silage it is necessary to carry the pipe nearly perpendicular to height of opening and the hood at top will direct the silage into silo. Dry cut or shredded fodder may be blown in almost any direction by proper use of suitable elbows.

Shredding Fodder—The new patent-applied-for shredder blade should be run at 600 to 700 revolutions per minute while shredding, and is a notable advance in construction, enabling the operator to shred dry fodder re-cum mover with the blower. There is a great saving in power, also, as compared with the tooth or saw-blade type of shredder, besides saving the leaves in much better condition.

The machine will cut and elevate from 3 to 5 tons of ensilage per hour.

Power—5 or 6 horse power. B.H.P. for the plain table machines; 6 or 7 horse power for the self-feeding table.

Speed—600 to 700 revolutions per minute.

Weight—720lbs. and 920lbs. respectively.

Pulley—10in. x 4in. face.

## ELEVATORS FOR ENSILAGE CUTTERS.

Chain Belt Elevators, for Ensilage Machines. To be used with No. 11, 13 and 16 inch cutters. Taking 30 feet for a standard

Thoroughly made of Redwood ... .. £27 -/-  
All Metal Work, including Bolts, Sprockets and Chains, &c. ... .. £30 -/-

Troughing 4/8 per foot for more or less height than 30 feet. Metal Work 2/- per foot.

# ANTHONY HORDERN & SONS, LTD., PALACE EMPORIUM, SYDNEY.

## "OHIO" STANDARD FEED AND ENSILAGE CUTTERS.

No. 11.

No. 13 ... .. £12/15/-  
Shredder Blades, 13in., 11/6; 16in., 14/-

The "Ohio" Standard Feed and Ensilage Cutters are made in various sizes, the only points of difference being length of knives, which are 11 and 16in. long, the numbers corresponding to the length of knives in all "Ohio" Machines. The general make up of these machines is such as to impress the purchaser with their strength, durability, beauty and satisfactory operation.

The train of feed gear pinions, clearly shown in picture, vibrate as the feed roller moves and lowers, yet their movable bearings maintain the respective distances to each other and keep the gears properly in mesh without friction, which gives a uniform motion to the roller. The backwardly-inclined motion of the upper roller, as it raises, assists in taking hold of the feed, and this, combined with other good points outlined, makes these machines strong feeders. This feeding device is made under U.S. patents.

The feed lever is adjustable, and its first arm is to disengage the chain of gears to change the length of cut. The length of cut is readily changed by either reversing the gear pinion on the roller shaft or substituting a different pinion. Another use of lever is to start and stop the feed. If the power runs down, or machine clogs for whatever reason, or an accident occurs, feed can be stopped instantly by grasping this lever.

The knives are manufactured of a high carbon steel, and they are carefully tempered and very durable. On account of the full-width throat they cut their entire length, which is one reason why they have such large capacity in proportion to the size. The knives are securely bolted to solid knife heads and are reinforced by set screws with lock nuts, which give ready adjustment of knives to cutter bar, so that perfect cutting may be done at all times.

By substituting shredder blades for the cutting knives, perfect shredding can be accomplished.

These machines are strong feeders, have large capacities, and are largely used for cutting ensilage as well as cutting all kinds of dry feed and shredding fodder.

Length of knives—3 and 6 in. Size indicator—18 1/2 in. diameter. Cuts with 4 knives, 1, 1 1/2 and 2 in. Cuts with 4 knives set, 1/2, 1, 1 1/2 and 2 in. Size of pulley—12 in. diameter, 6 in. face. Speed—450 to 600 revolutions per minute.

Power required—No. 12 2 1/2; 4 H.P. No. 16, 4 to 6 H.P. depend upon the length of carrier used. In their size can be successfully driven by 3 h.p. tread power and all sizes if suitably mounted up to, say, 30 H.P. but under such circumstances the cutter must, of course, be fed with due respect to the power at hand.

No. 12 has a capacity of 4 to 6 tons of silage, 2500 to 3500 lb. dry feed per hour; No. 16, 6 to 10 tons of silage, 3000 to 4000 lb. dry feed per hour. Weight—No. 12, 750 lbs.; No. 16, 650 lbs.

No. 11 ... .. £11/10/-  
Shredder Blades ... .. 11/6

The illustration shows the No. 11 "Ohio" Standard Feed and Ensilage Cutter. The design is similar to the No. 2, with the exception that the knives are longer, and the knife shaft extends through on both sides for the fly wheel and pulley, to better adapt the machine to power. The crank furnished fits directly into the cylinder shaft, so that the hand drive is direct.

The throw-out or feed lever is clearly illustrated, and its operation may be readily understood. As the upper feed roller raises to allow the feed to pass through, the cog wheels remain in proper mesh without binding, making an easy-running, durable device.

The feed lever assists in making changes in the length of cut, and also serves to stop the feed entirely in case of accident or otherwise.

The fly wheel, as now made, is nearly a solid web wheel, instead of having three spokes, as shown, and is therefore much better.

The wood work is nicely striped and finished in the natural color; the iron work is maroon; the whole machine is varnished.

By substituting shredder blades for the cutting knives, perfect shredding can be accomplished.

The capacity for cutting dry feed is 2500 to 3500 lbs. per hour, of ensilage, 3 to 4 tons per hour.

Length of knives—11 in.; four lengths of cut.

Diameter of knife shaft—1 1/2 in.

Pulley—12 in., 4 in. face.

Speed—400 to 600 revolutions per minute; requires 1 to 2 H.P.

Weight—440 lbs. Fitted with 4 knives.

No. 12.

# ANTHONY HORDERN & SONS, LTD. ONLY UNIVERSAL PROVIDERS

## ENSILAGE CUTTERS, AND ENSILAGE CUTTERS AND BLOWERS.

One of the most interested Subjects of the Moment.

### Unsolicited Testimonials.

#### "Simply Marvellous." Too Fast For Feeders.

Messrs. ANTHONY HORDERN & SONS, Sydney, N.S.W.

The No. 12 "Ohio" Ensilage Cutter has given complete satisfaction and the work it does is simply marvellous. I consider it a most wonderful machine. It filled our 110-ton silo, as represented in enclosed photograph, without a hitch or breakage of any kind. In fact, the only trouble we had was to get the maize to the machine fast enough.

AUBIN DOWLING, Talgai West, Hendon, Queensland.

#### Eleven Years Without Breakage.

Messrs. ANTHONY HORDERN & SONS, Sydney, N.S.W.

I have had a No. 11 Ensilage Cutter in use for a number of years. The only cost since I have been using the machine has been a set of new knives. . . . . In cutting lucerne hay, the "Ohio" does not crush the fodder like other cutters, and it can be used for cutting all kinds of fodder plants grown.

R. R. TREMAIN, Camelford Park, N.S.W.

#### Cuts Very Evenly.

Messrs. ANTHONY HORDERN & SONS, Sydney, N.S.W.

Our Ensilage Cutter is a No. 16 "Ohio". We have filled the silo twice during the year and found the machine worked perfectly. No breakdown of any importance occurred either time. The machine cuts maize very evenly and the elevator delivers it at the top of the silo without any trouble. The only difficulty is in feeding it fast enough.

J. GARTON USSHER, "The Plains," Tumut, N.S.W.

#### Works Perfectly.

Messrs. ANTHONY HORDERN & SONS, Sydney, N.S.W.

The "Ohio" Ensilage Cutter does its work splendidly. I cannot imagine that anything could be better adapted for the purpose.

T. W. GILLHAM, Glen Innes, N.S.W.

#### "Ohio" Saves Time and Fodder.

Messrs. ANTHONY HORDERN & SONS, Sydney, N.S.W.

I found the "Ohio" Cutter most successful and reliable, at the farm at Mount Pleasant Lismore. It is a great saver of time and economiser of fodder.

CHAS. B. WESTMACOTT, Athenaeum Club, Sydney, N.S.W.

#### No. 11 Blower Cutter Works Well.

Messrs. ANTHONY HORDERN & SONS, Sydney, N.S.W.

The No. 11 "Ohio" Ensilage Cutter and Blower does the work well and takes three of us to keep it going. It is worked by a 5 H.P. Hoensby engine, and the whole outfit has worked well and given us no trouble.

WILLIAM DUMMETT, Quama, N.S.W.

#### Thinks Silo and Cutter Solve Australian Drought Problem.

Messrs. ANTHONY HORDERN & SONS, Sydney, N.S.W.

I am pleased to report that the "Ohio" Ensilage Cutter is all that is claimed for it and even more. This year we have made about 180 tons of Ensilage which is turning out splendid, and the cattle are very fond of it. They seem to milk and "condition" all the time.

I have two silos of 110 tons capacity each. . . . . The conservation of fodder by the ensilage principle has come to stay and in my opinion is the only safe way of coping with drought, and no farmer who can afford to build a silo should be without one or two. Already the farmers down here are beginning to see the use of the silo, and before long every man who can afford it will have one.

JOSEPH LATIMER, "Glen Rock" Farm, Central Tilba, N.S.W.

#### No. 14 Cuts Large Tonnage Agent's Prompt Service.

A. ASHIE SMITH, Esq., Sydney.

The machine we purchased from Messrs. Anthony Horder & Sons (No. 14 "Ohio") has given entire satisfaction, having cut about 700 tons this season without a hitch. Next season we hope to put through fully double this quantity. We cannot speak too highly of the attention given to letter or telegraphic orders for spare parts, by your Sydney agents, Messrs. Anthony Horder & Sons.

DAVIES & KERSHAW, Grahamstown, N.S.W.

# BUSH HOUSES.

Made of Dressed Kauri Pine, at our Redfern Factory. Any other designs to order

Height (centre), 8ft. ...	Length, 9ft. ...	Width, 6ft. ...	£8/8/-
8ft. 6in. ...	12ft. ...	7ft. ...	£8/8/-
Doors with hinges, lock and key ...			14/6 extra.

The sections are strongly fastened by a simple device, and as every part is numbered, the structure can be easily taken to pieces and fitted together.

Bush Houses of any size or to customer's own design, made to order. Estimates sent on receipt of sketch and measurements. These pretty Bush Houses form an attractive addition to the garden or grounds, and their possibilities in the way of usefulness and ornamentation are unlimited. If thoroughly painted the trellis work will stand any amount of heat or bad weather.

The uprights and plates are now made of Hardwood. The walls 3in. mesh, gables and roof 1in. mesh.

## THE SUCCESS HAND GARDEN PUMP (No. Tx 890).

Brass Working Parts and Air Chamber.

Indestructible Bronze Ball Valves. Malleable Iron  
Foot Rest.

No. Tx 890

Showing foot-rest and  
position of valve in relation  
to pump and bucket

The annexed cut represents a most  
excellent Pump for use in gardens, vine-  
yards, greenhouses, orchards, for washing  
windows and buggies; also, for spraying  
poultry houses. The working parts are  
all brass, and bucket foot-rest is made  
of malleable iron. Nothing could be  
simpler and more durable than this pump.  
It has large air-chamber space and is  
double-acting, throwing an absolutely  
continuous stream, either solid or in  
fine spray. The "Bordeaux" Nozzle,  
the best combination Spraying Nozzle on  
earth, is furnished with Success Pump.  
This nozzle throws a splendid stream, fine  
or double spray (adjustable), and is easily  
disengaged; or may be shut off altogether,  
features possessed by no other Spray  
Nozzle. This Pump is packed in a neat  
straw-board box. Weight, 8 lb.

With 3 ft. Hose ... 19/6  
Extra Hose ... - 1/6 per ft.

# GARDEN HOSE, &c.

Hose is also largely used for cleaning purposes in Stables, Yards, Sheds, Outhouses, Dairies, &c., and for washing Carriages, Horses, Walls, sides of Buildings and Verandahs, and in many other ways where it is desirable to use water freely.

This important line has our fullest attention, and we are not ashamed of our prices. We print them bold for all folk to see, so that when we say that we **defy competition**.

## THE CAPITOL Lawn Trimmer and Edger.

(No. Tx 899).

**The Universal Verdict:— "Fills a long felt want."**

Does what no other machine can do, and what Lawn Mowers leave undone. It trims and edges your lawn with remarkable speed and perfection; the shield over the blade protects the flowers. Four years have demonstrated the usefulness of this trimmer ... 30/-

No Tx 896.—Capitol Edging and Border Trimmer

## 30in. PETROL LAWN MOWER.

These Machines are specially designed to work in places where a small Horse Mower is found suitable, and answers admirably for a large area of ground; is specially adapted for working on both level or hilly ground, and very desirable for use on golf links.

The Cutters are 30in. wide, and the Petrol Motor is about 5 h.p., with Bosch High Tension Magneto, which enables the Mower to work freely on heavy gradients.

The Motor drives by a chain gear through a reducing gear, which is provided with a clutch for starting and stopping the Machine without stopping the Motor.

The Machine is provided with long handles and is very easy to start; all parts are arranged with suitable adjustments.

The man who steers in the usual way when walking behind, has the Machine under perfect control, taking sharp bends with the greatest ease.

The Grass Box is fitted with a Patent Delivery Apparatus, and can be emptied without stopping the Mower or leaving the handles.

Price ... .. £172/10/-

## "MILLIONS OF MISCHIEFS"

And any amount of worry, may be avoided by attention to the following simple directions:—

Write your Orders legibly, and your name and address in full. Give the Post Town where an answer will reach you. State if parcel and invoice are to be addressed Mr., Mrs., or Miss.

Give the correct route by which the goods are to be sent, and say to whom they are to be consigned if you live far from a Railway Station or Port.

Be careful to give sizes, colors, lengths and quantities of goods wanted, and state whether we may substitute if we have not the exact material or article in stock.

In the event of goods going astray in transit, or not arriving at their destination in reasonable time, it would be well for customers, in writing to us, to give date of invoice, to assist in tracing cause of delay.

No. Tx 949

No. Tx 950

**The "Nox-all" Hand Poison Follard Distributor, complete (No. Tx 950) ... 20/-**

Will work in the roughest country or in the midst of crops etc., where poison carts are an impossibility. It weighs only 6 lb., has 2 or 1000 hands, and can be loaded in two minutes. The special advantages of the machine are its portability and its simple and intricate parts to get out of order. A big crop can be treated and duplicate parts cost but a few pence.

### Patent Rotary Hoe

6 in. wide, on 4 ft. Ash handle (No. Tx 951) ... 4/6  
 9 in. " 4 ft. " ... 6/6

**The Rotary Hoe and its uses.** It will do six times the work in a given time than the ordinary hoe. It loosens the soil, admits air, prepares for the coming rain, rouses the bacteria or insect world, stimulates root action, hastens the growth of young plants, and at the same time destroys the weeds in their infancy. Thoroughly turns over the ground 6 in. and 9 in. wide.

## KALESKI'S PETENT KNIVES.

Manufactured by THOS. TURNER & CO., Sheffield.

An Ideal Pocket  
Knife.

2/3 each

Postage, 3d. extra.

No. Tx 998a

For all Employed  
at Station  
Farm  
or Orchard Work.

As shown in the above illustration the one blade has a great variety of uses.

The curves do it. The hollow curve at the bottom prunes, foot-rots, trims leather or hides, rips bales. This curve cuts truly every time, and never causes the blade to slip.

The "sweep" above, skins, buds, and does other work. Sticks with the point and buds with the back; cuts paper (on budding ridge) better than any scissors.

The blade is practically unbreakable, because the strength is in the right place, wears a lifetime on account of width and thickness. Length of Pocket Knife when open, 8 1/2 in.

The Most Useful  
Sheath Knife.

No. Tx 998b

1 1/6 each;  
Postage, 3d. extra.

This Sheath Knife foot-rots, tails lambs, and cuts hides with bottom curve, curve above it skins, and point sticks. The user gets twice the strength to his stroke than he gets from any other Sheath Knife. Length, 9 in.

# SPRAY PUMPS, &c.

All of which are appreciated by Orchardists and Farmers.

No. Tx 1007.

**Myers' "Perfect" Double Acting Barrel Spray Pump,** with Brass Upper and Brass Lined Lower Cylinders, All Brass Plunger, Brass Check Valve, Brass Valve Seat, and fitted with Agitator, 1in. suction pipe, strainer, and two graduated Vermorel nozzles (No. Tx 1007) ... .. 67/6  
 3 in. x 3 ply Kerosene Proof Rubber Hose, to suit this pump ... .. -/8 per foot

The Perfect Barrel Spray Pump is manifestly the best barrel spray pump ever offered. It is constructed on the well known principle of the Myers Barrel Spray Pump, the best that mechanical skill and ingenuity can conceive, being single acting on the suction and double acting on the discharge, i.e. it discharges half the water on the up stroke and half on the down stroke of the handle.

The pump has an exceedingly large air chamber, necessary especially when two leads of hose are used, in connection with the mechanical construction above described, which enables the operator to work the pump under pressure with much less exertion than is required with other large spray pumps.

Price does not include Barrel shown in illustration.

**Ordinary Oil Barrel,** for use with above Pump— from 7/6 to 10/- each  
**Nikoteen,** in bottles, to make 5 gals., 1/3; 10 gals., 2/6

## ROGERS' LIME-SULPHUR SOLUTION.

Spraying with Lime-Sulphur Solution as a rule is carried on in the Autumn, when the trees are in a dormant condition. It is intended primarily for killing sucking insects and scale, although it can also be used (greatly diluted) as a summer spray for fungus diseases.

Rogers' Lime-Sulphur Solution is Cherry Red in color, absolutely clear and free from any sediment or settling, and there is no waste in its use, as it does not clog the nozzle or show a thick muddy sediment in the bottom of the package, as is so frequently the case with many of the commercial mixtures on the market. It also has the advantage over the self-made mixtures, that it can be sprayed cold, so does not have to be made up from day to day.

For use as a dormant spray, it should be diluted one part solution to nine parts water. At this dilution, it is especially effective in controlling the San Jose Scale, White Wax Scale, Woolly Aphis, and others. As a Summer spray, it can be used effectively at a much greater dilution against such diseases as Leaf Curl, Peach Mildew, Leaf Blister Mite and Pear Thrips.

For the harder species of trees, such as Apple, Pear and Quince, a dilution of one part Solution to 40 parts of water should be used. For the less hardy trees, such as the Peach, Plum, &c., one part Solution to 100 parts of water will be effective. Stronger solutions than these should not be used in spraying with Lime-Sulphur when the trees are in foliage, as otherwise there will be danger of injury by burning. Spraying with Lime-Sulphur at the above dilution should always be employed where there is the least sign of any Fungus infection.

In tins,  $\frac{1}{2}$ -gallon, 1/6;  $\frac{1}{4}$ -gallon, 2/6; 1 gallon, 3/9; 5 gallons, 15/-; and in casks containing 50 gallons, 75/-

## ROGERS' ARSENATE OF LEAD.

For Spring spraying this material will give the greatest possible poisoning efficiency without the danger of injuring the foliage. It is made so carefully that its particles are very finely divided, and in its precipitation they settle on every part of the tree, thus leaving small opportunity for the insect to do any feeding without taking some of the poison into its system. It has splendid adhesive qualities, so that it will stick to the foliage and not come off under a light shower or heavy dew.

This brand of Arsenate of Lead mixes readily with water, and can be combined with Bordeaux Mixture or Lime-Sulphur Solution if a combination insecticidal or fungicidal spray is desired. It contains no coarse or granular particles, and for this reason can be used without any danger of injuring or burning the leaves.

For first spraying in the Spring, the Arsenate of Lead should be diluted at the rate of three pounds of Lead to 50 gallons of water. At this dilution it is specially effective in controlling the first brood of the Codl. Moth, and other leaf-eating-and-chewing insects—

In Glass Jars, containing 1lb., 1/3; in Earthenware Crocks, 5lbs., 6/-; 25lbs., 25/-; in Kegs, 100lbs., 75/-

## BORDEAUX MIXTURE (PASTE).

A QUICK-ACTING FUNGICIDE FOR FRUIT GROWERS, GARDENERS, AND FLORISTS.

The tendency at present is to simplify the work connected with horticultural poisons. This has led many growers to adopt the method of buying the prepared product rather than different ingredients separately and combining them. By using a ready-made product of standard quality, the horticulturalist saves himself the inconvenience of a tedious mixing operation, and insures a uniform spray. Bordeaux Mixture Paste is a combination of quicklime, copper sulphate and water properly dissolved, neutralized and separated from all impurities. In making, a quick stone lime is used, and a chemically pure Blue vitriol in the crystal form, so as to insure proper strength in the finished material.

Bordeaux Mixture may be used in combination with Arsenate of Lead, forming one insecticidal and fungicide. For this spray, mix six to twelve pounds of Bordeaux with one to three of Arsenate of Lead in a thin paste, and add 50 gallons of water, stirring until free from lumps. Used as a fungicide for the Apple and Pear Tree, Potato and Tomato Vines, from 8 to 12lbs. of paste to 50 gallons of water will be most effective. Tender foliage trees and vines such as the Peach, Cherry, Plum and Cucumber will easily stand a spray made from 6 to 8lbs. of Bordeaux to 50 gallons of water—

In Glass Jars containing 1lb., 1/-; in Earthenware Crocks, 5lbs., 4/6; 25lbs., 15/-

# VARIOUS APPARATUS FOR ORCHARDISTS AND OTHERS.

Whereby much trouble is saved, and a good crop is sent to market in good condition.

Attached to the Reservoir, which is made of Copper, the following:—an iron handle, a brass pipe or "lance," and a flat screwdriver, the large end of which is used as a spanner. The lance has at one end a tap, and at the other end an internal screw to receive the spray nozzle.

Under the lid of the machine is a strainer of strong brass wire, which serves as a tray, containing the No. 26 Improved Vermorel Spray Nozzle, with three round jets of different powers, and a straight jet for treating trellised trees or for simple washing.

No. Tx 1011

The Elair or Vermorel Knapack Spraying Pump, (No. Tx 1011), holds about 3½ gallons. It will treat from 2½ to 5 acres per day, delivering from 35 to 70 gallons of solution per acre, according to the aperture of the jet or nozzle employed. Packed, 22lbs. ... 48/-

ANTHONY HORDERN & SONS, LTD., PALACE EMPORIUM, SYDNEY.

## THE MYERS' BULLDOZER POWER PUMP. PATENTED.

No. Tx 1020

Six Inch Brass Lined Cylinder, Twelve, Sixteen and Twenty Inch Stroke; Double Acting; Back Geared Eight to One, Capacity 8,000 Gallons per hour; will force 300 feet; Suction, 4 inch, Discharge, 4 inch (No. Tx 1020) £46/-

This represents the Myers' Bulldozer Power Pump as made in its largest size. This Pump is built with a six cylinder and 12, 16 and 20 in. adjustable stroke. The main body of the pump forms the cylinder which is first accurately bored and then BRASS LINED with a heavy, seamless drawn brass tube, which is forced into place by screw power working under many tons pressure, after which the ends are expanded out which ensures it being permanently located.

The pump is fitted with 12 valves formed by using a brass valve seat screwed into the pump proper, and high duty, quick closing rubber valves, 2 1/2 in diameter. The valves are fitted with a spring, which assists in closing so as to reduce the slippage of water to the minimum when working under pressure. These valves are all located at the top of the pump, immediately under the air chamber, so that they can be readily reached when required for repairing.

The suction and discharge are fitted with a flange union, securely bolted to the pump. They are each 4 in. diameter. The suction is immediately under the centre of the pump, thus doing away with elbows, etc., as the pump can be located directly over the well.

The gears are heavy and substantially made. All boxes are split and bolted and so arranged that the wear can be easily taken up. The piston rod guide is attached direct to the head of the pump, thus always ensuring a correct alignment. The shafting and wrist pins are steel.

The entire pump is mounted on one base, thus making it easy to set. The outer end of the pulley shaft is supported by a bearing with adjustable box, has brass-covered piston rod. The pump is equipped with tight and loose pulleys 30 in. diameter, with five face.

Its special construction, great power, and wide range of work recommend it for general and expert trade for the reason that it can be packed in a smaller space than any other pump of the same capacity known to the trade.

## MYERS' CENTURY LOW DOWN DOUBLE-ACTING FORCE PUMP.

With Brass Lined Cylinder, Brass Piston Rod and Stub Pitman for Machine Power; Capacity, 2,000 gallons per hour (No. Tx 1021) £44/12/6

This represents the Myers' Century Low Down Double Acting Force Pump, fitted with stub pitman, to be used with back gear, engine or other power.

The above pump is fitted with brass lined cylinder, brass valve seat, and rubber poppet valves of the high duty pattern fitted with quick closing coil spring. Has brass piston rod supported by a yoke attached directly to the head of the pump, thus insuring perfect alignment in all cases.

The pump is so arranged that all valves can be removed by taking off the top cap and air chamber. This is a great improvement over old style pumps wherein the cylinder head must be removed to reach the valves.

The pump is fitted for 2 inch suction and discharge pipe, and is designed to be run from 30 to 35 revolutions per minute. The cylinder is 3 inches in diameter with 3 inch stroke, and double acting.

No. Tx. 1021.

1201

ANTHONY HORDERN & SONS, LTD. ONLY UNIVERSAL PROVIDERS

## MYERS' BULLDOZER POWER PUMP.

No. Tx 1022.

Capacity, 2,000 gallons per hour; complete, as shown in illustration ... £16/12/0

This pump has been made with special reference to power, strength and capacity. The geared movement that operates the piston is the same as is familiarly known in the construction of bulldozers, and the tendency while at work under heavy pressure is such that the working parts cannot be injured, sprung or thrown out of line.

The cylinder head through which the piston operates also carries the front guide, which is provided with a renewable bushing.

The crank shaft and piston shaft run in paired boxes, lapped, a construction that can easily be renewed in case of wear.

The entire pump is constructed so that the working parts line with the bore of the cylinder, which is utilised as the main frame and the bed-plate of the pump, and is made with base check valves the entire construction. It has a fan, brass lined cylinder with valve metal seats and quick closing rubber valves, held in place by spring, has brass piston rod and brass packing box, large or smaller attached to pump with flange, has 5 in. stroke, 2 in. suction and discharge, is fitted with tight and loose pulley, 16 in. in diameter and 3 in. face. End box and outer shaft support for and of pulley shaft furnished with each pump.

We recommend this pump to do good service under heavy pressure. It is guaranteed to elevate water 125 ft. perpendicularly, or an equivalent pressure, when properly piped and not restricted, has a capacity of 20 gallons per minute, should be run 30 to 35 revolutions per minute. Each pump is run and tested with water under a pressure of 140 lbs. before leaving the factory.

The Myers' Submerged Cylinder Deep Well Double Acting Force Pump, anti-freezing, with brass upper and brass lined lower cylinders with latest improved glass valve seat held with brass follower, capped outside (No. Tx 1023) ... 67/6

For Wells from 10 to 160 ft. deep.

The submerged cylinder in which the plunger bucket operates is made of seamless drawn brass, and is placed five feet below the base of the pump. The lower cylinder in which the lift bucket operates is brass lined, capped outside, and has our latest improved glass valve seat, in which the valve and seat are held with brass follower, and should be placed near the bottom of the well in the water, if possible.

In placing this pump in wells, the upper and lower cylinders are connected together with intermediate pipe, and a 3/4 inch steel rod inside operating the lift bucket. It has a strong and substantial stand, has good leverage, and operates with ease in wells of great depths. It can be placed from the platform, no need of going down in well. Is durable and not liable to get out of order. It is adapted for wells of small or large diameter, as the price list will plainly indicate. The rods to connect inside of pipe 2 1/2 inch, 12 ft. long, screwed and with nuts to connect. In ordering this pump, be particular to give the extreme depth of well, to bottom; takes 1 1/2 in. pipe, and will lift 300 gallons per hour.

No. Tx 1023.

# FOR FARM AND GARDEN.

No. Tx 1024.

Two-Cylinder Force Pump,  
on plank, with air and  
vacuum chambers, tight  
and loose pulleys (No.  
Tx 1024).—

No. 2, about 1000 galls.,  
2½ in. iron cylinder, fitted  
for 1½ in. pipe, 7 in. stroke  
£10/7/6

No. 4, about 2000 galls.,  
3 in. iron cylinder, fitted  
for 2 in. pipe, 7 in. stroke,  
£13/-/-

This Pump, arranged as shown  
for power, is adapted for service in  
factories, shops, creameries, or  
any place where a light duty Power  
Pump is required. It should not  
be operated against more than 30  
lbs. pressure. Size of pulleys, 4 x  
16 inches

Improved House Force Pump  
on board (No. Tx 1025).—

No. 5—Size of pipe, 1½ in.,  
87/6

No. Tx 1025.

## DOUGLAS' HYDRAULIC RAM.

No. Tx 1026

Pamphlet giving full instructions on Rame and Prices of Pipes on application.

1203

For forcing water to any elevation  
proportionate to the fall, and for irriga-  
ting land, supplying dwellings, gardens,  
factories, farms and other places with  
water (No. Tx 1026).

The distance the water has to be  
brought will determine the length of pipe  
required, the size of the pipe being regu-  
lated by the number of the Ram to which  
it is to be attached, thus—

No. 3 takes 1 in. inlet, and ½ in. outlet, 45/-  
Will lift 3 gallons per minute.

No. 4 takes 1½ in. inlet, and ½ in. outlet, 55/-  
Will lift 7 gallons per minute.

No. 5 takes 2 in. inlet, and ¾ in. outlet, 88/-  
Will lift 14 gallons per minute.

No. 6 takes 2½ in. inlet, and 1 in. outlet,  
157/6  
Will lift 25 gallons per minute.

**The Ideal Double-acting Oscillating Force Pump,** with Brass wing piston, Brass valves and valve box (No. Tx 1026)

No. 3, fitted for 1 1/4 in. pipe; approximate capacity, 9 galls. per minute ... .. 50/-

No. 5, fitted for 1 1/2 in. pipe; approximate capacity, 19 galls. per minute ... .. 80/-

No. 7, fitted for 2 in. pipe; approximate capacity, 26 galls. per minute ... .. £5 18/6

This Pump fitted with self-cleaning and cock-piston, respectively adapted to pump in factory service, elevating water and other liquids into tanks, &c. All working parts are Brass and metallic fitted throughout, suitable for hot or cold water.

**Douglas' Self-priming Syphon, or**

**Windmill Force Pumps (No. Tx 1029)**

Bore Inside Cylinders	2 1/2	3	3 1/2 inch.
Size of Pipe...	1 1/2	1 1/2	1 1/2 inch Force.
Galls. per Stroke	17	24	42 galls.
Length of Stroke	8	10	10 inch.
	85/-	£2 2/6	£6 10/-

The working cylinder is surrounded by water so that the leathers cannot become dry. A hand hole at base allows the valve seat and lower valve to be removed for repairs. The plunger can be withdrawn after loosening the bolts in the divided air-barrel, without disturbing the pipes. The piston and rod, inside cylinder and connecting are of solid brass. There is a check-valve with brass seat in the discharge, also suitable drain plug to avoid freezing. Adapted for 10-foot lift from water to point of discharge. Extreme depth of suction-pipe, 25 feet.

## ROTARY PUMPS.

No. Tx 1029A.

**Rotary Pumps (No. Tx 1029A)** ... .. £30 15/-

This is a geared Rotary Pump with bed-plate and two pulleys, as shown in cut. The liquid is forced upward by two spur gears, meshing into each other. Do not try to use this pump on a long suction lift.

Pulleys are 3 x 11 inches; adapted for working against 30 pounds pressure.

This pump is particularly suited for pumping oily liquids which help to lubricate the gears, and do not permit the formation of rust.

Fitted to 2 inch inlet and discharge.

## DIAPHRAGM PUMPS.

No. Tx 1029a is the "Acme" Diaphragm Pump, which is particularly adapted for raising large quantities of water containing mud, drainage, grain, or sanitary matter. There is no cylinder or piston to wear by the introduction of foreign matter, and the diaphragm can be replaced, in an emergency, by a piece of canvas or an old coat. The valves carry rubber gasquets which work on iron valve seats. A strong wrought iron lever goes with every pump.

The top has two sets of lugs, so that the brake can be set either right or left handed.

No. Tx 1029c is similar to No. Tx 1029a, but with square base and side—instead of bottom—suction. Adapted for mounting on portable plank and using with suction hose.

No. Tx 1029a—Bottom suction.

Size.	Diameter of Diaphragm.	Gallons per Stroke.	Diameter of Suction Pipe.

## "CHALLENGE" OIL ENGINES.

2, 4 and 6 H.P.

The illustration shows our 2, 4 and 6 H.P. Stationary Oil Engines. They are made very strong and substantial, and will save their cost to anyone, within a very short time.

### 2 Horse Power —

Bore of Cylinder, 4in.; Stroke, 5in.; Speed, 450 revolutions per minute; Pulley, 5 x 4 in.; Weight, 400lbs ... £25

Work accomplished by 2 H.P.—

2in. Centrifugal Pump, giving 5000 gals. per hour on 20ft. head. 3in. Centrifugal Pump, giving 11,000 gals. per hour on 12ft. head. Dynamo, 20 lights. Bone Mill, 100 to 200 lbs. per hour. Hay's Corn Sheller, 25 to 50 bushels shelled corn per hour. Cream Separator, any usual size. Chaffcutter, up to 9in. mouth, 2 blades. Meat Chopping Machine, capacity 35lbs. in 5 minutes. Excelsior Mincer, capacity 350lbs. per hour. Churns. Washing Machines. Ice Cream Freezer, &c. Winnowers, converted from hand power to motor power. Wheat Grader. Air Fan, centrifugal, small size. Milking Machines.

### 4 Horse Power. The base of this engine is built in two parts, which enables the owner to use it either stationary or portable. The fuel tank is located in the base which makes the outfit very compact—

Bore of Cylinder, 5½in.; Stroke, 8in.; Speed, 400 revolutions per minute; Pulley, 9 x 8in.; Weight, 850lbs. ... £35

Work accomplished by 4 H.P.—

2in. Centrifugal Pump, giving 5000 gals. per hour on 35ft. head. 3in. Centrifugal Pump, giving 10,000 gals. per hour on 22ft. head. 4in. Centrifugal Pump, giving 20,000 gals. per hour on 15ft. head. 4in. Bulldozer Pump, giving 1650 gals. per hour on 12ft. head. Shearing Machine, 5 stands. Ensilage Cutter, 11in. knives. Bone Crusher, small Rapid mill. Kelly Duplex Grinding Mill, 125lbs. Corn Crusher, 25 to 30 bushels per hour. Chaffcutter, 9in. mouth, 2 blades. Circular Saw, 22in. diameter. Dynamo 110 volts, 16 amperes. Buffalo Meat Cutter, size 23½, capacity 35lbs. in 5 minutes. Sausage Machines. Washing Machines. Milking Machines. Air Fan, centrifugal, to cool several rooms. Winnowers, Cohoe and Walster patent.

### 6 Horse Power. Built exactly like the 4 H.P.—

Bore of Cylinder, 6½in.; Stroke, 8in.; Speed, 350 revolutions per minute. Pulley, 11 x 8 in. Weight, 1150lbs. ... £50

Work accomplished by 6 H.P.—

2in. High lift Centrifugal Pump, giving 6000 gals. per hour on 50ft. head. 3in. High lift Centrifugal Pump, giving 10,000 gals. per hour on 30ft. head. 4in. High lift Centrifugal Pump, giving 20,000 gals. per hour on 25ft. head. 4in. Double acting Bulldozer Pump, giving 2000 gals. per hour on 120ft. head. Ensilage Cutter, 4 knife, 16in. mouth. Ensilage Cutter, with blower, Ohio No. 11. Chaffcutter, 9½in. mouth, and Farmer's Bagger Bone Crusher, Rapid mill, large size. Kelly-Duplex Grinding Mill. Power Winnowers, taking output of 10 strippers. output 50 to 60 bags of wheat per hour.

Each engine is fitted with Magneto, Carburettor, Multiple Battery and Coil, Starting Crank, Two Wrenches, Oil Can and Oil Cups. All you have to do is fill the fuel and water tanks and oil cups, and the engine is ready to start. They are nicely finished in good dark red paint.

# FOR BEEKEEPERS.

ROOT'S Specially Compiled and Illustrated BOOK OF BEE GOODS SUPPLIES

will be forwarded to any address POST FREE ON APPLICATION.

## BEGINNERS' OUTFITS, HIVES, &c.

We are constantly in receipt of inquiries from parties who want information regarding a Beginners' Outfit, so we have arranged the following lists to answer more fully such inquiries than we can by letter.

### Outfit No. 1 For Amateurs—

- 1 ABC of Bee Culture, 1 Parker's Fastener, 1 Clark's Smoker, 1 Bee Veil, 1 pair Cotton Gloves, 1 Hive, 14-storey 8-frame for comb honey, in flat ... .. 25/-

The particular merit of this outfit is its low cost.

### Outfit No. 2—For Comb Honey—

- 1 ABC of Bee Culture, 1 Bee Veil, 1 Foundation Fastener, 1 Bee Escape with board, 1 Bingham Smoker, 5 Hives, 14-storey, 8-frame, with sections complete ... .. 77/8

This outfit is especially recommended for those who have a few bees in old-style or box hives, and want to try in a small way our Langstroth-size (dove-tailed) hives.

### Outfit No. 3—For Extracted Honey—

- 1 ABC of Bee Culture, 1 Bee Smoker, 1 Bee Veil, 5 Hives, 2-storey, 8-frame, complete in flat, 1 Novice Extractor, 1 Bingham Honey Knife, 1 Spur Embedder ... .. 25/17/8

The outfit is recommended for those having a few bees, who want to try in a small way a few of our hives for extracted honey.

### Outfit No. 4 For Comb or Extracted Honey—

- 1 ABC of Bee Culture, 1 Standard Smoker, 1 Bee Veil, No. 2, 5 Hives, 2-storey, 10-frame, complete in flat, 1 Bingham Knife, 1 Spur Embedder, 1 Comb Fastener, 5 Supers, complete with sections ... .. 21/10/-

The supers in the last item are intended for use in place of the extracting supers, or one comb-honey super and one extracting super may be used at the same time.

### Outfit No. 5—

- 1 ABC of Bee Culture, 1 Junior Smoker, 1 Bee Veil, 1 Bee Hat, 1 pair Gloves (cotton), 1 Colony Italian Bees in 8-frame dove-tailed Hive with Super for Comb Honey, 2 Hives for New Swarms ... .. 82/6

This outfit is particularly intended for those just beginning Bee Culture, who have neither bees, hives, or any equipment.

Any article can be omitted from any outfit, if desired, or any outfit may be selected and other articles from our catalogue added, or double quantities of hives or bees ordered, by adding to the outfit price the price of articles selected.

Hives for housing them; Frames and Fittings for their convenience and comfort; everything for the Busy Bees, so that in helping them, Beekeepers help themselves.

### Bee Hives

For Comb Honey, 14-storey, fitted as follows:—

Cover, Bottom, Body and Frames, Division Board and Super, complete with slotted sections (No. 537) 8-frame, 13/8; 10-frame, 14/8 each

For Comb Honey, 14-storey, fitted as follows:—

Cover, Bottom, Body and Frames, Division Board and Super, complete with Ideal or plain sections (No. 536) 8-frame 13/8; 10-frame, 14/8 ea.

When ordering, please say which you require.

For extracting, 14-storey, fitted as follows:—Cover,

Bottom, Body and Frames, Division Boards and Super, fitted with 5/8in. frames (No. 540)—8-frame, 12/8; 10-frame, 13/8 each

For extracting, 2-storey, fitted as follows:—Cover,

Bottom, 2 Bodies, Frames and Division Boards, (No. 541) 8-frame, 14/8; 10-frame, 15/8 each

Unless specially ordered, we send the Covers and Bottoms we consider most suitable for the district in which you reside.

### Danzon Baker Hives (No. 406)—

14-storey, complete with Sections, Danz Bottoms and Covers ... .. 10-frame, 12/6 each

The above Hives are packed 5 in a crate, the prices quoted being for the Hives in the flat; if set up 1/8 extra. For 5 Hives and over, a reduction of 1/8 per Hive is made if in original packages.

### The Root Observation Hives—

8-frame, complete, plain, in flat—87/6 each, setting up 5/- each extra

The "Pearl Agnes" Toy Hive, complete with Frames, Sections, and Feeder ... .. 10/- each

Queen Mating Hive ... 4/- each; set up, 4/6 each

Observatory Hives, for Shows, &c. Complete with case, glass all round 1-frame, with super, 11/- each

### Hoffman's Frames—

Wedge Top, Self Spacing, 18 1/2 in. top (No. 324) = 500, 19/-; 100, 19/6; 50, 10/-; doz., 2/6

Wedge Top, Self Spacing, 19 in. top—500, 19/-; 100, 19/6; 50, 10/-; doz., 2/6

Wedge Top, Staple Spaced, 18 1/2 in. top—500, 18/-; 100, 18/6; 50, 9/6; doz., 2/6

All Wood, 19 in. top (No. 325)—500, 14/6; 100, 15/-; 50, 7/9; doz., 2/-

Six " " " " 99/10/-, 101/10/-

**NOTE.**—Every care is taken to send only in suitable weather, but we cannot be responsible for loss or delay in transit.

## EXPLANATIONS REGARDING THE DIFFERENT GRADES OF QUEENS.

### UNTESTED QUEENS.

An Untested Queen is one raised from an imported mother or a breeding queen whose bees are extra honey gatherers. She is untested because she has only a frame or two of eggs; and as these eggs or brood are not hatched into bees, it is not known yet whether she will turn out a tested Italian queen or a hybrid.

### TESTED QUEENS.

These are queens that have been laying for a month or so, their young bees having already emerged from the cells. These queens have been in the hive long enough to show that their progeny are pure Italians.

### SELECT TESTED QUEENS.

Like the tested, their progeny is pure; but the queens themselves are large, young and prolific. Their progeny is gentle and finely marked, but for real business will probably be no better than bees from the ordinary tested.

### EXTRA CHOICE QUEENS.

Possess special excellent qualities of purity and beauty, and as such are not readily bred, and are not everywhere obtainable. Special care is devoted to the rearing of these, so as to ensure Beekeepers with unsurpassable breeding queens.

**NOTE.**—The Italian bees are superior to all other races of bees, being industrious, beautiful, docile, and defenders of their home against the Wax Moth and other enemies.

Best Beeswax bought in any quantity, Cash or Goods in exchange.

## LOYALSTONE ANT BANISHER.

A reliable preparation for the extermination of Ants, Flies, Cockroaches and other insect pests. The Inventor and Patentee successfully used for many years this preparation for keeping his apiaries and honey houses free from Ants.

It contains the most powerful ingredients known for the destruction of insect life, whilst its effect on animals is that of an irritant rather than a poison, but should be kept out of the way of children.

Loyalstone Liquid and Powder Ant Banisher has been known, and is the only remedy used, amongst the Bee keepers throughout the Commonwealth of Australia since the year 1896, as the only genuine successful remedy against Ants.

### Directions for Use

Well stir contents of jar before using.  
Place in the track of ants, or other pests, a few drops of the mixture, or a small piece of meat or meat bone on which the preparation has been lightly smeared, in a short time the insects will disappear. Repeat the dose when required.

Where ants are very numerous it takes a few days to exterminate them entirely, but in most cases one or two applications are sufficient.

Price ... .. 1/- per Jar.

**ANTHONY HORDERN & SONS, LTD., ONLY UNIVERSAL PROVIDERS**

## **POULTRY POINTS.**

### **THE EGG AND POULTRY BUSINESS.**

There is probably no branch of the poultry industry that is so universally followed as the egg business, nor is there any branch that will bring as quick and sure returns. Moreover, it is a business from which an all-the-year-round source of income can be derived by the man or woman who is engaged in the work, either largely or in a small way.

The successful poultry farmer raises his own laying stock, and a considerable source of revenue is derived from the sale of the surplus birds. If the birds are properly handled and marketed, they will very nearly clear the cost of their rearing and that of the hens kept for laying as well.

**For Ways and Means Consult the Pages of this Section.**

**REMEMBER THAT . . .**

**THE LAYING HEN IS THE PAYING HEN.**

**REMEMBER, ALSO . . .**

That though you can have no chicks without eggs, it is also clear that you'll get no eggs without chicks. And the cheapest way to get both, is per medium of—

**ANTHONY HORDERN'S FAMOUS LOW PRICES.**

### **INCUBATORS.**

Having got thus far, feed your hens with the best of food, and having given them plenty of grit, you may expect eggs. Dozens, scores, hundreds, thousands, millions, according to treatment and luck. You will then proceed to

**- - - HATCH 'EM OUT - - -**

so that the progeny of the hens you feed may feed you.

### **HINTS ABOUT WORKING INCUBATORS.**

Be patient.

Read the directions that are sent out with each incubator, and then follow them out.

An even temperature of 103 degrees must be maintained.

Ventilation sufficient to keep the air sweet in the chamber.

Dry down the eggs the same as a hen does under ordinary circumstances.

Under no circumstances neglect cooling. It makes the chicks strong.

Do not neglect testing your eggs, removing all those that are in the shell at different periods of incubation, and those that are infertile.

In adjusting your regulator, have the valve lever nicely balanced, and turn on sufficient blaze to keep it that way.

Turn the eggs every twelve hours, beginning on the fourth day.

Begin to cool on the fourth day, slightly at first, gradually increasing the time of cooling as the hatch progresses. Very little cooling, however, is needed until the twelfth day of incubation. Always cool in the evening.

Never let the lamp get empty. Very little flame is needed in warm weather, while in cold weather more flame is wanted to keep up the temperature.

Use the best grade of oil. Cheap oil was never intended to burn in a lamp for operating an incubator or brooder. In putting a new wick in the burner, pull it back and forward several times, so that it fits loosely. If the wick is too tight in the burner, the oil will not feed, hence you do not get a good flame. Be careful on this point, and see that the wick fits loose.

**ANTHONY HORDERN & SONS, LTD., PALACE EMPORIUM, SYDNEY.**

# **THE CYPHERS INCUBATOR**

Which, according to the Manufacturers, is . . . .

**"BUILT FOR BUSINESS—SOLD FOR HONOR."**

We endorse this because we believe Cyphers Incubators are capable of doing all that is promised, and of giving every satisfaction to those who employ them.

The Cyphers Incubator is the outcome of years of study of the requirements of both natural and artificial incubation, and the grand results obtained from their use are clearly traceable to the fact that . . . .

## **THE CYPHERS INCUBATOR**

**COMES NEAREST TO NATURE'S WAY.**

### **CYPHERS NON-MOISTURE INCUBATOR.**

The Cyphers Patent Diaphragm, Non Moisture, Self-Ventilating and Self-Regulating Incubators, manufactured and sold under registered trade mark. Warranted by the manufacturers as follows

**First.**—To require no supplied moisture.

**Second.**—To be self-ventilating.

**Third.**—To be self-regulating.

**Fourth.**—To operate with less oil and at less expense than any other make of incubator.

**Fifth.**—To be fire-proof, having the best, the safest, and the most costly-built heater attached to any incubator.

**Sixth.**—To be in all essentials the simplest and easiest to operate and control, requiring less labor and attention than any other style or make of incubator.

**Seventh.**—To produce larger and stronger chicks than any other make of incubator on the market.

**Eighth.**—Also that, where it is run with any other make of a different make, "it shall, in three or more hatches, bring out a larger average percentage of the fertile eggs in good healthy chicks or ducklings than does its competitor."

Each and every Cyphers Incubator is manufactured under the personal supervision of the inventor.

If you are in search of the latest patented, most durably built, and most practical incubator manufactured, the one that will hatch "the largest number of the strongest and healthiest chicks or ducklings" the Cyphers is that incubator.

ANTHONY HORDERN & SONS, LTD., PALACE EMPORIUM, SYDNEY.

## THE NEW BUFFALO INCUBATOR.

Designed and Manufactured by CHARLES A. CYPHERS.

In the construction of the **New Buffalo Incubator**, little wood is used. The casing is of galvanized iron, and can never rust. It is lined with fibre board, which eliminates any loss of heat by radiation. The walls are double, the space between the inner and outer cases being well packed, this makes an incubator as substantial and well insulated as it is possible to manufacture. The front is made of hardwood, finished in the natural grain. In addition to a glass door, it has an outer hardwood panelled door to darken the hatching chamber, and to preserve the heat.

## HATCHERS AND NURSERIES.

For Chicks and Ducklings.

The Cyphers Colony House in Use—

Plain	17/6
Painted	59/6

The Cyphers Colony Houses, or Roosting Coops, illustrated herewith, are recommended to all persons who wish to raise fowls to the best advantage. This style of portable house is 3ft. x 6ft. in size, is 36in. high in front, and 24in. high at the back. It is built of the best grade of dressed timber, tongued and grooved, and is put together in a thoroughly workmanlike manner.

## INDOOR BROODERS.

The Prairie State Pattern Indoor Brooder—

D No. 1—Hot Air, 50 Chicks, size 25 x 36in.,	25/-
D No. 2— „ 100 „ „ 36 x 36in.,	35/-

Best of their kind.

## CYPHER SHELTERS.

Chick Shelter, for D1 Brooder—

plain, 23/6; painted, 25/-
for D2 Peep o' Day, or
outdoor Brooders—
plain, 25/6; painted, 29/-
Size, 6ft. long.

## OUTDOOR BROODERS—TIP TOP EVERY WAY

One of the many advantages of the Prairie State Outdoor Brooder is the fact that when the chicks no longer require artificial heat, the heating device may be removed and roosts placed inside, making a house for the chicks until they are ready for the regular brood house.

**AMERICAN PATTERN BROODER, Hot Air, 100 Chicks,**

Egg Cabinet.

Egg Cabinet, for Storing Eggs—

To hold	100	300	300	400 eggs
	16/-	18/6	21/-	26/-

Every well-equipped poultry plant should have one of these cabinets. The saving from the loss in broken eggs, and the loss of time in handling will soon equal the purchase price. Eggs for table use (not fertilized) have been kept from three to four months in an ordinary cellar by using these cabinets. Eggs intended for hatching should be turned daily; the warmer the temperature the more necessary they should be turned. Eggs for market should be turned every two or three days if kept any length of time.

"BUFFALO" AND "PALACE" BROODERS.

"THE BUFFALO" HANDY HOVER.

The Buffalo "Handy" is a Floor Level Hover. It is complete in itself, and you can use it in any convenient place. The Hover proper and lamp case, balance when lifted with the Hover handle, so that it can be picked up as one piece and set aside to clean the floor.

The lamp flame can be seen without stooping. The lamp-case or heater compartment is attached to the Hover with easy rolled edge slip joints, and is quickly detached for tending the lamp.

The Buffalo Handy Hover is sanitary and fire-proof, as it is all galvanized iron. Heats easily, using little oil. Roomy, the Hover being two feet in diameter—a 72 inch circle at the curtain, with the floor space beneath the Hover all clear. It is warmest at the outer circle, and is perfectly ventilated. Full Descriptive List on application.

The Buffalo Handy Hover ... .. 57/6  
Shipping weight, 40lbs.

"THE BUFFALO" HOME-BROODER HOVER.

If you need a Hover for home-made brooders, or to use in a specially constructed brooder house or colony coop, where the lamp box can be extended below the floor level, the Buffalo Home-Brooder Hover will be found efficient and economical.

The Home Hover has a double heater, heavily insulated. The galvanized heating drum is similar to the "Handy," and the heating and ventilating scheme is the same.

The Hover shell has a wooden top which is lined with felt paper, as is also the galvanized iron circle on the sides.

The Hover is attached to the heater with easy rolled edge slip joints, and can be quickly detached and set aside to clean the floor.

The Buffalo Home-Brooder Hover is easily heated, handy to clean, and thoroughly efficient. It is equipped with a wafer regulator. It is two feet in diameter, and will care for 100 chicks—as many as will ever do well together in one flock.

POULTRY KEEPERS' SUNDRIES.

Wardin's Flight Arrester

5/- doz. ; -/6 each

This invention will restrain the flight of anything with wings, from a sparrow to a large turkey. They can be kept on the fowls continually or not, as desired. If kept on for a month the fowl forgets the desire to fly, and they can then be taken off. It is seldom necessary to put them on a second time. They are very easily adjusted or removed, and after being on a short while are hidden by the feathers; flexible, light in weight, and do not burden the fowl in the least, are rust proof, so will not soil the feathers.

How to put on.—In a sitting position, place the fowl between the two boxes, bend the wire over the back of the neck. Arresters with the hooks one under each wing, then fasten hooks at the back of wing on the elbows. If the wings stand out or droop, bend the wire which crosses the back upward in the middle a little, thus forming a slight bow, and press the wings gently to the body. After adjusting put the fowl down. It will back and flicker for a few moments, but will soon cease. Care must be taken not to let it press the wing bones. If it does so, take off, widen it by bending and replace.

Poultry Punch, circles, half-circles, diamonds, hearts, etc. ... 1/- each

No. 2

Poultry Punch, strong spiral spring, round hole only—1/6 each

These punches are so simple in construction that they will appeal to all as a practical tool. They make a good, clear, clean cut and do not irritate the web.

Oags to Prevent Feather Pulling—

1/4 each

This bit keeps the bill just far enough apart to prevent catching the feathers. It does not interfere with the fowl feeding.

Description.—Open the bird's beak, pass the bit between the two mandibles, bring the bone wires on both sides of the comb, and fasten the bit at the back of the comb by means of the small winging slide. The wires being placed can be bent to shape of bird's head.

Philadelphia Poultry Marker.

Inland Poultry Marker.

The Philadelphia Poultry Marker... 1/4

This little instrument, used to punch web between toes, is invaluable to the poultry raiser in marking young and old chickens, capons and all kinds of fowl. This marker enables every farmer and breeder to recognise their own fowl at a glance.

### POULTRY BASKETS—

Round or Square	...	...	...	...	...	4/10, 6/- each
-----------------	-----	-----	-----	-----	-----	----------------

No. 3—Green Bone Cutter and Farm Mill Combined, as illustrated, for power; weight 800lbs. Capacity 600 to 10,000lbs. of Bone in 18 hours. Grain 6 to 12 bushels per hour. Can be run with 1, 2 or 4-horse power ... .. £11/5/-

Regular size pulley, 8in. diameter, for 3in. or 4in. belt. Speed of mill from 600 to 700 revolutions per minute. It is the most complete mill for general use. The burrs are held in place by weight and lever, same as the large power mills. The burrs are so constructed that it is not necessary to run the bone through the mill more than once, grinding it fine the first time.

No. 3 Humphrey Green Bone Cutter, for direct power; capacity unlimited; weight 240lbs. £11/2/6

Will cut 47½ pounds of bone in four and three-quarter minutes, and we recommend it for the use of butchers and poultry raisers.

The cutter-head is 12in. in diameter, carries four heavy corrugated oil-tempered cutters, and can be run from 200 to 400 revolutions per minute. Tight and loose pulleys are 18in. x 4in. The main bearing in bronze, bushed, with centre oiling chamber and oil-soaked anti-friction washer back of cutter-head.

# GREEN BONE CUTTERS.

No. 1

No. 2

No. 6

No. 1—Humphrey Green Bone Cutter hand power; weight, 120lbs. ... 77 6

We recommend the Humphrey No. 1 for flocks of 10 to 200 hens. It has a large open hopper, ready for large bones at any time. Power fully back-gear; heavy balance wheel; the anti-friction washer back of cutter-head becomes soaked in oil, and prevents cutter-head from heating, reducing friction to the minimum. Four heavy corrugated knives, oil tempered. Holes furnished with cheek nuts to prevent knives from loosening. Tail nut on top, enables removal of wing, exposing all working parts instantly without use of wrench.

No. 2 Humphrey Green Bone Cutter. Capacity, by hand, 200 hens; by semi power, 600 hens. weight, 135lbs 95/-

No. 24 has all the special features that have made the Humphrey line of Bone and Vegetable Cutters so well liked by poultrymen

No. 6—Humphrey Green Bone Cutter, for power. Capacity, 1000 to 1500 hens; weight, 174lbs. ... £7/-

The cutter-head of No. 6 is 10ins. in diameter, carrying four heavy corrugated and oil-tempered cutters, and the bearings are bushed with bronze

## GRIT AND CORN MILLS.

Wilson's "Gem" Clover Cutter, for hand use—

With short legs; weight, 50lbs. ... 48/-  
" long " " 60lbs. ... 54/-

All iron and steel. Cuts green or dry, flea, even and easy. It has screw-feed and adjustable cutter-head which can be taken out and sharpened or replaced. The steel knives are so arranged that they can always be kept square on the cutting bar, making a clean cut. The cutter with short legs is intended to cut on a bench or table.

The secret of all successful feeding, whether of human beings, live stock or fowls, is in securing what the scientific gentlemen call a "balanced ration"—that is, a sufficient quantity of food containing every element needed for sustaining life and energy.

Theoretically, that is why successful poultry raisers feed green bone and cut clover.

Practically—and maybe that is more to the point—they feed both bone and clover, because experience has demonstrated beyond dispute that they produce eggs.

Wilson's Grit and Corn Mill, No. 1 ... 20/-

If you want birds of grit, give them the means of masticating their food.

The Enterprise Shell and Corn Mill ... 35/-

These Mills are especially adapted for grinding Shells, Corn, Grain, Chicken Feed, &c One of these Mills will soon pay for itself.

Will not cut Green Bone.

All Prices in this Catalogue are subject to Market Fluctuations.

# ANTHONY HORDERN & SONS, LTD., PALACE EMPORIUM, SYDNEY.

## GRIST AND GRINDING MILLS, &c.

No. 12 Hand Power.

### The Springfield Ball Bearing Hand Grist Mill—

(No. 12) ... .. 15/-

Unexcelled as a Hand Power Mill for grinding or granulating all kinds of grain, dry bone, charcoal, &c. for poultry food, and for making stock feed, rice meal, corn meal and whole wheat flour for family use.

A hardened steel ball bearing is placed between the end of the 3in. crusher shaft and the regulating screw; this relieves the end-thrust friction, and makes the mill very easy to operate. The grinding plates are 4 1/2in. diameter, and can be adjusted for grinding coarse, medium or fine. Plates and crushers are made of a special high carbon metal, harder than steel, and are renewable. Can be quickly and securely attached to a bench, box or other support, and all parts are easily accessible without removing the frame from its fastenings. Symmetrical in appearance, strongly built, and handsomely finished in Green and Gold.

### A CHEAP and HANDY GRINDING MILL

... For FARM or FAMILY USE.

The Tennessee.

It is readily taken apart for cleaning or oiling without the use of any tools. Easily adjusted for fine or coarse grinding of corn or other dry grain ONLY. All bearings are chilled—crank of malleable iron; and the Grinding plates made of the hardest and strongest metals.

Weight, complete, 12lbs. ... .. 10/-

Wigmores Test Dilator ... .. 2/-

This instrument is used for dilating obstructed tanks introduce the dilator with the style half withdrawn like one s, then force the style back again to the end like out s

# THE "BALANCE" CREAM SEPARATOR.

During the last few years, Milk Separators have been extensively used in dairy farming. The reason lies with the considerable advantages derived from this machine. No farmer, therefore, should fail to get a "BALANCE" SEPARATOR. It is now-a-days simply impossible to profitably work a dairy farm without a good Milk Separator. Whereas with the old pan method of standing the milk, which has first of all to be cooled and freed of air, and then stood for days in large rooms with specially regulated temperature, to separate by itself, our machine separates in the shortest space of time, immediately after milking, *i.e.*, whilst the milk is still warm. But it is not only the saving of time and space which speaks for the Separator, but chiefly the direct profit that is obtained.

Using the "Balance" Separator for separating milk, one may, according to local conditions, expect an average increase of 10 per cent. in the quantity of butter in comparison with that obtained by the ordinary method of separation. According to season and previous method, the increase may be even as much as 15 or 20 per cent.

The simplicity of construction and the few parts that have to be removed for cleaning make it a favorite machine. The capacity of the output and results of some equal any of the higher priced machines.

The scale of separation given below is understood for milk direct from the cow (as used for the tests in the laboratories) and not for milk which has been transported. The results become smaller the longer the milk has been standing and the farther it has been transported.

## SCALE OF PRICES AND SEPARATION OF THE "BALANCE."

Cow-Milking Tube ... 3/- each

The illustration shows the improvement in Cow-Milking Tubes, whereby Cows can be milked almost dry without allowing any air to enter the teat or udder, which at times causes considerable trouble. They are made in various lengths.

Self-Retaining Cow-Milking Tube ... 7/6 each

Specially invented to reduce the time of milking. A farmer or dairymaid can milk a cow in less than half the time it takes by hand. Assorted lengths.

Cow-Milking Tube ... 3/6 each

Highly recommended for sore or obstructed teats and hard milking cows. Inserting silver and silver-plated tubes in three sizes—Ecc., Min. and 4in. long.

Duplex Lancet Probes

7/6 each

The illustration herewith presents the latest improvements in self-retaining milking tubes. The demand for something that has been on the market heretofore for extremely sore teats, has forced us to invent this instrument. The instrument is perfection. The letter representing the different parts are as follows—  
a is the cow's teat, b is dotted line the tube within the teat, c the walls of the teat, d the handle of the self-retainer, e for holding the rubber band, f is a hole in the tube to suit a size teat, g rubber band, h splitting to hold rubber band, i top curve of the syphon. The milk can never get below this point, and the curve makes a perfect trap, so it is impossible for any air to get into the teat; j is outlet for the milk to pass. All of the syphon parts of this tube are the finest black-iron heavily silver-plated, therefore cannot corrode.

Wigmore's Self Retaining Syphon Milking Tube, 6 each

## GLACIER WINDOW DECORATION.

We can supply catalogues of Glacier, showing colors, designs and prices. The charge for same is 2/6 each, the amount being refunded on return in good order.

Made to represent Stained Glass.

For Fan Lights

For Church Decoration

For Window Decoration

## GLACIER WINDOW DECORATION.

These elegant decorations are designed to imitate Stained Glass, and well they do so. The most notable advantage is that they can be made in any color, and in any design, by means of Glacier Decorations, windows, doors, and other glass panels, windows of plain coloring, no matter how large, panels of brass, or silver, and many other spaces may be made in any color, and in any design.

When ordering Glacier Decorations, state the character, size, and shape of the window or door to be covered, and the design of decoration wanted for it. For prices, the cost of the material, when full particulars, prices, etc., will be sent by post.

# DECORATIVE WALL PAPERS.

Patterns of Wall Paper sent Post Free anywhere.

When writing for patterns please give description of room or place to be papered, and some idea as to price.

**Dark Pulp**, Floral, Geometrical, and other designs in dark colors ... from -/3½ per roll; 3/3 per doz.

**Light Pulp**, similar patterns, but in lighter shades— from -/4 per roll; 3/3 per doz.

The variety of color and pattern in this make of paper is almost inexhaustible. They are suitable for Kitchens, Dining Rooms, Bedrooms, Parlors, &c.

**Floral and other Patterns on Light or Dark Ground**, for Dining Rooms, Bedrooms, Parlors, &c.— from -/9 per roll; 8/4 per doz.

These papers, from the best White Pulp, are machine or hand-made according to price. Some really lovely effects are available

## Wall Papers—

Figured Ingrains ... from 1/3 per roll  
Plain ... 1/- ..  
Figured Oatmeal Ingrains ... 1/8 ..  
Plain ... 1/6 ..

**Wall Paper for Shops, Halls, Passages, Staircases, &c.**, in imitation of Sienna and other Marble, Tiles, &c., as well as Oak, Maple, and wood of various kinds.

**Sanitary Wall Paper** ... from -/8 per roll; 4/8 per doz.

Sanitary Wall Paper being stained or printed in oil, is less likely to absorb injurious particles than other kinds. It can be washed with warm water when soiled, no small advantage.

## Gold Paperhangings—

In qualities ranging from -/7 per roll

**Lignomur**, a most suitable material for wall and ceiling decoration, in high relief, and of light texture. It adapts itself to any scheme of decoration.

Samples of Lignomur, and instructions for hanging forwarded on application.

Prices range from 6/- per roll of 12 yards long by 21 inches wide.

**Wall Paper Friezes**—Our stock of these goods comprises the productions of makers of repute, and are specially manufactured to match all Wall Papers sold by us. They can be supplied in widths 10½ and 21in. at prices according to width and design—

Ranging from 1/4 to 2/8 per yard

Enquiries by post will receive prompt attention, and Customers would assist us in selecting by stating width and colors required, and price it is intended to pay. If possible, post a pattern of the paper to be matched, when a sample of the nearest Frieze we have in stock will be forwarded

**Narrow Borders**, for Wall Papers can be supplied in the following widths—

3in., -/9; 4in., 1/-; 5in., 1/6; 7in., 2/- doz. yds.

**Wall Papers**—Our stock of Wall Papers comprises an endless variety of high class artistic hand and machine printed decorations, such as: Satin Stripes, Figured Satins, Tapestry Effects, Burlap Pebbles, Panelling and Crown Decorations, Plain and Figured Oatmeals, Plain and Figured Ingrains, hand and machine printed Friezes, &c.

## AM-I-WUD.

### THE LATEST INTERIOR FINISH FOR BUILDINGS.

**AM-I-WUD** is imitation Hardwood, made from Wood Pulp for panelling Dados, &c., but the grains are a mechanical reproduction (not imitation) of the Artistic Oak and other hardwoods. It is identical in effect and appearance, but better, cheaper and more practicable in results. The grains and colors are reproduced on a chemically treated wood-fibre pulp substance, treated with ingredients which make it proof against moths and vermin. In **Am-i-wud** the following Hardwoods are reproduced: Weathered Oak, Jambiro and Mahogany.

### Prices.

<b>Am-i-wud Veneer</b> , for covering Wooden Mouldings or Beams, where Plank and Rafter effects are required, 1/60 for repairing: Rolls 36 feet x 24 inches 8 square yards ... .. 6/6 per roll
<b>Am-i-wud B Grade</b> , Light and pliable adapted to paste on to any smooth surface, either soft or hard finish plaster: Rolls 45 feet x 24 inches wide 10 square yards ... .. 11/6 per roll
<b>Am-i-wud Battens</b> , for covering joints, in lengths 12 feet x 2 inches wide ... .. 3/8 per length

### Instructions for Applying B Grade Am-i-wud.

This material can be compared in weight and hanging qualities to a kno-wall. It should be hung with paste such as paperhangers use, either a flour paste or a good grade of chemically prepared paste being equally satisfactory. The wall should first be prepared by scribing, according to the surface. On a bare plaster wall a good coat of glue size to stop absorption will be sufficient. If the wall be previously covered with paper, paint, or other coating, it should be prepared in the same manner as would be done for Lincrusta.

In hanging, first cut the material to the proper size of panels. Next lay each piece on its face and wet the back with cold water. This makes it more pliable and easier to handle, and prevents it from absorbing all the water out of the paste, which would diminish the adhesive qualities. Roll each piece as it is wet and set it aside for a time. In doing an ordinary room you can wet all the panels down, and then go right to work on the first one. Use the paste fairly heavy, free from lumps, and push the damp water all free and smoothly, then hang on the wall same as paper, brushing it on bare wall as if brush paperhanger's smoothing brush. There is no matching or butting of joints, but it is well to watch the grain and avoid repeats in adjacent panels. An inch or more can be left between pieces, as the battens will cover this space.

The battens are nailed on in the same manner as with the heavy grade. If the nailing is good and firm, a 1½ inch finishing nail placed along each edge at intervals of 8 or 10 inches is sufficient. If the backing is merely lath and plaster, it is best to both paste and nail the battens.

## TRIUMPH BRAND MINERAL LUBRICATING OILS.

Noted for High Efficiency, Absolute Uniformity, Great Economy

	Price per gal. in 4 gal. tins including tin.	Price per single cask including tin.
<b>TRIUMPH A OIL—</b> A highly refined Pale Oil for use on all classes of very light running Machines, Sewing Machines, small sized Lathes, very fast running Spindles, small Cream Separators, and for all purposes where high speed with light loads are points to be considered. The lightest bodied Mineral Lubricating Oil stocked by us, and recommended only for light lubrication, but it may be employed for blending with seed and animal oils ... ..	2/3	3/-
<b>TRIUMPH B OIL—</b> A very heavy bodied Black Oil. For Heavy Colliery and Mining Machinery, Road Rollers, Cog, Gear Wheels, and for many situations demanding the employment of a cheap full-bodied Oil. It is extremely viscous, and therefore specially suitable for all kinds of mining work where fluidity at any temperature below 60° Fahr. is not essential. Where fluidity below that temperature is desirable, Triumph C Oil is recommended ... ..	2/6	3/3
<b>TRIUMPH C OIL—</b> A Black Oil, but of a much more fluid character than Triumph B, and is largely used for Rough Machinery Sawmills, and in Machine Shops on swift running shafts and high speed journals generally, and for heavy Separators. It is a specially good dark lubricant, and has high viscosity and flash point, and is a most desirable oil for use in cold temperatures, as its cold test is under that of freezing point of water, viz., 32° Fahr., and it will flow and syphon splendidly below that temperature ... ..	2/6	3/3
<b>TRIUMPH D OIL—</b> A very high-class pale amber colored Machinery Oil. For Swift Running Machinery, high-speed Shafts and Spindles, large hand-power Cream Separators this oil will give splendid results. Used also on Gas and Oil Engines of the smallest type, both for Cylinder and Bearings. Has a greater sale than any other pale lubricating oil, and innumerable uses may be found for it ... ..	2/9	3/6
<b>TRIUMPH E OIL—</b> An extra heavy bodied Lubricating Oil, unrivalled in hot climates and for use on all classes of Heavy Machinery, Marine Engines, &c. A very excellent Reaper and Binder Oil; and, in fact, for almost any kind of Farm Machinery (except Cream Separators, for which either Triumph A or C must be used) this oil is unrivalled. Possesses good wearing qualities, and is an oil that stands severe working conditions ... ..	3/-	3/9
<b>TRIUMPH F OIL—</b> A pale oil having splendid tests and suitable for all classes of Heavy Swift Running Machinery and high speed Shafting, Dynamos, Motors, large Gas and Oil Engines. Highly recommended for Air Compressors. Has good lasting qualities and syphons readily ... ..	2/9	3/6
<b>TRIUMPH G OIL—</b> The best pure Mineral Oil for heavy Mill and Mining Engines, heavy Dynamos and Motors, and all classes of high-speed machinery making long runs. Guaranteed to give satisfaction under severe working conditions. Used with very excellent results on the heaviest types of Oil and Gas Engines, both for internal and external lubrication ... ..	3/3	4/-
<b>TRIUMPH H OIL—</b> A high grade dark Cylinder Oil having high flashing point. A very reliable Cylinder Oil for use on large Steam Engines. The O.I. may also be used with excellent results for very heavy bearings ... ..	3/-	3/9
<b>TRIUMPH I OIL—</b> A light colored Cylinder Oil obtained by filtration through animal charcoal. One of the best known Cylinder Oils imported and used with excellent results where good lubricating property is required at a reasonable price ... ..	3/3	4/-
<b>TRIUMPH K OIL—</b> A filtered Cylinder Oil having a better cold test than Triumph I; and, therefore, more suitable for use during cool weather. It has also the advantage of being a first-class all round lubricant, and this fact enables an engineer to use this oil exclusively for lubricating a Steam Engine ... ..	3/6	4/3
<b>TRIUMPH L OIL—</b> The best filtered Valve Oil manufactured. Has an unusually low cold test, whilst flash point and viscosity are high. May be used in many situations in place of Castor Oil with perfect satisfaction. Beautifully clean and durable in working, and is highly recommended ... ..	4/3	5/-
<b>TRIUMPH M OIL—</b> A very high class Black Cylinder Oil, having a flashing point not under 600° Fahr. Has heavy viscosity, and is eminently suitable for Marine and Locomotive Cylinders, &c., and for high pressure Steam Engines making long runs ... ..	3/3	4/-
<b>TRIUMPH N OIL—</b> Specially manufactured for use on Refrigerating Machinery, Cold Storage Plants, &c. In these situations it is essential to use a pure Mineral Oil, which this oil is guaranteed to be and it will remain liquid under zero ... ..	3/-	3/9
<b>PRICE'S MOTORINE C</b> ... .. per 2-gal. tin	10/3	
<b>OLEOGENE D</b> ... ..	8/9

To thin these paints. First, take from the can enough paint to do the job in hand, and stir well in the cup before adding any thinning, then add a small quantity of turpentine, stirring all the time and adding until the whole mass becomes smooth and free from lumps, giving the contents of the cup the appearance of a perfect solution; this being done add sufficient Raw Linseed Oil to retard drying, to your liking. Bear in mind that the oil must in all cases be put in last, and that in thinning the color with Turpentine, room must be left for oil. Do not add the Turpentine all at once; pour it on little by little.

# FOR INSIDE AND OUTSIDE WORK.

## GLIDDEN'S WATERPROOF FLAT FINISH.

FOR INTERIOR DECORATION.

These finishes are prepared for the special purpose of decorating all interior surfaces, viz.: new or old plaster, plaster of paris, smooth or rough finish, sand and cement rough coat finish, plaster wainscoting or panels, composition plaster or stucco surfaces, wood wall linings, metallic ceilings or side walls, and wood.

They can be cleansed by the application of a good soap and moderately hot water, making them an economical and sanitary finish for the most interior decoration.

Their covering capacity varies from 500 to 600 square feet to a gallon under ordinary surface conditions.

In the following shades:—Pink, Light Blue, Pearl Grey, Cream, Buff, Light Yellow, Chrome Yellow, Light Green, Eau-de-Nil, Dark Green, Cardinal Red, Brown.

1 gallon.	$\frac{1}{2}$ gallon.	$\frac{1}{4}$ gallon tin
12/6	6/9	3/9

## GLIDDEN'S ALKALI PROOF WALL SIZE.

ESPECIALLY PREPARED AS A WALL SEALER.

Glidden's Alkali Proof Wall Size is especially prepared as a priming or sealing coat for old or new plaster, cement, composition plasters, and general surfaces. Its features are the penetration of the porous surface, thereby counteracting the general alkaline reaction of the plaster or cement, sealing the pores, and giving the wall coating protection from discoloration under ordinary circumstances.

1 gallon tin ... ..	7/6
---------------------	-----

## GLIDDEN'S ENDURANCE WOOD STAINS.

Made by a special process. The colors are the most permanent on the market, penetrate and do not raise the grain of the wood.

Glidden's Endurance Stains are to be used on new wood which has never been finished. In case it is desired to refinish wood that has been finished, it is necessary to remove the old finish.

In the following colors: Light Golden Oak, Dark Golden Oak, Fumed Oak, Flemish Oak, Cathedral Oak, Weathered Oak, Mission Oak, Black Flemish Oak, Kress Green, Dark Kress Green, Early English, Silver Grey, Light Mahogany, Dark Mahogany, Weathered Brown.

1 quart.	1 pint.	$\frac{1}{2}$ pint tin
4/-	2/3	1/4

Shade Card free on application.

## GLIDDEN'S LIQUID CEMENT.

(COATING.)

FOR OUTDOORS OR INDOORS

This coating for Cement, Concrete, Stucco, Brick, and Stone Surfaces, is a modified cement, incorporated with or carried in suspension by a durable, water-resisting vehicle. Its functions are to damp-proof and uniform the surface color of Cement, Concrete, Stucco, Brick and Stone, without destroying the surface texture, producing a pleasant decorative effect.

In the following shades: Pale Cream, Mid. Stone, Dark Brick, Dark Grey, Light Stone, Brown, Light Grey, Light Brick, Buff.

1 gallon tin ... ..	12/8
---------------------	------

Shade Card free on application.

## GLIDDEN'S ENDURANCE ROOF & SHED PAINT

(RED.)

FOR ROOFS, SHEDS, FENCES, OUTBUILDINGS, &c.

This is the best and most durable outdoor paint for wood or iron surfaces. It is made with China Wood Oil, which makes the greatest protection to the surface against the elements. It is easy to apply, and dries with a fine, smooth appearance. It has great covering capacity, and will outlast any Linseed Oil Paint made.

1 gallon.	$\frac{1}{2}$ gallon	$\frac{1}{4}$ gallon.
8/6	4/9	2/9

Card of Color free on application.

## "ELASTICOTE" PAINT.

'Elasticote' is not affected by heat, water, or acids of any kind, and positively protects and preserves everything which it covers.

'Elasticote' imparts no odor or taste of any kind and will not discolor any liquid with which it comes in contact, thus making it an excellent coating for iron tanks, iron roofs, &c.

In appearance 'Elasticote' is rich and attractive, which makes it desirable for painting houses, barns, boats and particularly surfaces subjected to severe exposure or great variations in temperature.

In the following colors: Slate Stone, Buff, Olive Green, Bronze Green, Grey, Fawn, Terra Cotta, Red, Brown, Maroon, Black, White.

## BEDSTEADS AND BEDDING.

Given a Soundly-built Bedstead, Comfortable Bedding, and needful accompaniments, and a good many of life's worries may be minimised, if not altogether lost their sting.

A study of the following pages, in company with other parts of this Book, will surely lead to this happy consummation.

Not only do we import Bedsteads from well-known British Manufacturers, but the Manufacture of Bedsteads is an important feature in the work done at our Rodfern Factories.

No. 70

**The Palace French Wood Bedstead, Stained Morris Green, with Iron Side Angles. A strong and neat Bedstead (No. 70) —**

6ft. 6in. x 3ft. ...	70/-
6ft. 6in. x 3ft. 6in. ...	75/-
6ft. 6in. x 4ft. ...	84/6
6ft. 6in. x 4ft. 6in. ...	90/-
6ft. 6in. x 5ft. ...	95/-

Can be Stained Walnut Color, Rosewood, &c.

**Italian Tops to Fit French Bedsteads, viz. — Two Uprights, Pair Italian Arms, Back and Front Rods.**

No. 1.—Painted to match Bedstead, Plain Arms ...	30/-

and Stretchers, 3/6 extra.

## THE UNIVERSAL BEDSTEAD.

MADE AT OUR REDFERN BEDSTEAD WORKS.

In place of the usual angle irons, the Bedstead is held together by the Wire Mattress dropping into Shoes or supports (see illustrations) at each corner. These shoes can be turned so as to minimise space required for packing, and so save freight (see illustration No. 3).

No. 1.—French Bedstead.

No. 2.—Showing Shoes folded for convenience of packing.

Spring Stretcher.

In ordering Spring Mattresses for Cots and Bedsteads in sizes other than quoted, measurements should be sent as follows —

Length, inside Bedstead, from post to post.  
Width, outside edge.

## THE CHOICE OF CARPETS.

BY attending to the directions contained in the following pages, country residents may secure all the advantages at the service of town buyers. For post orders the same prices are charged, and selections are made from the same stocks.

In the choice of Carpets or other Floor Coverings, appropriateness is essential. The surroundings should be studied, and the character of the furniture carefully considered, so that while the comfort of the apartment is increased, the harmony of everything it contains may be preserved. Before selecting a carpet, it is well to decide whether it shall be fitted to the room, or be in the form of a bordered central carpet.

### ... THE MODERN FASHION ...

of a bordered central carpet, with a "Surround" of another material, has many advantages, not the least being that the carpet can be more readily taken up and more easily adapted to another apartment. With regard to the material for the "Surround," Linoleum is largely used in plain colors, Brown, Green or Terra Cotta, also in Matting patterns in Soft Art Shades, or in imitations of Parquet or Polished Oak Boards. Plain colored Felt, made in almost any Art Shade or color, is also admirable for "Surrounds." Descriptive price list will be found on page 1297. Japanese Matting may also be used in the same way, a neat and cool appearance resulting.

## Hints for Carpet Buyers

OFFERED IN FURTHERANCE OF A DESIRE TO AFFORD THE BEST INFORMATION ON AN IMPORTANT SUBJECT.

### THE DRAWING ROOM.

Of suitable carpets first place must be accorded to Axminster. In no other fabric can the same delicately soft, rich, bloomy effects be obtained, while the price, as will be seen, places this lovely carpet within the reach of everyone.

Brussels Carpet, though not possessing the rich, velvety appearance of Axminster, costs less, and is extremely durable; while for smaller rooms, or when an inexpensive carpet is desired, Tapestry or Art Squares may be used with advantage.

### THE DINING ROOM.

Axminster or other Pile Carpets are suitable for the Dining Room, but Brussels Carpet, from its capacity for hard wear, combined with pleasing effect at a moderate cost, is often preferred.

Another way is to cover the Dining Room with Linoleum in carpet pattern. Linoleum, while being almost as effective as carpet, is cooler, more easily cleaned, and less expensive.

### THE BEDROOM.

Carpet Squares, as described on pages 1295 and 1296, are very appropriate; or the plan of covering the floor with a pretty Carpet Pattern Linoleum with a Bed Surround of Axminster, Brussels or Tapestry Stair Carpet finds many friends. Mats or Rugs placed in various parts of the room renders the apartment comfortable and attractive.

### THE HALL AND THE KITCHEN.

Should be laid with Linoleum of geometrical design. The Hall can be made more attractive by placing a "runner" of Stair Carpet down the centre.

# ANTHONY HORDERN & SONS, LTD., PALACE EMPORIUM, SYDNEY.

## CARPET SQUARES.

The advantages attaching to Carpet Squares are set forth on the preceding page, and before deciding on your Carpet it may prove useful to consider the whole question. Following are price lists and information relating to various kinds of Carpet Squares, and on page 1297 will be found particulars of Carpets sold by the yard. With the fullest confidence in our power to satisfactorily fill your order, we invite perusal.

### AXMINSTER SQUARES. Of British Manufacture, woven in one piece.

These beautiful Carpets are manufactured upon specially constructed looms, and are woven in one piece. The illustration No. 717 shows an Axminster Square of British manufacture, the different sizes in which this pattern is made being stated. The illustration is useful as shewing the pattern of the Carpet, but it is impossible in this way to reproduce the lovely soft rich shades of coloring for which Axminster Carpets are noted.

		Quality No. 1.		Pattern No. 717		Rich Crimson Ground.			
		Sizes							
No. 1 quality	...	9 x 9	10½ x 9	12 x 9	12 x 10½	13½ x 10½	15 x 12	feet	
	...	£5/-	£5/15/-	£6/12/6	£7/15/-	£8/15/-	£11/2/6		

### SEAMLESS AXMINSTER SQUARES.

		Quality No. 1.		Quality No. 2.			
		Sizes

	...	72/6	85/-	97/6	£6/5/-	£8/-	

### TAPESTRY SQUARES

are suitable for almost any room. They have in a great measure the appearance of Brussels Carpet and are very much less expensive. Made in two qualities, and in the following sizes.

		Quality No. 1.		Quality No. 2.			
		Sizes					
No. 1 quality	...	7½ x 9	9 x 9	9 x 10½	9 x 12	12 x 10½	12 x 12
No. 2	...	40/-	47/6	47/6	55/-	63/-	72/6
	...	28/6	33/6	40/-	47/6	57/6	65/-

When ordering give idea of Coloring and class of Design preferred.

# BRUSSELS SQUARES.

These Carpets are made up in widths, the border being woven instead of sewn. By this system there is no waste in making up. There is a fine array of patterns and colors in Brussels Squares, from which people of widely different taste may choose with satisfaction.

Pattern No. 6617. Made in Quality No. 1 only.  
Fawn Ground, Brown, Pink and Green shades.

Size	9 x 9	10½ x 9	12 x 9

# HEARTH RUGS.

Variety reigns supreme. Among the best are various qualities of Axminster Rugs, **Angora Rugs in Pure White**, also **Mohair Rugs in Olive, Ruby, Old Gold, Terra Cotta, and Blue.** Mohair Rugs, fringed at the ends, are among the newest and prettiest, being remarkably effective wherever placed. Mats to match Mohair Rugs are also made.

## CARPETS AND SUITABLE "SURROUNDS."

Remarks on page 1294 will be found fully explanatory.

### AXMINSTER CARPET—By the Yard.

The excellence of the Axminster Carpets we offer, both from the point of artistic merit and from that of extreme durability, is beyond question.

Imperial quality ... 6/9 yd. | Heavier quality ... 8/6 yd.

### BRUSSELS CARPET—By the Yard.

Of all Carpets Brussels is probably the most generally used. We are continually receiving from the manufacturers striking novelties in designs and colorings.

Best Five Frame quality ... 5/11 yd. | Special Five Frame quality ... 4/9 yd.

### TAPESTRY CARPET—By the Yard.

The soft colors and delicate shades, until recently only found in more expensive goods, are now available in Tapestry Carpet.

Tapestry Carpet ... 2/8, 3/3 yd.

The prices quoted for Carpet by the yard are for the Carpet only, and do not include the cost of making up, for which our charge is as follows:—

Axminster and Wilton ... 1/6 yd. | Brussels and Tapestry ... 7/6 yd.

### SANITARY CEDAR FELT.

For Laying under Carpets, Floorcloths, &c.

This Felt entirely protects the Carpet from moth, and retains the aroma of the cedar wood for years. It makes the Carpet last twice as long, and prevents draughts and dust coming through the seams and cracks in the floor.

5ft. wide ... 7/8 yd. | Per piece of 50 yds. ... 32/-

The Tree Brand Felt, for laying under Carpets, Linoleums, &c. This Felt is made expressly to our order, every yard being stamped with our name and trade mark.

5ft. wide ... 7/8 yd. | Per piece of 50 yds. ... 22/6

### MATERIALS SUITABLE FOR SURROUNDS.

As described on page 1294.

Plain Linoleum—Green, Crimson, 6ft. wide—

4/-, 5/6, 8/ running yard

" " Brown, 6ft. wide

3/9, 5, 7/6 " "

Printed Linoleum, in Matting patterns, Parquet or Oak Boards

2/9, 3/3, 3/6, 4/9, 5/6 running yard

### ART FELT.

Plain Felt in Art Shades is sometimes used as a floor covering, but it is more frequently employed as a Surround for Drawing Room Carpet Squares. See page 1294

Art Felt, in almost any shade, width 42 in 4/6 yd. Patterns sent on application.

### BED SURROUNDS.

In connection with Bed Surrounds the remarks on page 1294 are well worth reading. Patterns of Carpet for Bed Surrounds sent on application.

	For 3ft. Bedstead.	For 4ft. 6in. Bedstead.
Width of Stair Carpet	27 36	27 36 in.

Axminster	55/-	87/-	58/6	92/-
Wilton	50/-	80/-	52/6	84/-
Best Brussels	42/-	69/-	45/-	75/-

## FURNISHING THROUGHOUT.

The general question of furnishing will often crop up when Carpets and Floor Coverings are under consideration and we have much pleasure in referring residents in the country to the various price lists contained in this book that bear upon House Furnishing. From page 1294 to the end the main features of this important work are dealt with, and a reference to the Index will put the reader on the track of all the others.

### STAIR CARPET.

Stair Carpet is made in various fabrics, and applied to many purposes, besides that of carpeting stairs. For instance, Bed Surrounds, Billiard Table Surrounds and Runners to my down in halls, corridors and similar places, are made of the Carpets enumerated in the following list.

Axminster Carpet is excellent for the purpose. It has a rich appearance and is soft to the tread.

Brussels Stair Carpet is recognised as excellent, and is sometimes chosen in preference to others. It always looks well and gives good wear.

Tapestry Stair Carpet is made as narrow as 18in., and there are several qualities in that width. There is a great variety of patterns, including plain centres with different colored borders, as Grey, Oak, and Crimson, and Green.

	Width	18	22½	27	36	in.
Best Axminster	...	—	9/-	9/6	15/-	yd.
Imperial Axminster	...	—	8/6	8/8	11/6	"
Best Wilton	...	—	7/6	8/-	12/6	"
Velvet Pile, Plain Centre, Crimson Border, or Crimson Centre with Gold Border	...	—	6/9	7/3	10/6	"
Best Five frame Brussels	...	—	5/6	5/11	9/6	"
Second quality	...	—	4/-	4/3	4/4	7/6
Special	...	—	3/8	3/9	4/3	—
Tapestry, A quality	...	—	2/8	2/6	2/9	—
" B	...	—	1/10	2/2	2/6	—

### WOOL BUGGY MATS.

Best quality Long Wool—Amber, Crimson, Dark Green.

Size, 30in. x 12in.	...	...	6/6
" 30in. x 14in.	...	...	7/6
" 30in. x 18in.	...	...	9/6

The above are the measurements of the skin. The wool projecting beyond the skin gives the mat a much larger appearance.

### INDIA RUBBER MATS.

Largely used for Doorways, Bathrooms, Buggies, Motor Cars, &c., can be made to any size or pattern, with or without lettering. For guidance we quote a few useful sizes and prices—

27in. x 16in.	...	...	9/6
30in. x 18in.	...	...	11/9
33in. x 20in.	...	...	14

For cost of lettering, kindly send wording and size of mat required, and a quotation will be sent by return of post.

### VESTIBULE AND HEARTH RUGS.

Rugs suitable for Vestibules, Halls, and Corridors.

The Vestibule Rug has of late become very fashionable. A Hall not being considered complete without a Rug, or, failing that, a Carpet Runner, see page 1294. We have a splendid assortment of Rugs suitable for the purpose, including Real Indian Hand-made Rugs and Axminster Rugs of various designs, while, if a less expensive Rug is required, Japanese Jute Rugs in rich Eastern Designs and Coloring are available.

Price List of Vestibule Rugs with sizes on application, post free anywhere.

### FELT PADS FOR STAIR CARPET.

As a matter of economy, Carpet should never be laid on stairs without Stair Pads underneath. They preserve the Carpet wonderfully, and give a softness to the tread that is most desirable.

18	22½	27	in.
3/9	6/-	7/-	doz.

### STAIR DAMASK FOR COVERING STAIR CARPET.

	14	16	18	in.
Best Linen	—	—	—	—
Oil Baize	—	—	—	—

Patterns of Stair Carpets and Damask post free to any address.

# ANTHONY HORDERN & SONS, LTD., PALACE EMPORIUM, SYDNEY.

## USEFUL AND ORNAMENTAL MATS.

Mats are made of many things as will be seen by the lists on this page. Considering its useful and ornamental qualities, the cost of a really good mat is soon compensated for by the advantages the mat confers.

### MATS FOR INTERIOR DOORWAYS.

In the same materials as many of the Hearth Rugs described on page 1298 There are also less expensive mats, as The Universal Axminster Mat, Japanese Mats, and Beam Mats without Fringe, prices of all of which are stated in the following list:—

#### Cashmere Axminster—

30in. x 13in. ....	5/6
32in. x 16in. ....	7/6
36in. x 18in. ....	8/3

#### Mohair Mats—

30in. x 12in. ....	3/11
32in. x 15in. ....	5/3
36in. x 18in. ....	7/3

#### Indian Axminster Mats—

30in. x 15in. ....	4/6
32in. x 15in. ....	4/9
36in. x 18in. ....	6/3

#### Sheepskin Mats—

28in. x 9in. ....	4/9
30in. x 12in. ....	6/-
36in. x 14in. ....	7/9
36in. x 18in. ....	8/6

#### The Universal Axminster Mats, Fringed ends

2/9

#### Japanese Mats, Fringed ends

1/3

### MATS FOR EXTERIOR DOORWAYS.

#### COCOA FIBRE OR COIR DOOR MATS.

For doors leading to the exterior of the house. A good plan is to place the mat in a well sunk in the flooring; the door will then open over it without hindrance. We make Mats of any size and thickness for this purpose. Also to fit spaces of any shape, however peculiar. We also make Mats with NAME, or other wording, worked in the centre, and on receipt of particulars, quotations will be sent by return of post.

Sizes.	Medium make.	Heavy make.		Medium make.	Heavy make.
No. 1, 24in. x 14in. ....	2/3	3/3	No. 6, 39in. x 24in. ....	6/3	8/6

### WIRE DOOR MATS.

These ingeniously made Door Mats are constructed to allow for the insertion of milk white stone letters (see illustration), by means of which any name or announcement can so to speak, be printed on the mat. The mats are suitable for both business establishments and private houses.

**No. 1 Quality**, made of the best English Steel Wire, fine wave duplex mesh. This wire will not rust, is perfectly flexible, strong and springy, and will stand any amount of hard wear.

**Mats without Lettering**, these sizes only—

Sizes	30 x 18	36 x 21	42 x 24	48 x 30 in.

## INLAID LINOLEUM.

So called because the colors go right through the material, so that the pattern cannot wear off. The great durability of Inlaid Linoleum renders it specially suitable for Hotels, Banks, Offices, Public Institutions, or any place where the floor covering is subjected to hard street-like wear.

### STAINES' INLAID LINOLEUM.

Pattern No. 2, 11

Medium Quality, 6ft. wide

8/6 running yard

To avoid misunderstanding, the price for Inlaid Linoleum is quoted by the running yard for the full width of the material.

## INEXPENSIVE FLOORCLOTHS.

For those who are not prepared to pay the cost of Linoleum, the following **Inexpensive Floorcloth** cannot fail to have a special interest. Floorcloth originated in the custom of painting boarded floors in diamonds or squares of black and white, red or other colors, a troublesome and tedious work. An ingenious workman, possibly not using his task, and noticing the inconvenience arising from the process, conceived the idea of painting the patterns upon a strong coarse canvas, using his own workshop instead of his patron's house, and then laying the painted cloth upon the floor. From this has developed the manufacture of Floorcloth, and of late years there has been marked progress in the colorings and designs, many of which are most artistic, embracing **Tile and Carpet Pattern effects**. Floorcloth is made two yards wide, also in **Bordered Widths** for Halls, Passages and Stairs.

Quality, No. 1	...	...	...	Width. 72 in.	86 1/3	Bordered Widths.			18 in. - 8
						27	22 1/2	- 10	
				2/-		1/-			

### QUALITY No. 1.

Pattern No. 108. 6 ft. wide. Green, Crimson and Gold.  
Quality No. 1 ... 2/- per running yard

Pattern No. 142. 6 ft. wide. Light Green or Chamois and Gold.  
Quality No. 1 ... 2/- per running yard

The designs of Inexpensive Floorcloths are frequently changing, and in the event of the pattern selected having been sold out, we will, unless instructions are given to the contrary, substitute the nearest in a later design.

Patterns of Linoleum or Floorcloth sent free anywhere on application. When writing for same, state colors and quality required, also the price it is intended to pay.

### COCOA FIBRE MATTING.

### "MILLIONS OF MISCHIEFS"

And any amount of worry, may be avoided by attention to the following simple directions:—

Write your Orders legibly, and your name and address in full. Give the **Post Town** where an answer will reach you. **State** of parcel and invoice are to be addressed **Mr., Mrs., or Miss.**

Give the correct route by which the goods are to be sent and say to whom they are to be consigned if you live far from a Railway Station or Port.

Be careful to give sizes, colors, lengths and quantities of goods wanted, and state whether we may substitute if we have not the exact material or article in stock.

In the event of goods going astray in transit, or not arriving at their destination in reasonable time, it would be well for customers, in writing to us, to give date of invoice, to assist in tracing cause of delay.

## RISISTOID FLOORCLOTH.

Width 36in., 1/6 yard; per roll of 24 yards, 34s.

Risistoid Floorcloth, as supplied to the Federal and New South Wales Governments, can be strongly recommended as an ideal covering for stone or cement floors. It is also largely used in offices, basements, and places subject to hard street like wear. Risistoid Floorcloth is absolutely damp and vermin proof, and is, moreover, quite inexpensive. Risistoid Floorcloth is manufactured in America expressly for Anthony Hordern and Sons, Ltd., Only Universal Providers, New Palace Emporium, Sydney. Sample of Risistoid Floorcloth, sent to any address post free, on application.

## CARPETS AND FLOOR COVERING FOR CHURCHES.

In our large stock there are many kinds of Floor Coverings suitable for purposes of comfort and adornment in churches or other edifices of a similar character. In Brussels Carpet, Fleur-de-lys, Mitre and other designs are especially appropriate to Chancel or Altar. The price of this carpet is 4/6 per yard, and by following the directions appended to the plan as shown, any space may be accurately fitted. For Stone Floors we would recommend Cocoa Fibre Matting as very serviceable, and for Aisles, Vestries, &c., Linoleum has proved useful.

We can also supply Hassocks, Pew Cushions, Kneeling Mats, Brass Rods, and fixings, and shall be pleased to send patterns of suitable materials for Screens, Curtains, and other hangings.

## STAINES' LINOLEUM REVIVER.

Manufactured by the Staines' Linoleum Co.

An occasional application of this excellent mixture will greatly improve Linoleum, and restore the colors to their original brightness. The Linoleum should first be well washed with soap and water (without soda), and dried with a clean cloth. Then take a rag and apply the reviver in moderate quantity. Rub it well into the cloth, and wipe carefully off until there is no greasiness on the surface. The colors will be brought out bright and clear, and the Linoleum easily washed afterwards.

Staines' Linoleum Reviver	...	1/6 per tin
Linoleum Cream	...	/10 per tin

The diagram explains how to measure a room or other place for Carpet or any kind of Floor Covering. Draw a complete plan of the room or space to be covered, with measurements in feet and inches, and position and size of windows, doors, fireplaces and recesses, after the same way as shown.

Carefully check all measurements, positions, &c., before sending. If it is a Carpet you are ordering state whether it is to be made up with or without a border, also indicate which way the widths should run.

ANTHONY HORDERN & SONS, LTD. ONLY UNIVERSAL PROVIDERS

# HOUSEHOLD FURNITURE.

The Furnishing of a House is an INDEX to CHARACTER and TASTE.

"Our Homes are an expression of ourselves; their Furniture marks the character of us as their inhabitants; all sorts of Delicate Affinities establish themselves between us and the rooms in which we habitually live."

"Lights and Shades of Mood stamp the juxtaposition of mind and matter."

"Tendrils of habit make the Dweller and the house incorporate, and we ourselves are the spirit of the place."

"Life's I said, ending the peroration with a cheap epigram. 'Life should be the equilibrium between Beauty and Utility.'"

FRANCIS RIVERS, in *100 Papoils*.

Most of the Furniture in the following lists is manufactured at our Redfern Factories. By this method, while the quality of the materials and the best of workmanship is assured, the profit exacted by manufacturers who would otherwise supply the goods, is saved to the user.

Our Selling Prices are affected in various ways, and they rise and fall accordingly. They are influenced by the current rates of wages in various parts of the world where manufacturing enterprise is carried on; by alterations in the cost of raw materials; by the operations of Trusts and Combines, and by various other things beyond our control.

Our system of paying Spot Cash for everything enables us to buy in the best markets at the lowest rates, and these advantages are passed on to all who honor us with their custom.

**TERMS: SPOT CASH.**—In doing business with our numerous customers, we claim a ready recognition of the necessity for Cash Payments. To pay cash and give credit in return would require the wealth of Croesus ten times told and ample as are our means, and willing as we are to employ them in the service of the public, it would be impossible, except by the sacrifice of those famous low prices which have made our name so renowned, to do business except for prompt cash.

## "MILLIONS OF MISCHIEFS"

And any amount of worry may be avoided by attention to the following simple directions:—

**Write** your Orders legibly, and your name and address in full. Give the Post Town where our answer will reach you.

**State** if goods and invoice are to be addressed Mr., Mrs., or Miss.

**Give** the correct route by which the goods are to be sent, and say to whom they are to be consigned if you live far from a Railway Station or Port.

**Be** careful to give sizes, colors, lengths and quantities of goods wanted, and state whether we may substitute if we have not the exact material or article in stock.

**In** the event of goods going astray in transit, or not arriving at their destination in reasonable time, it would be well for customers, in writing to us, to give date of invoice, to assist in tracing cause of delay.

Model 6D, 4ft. 6in. high, in Burr Walnut. This model is beautifully fitted up and presents a striking elegant exterior, and as a Concert Piano has been very successful owing to its rich full tone (GA 253).

## PACKARD ORGANS.

In the manufacture and sale of their Organs, The Packard Company have taken the ground that a reputation gained by putting a superior article on the market and giving purchasers more than they expect, is more lasting than one gained by extensive advertising an article which is a disappointment when examined. That the Packard Company is right is readily shown by the increasing demand for the Packard Organ, which has gained the confidence of the music trade and the public. It is the Organ of all others to stand round when the hours of evening fall, and family voices break forth into song and praise.

No. 281.

Organ, Style No. 281—With Low Top, Walnut Case, five octaves; having two sets of reeds of two octaves each, and two sets of three octaves each (GA 281).

## FURNISHING DRAPERY.

We make up to order **Mounted Draperies, Curtains and Valances** in all kinds of suitable materials, to customers' own patterns and designs; also, **Ladies' own Needlework** neatly and tastefully mounted.

Bed Draperies for Half Testers: Four Post and Italian Bedsteads, made up in Reversible Cretonne, Cretonnes lined Sateen, Printed Sateen, Tapestry Cream, and Colored Madras Muslin, &c., trimmed with Silk, Sateen, &c., according to price required and design chosen. Quotations forwarded on receipt of particulars of style of Bedstead, Materials, Trimmings, &c.

In ordering **Bed Draperies**, size may be obtained by placing the **Tester** bow of **Bedstead** on a piece of paper, and drawing a line round the outside. With **Four-Post Bedsteads**, give length and width at top measuring from ends of posts. For **Italian Bedsteads**, state if rings are on arms and back rod, and how many; if with fixed eyelets, state how many and distance apart.

**Eeru Madras Muslin.** In various Large, Medium and Small Designs -

Tasselled both edges, 45in. wide,	1/-, 1/2	yard

# TEAPOTS.

Is it not passing strange that the poetic genius that has poured out libations of wit and enthusiasm in praise of other beverages, has never been inspired to brilliant thoughts anent Tea. The poet tells us to "Pour out the Rhine Wine," but was it ever known that anyone with poetic inspirations ever burst into song to the refrain of Pour out the Tea! The Teapots listed will be found both handsome and useful.

# ANTHONY HORDERN & SONS, LTD., ONLY UNIVERSAL PROVIDERS

## DINNER SERVICES.

In this branch of trade our knowledge has been gained in the hard school of experience, by intimate acquaintance with the first sources of supply, and by watching the market with Argus eyes. In the World's Potteries we are as well known as in Sydney.

### ST. REGENT WHITE SEMI-PORCELAIN DINNER WARE.

Pattern, as shown in the illustration.

This favorite ware is all white, with embossed design, the tracing in the illustration indicating the pattern. It is sold in separate articles or in sets, as the following lists show

## SICK ROOM COMFORTS.

No. 639x.

**"Melnecke" Perfection Bed and Douche Pan**  
 (No. 636x) ... .. 11/-  
 Small size, for Children ... .. 8/-

Four Reasons why it is better than other kinds—

- 1 It is more comfortable and does not hurt the patient.
- 2 It has a large capacity.
- 3 It can be used also as a Douche Pan.
- 4 It is the only Bed Pan that is really sanitary, and can be quickly emptied and readily cleaned, having no sharp corners and no spout.

**Spitting Mugs, White** ... .. 8  
 White and Gold ... .. 9  
 Fancy decorations, Gilt ... .. 10, 1/-  
**Sick Feeders, White** ... .. 8  
 White and Gold ... .. 7 1/2  
 Fancy decorations, Gilt ... .. 8 1/2, 10, 1/-

**The Liverpool Slipper**  
**Bed Pan (No. 639)—**  
 11in., 5/ ; 12in., 5/9

**Urinals, for Males** ... 2/6  
 " " **Females** 2/6  
 For Enamelled Urinals  
 see Index.

No. 639

No. 10.

**The Winton Slipper Bed Pan, with broad rim, making**  
 it comfortable for the patient's use (No. 10)—  
 Small size, 5 3/4 Med um size, 6 9/8; Large size, 8 1/4

**Mortar and Pestle, Royal Doulton Stoneware—**  
 7in., 6/6; 8 1/2in., 9/8  
**Denby Stoneware—**  
 2 pints, 5/6; 3 pints, 8/6; 4 pints, 11/- each

# BEDROOM REQUIREMENTS.

No. 634

**The Utilitas (No. 634), combined Slop Pail and Night Commode—**

Plain White ... ..	11/-
White and Gold ... ..	15/-

**Slop Pails—**

White ... ..	7/6
“ and Gold ... ..	9/6

No. 635.

**Patent Commode Pan (No. 635), with cover and iron handle ... .. 4/-**

These Pans have a deep groove round the rim which should be kept filled with water when the Pan is in use.

**Chambers, plain White—**

Small size ... ..	9
Medium size ... ..	1/
Large “ ... ..	1/4

**Chair Pans ... 6in., 1/1 ; 9in., 1/9 ; 10in., 2/-**

No. U15.

**The Perfection Noiseless Chamber (No. U15) —**  
Plain White, 4/6 ; White and Gold, 6/-

No. U16.

**The Water Seal Combined Slop Pail and Night Commode, wicker handle (No. U16) ... .. 12/-**

This illustration shows the interior. A little water poured in the channel at top makes a perfect trap and prevents any effluvia escaping.

**Nursery Chambers, oval opening, comfortable seat—**

Baby's size (suitable for children from 6 months old), opening, 4 1/2 in. wide x 6 in. long ; height, 3 1/2 in. ...	2/3
Larger size. Opening, 5 in. wide x 7 1/2 in. long ; height, 4 1/2 in. ...	3/

Close fitting covers, so that they can be used as children's night commodes—

Baby's size, 1/3 ; large size, 1/9

**"MILLIONS OF MISCHIEFS"**

And any amount of worry, may be avoided by attention to the following simple directions:—

**Write your Orders legibly, and your name and address in full. Give the Post Town where our answer will reach you. State if goods and invoice are to be addressed Mr., Mrs., or Miss.**

**Give the correct route by which the goods are to be sent, and say to whom they are to be consigned if you live far from a Railway Station or Port.**

**Be careful to give sizes, colors, lengths and quantities of goods wanted, and state whether we may substitute if we have not the exact material or article in stock.**

**In the event of goods going astray in transit, or not arriving at their destination in reasonable time, it would be well for customers, in writing to us, to give date of invoice, to assist in tracing cause of delay.**

" " 3 " 6/9, 7/6, 8/6, 10/-, 11/-  
" " 4 " 9/6, 10/6, 13/-  
" " 5 " 9/6, 10/6, 11/-, 12/6, 15/6

**Flower Stand (No. 663),** with Centre Tube,  
3 Branches and 3 Fern Leaves in Sun  
rise, Seafoam or Ruby ... 11/6

No. 663

No. 2a

**"Floral Aid."** Specially designed for use in open bowls. By its help flowers of all description, particularly those with long stems, can be arranged in bold, free, artistic groups with due regard to their natural pose and charm (No. 2a)—

Height	3 1/2	5	6 1/2	8 1/2	9	10 1/2	inches
Weight	3 1/2oz.	12oz.	1lb. 5oz.	1lb. 14oz.	2lb. 5oz.	4 1/2lb.	each
	-7/8	1/2	1/9	3/-	4/-	5/6	"

The advantages of "Floral Aid" are quickly grasped by every lady who has made use of it in floral decorations. With a little manipulation of the foliage, "Floral Aid" may be easily hidden. The heavy base ensures the absolute steadiness of the arrangement. The work may be bent at the discretion, and to the taste of the arranger. No fears of corrosion, and consequent injury to the flowers by use, need be entertained, since "Floral Aid" will not rust. For the purpose of changing the water daily, "Floral Aid" can be removed without disturbing the flowers.

# KEROSENE LAMPS.

Not new Lamps for old, but the wicked gent offered, but nicer Lamps for less money than is asked anywhere else. From the little Lamp that serves to light up the midnight gloom to the lordly Banquet Lamp which sheds its glorious effulgence over the forms of fair women and brave men, there is an ample choice for all comers. All the Lamps are of chosen manufacture, picked from the hosts of Lamps turned out in various parts of the world for strikingly useful and ornamental qualities.

**Table Lamp, on Brass Stand,** with Earthenware Base and Cut Glass Oil Container, fitted with Duplex Burner, 1½ in. wick, 24 in. chimney and Manographic Globe (No. 751) ... 8/6

The same Lamp, but with better quality burner and globe ... from 10/6 to 13/6

No. 758

**Table Lamp, similar to No. 758,** with Bronzed Iron Stand, Colored Glass Oil Container or Fount, fitted with A Venus Burner, 24 in. crimped-top chimney, 1 in. wick  
2/ 2/3, 2/6

**Table Lamp, with similar stands to the above,** fitted with B Venus Burner, 3 in. crimped top chimney, ½ in. wick  
2/6, 2/9, 3/ 3/6, 4/

**Similar Lamps, fitted with Mammoth Chimney**  
A or No. 1 size from 2/6  
B or No. 2 size " 3/6

**Table Lamps, with Bronzed Iron Stand,** Cut Glass Oil Container, B Venus Burner and ½ in. wick, fitted with Clear Glass crimped top chimney—  
3/6

With 3 in. La Bastie Unbreakable Chimney... 4

With 3 in. Frosted Mammoth Chimney from 4/6

No. 759

**Table Lamp, with Polished Iron Base and Fancy Moulded Oil Container,** fitted with Duplex Burner, 1½ in. wick, 24 in. chimney, and beehive shaped Manographic Globe, as illustrated (No. 759) ... 8/6

The same Lamp with a better quality Duplex burner for 10/6, or with various shapes and patterns of globes at prices ranging from 9/6 to 13/6, according to the quality.

Particulars of the fittings of each Lamp are given, so that in case of breakage or loss they may be easily replaced.

For particulars of Shades, Wicks, Burners and Chimneys, see pages 1415, 1428, 1429.

3 Light, Antique Brass or Copper	55/-
4 Light, Globe and Top as No. 22	50/-, 56/-
Spring Extensions ..	10/6

## Side or Bracket Lamp (No. 22)

Nickel-plated	16/6, 22/6
Antique Brass or Oxidized Copper	21
Embossed Copper, Brass or Nickel finish ..	27,

These side lamps can be recommended for any purpose where side lamps are best adapted. They speak for themselves. Single burner lamps attach to the side of a room. They cannot be suspended from the ceiling. But they can be easily moved from place to place.

The Angle Lamp gives a beautiful, steady flame producing a light of great brilliancy, but of the soft, mellow, eye-resting quality for which it is famous.

This splendid "kerosene-quality" light is one of the most pleasing features of the Angle Lamp.

A saving in oil so great that it soon amounts to more than the entire cost of the lamp; our quart of ordinary kerosene oil burns 15 hours because so oil is wasted by being thrown off unburned, but every particle consumed is turned into light.

No soot is thrown off to discolor and blacken the ceiling. There is not the slightest trace of odor whether the lamp is burned at full height or turned low like gas.

The constant circulation of cool fresh air in the globe and top reduces the radiation of heat to a minimum—less than gas.

The Angle Lamp is lighted without removing the globe or top—just a turn of the wick and a touch of the match-like gas.

The Angle Lamp is extinguished by a single turn like gas or electricity.

The Angle Lamp is filled by simply removing and filling the main font.

This can be done with perfect safety while the lamp is lighted, since this arrangement keeps the heat away from the oil and so no gas is ever generated.

No. 22.

BEDROOM LAMPS.

No. 797

No. 798

**The Glow Night Lamp (No. 797), Plain Glass, with White Opal, Green or Amber Globe ... 1/3**

This simple, yet scientific, Lamp (No. 797) consumes "its own gas," and consequently emits no odor. It holds about a pint of kerosene, and will burn for nearly a week without refilling. Suitable for the sick room or nursery. Full directions with each Lamp.

**The Liliput Night Lamp (No. 798), Base, Green, or Amber Glass ... 1/9**

No. 801

No. 802

**The Pearl Night Lamp (No. 801), 2 1/2 in. to top of burner, fitted with Stella Burner and Chimney ... 1/1**

**The Elfin Night Lamp (No. 802), Nickel-plated, 4 1/2 in. to top of burner, has Removable Handle, fitted with No. 0 Venus Burner and Wick, 2 in. Crimp-top Chimney, and Adjustable Reflector; holds 1 pint of oil; burns 17 hours ... 2/6**

Particulars of the fittings of each Lamp are given, so that in case of breakage or loss they may be easily replaced.

For particulars of Shades, Wicks, Burners, and Chimneys, see pages 1415, 1428, 1429.

No. 800

No. 2

**The Acme Night Lamp (No. 800), Nickel-plated, 4 in. to top of burner, fitted with Stella Burner, Chimney, and Adjustable Reflector, and Handle or Hanger—1/6**

**The Glow Combination Lamp, all Brass (No. 2)**  
Crystals ... 2/3  
Extra Burners ... 1/6 each

This New Lamp looks exactly like a small electric light fixture. It is made entirely of brass, finished in "Old English," and with globe, 5 1/2 inches high. The lamp may be quickly lifted from the wall-fixture, and carried from room to room or placed upon a stand or table which allows it to be used for many purposes.

The Globe may be instantly removed without trouble, no screws or hooks hold it in place, yet it is always held firmly by our new patented holder.

The Wick is regulated from the outside and can be lighted without removing the globe.

With one filling this lamp will burn all night for a week. Handy, convenient, safe and clean. Made in two colors: Crystal and all Red or Ruby. The Red Lamp is generally used as a Shrine Lamp.

No. 9589

**The Gimbals Fearnought Lamp, in Brass, can be placed on table or fastened to wall, with White Opal Globe (No. 9589) ... 1/9**

## GROCERY AND PROVISIONS.

Though men and women may do without fine clothes and "silk attire," no one has ever been known to get on comfortably without ample supplies of the goods contained in the following lists, and in recommending our wares in this way for the consideration of the public, we can promise the best of everything, and a considerable saving in price.

All prices are subject to Market Fluctuations from whatever cause arising. Current Price List of Groceries and Provisions issued monthly, posted free on application.

### ... TEA ...

Perhaps the most important line in the Department, and certainly one upon which the most anxious thought and careful selection is bestowed. The Price List which follows, represents all the finest Teas that come to Australia, from the lowest price upwards. We pride ourselves upon giving our customers the best value available.

The lower priced Teas specially suitable for household use, are of the very best character, sound in every way, and delicious in flavor, while the Teas we offer at higher prices are the choicest to be found in this market.

**TERMS: SPOT CASH.**—In doing business with our numerous customers, we claim a ready recognition of the necessity for Cash Payments. To pay cash and give credit in return would require the wealth of Croesus ten times told, and ample as are our means, and willing as we are to employ them in the service of the public, it would be impossible, except by the sacrifice of those low prices which have made our name so famous to do business except for prompt cash.

ALL PRICES IN THIS CATALOGUE ARE SUBJECT TO MARKET FLUCTUATIONS

EVERY woman who sees Silvasheen is charmed with its elegance. Twelve years ago when Silvasheen was first introduced, women of taste and discrimination bought Silvasheen for a single dress because they liked its value and appearance when new.

To-day, they are buying Silvasheen again and again—not alone for one dress but for many—because they have proved for themselves by years of trial that Silvasheen is the best lining value they can buy.

For fancy work it is beyond compare.

ANTHONY HORDERN & SONS, LTD., are always up-to-date with the latest London and Parisian shades in Silvasheen. Dressmakers and others when ordering dress materials are recommended to specify Silvasheen to match.

# "WOLSEY" UNSHRINKABLE UNDERWEAR..

**"The Best the World Produces."**

**For MEN,  
WOMEN, and  
CHILDREN.**

In all sizes, qualities and textures. Made from Australian Wool in British Factories, on the most modern machinery, by the oldest and most up-to-date Manufacturers.

N.B.—An interesting fact, which speaks for itself, is that the entire SOUTH POLAR EXPEDITION, under Captain SCOTT, is entirely equipped, from head to foot, with the Celebrated...

**"WOLSEY" UNDERWEAR.**

## CONVINCING TESTIMONY.

The Proprietors of several of the First Steam Laundries in Sydney express themselves enthusiastically on the merits of "WOLSEY" Garments. The following are a few extracts

L. HERMANSON & CO., of the Standard Steam Laundry, say:—"Wolsey" garments have proved themselves to be positively unshrinkable."

Mr. H. MCGHEE, of the Sydney Steam Laundry writes:—"Have found 'Wolsey' to be all you claim for it, absolutely unshrinkable, and coming from the test as soft and elastic as before."

Mr. A. D. BOK, of North Sydney Steam Laundry, states:—"After putting 'Wolsey' through the most severe tests, we have found it absolutely unshrinkable."

Mr. OSCAR S. WILSON, Wilson's Steam Laundry, says:—"After testing 'Wolsey' found it to be as claimed, unshrinkable and as soft and elastic after the test as before it."

"WOLSEY"  
Men's Shirts and Pants.

## ANALYST'S REPORT.

A. C. ABRAHAM, F.C.S., F.C.L., reports that after examination of the "WOLSEY" goods he "failed to find arsenic or other poisonous metallic substances," and the Dermatologist at the Royal Infirmary has satisfied himself as to their non-irritating, and hygienic properties. Many other expert testimonies could be quoted, but the manufacturer is loath to rely upon the verdict of the actual wearers, one of whom writes as follows:

"The 'WOLSEY' unshrinkable underwear is perfect. For the past year I have been unable to procure really warm underwear up to this, and did not create my own name, I cannot recall. My wife's friend recommended an article that certainly felt smooth to the hand, but after a few days' wear it was extremely uncomfortable. After an interval I tried it again, but with the same miserable and unendurable result. The 'WOLSEY's,' on the contrary, during the warmest I have worn is absolutely free from any feeling of irritation whatever. It is the softest, soft smooth, and has also the unique and valuable merit of being both soft and absolutely unshrinkable."

## ANTHONY HORDERN & SONS, Limited,

Hold a LARGE and ASSORTED STOCK of all sizes, in all weights, for Men, Women and Children, of THE WORLD-FAMED

## "WOLSEY" UNSHRINKABLE UNDERWEAR.

The Ideal Pure Wool Underwear for Colonial wear,  
—being soft, supple, elastic, and non-irritating.

12" NONE GENUINE WITHOUT THIS TRADE MARK.

1489

# WOLSEY

# UNSHRINKABLE UNDERWEAR

has, on its superb merits, become the greatest underwear-success in the world. Every garment of Wolsey Underwear is pure wool; every garment will afford luxurious comfort, splendid health-protection, and highly satisfactory wear.

All Wolsey is made by Britshers in the largest British underwear factory in the world. A hundred and fifty years of underwear-experience go to its making. Its unfailing quality, its absolute reliability, and its unvarying *value* retain the old friends, whilst adding new ones each successive year. Wolsey will delight You.

## WOLSEY WILL NEVER SHRINK

Every trade-marked Wolsey garment is guaranteed to be unshrinkable. Should it prove otherwise it will promptly be replaced by a new one, absolutely free.

Wolsey Undergarments are offered in all sizes, qualities, and textures, for men, women, and children's wear. Though not the lowest-priced at the outset, Wolsey proves to be by far the cheapest in the end. The proof of genuineness is the Wolsey trade-mark.

# CORSETS

## W.B. "ERECT FORM" CORSETS

produce the long slender waist line without constriction or pressure, and retains its perfect shape to the last.

There's hardly a figure but what will find improvement with the wearing of an.....

"ERECT FORM" CORSET.

For Price List of Corsets

.. see page 78.

## W.B. "REDUSO" CORSET.

is famous as a beautifier of large figures. It gives the over-developed and matronly figure the lines of youth with the effect of slenderness.

## W.B. "NUFORM" CORSETS

Improve the figure. The woman corseted in a W.B. "Nuform" model looks slim, graceful and fashionable.

There are many models suited to the requirements of varying types of women.

For Price List of Corsets

.. see page 78.

## "The Corsets For Our Customers!"

An article which combines quality with beauty of construction; masterful and skilful designing on artistic, scientific, hygienic and strict anatomical accuracy, with elegance of style deserves our warmest approval and sincerest recommendation. Such, then, you will find in every model (and we stock enormous ranges of magnificent shapes and styles) of the famous French

## Royal P.D. Rustless Corsets.

These Celebrated Corsets are worthy, and invariably win the highest praise of every woman who desires to dress well, smartly and attractively. Every Royal P.D. Model is not only a work of art, but is so exquisitely modelled as to impart a distinctive charm of figure—a graceful poise to the carriage—and a dignified and attractive personality. Freedom of limb means luxurious physical comfort, and in all the fickle phases of the Goddess, Fashion, the wearer of a Royal P.D. Corset will always find true satisfaction in Dress, apart from the fact that you will find them of incalculable value in the preservation of good health. Ask to see these Corsets—none genuine without Trade Mark

# IMPORTANT TO PURCHASERS

— OF —

## CARPETS, FLOOR COVERINGS and BEDDINGS

### SURROUND YOUR CARPET SQUARES

with "MASCO" Plain Dyed Art Felts, giving character to the Carpet, and pleasing richness and warmth to the room. Made in over forty shades, toning with all the new colours in Carpets.

### SAVE YOUR CARPETS AND FLOOR COVERINGS

by placing underneath them the "MASCO" & "HYGIENIC" Woollen Underfelts, or the lower-priced "BOULINIKON" Patent Paper Carpet Felts.

### SAVE YOUR STAIR CARPETS

by laying on the treads "MASCO" Patent Nosed Stair Pads, "SANITAS," "HYGIENIC" or "CEDAR WOOL"; also by Art Stair Felts, plain or bordered. The Inlaid Reversible Stair Felt is specially recommended.

### SAVE YOUR BEDDING

by placing on the Wire Mattresses "MASCO" Patent Pads, "DOMINION" and Moth-pooof "IMPERIAL" and "PREMIER" specially recommended. Will keep the wirework from rusting.

### USE "TOILET MATS DE LUXE" & "ELITE" MATS

for laying in front of Dressing Tables and Washstands. Made of very thick all-wool Felt, good quality. Rich in appearance and everlasting wear.

### FOR BEDROOMS

Use Beaver Squares, bordered. In select Art Colourings. The cleanest, warmest, and most sanitary floor covering yet introduced.

### FOR TAILORS.

"FEATHERWEIGHT" Shoulder Pads, Birtill's and Griffiths' patents. Light, effective and cheap. Made in a great variety of sizes.

# CARR'S LADDER TAPE FOR VENETIAN BLINDS.

**Carr's**  
LadderTapes

It is worth paying a trifle more for some things in order to secure **THE BEST**.

It is poor economy to save a **FEW PENCE** on the **TAPES** of a **VENETIAN BLIND** by using inferior makes, which only last half as long as "**CARR'S**" **TAPES**.

It is most important that purchasers should be sure they are getting the right quality, and they should insist upon seeing the name "**Carr's**" which is stamped on one of the interwoven cross-straps once in every yard.

**N.B.** Other qualities of Ladder Tapes are made by the same manufacturers under the names "**Clarence**," "**C.C.L.**," and "**Cee-Tree**," **BUT ONLY THE BEST QUALITY MAY BE SOLD AS "CARR'S" LADDER TAPE.** The name "**CARR'S**" is a registered mark applied and applicable only to the Stamped or best quality. The use of it in connection with other qualities is an infringement.

# THE DEMING CO.'S PUMPS

"THE WORLD'S BEST." — FOR ALL PURPOSES.

**Improved Hand Force Pump on Base.**

With Windmill Top, Air Chamber and Cock Spout

Nos.	2	4	5
	52/6	84/-	90/-

Size of pipe, 1 1/2 in. 1 1/2 in. 2 in.

This Pump may be used with a Windmill, or wherever power can be applied. It is also arranged for hand, which in many cases will be found convenient. When used in cold climates, freezing may be prevented by raising the Lever to its extreme height which trips the Valves and allows the water to escape from the Cylinder. It has Brass Valve Seat, Brass Cased Piston Rod Coupling for Iron Suction Pipe, and Spout threaded for Hose Coupling.

**"Bordeaux" Nozzle,**

Absolutely "foot" proof, simple and durable, capable of adjustment for Spraying, White-washing, &c. ... 3/9

**The Giant Double-acting Force and Lift Pump.**

Will lift 2000 gallons per hour, raised by 2 in. Pipe or Hose—  
40

**Success Spray Pump,**

With footrest, Brass working parts, indestructible Bronze ball valves, fitted with Bordeaux nozzle—

With 3 ft. hose ... 19/6

Extra hose ... 6 ft

**The "Ideal" Double-acting Oscillating Force Pump, With Brass Wing Piston, Brass Valves and Valve Box**

Nos.	3	5
	60 -	90 -

These Pumps are especially adapted for use in the Coal and Iron Mines. They are found of advantage when elevating water any great distance above the Pump. For House Tank service it is especially adapted.

*Description of Success Spray Pump.*

See pages 1178, 1200 and 1234.

**Sold and Recommended by ANTHONY HORDERN & SONS, LTD.**

---

You buy Dress Shields TO PROTECT your Dress.

That Protection should be Guaranteed BY THE MAKER.

THE ABSENCE of the Makers' Name on a pair of Dress Shields, indicates that he WILL NOT Guarantee the Shield.

## AN ABSOLUTE GUARANTEE

IS INSIDE EVERY PAIR OF

# Kleinert's Dress Shields.

PLEASE READ IT.

### THIS GUARANTEE

accompanies every pair of

### KLEINERT'S DRESS SHIELDS

WHICH BEARS OUR TRADE MARK.

Every pair of Kleinert's Dress Shields is warranted to be perfect, and when properly used, we will not only refund money paid for Shields that are not perfect, but will hold ourselves responsible for any resulting damage to gowns.

#### CAUTION.

Use Shields that are large enough, and in attaching them to the garment, sew through the binding only in no less than five places on each flap, thus preventing the Shield from wrinkling.

Sew through Binding only: a puncture on body of Shield inside the binding will ruin the Shield.

GUARANTEED FOR TWO YEARS FROM DATE OF PURCHASE.

PIKE TURKEY OIL STONES

PIKE WASHITA OIL STONES

PIKE ARKANSAS OIL STONES

PIKE RAZOR HONES

PIKE TOOL GRINDERS

Under the Pike Trade Mark may be found a Stone of the right sharpening substance, whether natural or artificial, for any and every kind of cutting edge, and in purchasing these goods the Worker can ensure getting the Stone best suited for this purpose.

## PIKE CRYSTOLON SHARPENING STONES.

CRYSTOLON possesses great brittleness, and it is the addition of this quality to the diamond-like hardness and sharpness of its crystals which makes it an ideal abrasive where rapid work is required. These sharpening Stones, made entirely from green Carbide of Silicon, are noted especially for their wonderful fast cutting properties, and are especially adapted for sharpening general woodworking tools.

# PIKE TOOL GRINDERS

FOR SHARPENING KNIVES, TOOLS, &c.

The Pike line of Tool Grinding Machines is built entirely with the idea of giving full value for every shilling expended, and every effort has been directed towards producing high-grade appliances which would give perfect satisfaction to the user, and not prove a source of trouble and annoyance.

**Pike Household Tool Grinder.**

A wonderfully well built little machine. Similar in construction and appearance to the Artisan and Domestic machines, but designed for small tools and household sharpening. Extremely useful where there is not a great deal of grinding to be done, but where there are some dull edges to be sharpened. It is equipped with a 4 in. Pure Corundum Wheel, and the range of work that can be performed is truly remarkable.

Price, 10/-

**Pike Domestic Tool Grinder.**

It is a remarkably nice running machine, especially desirable where there is not a great deal of heavy grinding to be done, and will prove very popular among mechanics for grinding all sorts of small tools. It is equipped with a 5 1/2 in. x 1 in. Pure Corundum Wheel and is built very strongly and compactly. Just the size for a mechanic to take along in his tool chest. It will last years with proper care.

Price, 12/6

**Pike Whirlwind Tool Grinder.**

This Machine is a wonderful combination of high speed and great power. It is geared 20 to 1 and develops a periphery speed of over 5,000 feet per minute, making it the fastest running hand power grinder ever constructed. All parts are made heavy, strong and accurate to withstand the heavy hard work a machine of this class must perform. It is especially adapted for railway construction work, quarrying, mining and for contracting and building and kindred trades. Equipped with Universal Tool Rest.

Price, 32/6

**The King Power Tool Grinder.**

No. 400.—Will carry 2 wheels, 10 in. x 1 1/2 in. or smaller, 1/2 in. shaft, equipped with fast and loose pulleys, 2 adjustable rests, habbitts bearings, brass oil cups, weight, 97 lbs. 39/-

No. 500.—Wheels, 12 in. x 2 in. 1 in. shaft, fast and loose pulleys, &c., as above, weight, 155 lbs. 52/6

No. 600.—Will carry wheels 14 in. x 2 in. or smaller, 1 1/2 in. shaft; equipped with adjustable habbitt bearings, 2 adjustable rests, brass oil cups, 2-step cone pulley... 87/6

Countershaft for No. 600 ... 90/-

For other styles Pike Tool Grinders see pages 974, 975, 1094, 1095, 1096.
